The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.

Santa Maria di Galeria is kind of extraterritorial from Vatican City itself,
however NASWA does count it as Vatican City.

To 'actually hear' Vatican City, one must hear the Citta del Vaticano site, on
4005, which I think is the only frequency in use these days, at various times.

The LIBERAL FASCIST Path to Socialism:
Pt.1 http://www.youtube.com/watch?v=fPyoEbU_wc4
Pt.2 http://www.youtube.com/watch?v=Dvuxr7v4xzk

"Just as the Left was drawn to the communist killing machines of
Lenin, Stalin, Mao, Pol Pot, and Castro, so too it is now attracted to
radical Islam."

"The contempt that German Hitlerytes had for "Bolshevism" or "marxist
Jews" generally should also not mislead us in assessing the similarity
between National Socialism and Communism. Leftist sects are very prone
to rivalry, dissension, schism and hatred of one-another. One has only
to think of the Bolsheviks versus the Mensheviks, Stalin versus
Trotsky, China versus the Soviet Union etc. Similarity does not
preclude rivalry. Hitler and Stalin were literally brothers in arms
BEFORE they became rivals. That socialist brothers sometimes fall out
should not prevent us from noting the brotherhood concerned."

[...]

"The fundamental dogma of all brands of socialism and communism is
that the market economy or capitalism is a system that hurts the vital
interests of the immense majority of people for the sole benefit of a
small minority of rugged individualists. It condemns the masses to
progressing impoverishment. It brings about misery, slavery,
oppression, degradation and exploitation of the working men, while it
enriches a class of idle and useless parasites."

"This doctrine was not the work of Karl Marx. It had been developed
long before Marx entered the scene. Its most successful propagators
were not the Marxian authors, but such men as Carlyle and Ruskin, the
British Fabians, the German professors and the American
Institutionalists. And it is a very significant fact that the
correctness of this dogma was contested only by a few economists who

were very soon silenced and barred from access to the universities, the press, the leadership of political parties and, first of all, public office. Public opinion by and large accepted the condemnation of capitalism without any reservation."

[...]

Dr. Ludwig von Mises - http://mises.org/midroad.asp

[...]

"The term 'planning' is mostly used as a synonym for socialism, communism, and authoritarian and totalitarian economic management. Sometimes only the German pattern of socialism-Zwangswirtschaft-is called planning, while the term socialism proper is reserved for the Russian pattern of outright socialization and bureaucratic operation of all plants, shops, and farms. At any rate, planning in this sense means all-around planning by the government and enforcement of these plans by the police power. Planning in this sense means full government control of business. It is the antithesis of free enterprise, private initiative, private ownership of the means of production, market economy, and the price system. Planning and capitalism are utterly incompatible. Within a system of planning production is conducted according to the government's orders, not according to the plans of capitalists and entrepreneurs eager to profit by best filling the wants of the consumers.

"But the term planning is also used in a second sense. Lord Keynes, Sir William Beveridge, Professor Hansen, and many other eminent men assert that they do not want to substitute totalitarian slavery for freedom. They declare that they are planing for a free society. They recommend a third system, which, as they say, is as far from socialism as it is from capitalism, which, as a third solution of the problem of society's economic organization, stands midway between the two other systems, and while retaining the advantages of both, avoids the disadvantages inherent in each.

"These self-styled progressives are certainly mistaken when they pretend that their proposals are new and unheard of. The idea of this third solution is very old indeed, and the French have long since baptized it with a pertinent name; they call it interventionism. Hardly anybody can doubt that history will link the idea of social security, more closely than with the American New Deal and with Sir William Beveridge, with the memory of Bismarck whom our fathers did not precisely describe as a liberal. All the essential ideas of present-day interventionist progressivism were neatly expounded by the supreme brain-trusters of imperial Germany, Professors Schmoller and Wagner, who at the same time urged their Kaiser to invade and to conquer the Americas. Far be it from me to condemn any idea only on account of its not being new. But as the progressives slander all their opponents as old-fashioned, orthodox, and reactionary, it is expedient to observe that it would be more appropriate to speak of the

clash of two orthodoxies; the Bismarck orthodoxy versus the Jefferson orthodoxy.

[...]

Dr. Ludwig von Mises - 1952 - http://mises.org/books/planningforfreedom_mises.pdf

The origins of the modern left can be traced back to the famous passage in Rousseau's Discourse on the Origin and Foundations of Inequality, in which he condemned the institution of private property:

"The first man, who after enclosing a piece of ground, took it into his head to say, 'this is mine,' and found people simple enough to believe him, was the real founder of civil society."

Added Rousseau: "How many crimes, how many wars, how many murders, how many misfortunes and horrors, would that man have saved the human species, who pulling up the stakes or filling up the ditches should have cried to his fellows: Beware of listening to this impostor; you are lost, if you forget that the fruits of the earth belong equally to us all, and the earth itself to nobody!"

Around the 1830s, a faction of French liberals gravitated toward Romanticism and the philosophy of the late Rousseau, proclaiming that capitalism, private property, and the increasing complexity of modern society were agents of moral decay -- both for the individual and for society at large. This is essentially the worldview that has made its way, through history, into the collective mind of the modern left; it is a worldview calling for a revolution that not only will topple the existing capitalist order and punish its corrupt leaders, but that also will replace that order with a socialist regime where the utopian ideals of perfect justice and equality will reign. Such an ambition can be put into effect only by a totalitarian state with the authority to micromanage every facet of human life, precisely the end-point toward which the policies and crusades of the modern left are directed.

When the term "liberalism" (from the Latin word liberalis, meaning "pertaining to a free man") first emerged in the early 1800s, its hallmarks were a belief in individual rights, the rule of law, limited government, private property, and laissez faire economics. These would remain the defining characteristics of liberalism throughout the liberal epoch (generally identified as the period of 1815-1914). Yet the modern left, which portrays itself as the agent of enlightened commitment to "liberal" causes, in fact stands for the antithesis of each of the foregoing liberal ideals. Contrary to its self-definition, the left is neither "liberal" nor "progressive," but rather a reactionary force that seeks to resurrect the traditions that characterized the epoch which preceded the rise of classical liberalism.

http://www.discoverthenetworks.org/viewSubCategory.asp?id=1217

The following is from The World Book Encyclopedia, 1947 edition:
The chief characteristics of Fascism are as follows:

THE CULTIVATION OF IGNORANCE

Fascism, like all forms of government, rests firmly on the sincere consent of a large part of the population... To maintain this consent, the Fascist leadership must cut off the people from any information which might cause them to doubt the complete correctness of the fixed Fascist principles... All forms of communication are carefully censored, so that the public will receive only those facts that the dictators want known... Travel to other countries must be controlled, and freedom of speech and assembly must be rigorously suppressed...

http://www.americanthinker.com/blog/2010/10/arrest_warrant_filed_for_rahms.html
http://www.youtube.com/watch?v=sce0TLA5UYE
http://bigjournalism.com/dloesch/2010/10/13/exclusive-cbs2-reporter-threatens-journalist-over-rahm-questioning/

SUPPRESSION OF LABOR AND INDUSTRY

Fascism in Italy and Germany at first won the support of the wealthy classes, both landed and industrial...

http://www.discoverthenetworks.org/individualProfile.asp?indid=977
http://www.discoverthenetworks.org/viewSubCategory.asp?id=589
http://www.keywiki.org/index.php/George_Soros

These people saw in Fascism a protection against the demands of farmers and other workers... Both regimes at first upheld the rights of private property... They subjected the working classes to a rigorous discipline... As soon as they were firmly established, the dictators began to limit profit, impose capital levies, and regulate business in great detail...

Employment Rates under Liberal Fascism
http://www.youtube.com/watch?v=9ssIhiD8kKM

.....sound..familiar?.....

THE POLICE STATE

Fascism depends upon the police to crush all opposition or dissent. Secret police spy on the whole population, and any casual remark against the regime leads to swift and severe punishment... Opposition parties are dissolved. Intellectual, athletic and recreational organizations are usually brought under the control of the Fascist authority... The ruthlessness of the police gradually becomes less noticeable... This is because within a year or so after a Fascist government takes power, vigorous opponents of the regime have either left the country, been killed or jailed...

LIBERAL FASCIST union thugs trying to upend the results of Wisconsin elections by force.

http://www.chicagonow.com/blogs/publius-forum/2011/02/teachers-union-thugs-comparing-people-to-hitler-shutting-down-schools-losing-their-argument.html#ixzz1EGR2iKwW

(Both Fascist and Communist leaders make use of the police state...
Every absolute government has used the police state to some degree...
It was highly developed among the ancient Assyrians...)

.....sound..familiar?.....

EXTREME NATIONALISM

Fascism is highly nationalistic... It tries to identify its principles with the country, so that disagreement will look like treason... Some other country, or some group within the country, is chosen to serve as the "enemy" and made to appear as the cause of all evils or misfortunes... For example, the Nazis in Germany represented their movement first as a crusade against the Jews, then as a fight against Communism and later as a struggle against the "attacks" from whatever neighboring country they wished to subdue or occupy... Extreme nationalism often becomes a kind of racial fanaticism... Sometimes it combines racial and religious bigotry...

When you hear the Liberal Fascist JackAss propaganda that THEY are the true patriots then you know the time is near. Look for it from the socialist Labor Unions such as the SEIU!
http://www.discoverthenetworks.org/groupProfile.asp?grpid=6535

MILITARISM

Fascism maintains among the people a permanently warlike frame of mind... Every citizen feels that he is mobilized against enemies of the regime from within, and against possible foreign foes... The dictator usually comes to power during a period of economic crisis or depression... He relieves the depression partly by employing many people in the making of armaments... To justify this procedure, he must convince the people that the country is threatened, and must point toward some of the enemies against whom the armaments may be needed...

Listen to 0baMa0's rhetoric and his fascistic support from the Liberals
.....sound..familiar?.....

Here are the Three (3) Phases of Liberal Decay into Fascism:

1. Liberalism (Well Meaning, Nice Sounding, "Do-Gooder" Policies Always Doomed to Fail)

2. Liberal-Progressivism (The Drive for Social Improvement through Change and Promising Hope;
More Draconian Liberal Polices are Implemented to Transform The People into a New Society that
Is Guided by 'The Party') The Party Elite Have Complete Power and Rule Un-Checked.

3. Liberal-Fascism (The Rise of the Party Leader over 'The Party'
Ensuring the Unity and Uniformaty of 'The Party' and Enforcing The
Will of 'The Party' Over the People.) The Party Leader will Cleanse
'The Party' of All those Who Are NOT of 'The Party'; and 'The Party'
Will Cleanse the People of All Those Who Do NOT Support 'The Party'
and The Party Leader. The Party Leader Now Has Complete and Total
Power and Rules by the Force of His Iron Will.

Brother/Sister Are You "OF" 'The Party' ?

Does The Teaching Of 'The Party' Abide Within You ?

Does The Thoughts Of 'The Party' "Leader" Guide Your Thoughts ?

Let 'The Party' Change Your Life and Transform You !

Let 'The Party' Give You Hope and Renew You !

When you vote cut them off at the knees from your Tax Dollars.
Vote with your wallet.

I have some old Apple and Machintosh computers (some other different brand names computers too) here, I reckon at least a dozen old computers.
I am sort of kind of looking for a Mac mini with HDMI output port.As reccomended by Ken Dine in one of the WebTV computer discussion newsgroups.
Group: alt.discuss.computers
(you have to use a WebTV box to get there)
Yeah, if somebody has a Good working Mac mini for sale at a 'Good price'?, Good to me anyway.

The Democrat members of the Legislature in Wisconsin apparently decamped to Illinois where the WI State Police do not have jurisdiction.

This is just to much fun to listen to.

If we work together, and demonstrate, like they did in Egypt, I believe that we can bring the Obama Regime to an end within six months.

gypsies, etc. this to fails on a huge scale. just look what happened
to the central european fascists. they collapsed their economies, and
came up millions of workers and soldiers short.

http://www.spiritone.com/~gdy52150/chpt1.htm

What Fascism Is & Isn't

No other word causes so much misunderstanding, confusion, and heated
debate in politics than fascism. The term has been applied to many
individuals such as McCarthy, Hoover, and others. It is frequently
used to describe government policies and government themselves, often
incorrectly. What then is fascism exactly? Webster's Dictionary
defines it as: "A government system marked by a centralized
dictatorship, stringent socioeconomic controls and belligerent
nationalism." But the author takes exception with that definition. At
best, the definition is vague and abstract. Nor does the definition
seem capable of taking into all forms of fascism.
There is a resurgent, widespread attempt by the far right to label
fascism as a form of socialism. Fredrick von Hayek was the first to
attempt labeling the Nazis as socialists in his book The Road to
Serfdom published in 1944.70 The hard right quickly adopted it, as it
allowed the hard right to escape the charges that they had much in
common with the Nazis.2 Such endeavors are not only silly, but
dishonest as well and represent an attempt by the far right to
distance themselves for their earlier support of Hitler.
Hayek's book is based on two erroneous assumptions from the very
beginning. He first assumes that fascism and communism are one and the
same, as they are both totalitarian systems. This makes about as much

sense as calling a maple tree a pine tree because both are trees. His second erroneous assumption lays in his belief that only socialism or liberalism leads to totalitarian systems. In fact, all political systems can lead to totalitarian systems and all political systems are inherently unstable, as is any system created by man.
From there, Hayek takes severe liberties with history. For instance, he goes on to claim that by deliberate policy the United States by allowed the growth of cartels and syndicates after 1878.71 Indeed this date and time period is significant, but not for a move towards socialism or liberalism. Rather, it's the opposite a move towards fascism and corporate rule. Even a reader with a rudimentary knowledge of American history would recognize this time frame as the beginning of the robber baron era and laissez faire economics, precisely the type of economic policy Hayek holds in utmost esteem.
Hayek offers little proof to support his conclusions; in fact the book is devoid of any proof or even examples to support his findings. The book degenerates into an argument based upon unsubstantiated assertion. He argues against the nation state and proposes a supernational authority or world federation made up of the financial elite. In essence, Hayek proposes a world made up of sovereign corporations accountable to no one. Not only did Hayek take severe liberties with American history, he ignored the very nature of fascism in Germany and Italy.
In various speeches made shortly after the March on Rome, Mussolini stated, "We must take from state authority those functions for which it is incompetent and which it performs badly... I believe the state should renounce its economic functions, especially those carried out through monopolies, because the state is incompetent in such matters... We must put an end to state railways, state postal service and state insurance." The state returned large monopolies to the private sector after returning them to profitability such as the Consortium of Match Manufactures, privatized the insurance system in 1923, the telephone system in 1925, and many of the public works.
In Germany the Nazis announced they would end nationalization of private industries when they seized power. In 1932, Hitler returned control of the Gelsenkirhen company to private hands and in 1936 returned the stock of "United Steel" to private hands. Throughout 1933-1936, the Nazi returned to private hands the control of several banks: Dresdner, Danat, Commerz and Privatbank, the Deutsche Bank, and several others. In 1936, the steamship company Deutcher Schiff and Maschinenbau was returned to the private sector. In 1934, Dr. Schacht, the Nazi Minister of Economy, gave instructions to hasten the privatization of municipal enterprises. These enterprises were especially coveted by the rich industrialists, as they had been prosperous even during the depression.
Both in fascist Italy and Nazi Germany, the tax system was changed to one favoring business and the wealthy. The Nazis allowed industries to deduct from their taxable income all sums used to purchase new equipment. Rich families employing a maid were allowed to count the maid as a dependent child and reap the tax benefit. In Italy, the

Minister of Finance stated: "We have broken with the practice of persecuting capital."73

Such programs, catering to big business and the rich elite, are more akin to the policies of the Reagan Administration than it is to any liberal administration including FDR's. Likewise, it was the rich industrialists that were behind the fascist movement in the United States during the 1930s. Thus it is no surprise that the right wing attempts to try and label fascism as socialism in trying to distance themselves from their previous support of fascism.

Perhaps the only redeeming feature in Hayek's book is his acknowledgement of environmental problems.72 Indeed this is significant, considering the book was first published in the 1940s, long before the birth of the environmental movement. Hayek readily acknowledges the problem of industrial pollution and the harmful effects of deforestation, yet he stops short of any meaningful solution. Instead of offering a viable solution Hayek condemns government regulation and would allow market forces to provide the solution. However, it was these same market forces that produced the problem. We have plenty of proof of such a fool hearty approach both here and globally. As late as the 1970s rivers caught fire in the United States, cities were smog stricken and harmful pollutants were damaging the environment world wide. Today we face the problems of global warming and ozone depletion, and the problem of environmental estrogens, which has the potential of being even more threatening than both global warming and ozone depletion.

But perhaps the most damning of all evidence that Hayek was dead wrong comes from the implementation of an economic system based on his beliefs. Hayek later taught at the University of Chicago, the same university that trained the "Boys from Chicago" who were the economic brains behind the fascist regime of Pinochet in Chile. There is no question in the matter that under Pinochet, Chile was indeed fascist. More alarming, Hayek is an idol to several top-level officials in the George W. Bush administration. They are dangerous close to imposing a fascist style economy on the United States.

In order to dispel the myth of the Nazis being socialists we need to first define socialism. Socialism is rigidly defined as an economic system in which the workers own the means of production and distribution of goods. A more relaxed definition would be simply that the workers maintain political control over the production and distribution of goods. Even using the more relaxed definition of socialism, the Nazis can not be labeled as socialists as there simply was no worker control over the production or distribution of goods in Nazi Germany. In fact, the Nazis outlawed legitimate labor unions. In place of the original unions, the Nazis implemented quasi-like unions that were controlled by the industrialists. In a déjà vu manner, the Republican Party has recently tried to enact a similar measure, conferring legal status on worker groups controlled by corporations. Some writers and historians have argued that you cannot have fascism without corporatism, as the corporate power structure has much in common with fascism. During the period preceding the outbreak of WWII

it was common to refer to fascism as corporatism in polite English society.
More recently others have tried to define fascism as the "Third Way", in the sense that it borrowed ideas from both capitalism and socialism. The basic philosophy behind the "Third Way" incorrectly labels any regulations or government controls over businesses as socialism; essentially it's just a restatement of syndicalism. Such nonsense should be rejected whole heartily. It again represents an attempt to distance the right from their support of Hitler in the 1930s and ignores that the basis of the German economy under Hitler was a capitalist system where the means of production remained in private hands. Further, following the logic of the "Third Way," one would have to label all capitalistic systems as "Third Way," for throughout history there has never been a pure capitalistic system. A pure capitalist economy is so inherently and fatally flawed that it's never even been tried. But that is to be expected for any system that awards the winner with all the eggs. Nor has there been a pure socialistic system. Human greed simply prevents it.
The dangers of such nonsense can be illustrated with the following quote taken from a Baptists fundamentalist's web page in their labeling of the Japanese economy as fascist: However, Fascism is an economic term, denoting the type of economy where the Means of Production [factories, companies] and the ownership of raw materials [mines, oil wells] remains in the hands of private individuals, but where the government intervenes to determine how many competitors will be allowed to produce the same thing, how much is produced, and what prices may be charged.1
Here it can be seen that the term fascism has been clearly misapplied. This description could past for the economic theory of the fascist philosopher George Sorel. This is a description of syndicalism; it was the economic model of fascist Italy and Nazi Germany to a large extent. Syndicalism does draw some aspects from socialism, but the system is still a capitalistic system as ownership of the means of production and distribution of goods remain in private hands. It is no more socialism than the conclusion of the Robber Barons and the corrupt politicians of Tammy Hall. The only difference between this example of syndicalism is that the government participation is open versus the backroom corruption of politicians in Tammy Hall.
Not only Japan invoke syndicalism, but almost all the Pacific Rim nations do, to some extent. These are the same nations that the hard right has held up in the past as darlings of capitalism and free enterprise. Yet these are precisely the same economic policies of the Nazis that they have tried to foist off as socialism. The key distinction here is the means of production still remains in private hands, just as it did in Nazi Germany. No capitalistic society has ever existed without some form of syndicalism or government control over the economy. The closest America came to an entirely capitalistic system was either the 1890s and the Robber Barons or the laissez faire policies of Herbert Hoover, and as we all know, that didn't end too well in the Great Depression of the 1930s.

No where does the quote above refer to totalitarian control or extreme nationalism. In fact, they have tried to define fascism in strictly economic terms for their own purposes. But it does serve to point out the dangers of inventing the "Third Way" or the use of syndicalism in an attempt to label the Nazis. The problem here is determining where syndicalism ends and capitalism begins. Is the trading of pollution credits a form of syndicalism or is it free enterprise? In America today, the hard right would attempt to label it as socialism, as they try to do with any laws or regulations of business. In fact, the past laws regulating corporations were much more severe and restrictive in the 1800s than today. One could argue that it was through syndicalism that the power elite and corporations gradually eroded those laws until corporations now enjoy more freedoms than what an individual enjoys. This is precisely what has happened in America.

But environmental and labor laws are not socialism. They are in fact nothing more than an attempt to bring an out of control system hell bent on exploitation of the environment and labor back to order. No labor law or environment law was ever passed in a vacuum. All of these laws were brought about by a need to correct an unhealthy or unsafe situation. While there are some corporations that strive to provide a clean and safe workplace, there are many whose only concern is the bottom line and they turn a blind eye towards safety and view their employees as expendable commodities.

Regulation of businesses or corporations by itself is not socialism. A business entity such as a corporation has no rights other than what privileges a society wishes to grant it. People have rights; a paper creation of a society such as a corporation has no inherent rights. Business entities such as corporations only have conditional privileges based upon providing for the common good of the society, which granted the charter. All such paper creations have an obligation to serve the society, which created it. Failing to perform that obligation, it loses any right for its continuing existence. It the obligation of that society to restrict the rights of such entities to promote equality for all and to prevent a ruling aristocracy from developing. This view is hardly socialism or even radical, unless one wishes to label Thomas Jefferson as a radical socialist as he more eloquently stated it:

"I hope we shall take warning from the example of England and crush in its birth the aristocracy of our moneyed corporations which dare already to challenge our Government to trial, and bid defiance to the laws of our country."3

Perhaps one of the better definitions of fascism comes from Heywood Broun, a noted American columnist in the 1930s:

"Fascism, is a dictatorship from the extreme right or to put it a little more closely into our local idiom, a government which is run by a small group of large industrialists and financial lords...I think it is not unfair to say that any businessman in America, or public leader, who goes out to break unions is laying the foundations for fascism"75

A definitive definition of fascism is a totalitarian government with extreme nationalist tendencies in which the government is controlled and operated for the benefit of a few elite. However, it should be noted that an all-encompassing definition of a complex system can not be simply stated. Such simple definitions undoubtedly fail in time. A caveat to the above definition would be anytime the government places the rights of corporations or the elite above the rights of the citizens, it represents a step towards fascism. A better insight into what fascism is can be obtained by listing the traits that are common to the classical fascist states of Franco's Spain, Nazi Germany and fascist Italy. A list of traits of fascism is presented below. Note that the first two are the two most defining traits, obviously many of the others can be applied to many other social-political systems as one moves down the list.

1. Totalitarian
2. Extreme nationalism
3. Top down revolution or movement
4. Destructive divisionism such as racism and class warfare
5. Extreme anti-communism, anti socialism, and anti-liberal views
6. Extreme exploitation
7. Opportunistic ideology lacking in consistency as a means to grab power
8. Unbridled Corporatism
9. Reactionary
10. The use of violence and terror to attain and maintain power
11. Cult-like figurehead
12. The expounding of mysticism or religious beliefs

Not all fascists need exhibit all of the traits once again it should be emphasized that all fascist states will exhibit a totalitarian view. Most fascist states will have an extreme nationalism policy. However, extreme nationalism is not mandatory. States such as Spain under Franco and Chile under Pinochet were indeed fascist states, but they could hardly be described as having a policy of extreme nationalism.

A brief look at the above traits and how they relate to fascism will convey a better understanding of what fascism really is, using Nazi Germany as an example. First, because it was undisputedly fascist and secondly because there is more literature available on the Nazis than on either fascist Italy or Franco's Spain. Moreover, the use of the Nazi's as an example is closer to the focus of this book, which is creeping fascism in America.

Creeping fascism is the gradual lost of freedoms of the masses to the power elite. Full-blown fascism has never appeared all at once. The Nazis took several years to reach the final state of full-blown fascism. It took the Nazis five years before Kristallnacht, which marks the beginning of the "Final Solution." The Nazis gradually took away the freedoms of the citizens of Germany until they were able to launch the Holocaust. This was the reason for including the caveat in the definition of fascism above, "Any action taken by the government that places the rights of the elites and corporations above the

citizens is a step towards fascism."
Such actions will not look like fascism some may even appear to be reasonable. Its only when the summation of many such actions ends in a fascist state that such actions can be seen as a step towards fascism.
Make no mistake in understanding that the power elite, those that own and run America's corporations, are fascist. They have forced war on this country to protect their assets, they have over-exploited their employees, they have used violence to bust unions, and they rely on divisionist policies such as racism and class warfare to maintain their power.
The erosion of our freedoms in the United States was prolonged by our constitution. Nevertheless, over time the lost of freedoms has left America at the edge of a chasm. Any further loss of freedoms and America will begin an irreversible slide into the deep abyss of fascism.
Before looking at the traits of fascism a brief review of the history of fascism and its roots in modern philosophy is needed. By looking at the roots of fascism in philosophy, we can gain an understanding why fascism is often described as reactionary. By looking at the various philosophers that have come to be associated with fascism, we will be able to see that many of these traits come directly from fascism's roots in philosophy. In that way, we can then see how some of these traits that can be applied to other social-political system are central to fascism.
Many writers have assumed that fascism has no intellectual or philosophical roots due to its lack of a consistent ideology. But such views are incorrect; the roots of fascism extend back to the French Revolution. The French Revolution is one of those landmark events in the history of Europe marking the beginning of a major shift in European culture and governments. In essence, fascism was a reaction to the French revolution. It was a reaction particularly to the slogan of the revolution of "Liberty, Equality, Fraternity" that was hated the most.
The concept of liberty from oppressive regimes in the daily lives of the citizens, including forced religious values, and the concept of voting and majority rule where the minority still retained a set of inalienable rights, incensed the early philosophers of fascism. Such a concept was a direct threat to the kings and nobles of the time, as well as to the church. Remember this was a time for debtor's prisons, indentured servants, and vassal states.
Equality, in the eyes of the law, was unspeakable. How could a mere peasant have the same rights under the law as the kings, nobles, and merchants? This was the time when the king's word was the law. Rights were based on the social standing of one's birth. The only rights a person had at the time were the rights that the king was willing to extend, and they could be withdrawn at any moment.
Fraternity, in the sense that all men and women shared humanity was considered heresy. It was a time when slaves were still considered and treated as animals and women were considered property, and not part of

a greater humanity that needed to be shared.
All three terms meant a loss in power and control by those in power. But, this is exactly what the philosophers that have come to be associated with fascism were reacting to and rejecting. The period following the French Revolution produced a virtual intellectual stew of various philosophies, including those of Marx and Engels. A brief look at some of the major philosophers of fascism will show how they relate to the traits listed early, and how they were a reaction to the French Revolution. This list of philosophers is by no means complete, but it will suffice to show that many of the traits attributed to fascism above have roots going back as far as the French Revolution.
Arthur Schopenhauer (1788-1860) was a German philosopher perhaps best known for his The World as Will and Representation.4 His beliefs held that the will is the underlying and ultimate reality. The whole phenomenal world was only the expression of will. Individuals have free will only in the sense that everyone is an expression of a will. Thus we are not authors of our own destiny, character, or behavior, according to Schopenhauer. His views parallel the development of relativistic physics that came a century later. His views were influential on Nietzche, among others.
Georg Hegel (1770-1831), a German philosopher held pantheism as the heart of his beliefs. The Phenomenology of Spirit and Science of Logic are two of his better-known works. He viewed that all existence and all history was divine and that nature was sacred. He viewed God as an absolute spirit that also manifested itself in material things and individuals. He believed God acted through humans and embodied himself first in nature, then in the rising stages of human consciousness and civilization. He also had an ethnocentric and egocentric view. He maintained that the German nation was the highest carrier of the wave of God's development. He believed that the bureaucratic monarchy of Prussia was the highest form of state. These later views were certainly manifested in the Nazi's view of the Aryan race, as shown in the following quote.
"Thus the highest purpose of the folkish state is concern for the preservation of those original racial elements which bestow culture and create the beauty and dignity of a higher mankind. We, as Aryans, can conceive of the state only as the living organism of a nationality which not only assures the preservation of this nationality, but by the development of its spiritual and ideal abilities leads it to the highest freedoms."8
Fredrich Nietzche (1844-1900), also a German philosopher was best known for his work Thus Spake Zarathustra.5 Hitler liked to be photographed staring at a bust of Nietzche. Nietzche theorized two sets of morals, one for the ruling class and another for the slave class. Nietzche viewed that ancient empires grew out of the ruling class and that religions arose out of the slave classes, (which denigrates the rich, the powerful, rationalism, and sexuality.) He developed a concept of an "overman," a superhuman, which symbolized man at his most creative and highest intellectual development.

Obviously, the "overman" was manifested in the Nazi's view of the Aryan race. He suffered a mental break down, most likely from the advances of syphilis, and was cared for by his mother and later his sister, Elisabeth. His sister painstakingly gathered his notes to publish his latter works. However, she was active in the rising anti-Semitic movement at the time and may have tainted his later work with her views. From time to time, Nietzsche enjoys a rebirth of popularity. Today is one such rebirth, fitting in well with the unmitigated greed and corporatism of today's hard right. Nietzsche's connection to the Nazis is obvious, as shown by the following quotation.

"with satanic joy in his face, the black haired Jewish youth lurks in wait for the unsuspecting girl whom he defiles with his blood, thus stealing her from her people. With every means he tries to destroy the racial foundations of the people he has set out to subjugate. Just as he himself systematically ruins women and girls, he does not shrink back from pulling down the blood barriers for others, even on a large scale. It was and it is Jews who bring Negroes into the Rhineland, always with the same secret thought and clear aim of ruining the hated white race by necessarily resulting bastardization, throwing it down from its culture and political height, and himself rising to be master."9

Notice the similarity in this passage and the Council of Conservative Citizens that Senator Lott and representative Barr supported before becoming embroiled in the resulting scandal in late 1998.10 The web site for this white supremacist group described interracial marriage to the mixing of chocolate milk with plain milk, and labeled it as a path to racial extinction. They also described Lincoln as a communist. 11

Henri Bergson (1859-1941) was a French philosopher with a Jewish father and an English mother. He was the winner of the Nobel Prize for literature in 1927. He rejected the idea that scientific principles could explain all existence. He was a promoter of what has become known as Social Darwinism.6 Perhaps one of his better known works was Time and Free Will. He was also a believer in pantheism. Once again, we see the obvious connection with the Nazis of a master race in the following quote concerning the Nazi's euthanasia program:

"...a secret circular went out from the Reich interior Ministry which marked the beginning of a programme of euthanasia for mentally ill or deformed children up to three years old. Doctors would be required to report all such cases to the health authority on special forms; the forms would then be forwarded to a panel of three medical assessors who would adjucate over life or death by appending "-" or "+." Should all three place a "+", a euthanasia warrant would be issued, signed by the Reichsleiter Philipp Bouhler of the Fuhrer's Chancellery or SS_Oberfuhrer Dr Viktor Brack, head of the Chancellery's Euthanasia Department II. And so it happened: infants marked for death were transferred to what were referred to as Children's Special Departments in political reliable clinics, there to be given a "mercy death" by

injection or in one institution at Eglfing-Haar simply starved by a progressive reduction of diet."7

Geroge Sorel (1847-1922) was a French philosopher who had considerable influence on Mussolini. His writings promoted an economic model based on syndicalism. He also believed in the degeneration of societies and believed that social decay could only be delayed by idealists who were willing to use violence to obtain power. His views were extremely anti-democratic and anti-liberal.

With this very brief review of philosophy has shown that the fascist traits of nationalism, totalitarian, racist, violence, unbridled corporatism, reactionary, and the top down nature of fascism all are grounded in the works of past philosophers.

A totalitarian government is one that seeks to maintain control over all aspects of public and private life by using propaganda, terror, and technology. Totalitarian regimes seek control over political, social, and the culture. However, economic control is left in the hands of a few elites in the fascist state. While the means of economic control is left in the private hands of a few elites, this same group controls the government. In essence the government becomes the tool by which the rich and the corporations maintain control. The distinction is important to note as it separates communism from fascism. In a communist state the control over the economy moves to the inside of government, while in the fascist state it remains in private hands. Dictatorships differ in seeking only limited control over the political environment of a society.

There was only limited government ownership under the Nazis. Prior to the Nazi take over, the German governments took over failing businesses and continued to operate them. When the Nazis took over the government already owned a large number of enterprises. When the Nazis took over they began to privatize many of these businesses, especially the ones that had remained profitable during the depression like the electric utilities.

Once Hitler assured big business that they would be free to continue to operate, they failed to raise any further objections to the Nazis. The large German steel and coal industries especially welcomed the Nazis. Hitler's plans for rearmament meant large contracts for new ships, tanks, etc. Later during the war when a labor shortage appeared, it was Krupp from the German steel industry that first raised the question of using slave labor from the concentration camps. At first the Nazis were reluctant to allow the inmates to be used as slaves as it would slow the progress of the "final solution." However, once Krupp offered to pay for the slaves the Nazis readily agreed and soon there was no shortage of companies seeking slaves.

What is less understood about the totalitarian power Hitler achieved was the path he took to obtain that power. There never has been totalitarian regime that gained instant total control. Such a sudden change would spawn sudden revolutions. Mussolini took three years before consolidating his power in Italy. In case of the Nazis, it took even longer. Nor did the path to totalitarian Nazi state start with

the elevation of Hitler to the position of chancellor. Some historians trace the roots of the path all the way back into the 1800s. A complete analysis of German history from the time of the monarchy to the seating of Hitler is beyond the scope of this book, if not beyond the scope of any single book, as volumes could be written. What follows is a very brief look at the slow erosion of freedom and the concentration of power as it relates to the final totalitarian state.

For the most part, the period following WWI was a period dominated by raucous politics and a series of crisis in Germany. The two periods in which the Nazis gained the most strength was the early 1920s, during the hyper inflationary period, culminating with the Beer Hall Putsch and the depression of 1929-1931. There is little need to examine the raucous politics of that period, everyone is well aware of Hitler's SA thugs breaking up political rallies of other parties which also resorted to the same tactics. It would not be untrue to describe many political rallies of the time as ending in brawls.

Hitler and the Nazis were extremists, and mostly rejected by the German voters during the good economic times of the 1920s. For example, in 1928 they only polled 2.6 percent of the vote, gaining just 14 seats out of the 491 seats in the Reichstag by virtue of the republic's proportional representation. By 1930 and the start of the depression, the Nazis had increased their seats to 107 out of 577 seats in the Reichstag. In the July 1932 election, at the height of the depression, the Nazis polled 37.4 percent of the vote winning 230 seats in the Reichstag, becoming Germany's largest party.13 In the Nov 1932 election, they only won 196 seats as an anemic economic recovery was already underway, the people began rejecting the Nazis and their radical views and actions.

Germany's plunge into a totalitarian state began before the Nazis took over. It was as much a result of a lack of a strong leadership as anything else. For the first eleven years of the German Republic there had been seventeen cabinets headed by nine different chancellors.12 Undoubtedly, the country faced grave crisis in this period such as hyperinflation, but the lack of strong leadership and an increased polarization was readily apparent. The Nazis were the most notorious radicals unwilling to compromise, but the other parties have to share some of the blame for this polarization as well. The blame can be extended beyond the parties to the vested interests behind each party, including that of big businesses. Fracturing the electorate by polarization was playing right into the divisionist character of the Nazis, whose radical program lacked a broad base of support as the election results from 1928 showed.

The policies of the German governments during the 1920s inadvertently aided the rise of the Nazis. Throughout the 1920s the government arrested many of the leaders from the left. It would not be unfair to term these arrests as purges. The arrest of any strong leaders emerging from the left only served to further polarize the country by creating a vacuum on the left that was only filled with the more radical communists. A similar situation is emerging in the United

States, throughout this century the United States has conducted purges of the left: the Great Red Scare of 1919, McCartyism of the 1950s, and COINTELPRO operations during the sixties. Without the voices from the left to moderate policy, the political center in the United States has shifted to the hard right.

The immediate result in the lack of strong leadership is frequent chances in government, which only lead to more instability and chaos. An ideal parallel is the long string one term Presidents ending with Lincoln and the Civil War. The polarization of the Unite States gradually increased from about 1820 on resulting in one term presidents. Another string of one term Presidents ended with the election of Roosevelt in the middle of the Great Depression. In both U.S. case the ending result was not pleasant: a civil war and a depression.

Such frequent change in government does not allow businesses to make long range plans, nor does it allow for enough to time for programs enacted by a government to work. These effects then act as negative feedback, further increasing the polarization and the resulting chaos.

Additionally, the German constitution was flawed and did not account for a negative parliament. Power in Germany was concentrated in the office of the president, headed by Hindenburg, who initially had been elected by conservatives and reactionary rightists. He was a member of the aristocratics from the Junker class and had been a war hero; he likewise held sentiments for the monarchy. The president had the power to appoint cabinets and chancellors. Beginning in 1930, Hindenburg began the practice of appointing chancellors of his choice that were not beholding to the parliament. To allow the chancellors to circumvent parliament, he granted these chancellors emergency powers that had been given to the president by the constitution. Starting in 1930, almost all national laws, including the power to tax, were enacted by presidential decrees and not by the parliament. Such presidential decrees would be similar to the executive orders in the United States.

Hence, even before Hitler was appointed to the chancellor position, power was being concentrated into the two offices of the chancellor and the president. At least twice before appointing Hitler as chancellor, Hindenburg entertained ideas of violating the constitution by not holding elections within the sixty days as required by the constitution.

Hindenburg had also avoided appoint Hitler as chancellor twice before January 1933. Even with the support of big business Hindeburg failed to appoint Hitler when the Nazis held more seats in the Reichstag than any other party.

It wasn't until after Hitler met in secret with von Pappen at the Cologne home of Baron Kurt von Schroder that Hindenburg would relent and appoint Hitler chancellor. The baron was the head of the international Schroder banking empire and had previously raised funds to pay off the Nazi's debt.

The secret meeting on January 4, 1933 allowed Hitler and von Pappen to

work out their differences and to agree to a new cabinet under the direction of both. This secret meeting was the birthplace of the Third Reich.
However, there were two Americans that also were in attendance: John Foster Dulles and his brother Allen. The Dulles brothers were there as legal representatives for Kuhn Loeb Company, which had extended large short term credits to Germany. Their presence was to secure a guarantee of repayment from Hitler.
Moreover, Kurt von Schroder had extensive financial contacts in New York and London. He was a co-director of Thyssen foundry along with Johann Groeninger, Prescott Bush's New York bank partner. Schroeder was also the vice president and director of the Hamburg-Amerika Line, the same shipping line seized from Prescott Bush for trading with the enemy.
Throughout 1932, actions taken by the Bush-Harriman shipping line were directly responsible for bringing Hitler to power. The constitutional government tried to disarm the Nazi Brown Shirts to stop the mad election melees and murders. The U.S. embassy in Berlin reported:
" Hamburg-Amerika Line was purchasing and distributing propaganda attacks against the German government, for attempting this last-minute crackdown on Hitler's forces."
During 1932, Hitler's thugs murdered thousands of Germans. Arms for Hitler were shipped to Germany aboard Hamburg-Amerika Line. They were transferred to river barges before reaching Antwerp and then transported across Holland freely. Samuel Pryor, founder of Union Bank and a partner in the Hamburg-America Line was also executive committee chairman of Remington Arms. Hitler's Brown Shirts were armed primarily with Remington arms and Thompson submachine guns. A Senate investigation of Remington concluded that all of the political factions in Germany were armed with mostly American made guns.
Once Hitler and von Pappen had reached an agreement on their future course of actions. Pappen pressured Hindenburg to appoint Hitler as chancellor. The success of the meeting was recorded in Goebbels. On January 5, 1933 Goebbels wrote in his diary "If this coup succeeds, we are not far from power. . . . Our finances have suddenly improved."
Hindenburg appointed Hitler, as chancellor with the understanding Hitler would be a parliamentary rather than a presidential chancellor. Hitler immediately set about sabotaging the efforts to from a parliamentary majority. Here is one of the first examples of fascism and divisionism.
On February 1, 1933 the German parliament was dissolved and new elections were scheduled for early March. Using his henchmen, Hilter had the Reichstag building burnt. The fire was blamed on the communist, his main revivals. Using the fire as an excuse, Hitler banned the communist from the upcoming election. Additionally, Goring deputized his storm troopers to harass any political opposition from his position in the cabinet; even then the Nazis could not achieve a majority in parliament as they polled only 43.9 votes.14 By summer, all political parties except the Nazis had been dissolved. On the

death of Hindenburg in 1934, Hitler assumed the office of president and further consolidated his gripe on power, but it would take a couple of additional years before Hitler was a true totalitarian. He purged the justice system of judges with adverse views, appointing rabid Nazis in their place, and the storm troopers were given police powers. Justice was now the Nazi party line.

One does not need to expound upon the extreme nationalism of the fascist. The history of their invasion in a quest for world dominion is well known. Mussolini turned his attention to Ethiopia and North Africa; Hitler first to Austria, then Czechoslovakia, followed by Western Europe and later to Norway and the east.

Hilter had left a blueprint for his extreme nationalism and the quest for lebensraum in Mien Kampf as shown by the quote below.

"If the National Socialist movement really wants to be consecrated by history with a great mission for our nation, it must be permeated by knowledge and filled with pain at our true situation in this world; boldly and conscious of its goal, it must take up the struggle against the aimlessness and incompetence which have hitherto guided our German nation in the line of foreign affairs. Then without consideration of traditions and prejudices it must find the courage to gather our people and their strength for an advance along the road that will lead this people from its present restricted living space to new land and soil; and hence also free it from danger of vanishing from the earth or of serving others as a slave nation.

The Nationalist Socialist movement must strive to eliminate the disproportion between our population and our area-viewing this later as a source of food as well as a basis for power politics---between our historical past and the helplessness of our present impotence."15

The third trait of fascism is that it consists of a top down revolution or movement. It is becoming more accepted today that the Nazis drew support from all classes. Indeed, this seems a reasonable assumption when looking at all of the evidence. The storm troopers for the most part drew their numbers from the lower and middle classes. They were typically were unemployed laborers, inept middle management, or failed businessmen. Likewise, given the vote tally of over thirty percent in the 1932 elections, the Nazis had to have drawn votes from all social classes. But this has no bearing on who controlled the direction of the party. Control of the party rested solely with Hitler and whom he allied with. He chose to ally with the upper class and big business as borne out by his policies after gaining power. There is little controversy over the considerable support Hitler drew from the aristocrats, the military, or the Junkers.

Telltale signs forewarning of the elite control was evident from the very formation of the party until the final days before gaining power. A brief look at those that financed the Nazis rise to power will reveal the real support behind Hitler. This is becoming an increasing issue of contention as American hard right tries to distance themselves from the similarities of their policies with fascism.

Hitler himself did not form the Nazi party initially. He joined an

existing party and then molded it according to his wishes. In fact, his company commander had ordered him to attend a meeting of what was the German Workers Party. Here was Hitler's initial reaction to the party.

>"My impression was neither good or bad; a new organization like so many others. This was the time in which anyone who was not satisfied with developments and no longer had confidence in the existing parties felt called upon to found a new party. Everywhere these organizations sprang from the ground, only to vanish silently after a time. The founders for the most part had no idea what it means to make a party---let alone a movement---out of a club. And so these organizations nearly always stifle automatically in their absurd phillistinism."16

The order from his company commander provides the first evidence that the elite backed Hitler from the very beginning. At any point from this date the German military could have withdrawn its support of Hitler and disbanded the Nazi party

Hitler was a good orator by all reports, as well as an astute political observer. He knew how to motivate the masses in his name and how to sustain a movement. Someone once remarked recently that you needed only gain control of the 3Ms to gain power. The three "Ms" are the military, media, and money. Hitler had all three behind him. As shown by the passage from Mein Kampf, Hitler started with the blessing of the military. The military, as well as big business, played a behind the scenes role in the appointment of Hitler as chancellor.

It's the last of the 3Ms where much confusion and debate arise, Hitler's source of funds or money.

Big business likewise had a large hand in bringing down Bruning in 1930. In a large part, it was the constant bickering by special interest groups that led to the falling of Bruning's cabinet. Big business was urging the following demands on the Bruning government:

>1. The government must take steps to lower the cost of production and widen the profit margin.
2. Lower taxes
3. Reduce the size of government.
4. Lower unemployment insurance benefit
5. The government must allow wages to progress to lower levels, by voiding labor contracts and binding arbitration.26

If these demands from the business community seem familiar to the reader, it's because in a large part they are the same policies that the Republican Party has been advocating for the last twenty years.

Throughout the 1920s and up until Hitler was appointed chancellor the Nazi party was plagued with a shortage of money. After release for prison for the failed Beer Hall Putsch, Hitler's only known source of income was from the sale of Mein Kampf and fees for newspaper articles he would write. The first edition of Mein Kampf was published July 18, 1925 in an edition of 10,000 copies selling for 12 marks. By the end of the year almost all copies had been sold. A new edition was printed but sales in the following year plummeted.

Nevertheless, almost immediately after being pardoned he bought a new super-charged Mercedes-Benz for 28,000 marks.17 Additionally, Hitler did not drive, so he had the additional expense of a chauffeur.

Likewise, from 1925 until his appointment as chancellor in 1933, Hitler lived in increasing comforts, if not outright lavishness for

the times. Certainly, the royalties from Mein Kampf and fees for his other writings were insufficient to cover even his living expenses, not to mention the party's expenses.
Also, the funding for an ever-increasing number of SA troopers (many of which were unemployed) had to be secured. Turner has suggested that the Nazis were self sufficient from dues, speaker's fees, and donations at rallies. However, this seems almost improbable looking at the numbers from 1930. In 1930 there were about 100,000 storm troopers that had to be fed, housed and otherwise supported. Additionally there were 15,000 in the SS. Nazi membership at the beginning of 1931 was only 389,000.18 Thus it seems very reasonable that outside sources of funding was needed to maintain the SA and SS, as well as the ever increasing lifestyle of Hitler. Membership fees in the Nazi party started at a mark per month, non-paying members were quickly dropped from the party.
From the very beginning of the Nazi party Hitler showed a knack for obtaining funding from the more privileged members of German society. For instance, everyone is well aware of the trial following the Beer Hall Putsch, but less well known was a secondary trial following the putsch. In the secondary trial, several businessmen that had donated money or other support for Hitler were put on trial. Some have attributed much of this early funding of the Nazis to the secret Thule Society.19 Another early source of funds in the early 20s came from the efforts of Scheubner-Richter, who was adept at gaining funds from Bavarian aristocrats, big businessmen, bankers, and leaders of heavy industry.20 Another source of early funds came indirectly from Fritz Thyssen. Henry Ford also exerted a considerable influence over Hitler in the early 1920s, as well as money. Some passages from Ford's International Jew are nearly identical to passages in Mein Kampf. Ford's book is reported to have had a large effect on many of the school children of the time that were suffering through hyperinflation and economic hard times while reading a book written by the world's foremost capitalist.
The extent of Ford's financial donations to Hitler still remains a mystery. The U. S. ambassador to Germany, William Dodd, was quoted saying "certain American industrialists had a great deal to do with bringing fascist regimes into being in both Germany and Italy."21 The extent of corporate America's collaboration with the Nazis before the war and even during the war, in some cases, is not fully known. However, as time goes by and more information becomes available, the collaboration begins to appear significant, as shown in the following article.
"Bernd Greiner said 26 of the top 100 US companies in the 1930s collaborated to some degree with the Nazis before, and in some cases after, Hitler declared war on the United States in December 1941. Company headquarters in the US have denied they knew what was going on in Germany, but there is evidence to suggest they knew their German subsidiaries used slave labor, tolerated it and in some cases were actively involved, Greiner said.

Greiner confirmed a report in the newspaper Die Zeit, based on his findings of US corporate involvement in Nazi Germany. The findings went beyond allegations of US lawyers and historians last year that automakers General Motors and Ford collaborated with the Nazi regime."22

One of the more historically accurate, but shamefully apologetic to big business sources is the book, German Big Business and the Rise of Hitler by Turner.23 Turner does a good job in detailing the extensive participation of the leaders of business with the Nazis. However, he reaches the conclusion that big business did not support Hitler with a rather contrived definition of what big business is. He based his definition on the value of the float of stock on the market. His definition limited the number of companies that he would classify as big business to only 14 companies in the Ruhr industrial area and a smattering of companies located elsewhere. Essentially, his definition would be the equivalent of saying that only the Dow 30 companies in the U. S. could truly be called big business. This of course is nonsense. The majority of people would certainly consider Chrysler, Texas Instruments, Hewitt Packard, John Deere and Chase Manhattan Bank to be big business, but according to Turner's book they are not. It is from this group of second and third tier businesses (in keeping with Turner's definition) that provided the most help and support for Hitler. Furthermore, Turner neglects the effect of cartel agreements as well as subsidiaries in his analysis. Many of these second and third tier corporations were owned and controlled by the 14 corporations, he considered to be big business.

Secondly, Turner focuses much of his attention on the period of 1920-1928, when the Nazis were at best a minor noisy party. During this time, the Nazis were lucky to poll more than three percent of the vote. Yet Turner tries to use this as proof that big business did not support Hitler's rise to power, although he does admit that Fritz Thyssen and Kirdolf were supporters of the Nazis during this time. An equivalent situation would be today's Libertarian Party, a party that draws support from Koch, head of Koch refinery (a second tier company by Turner's reasoning). But no one is rushing to fund the Libertarians today when they cannot even poll five percent of the vote.

Finally, when the source of funds were unquestionably from big business Turner attempts to discredit them by claiming the source of the funds was a junior level executive that couldn't be responsible for overall company policy. Or he attempts to say they were given to an individual Nazi. In one shameful passage Turner attempts to discredit the funds given to Nazi fund-raiser Walther Funk by claiming they were not a donation to the party as they may have been spent by Funk for entertainment. Turner describes a particular drunken binge across town by Funk in which he passed out some rather large tips and then draws the conclusion that perhaps none of the funds given Funk ever reached the Nazis.24 This is not the work of a historian, as Turner claims to be. This is nothing more than conjecture by a propagandist. There is also one other speculative conclusion one could

draw from this passage, and that is that the amount of money Funk was receiving was so enormous that it permitted such behavior.
Turner does a good job in showing that it was those second and third tier businesses that supported the Nazis. In Duren, a Rhenish manufacturing town, the Nazis received considerable support from local industrialists such as the millionaire dynasties (a term in use from the 1820s in describing these two families) of the Schoellers and the Schulls. Another area in which the Nazis received broad support from businesses was Solingen, an industrial town.25 Overall, Turner documents the participation of business leaders and their support for the Nazis, leaving no question in the reader's mind that business leaders exerted a considerable influence on the Nazis. Unfortunately, he ends his study just as the Nazis seize power.
Many businesses chose to align with and support the Nazis after they gained power. Krupp and I.G. Faben were both executors' of Goring's Four-Year Plan to make Germany militarily self-sufficient by 1940. One can view the details of Krupp's involvement and support for the Nazis after March 1933 in the documents from the War Crimes Tribunal at Nuremberg.31 The full set of available documents from Nuremberg is also available on the Internet.32 By 1939, I.G. Faben provided the Nazis with 90 percent of their foreign exchange, 95 percent of imports, and 85 percent of all military and commercial goods. In 1932, Hermann Schmitz Faben's joint chairman joined forces with Kurt von Schroder, director of a wealthy private bank. Schroder was a fanatical Nazi, often times dressed in his black SS uniform. Schroder is the man that is closely linked with Chase Bank, Standard Oil and William Teagle, and ITT. In 1932, Schroder and Wilhelm Keppler formed the group known as "The Fraternity." This group guaranteed a source of money to the Gestapo. Members agreed to contribute an average of one million marks a year to Himmler's personally marked "S" account and the transferable secret "R" account of the Gestapo.27
In April of 1933, Gustav Krupp sought out a private meeting with Hitler. Krupp agreed to become Hitler's chief fundraiser and chairman of the Adolf Hitler Fund. In return Hitler promised to appoint Krupp as the fuehrer of Germany industry. Over the years, Krupp contributed over six million marks of his own money to the Nazis, and his correspondence shows that he truly enjoyed his job as chairman.28 Likewise, it is common knowledge that after Hitler was appointed chancellor Krupp greeted people cheerfully with the Heil Hitler salutation.
Schirer writes that in 1931, when Hitler decided to cultivate relationships between influential industrial leaders, he kept their identity a secret.
"The party still had to play both sides of the tracks. The party had to allow Strasser, Goebbels and Feder to beguile the masses with socialist talk and denigrating the industrial magnates."
Some of the meetings were so secretive that they were held in forest glades."29
Further proof of the industrialist involvement and support of the

Nazis comes from the testimony of Funk at Nuremberg. The entire list implicated by Funk is far too long to reproduce here, but besides Thyssen and Krupp it included Georg von Schnitzler-I.G. Farben, August Rosterg and August Diehn of the potash industry, Cuno of the Hamburg Amerika Line, Otto Wolf, Kurt von Schroder, and many other wealthy industrialists30

On May 2, 1933, the Nazis raided and occupied all trade union headquarters. The leaders were beaten and arrested; some were placed in the concentration camps. Union funds were confiscated and the unions were dissolved. Members of the communist party and the social democrats had already been arrested. On June 20, 1934, in what has become known as the Night of Long Knifes, Hitler purged the socialists within the Nazi party, chief among them Roehm.

With the broad financial support from the leaders of the business community as well as from the military leaders and aristocrats, the Nazis were truly a top down organization, while the Nazis used the lower class as foot soldiers to gain power. They did so in a deceiving manner, and once in power, immediately set about betraying the lower classes

We have already shown one example of divisionism by the Nazis in their rise to power. But what sets fascist divisionism apart from the ordinary divisionism of any other political ideology? Certainly any politician in a democracy appeals to some sort of divisionism, as he is fully aware that he can not possibly appeal to the entire electorate. The difference lies in the fact that divisionism is always destructive in fascism and serves only as a means to gain and maintain power. Even after gaining power, Hitler went to great pains in dividing power, playing one follower against another, creating rivalries in the party in the process. In short, Hitler kept the Nazi party divided as if it was a set of small fiefdoms. One of the biggest myths about the Nazis is that they were a single unit, when in fact they were a conglomeration of various fractured parts. Eatwell states the paradox within Hitler's power structure as: "because the party was so divided that he had power and in turn the party was divided from other key centers of power such as the army." 47 In other ideologies, the divisionism is not inherently destructive. Rather, it's based on differing approaches coming together to reach an equable solution to a problem. In his rise to power, Hitler had no intention of compromising with the other parties to form a parliamentary president. His moves were calculated to destroy any chance of that.

A couple of examples from the present can further delineate the difference between the two. Certainly many of the tax proposals coming from the Republican party today could be classed as divisionism as they favor the upper income earners over the lower income groups. While the measures are divisive they can hardly be labeled as destructive divisionism. They are more a reflection of difference in opinion.

However, an example of an act that could be termed a fascist divisionism was the Republican caused shut down of the government in

November 1995 after Clinton vetoed the budget bill. Clinton had previously warned Congress that unless changes were made in the budget he would veto the bill. Members of the hard right Council for National Policy and many of their Republican members openly had declared they would shut down the government. In essence, the Republicans adopted the same policy that Hitler had in his bid to dismiss parliament; they refused to negotiate honorably.

Just as Hitler had taken a position to subvert democracy, so had the Republicans, led by Gingrich. The constitution defines the passing of the budget in detail. The spending bills originate in the House after passage by both the House and the Senate. It is then sent to the President, who may either veto it or sign it. If the bill is vetoed, it is up to Congress and the President to reach a compromise bill. Otherwise, Congress must pass a bill with a two-thirds majority. The failure of Congress to pass a bill to advert a government shutdown was a dereliction of their constitutional duty. Fortunately, the outrage coming from the general public forced the Republicans back to the negotiation table. The point to be made is the only difference between the two events---the Republicans feared the wrath of the people and capitulated, Hitler had no such fear and parliament was dismissed.

The Republican shut down of the government also serves to point out a flaw in our constitution, just as there was a flaw in the German constitution. In the case of the U. S. constitution there is no other mechanism other than shutting down the government if Congress fails to pass a budget. If the fascists in America can be successful in polarizing American politics to such an extent that the public, or at least a considerable portion of it, tolerates a government shut down, then the entire budget process becomes a fracas. And after observing the behavior of the Republicans in their ill fated attempt to impeach Clinton such a possibility does not appear so remote.

Another example of divisionism that is solely destructive that is not based on racism or class warfare was the impeachment of Bill Clinton. It served no purpose other than to smear the president, the articles of impeachment fell far short of what the founding fathers had defined in the phrase "high crimes and misdemeanors." That phrase refers back to the misuse of offices in England under the king. Additionally, the investigation of Ken Starr has been plagued by civil rights abuse and possible criminal action by Starr himself. It resembles a coup headed by the multi millionaire Scaife with the aid of the religious right, more than it resembled a justified impeachment.

But perhaps, the greatest illustration of the divisionism was seeing support for the impeachment evaporate like rain on hot pavement in the Senate following the State of the Union address and a thorough defense of the charges by Clinton's legal team. The House prosecutors with the conclusion of Ken Starr questioned Monica Lewinsky further in secret. This single action by the House Republicans invoked criticism from even members of their own party in the Senate. It was conducted against the agreed upon rules, and it was unconstitutional in that the power of investigation is delegated to the Senate. Likewise, it is

against the statute of the Independent Council. It served no purpose other than to further divide and disgust the country. In short, it is nothing but an attempt at a power play.
Often times, this divisionism takes the form of racism or class warfare. It is often stated that Mussolini tried to eliminate class distinctions in fascist Italy. But the reality is that he only reinforced those distinctions. Certainly the Nazis practiced racism in an outrageous manner, ending in the Holocaust. On the other hand, fascist Italy was not racist in nature until after Mussolini adopted Hitler's Jewish solution. Fascism doesn't necessary have to be racist in nature, but racism is often used to divide the citizens, as their radical platform isn't appealing to the broad masses. In addition, racism is violent in nature and the resulting chaos from the violence serves to further divide the masses. Whether or not a fascist state is racist seems to depend more upon the culture of the society in which it arises. Before fascism, Italy had a long history of generally equable racial relationships, going all the way back to the old Roman Empire. For instance, even the slaves were eventually given full rights in Rome. However, the roots of anti-Semitism goes back much further in Germany as shown in the following quote.
"This is a good month to reflect on the toxicity of words meant to kill. Nov. 9 marks the 60th anniversary of Kristallnacht, the 1938 'Night of Shattered Glass' unleashed by the Nazis to terrorize Germany's Jews. The date was chosen specially by Josef Goebbels, Hitler's propagandist, to honor the birthday of Martin Luther, the 16th century monk who was a father of the protestant Reformation and the founder of what became the Lutheran church.
Hitler greatly admired Luther: "He saw the Jew as we are only beginning to see him today." Indeed. Luther saw the Jews as 'hopeless, wicked, venomous, and devilish... our pest, torment, and misfortune.' Initially, certain that his version of Christianity would appeal to Jews, he expected large numbers of them to covert. When that failed to happen, he turned violently against them. In 1543, Luther Published "On the Jews and Their Lies," a work that would become known throughout Germany, perhaps the most widely disseminated work of anti-Semitism by a German until the rise of the Nazis 400, years later.
"What then shall we Christians do with this damned, rejected race of Jews?" Luther asked.
"First, their synagogues should be set on fire, and whatever does not burn up should be covered or spread over with dirt, so that no one may ever be able to see a cinder or stone of it...
Secondly, their homes should likewise be broken down and destroyed...
Thirdly, they should be deprived of their prayer books and Talmuds, in which such idolatry, lies, cursing, and blasphemy are taught.
Fourthly, their rabbis must be forbidden under threat of death to teach any more...
Fifthly, passports and traveling privileges should be absolutely forbidden to the Jews...
Sixthly, I advise that...all cash and treasure of silver and gold be

taken from them...
Burn down their synagogues, forbid all that I enumerated earlier, force them to work, and deal harshly with them... If this does not help we must drive them out like mad dogs, so we do not become partakers of their abominable blasphemy and all their other vices. I have done my duty. Now let everyone see to his."
This is hate speech.
< Sixty years ago next Monday on the night of Luther's birthday, Nazi gangs rampaged across Germany. In every Jewish neighborhood, windows were smashed and buildings were torched. All told, 101 synagogues were destroyed, and nearly 7,500 Jewish-owned businesses were demolished. On that night, 91 Jews were murdered; 26,000 were rounded up and sent to concentration camps. It was the greatest pogrom in history. And it was nothing compared with what was to come."33
The question then remains whether the fascism in America can be considered racist or not. The past history of racism in the United States would tend to support such. As a nation, we was one of the last industrial nations to allow slavery, and it took the Civil War to end slavery. It has been less than fifty years since "separate but equal" was the rule of the land. It's only been sixty years since Japanese citizens and immigrants were interred in camps following the bombing of Pearl Harbor. The Rosewood incident happened less than a hundred years ago, and lynching of blacks was common well into the 20th century. This country has had a long, incredulous history of bigotry and even genocide. There is no question of the genocide of Native Americans in the efforts of the U. S. Army in passing out blankets infected with small pox, or the slaughter of the Plains Indian's primary source of food, the buffalo. Then there was the Trail of Tears, as well. The Irish immigrants, following the potato famine, were greeted by the Know Nothings, a party that based its support on the hate of Catholics.
All of the hard right groups are racist, although more than one tries to play their racism down or to hide it, such as the John Birch Society and some of the various militia groups. Others are openly racists, such as the Klan, the Nazis and the skinheads. The great unifier of the far right, the Identity religion, links many of the hard right groups. The Identity religion is based on anti-Semitic belief that the true followers of Jesus immigrated to Britain and northern Europe, that today's Jews are the descendents of Satan. It's the mainstay religion among the militias, the Posse Comitatus, and even among some of the Klan groups.
Besides the normal hate groups based on racism or anti-Semitism. the religious right has emerged in the 1990s as a venomous hate group basing their hate on gays and abortion. Abortion clinics increasingly are becoming targets of bombings, arson, and vandalism. Late in 1998, Matthew Shepard was murdered in Wyoming after being tie to a fence and then pistol whipped, for being gay. Below are some quotes about gays from one of the leaders of the religious right, Pat Robertson.
"This conduct [homosexuality] is anti-social, and it is a pathology.

It is a sickness, and it needs to be treated. It doesn't need to be taught in the classroom as a preferred way of life..." - 700 Club, 3-7-90

"...the acceptance of homosexuality is the last step in the decline of Gentile civilization." --Pat Robertson, of the Christian Broadcasting Network, warned that hurricanes could hit Orlando, Fla., because of gay events there. Time magazine, Oct 26, 1998

"If the world accepts homosexuality as its norm and if it moves the entire world in that regard, the whole world is then going to be sitting like Sodom and Gomorrah before a Holy God. And when the wrath of God comes on this earth, we will all be guilty and we will all suffer for it." - 700 Club, 9-6-9534

Compare that last quote of Robertson's to the following quote of Hitler on syphilis.

"...they speak of this whole field as if it were a great sin, and above all express their profound indignation against every sinner caught in the act, then close their eyes in pious horror to this godless plague and pray God to let sulfur and brimstone preferably after their own death rain down on this Sodom and Gomorrah, thus once making an instructive example of this shameless humanity."39

Such evidence, as Robertson's words, abounds that they would persecute gays, it abounds in the numerous ballot measures in various states that would deny gays their civil rights. Such a measure passed in Colorado, only to be overturned by the Supreme Court. Another measure, led by Lon Mabon in Oregon failed state wide, but was reintroduced on local ballots in the following election. Mabon has also led ballot measures to limit the concept of a family and limiting abortions to only the first trimester. The first was another attempt to limit the rights of gays.

In June 1998, near Jasper, Texas a black man named James Byrd was dragged behind a pickup. Body parts were found over a two mile length of the roadway.35 It is too early for trends in hate crimes to emerge, as the FBI only began tracking hate crimes in 1991. The one trend that does seem to be emerging is the hate crimes are becoming increasingly violent as evident from the murders of Shepard and Byrd. The real danger of these two murders is they serve to desensitize us, leading to more numerous and increasing levels of violence, just as the Nazis used increasing levels of violence against the Jews.

Racism is reemerging in various forms in the 1990s in political issues and in the Republican Party. "English only" laws are being promoted with increasing frequency by various Republican candidates, including Robert Dole, and have even appeared on some ballot measures such as California Prop 187. The obvious targets are immigrants from Mexico. In effect, its nothing more than the reemergence of nativism. Other forms of nativism have appeared, such as denying immigrants access to welfare and the school system for children of immigrants. Nativism is also behind various immigration bills and the increasing efforts directed at illegals.

Perhaps the most dangerous form of racism to emerge has been the

Republican efforts to 'monitor' the polls. And videotape those leaving. Cases have arisen in the 1998 election in North Carolina, Georgia, Michigan, Maryland, Kentucky, Texas and Maine. The efforts are directed primarily at districts in which have a high percentage of minorities. Such efforts serve no useful purpose and do constitute a violation of the Voting Rights Act.36 More disturbing is the Chief Justice of the Supreme Court, William Rehnquist, served as the director of Republican 'ballot security' in the poor areas of Phoenix, Arizona between 1958-1962.37 He likewise wrote a pro separate but equal memo as a law clerk for Justice Robert Jackson. All of which was brought out in his confirmation hearings.

An even more subtle effort on the part of Republicans in denying votes to the minorities and the poor is centered on the debate to allow a statistical correction to the 2000 census. Such effort on the part of the Republicans goes far beyond the election of 2000. The census will be used to reapportionment of the congressional districts for the decade. Thus, by denying the correction, they in effect are perpetuating their power to 2010 by undercounting groups that historically vote for Democrats

n Dec 1998, Republican House member Bob Barr and Senator Trent Lott were exposed as keynote speakers before the Council of Conservative Citizens, a racist organization. Lott was later determined to have been an honorary member and had written several articles for their paper dating back to the early 1990s. In January, Republican National Chairman, Jim Nicholson asked members to dissociate themselves from this group and directly appealed to national committee member Buddy Witherspoon from South Carolina to resign. The request was refused.38 Once before, the Republicans were asked to denounce the radical John Birch Society at their National Convention in the early 1960s. Moderate members such as the former President Jerry Ford, did so. However the measure failed.

>Another Republican that deserves mention here is Pat Buchanan and his anti-Semitic views. Buchanan has opposed virtually all civil rights bills and favorable court decisions; he has supported apartheid in South Africa; he has spewed forth views of Holocaust denial; he has called fascists such as Franco and Pinochet soldier-patriots. And Buchanan was a key figure in urging Reagan to visit the SS cemetery in Bitburg.40

Thus as we prepare to enter a new century, the Republican Party has adopted racism as a divisionist tool to divide the electorate in an attempt to maintain power and enact their extremist agenda. Not all members of the Republican Party are racist, but many of the members from the hard right that controls the party are racists. There are honorable members of the party, but they are being forced into lesser and lesser roles. The extremists have gained control. It is the burden of those honorable members to take back control of their party and denounce the extremist before it becomes too late.

Perhaps the best assessment of the use of destructive divisionism by fascist in the United States comes from a 1945 War department publication:

"Three Ways to Spot U.S. Fascists.

Fascists in America may differ slightly from fascists in other

countries, but there are a number of attitudes and practices that they have in common. Following are three. Every person who has one of them is not necessarily a fascist. But he is in a mental state that lends itself to the acceptance of fascist aims.

1.Pitting religion, racial, and economic groups against one another in order to break down the national unity is a device of the divide and conquer technique used by Hitler to gain power in Germany and in other countries. With slight variations, to suit local conditions, fascists everywhere have used this Hitler method. In many countries, anti-Semitism is a dominant devise of fascism. In the United States native fascists have often been anti-Catholic, anti-Jew, anti-Negro, anti-Labor and anti-foreign born. In South America native fascists use the same scapegoats except that they substitute anti-Protestantism for anti-Catholicism.

Interwoven with the master race theory of fascism is a well planned hate campaign against minority races, religions, and other groups. To suit their particular needs and aims, fascists will use any one or a combination of such groups as a convenient scapegoat.

2. Fascism cannot tolerate such religious and ethical concepts as the brotherhood of man. Fascists deny the need for international cooperation. These ideas contradict the fascist theory of the master race. The color, race, creed or nationality-have rights. International cooperation, as expressed in the Dumbarton Oaks proposals, run counter to the fascist program of war and world domination. Right now our native fascists are spreading anti-British, anti-Soviet, anti-French and anti-United nations propaganda.

3. It is accurate to call a member of a communist party a communist. For short, he is often called a Red. Indiscriminate pinning of the label Red on people and proposals which one opposes is a common political device. It is a favorite trick of native as well as foreign fascists.

Many fascists make the spurious claim that the world has but two choices---either fascism or communism and they label as communist everyone who refuses to support them. By attacking our free enterprise, capitalist democracy and by deny the effectiveness of our way of life they hope to trap many people."74

The extreme anti-communism and anti-socialism stance of the fascist is beyond dispute among honest historians. Both communists and socialists were the first to enter the concentration camps in Nazi Germany. Both Mussolini and Franco fought against communist influence. From the brief survey of the fascist philosophers and extreme anti-liberal stance has been a factor in fascism from the beginning. The Nazi used socialism as a ruse to gain power, but once in power they purged the socialists within their party. The following quotes taken from Mein Kampf will illuminate the anti-communism, anti-parliamentary democracy, and the social darwinism of Hitler.

"Just as in 1918 we paid with our blood for the fact that in 1914 and 1915 we did not proceed to trample the head of Marxist serpent once

and for all, we would have to pay most catastrophically if in the spring of 1923 we did not avail ourselves of the opportunity to halt the activity of the Marist traitors and murders of the nation for good"41 >

"As regards the possibility of putting these ideas into practice, I beg you not to forget that the parliamentary principle of democratic majority rule has by no means always dominated mankind, but to the contrary is to be found only in brief periods of history, which are always epochs of decay of peoples and states."42

"The best state constitution and state form is that which, with the most unquestioned certainty, raises the best minds in the national community to leading position and leading influence.

But as in economic life, the able men cannot be appointed from above, but must struggle through for themselves,..."43

The second quote certainly is anti-liberal as it shows Hitler's contempt for the democratic process. The last quote reveals Hitler as a social Darwinist of which Turner makes the point in several places in his book.44 Social Darwinism runs counter to the aims of socialism. In fact it is the antithesis. It allows the elite to gain further power, it willingly discards the poor and the weak as expendables.

With the anti-communism stance and social Darwinism character of Hitler, it is not surprising that the fascist in America would come from the extreme right. The United States was right in opposing communism. But to what links? As with anything else moderation is an admirable quality, excesses of any nature are damaging. Truman or Eisenhower were not fascists for their anti-communism actions. However, Tail Gunner Joe was either a fascist or a willing dupe of fascists. The type of anti-communism of McCarthy served no other purpose than to further his political career. He openly violated the right to free speech and assembly of his victims. His aim was to destroy them with out any regard to the evidence.

The social Darwinism as initiated by Reagan and his attacks on the poor, and the dismantling of the welfare program led by Newt Gingrich will also be labeled as examples of creeping fascism. Throwing people into the streets arbitrarily to fend for themselves is destructive; it is social Darwinism at its worst. Forcing them to except wages below the minimum wage law is denying them their equal rights. But it was precisely the economic woes of Germany that allowed the Nazis to rise to power. Currently America is enjoying good economic times, but when the economy takes a turn to the south the full impact of the lack of a social safety net is going to be felt hard.

The next trait of fascism, extreme exploitation, is a direct result of one of the primary traits of fascism, extreme nationalism. The form of nationalism promoted by fascism not only concerns the standing in the world but also applies to the sacrifices that are expected of citizens. In short, the fascist state reigns supreme while the individuals are subordinate to the state. The subordination of individuals to the state is the antithesis of liberalism. Once again some quotes from Mein Kampf will suffice.

"Since for us the state as such is the only form, but the essential is its content, the nation, the people, it is clear that everything else must be subordinated to its sovereign interests."45
"a peace, supported not by the palm branches of tearful, pacifist female mourners, but based on the victorious sword of a master people, putting the world into the service of a higher culture."46
Certainly from those two quotes there can be no question of the subordination of individuals as practiced under the Nazis or to any limits short of world domination by the Nazis. It is often stated that Hitler left a road map to his future goals in Mein Kampf. There is no greater evidence of that than in the last quote. How then did he rise to power? The problem was nobody was listening. Nobody challenged his aggressive views toward war, or at best they believed that they could control or contain him. Only later did they find out the errors of that false assumption.
This writer can find only two instances of this extreme exploitation in America. Thanks to the efforts of CBS 60 Minutes and Evening News, the story broke about the Tomb of the Unknown and how the Reagan White House pressured the military to find an unknown to bury on Memorial Day 1984. Turns out that in their haste to respond to the pressure coming from the White House, they deliberately buried a fallen soldier that wasn't so unknown. The unknown was Michael Bassie. This man had given everything to his country except for his name. And the lowlife filth occupying the White House had that stripped from him so he could have a photo op on Memorial Day in an election year. This writer can think of no other action that is more despicable; it's unforgivable.
Of course Reagan made sure he was the star of this photo op and used it to promote and build support for his extremist military agenda.
The second instance comes at the hands of Newt Gingrich and the Republicans of the 104th and 105th Congress. They have stripped the rights of welfare recipients and required that they participate in workfare. The problem comes in that these poor souls are not even entitled to be paid the minimum wage or the right to unionize in some cases. In other words, the Republican's answer to the poor is to force the to work in perpetual slavery with no chance of ever breaking out of poverty.
But this event is much more dangerous and goes much further than it appears. The danger here lies in the suspension of the constitutional equality under the eyes of the law. The Republicans have in effect created a sub-class in which one of the very fundamental tenets of our constitution, equality under the eyes of the law was ignored and thrown out the window. Nor is this the only example of unequal treatment of the poor at the hands of the Republicans. They also have advocated cut backs in the budget for the public defender's office.
The Republicans have been very successful in their propaganda in demonizing the poor. There seems to be an almost gutter level hatred of the poor and any aid to assist them. Instead of reaching out a compassionate helping hand towards the poor, the Republicans have adopted a mean spirited social Darwinist view.

This brings us to the trait of opportunistic ideology of fascism. It is perhaps one of the more confusing aspects of fascism. Mussolini appears to have been indeed a socialist before founding the fascist party. Mussolini likewise went from a pacifist to a rabid warmonger. Clearly such dramatic changes in ideology could only be based in an opportunistic grab for power. Mussolini started supporting a syndicalism economy, but by 1923, with clear objections from business leaders, he concluded the Palazzo Chigi Pact. This pact's main intent was to simplify business relations by making the fascist the sole representative of labor. In 1925, the Plazzo Vidoni agreement was signed. This agreement made Rossoni's union the sole representative of labor. It likewise prohibited the challenging of factory management. By the close of the year, the grateful employer's federation publicly announced adherence to the fascist regime.48 Such transformations illistrate the opportunistic ideology present in fascism or is it a lack of ideology, as well as further dispeling the myth that fascism is another form of socialism.

Part of the problem with the ever-changing ideology of fascism arises from the divisionism. Strasser was a socialist and it seems that Goebbels was a Marxist. Both were allowed almost free reign in promoting their own economic views as long as it gathered more support of serve Hitler's purpose. But once their views failed to serve Hitler, they were then brow beaten severely. An example of such reversal in party ideology of the Nazis occurred on February 14,1926. Prior to this date, both Strasser and Goebbels had approved of a plebiscite campaign to deprive former royalty of their possessions, a measure, that was popular with the common citizens. On the given date, Hitler summoned both men to a meeting in Bamberg. Before those gathered, Hitler forced both to capitulate and abandon the program.49 Similar events have already been given, in which various Nazis were initially allowed to promote socialism in efforts to appease the lower classes in an effort to gain their support.

Examples abound throughout the history of the Nazis where they adopted their ideology to suit the audience. In October 1932, Strasser announced a new program that was a stark reversal of the program the Nazis had advocated in July. Higher taxes on the rich had been replaced with a general reduction of taxes, instead of price controls it centered on freeing prices. Instead of protectionism trade policy, export and global trade was now promoted. Likewise, much of the inflammatory rhetoric had been dropped.50

Hitler seems to have sensed the explosive nature of economics and tried to avoid the subject both publicly and within the party. From all indications, he was dissatisfied with the party planks on economic matters. The only official stance on economic matters was the 1920 twenty-five point program. However, he only referred to this policy document disparagingly in Mein Kampf and distanced himself from the document.51 Likewise Hitler would never take an aggressive stance on minor issues, he played to his audience to win their support.

Perhaps the most dramatic evidence of the opportunistic character of

the Nazis is illustrated by the actions of thirty-nine businessmen in November 1932. The group contained such notables as Krupp, Thyssen, Bosch, Siemens, and others. In a signed letter to Hindenburg they urged him to appoint Hitler as chancellor. In essence they were placing a bet that the socialism ideology was a fraud and that once in power he would be a tool of capitalist.52

The only other reversal in policy that could rival the bet that the leaders of big business made was Hitler's writings. In the first part of Mein Kampf he argued that France was the sworn and greater enemy of Germany. However, the second part to Mein Kampf he reversed course and argued that Russia was the enemy as opposed to the first book in which he proposed an alliance with Russia.53 This was a complete change in his foreign policy. One can only speculate as to the reasons behind such a switch.

Many writers have tried to label the Nazis as socialists in a folly to distance themselves from fascist theory. They are quick to point to the syndicalism policy as proof of socialist regulation of business. They are in error, of course. Syndicalism is neither left nor right in itself. It can be either, depending upon the political structure. Syndicalism with labor groups or consumers dominating the issues would indeed be socialistic in nature. On the other hand, syndicalism with only industry or business groups dominating is certainly from the right wing of the political spectrum. The issuing of controls or goals over the production of war material by the government in a syndicalism system is neither left nor right, it's simply self-preservation. The goals and controls, including the 4-Year Plan issued by Goring, were nothing more than gearing the economy up for war time production. In essence, they were merely self-preservation measures. >

Secondly, they will point toward many of the public works projects that were implemented under the Nazis as examples of socialism. An example of this is the construction of the autobahn, a project that had been planned by previous governments, as were many of the public work projects. They likewise forget that the Nazis took over at the bottom of an economic depression, public work projects were enacted not only in Germany, but in the U. S. as well as a means to end the depression. Many of those projects in the U. S. were the construction of useful infrastructure, such as the building of the high school in New Ulm, Minnesota. Others had a definite commercialism bent to them, such as the construction of Timberline Lodge on Mount Hood in Oregon. Labeling the construction of a facility for a commercial business as socialism is simply fools folly. The same applies to many of the public works projects that were implemented under the Nazis. Labeling such programs as socialism would be the same as labeling the construction of the interstate highway system as socialism. If the Eisenhower administration had one shinning moment, it was his support for the construction of the freeway system. For those that are silly enough to label such work as socialism, let them be reminded that no other single event, other than the construction of the cross continental railroad aided the development of business. Besides the

obvious advantage to shippers, the interstate highway system has spawned many new businesses. Think of the number of motels/hotels as well as the tourist traps, service stations, and others that have grown up along the freeway system. The same applies to Germany and the autobahn.

Finally, the same writers that label fascism as socialism would like their readers to believe that these government regulations and bureaucratic offices held ultimate power. Failure to comply would result in the owners being shot. Nothing could be further from the truth. The Nazis for a large part lived in fear of the leaders of big business. They were aware that they had no comprehensive economic plan and would defer to the judgement of the business leaders.

This point can be driven home with one simple example. Goering was one of the Nazis that had little economic knowledge, but harbored some of the more radical economic ideas and was fond of using regulatory offices. Goering tried first to persuade the steel industry, both the smelters and miners, to use low-grade German ore as opposed to the high-grade Swedish ore. Importation of ore from Sweden would use up precious foreign currency, as well as being a less reliable source in the event of war. The invasions of Denmark and Norway were conducted solely to protect the Nazis shipping routes for the Swedish ore. Most of the industrialists politely refused Goering's request; even under threats of arrest for sabotage, they still declined.54 None were arrested for refusal. Instead Goering formed the Herman Goering Works to take on the task. By the time of the outbreak of the war it had evolved to be one of the largest companies in Germany.

Farben is another example of the Nazis bowing to the expertise of leading corporations. With the advent of the first 4-Year Plan, they realized they needed the cooperation of business leadership in order to achieve self-sufficiency in a series of raw materials and finished products. Most of which were items would be crucial to wartime production. By the end of the war Farben, had a series of factories around concentration camps, were major users of slave labor, along with Krupp and many other corporations.

But the most damning evidence of the Nazi's unbridled corporatism was evident shortly after passage of the Enabling Act, when Hjalmar Schacht was appointed president of the Reichsbank. Schacht was a brilliant financier who helped negotiate the Dawes Plan and was largely responsible for stabilizing the currency in 1923; he also detested democracy and parliamentarianism. His first official act was the creation of Metall-Forschungsgesellschaft A.G. (Mefo), a dummy corporation of four armament firms. The state assumed the liability for their debts. The Mefo bills were not unlike promissory notes, they were issued to government contractors and could be extended to five years.55 Such favoritism of business is certainly not socialism. Today in America such corporate aid is labeled as corporate welfare. Note the similarity here not only to the present corporate welfare that's being doled out, but also to Eisenhower's warning of the military-industrial complex. The American military-industrial complex didn't

need to invent a new plan, they were simply free to follow the example the Nazis used. In fact fascism is inseparatable from corporatism. You simply cannot have a fascist government without corporations and a capitalistic economy.
Schacht was later appointed to minister of economics in 1934, a post he retained until he resigned in 1937 over policy disputes. He was not an anti-Semitic and was conscious of the negative aspects of the takeover of Jewish business on both the economy and world opinion. By 1936, he was advocating slowing down the rearmament program, fearing the return of inflation.56 The return of inflation dispenses with the myths that the Nazis maintained strict control of corporations and the prices of goods in short order. In effect, such controls were non-existent. It should also be pointed out here that the economy at this time had taken on considerable shades of a consumer economy.
Italy used their form of syndicalism to eliminate labor unions; the Nazis followed a similar path. The workers benefited little from this unbridled corporatism. Unemployment went from an official figure of six million unemployed in 1933, to 2.7 million in 1937, and by the time of the outbreak of war there was a serious shortage of workers. But growth in wages was far less spectacular, real wages rose only sparingly. The index of wages rose from 92.5 in 1933 to 103 in 1937, an increase of a meager eleven-percent.57 Much of the increase in wages was achieved only from working longer hours. The only real increases in the plight of the workers came with more unpaid leave. Many of the other benefits produced no real benefits to the worker, such as the factory beautification program.
From looking at the philosophers of fascism, it was revealed that fascism was a reactionary movement. What then was the fascist reacting to that led to the rise of Mussolini and Hitler? Many people responding to the question would simply answer the Treaty of Versailles. But such an answer is only partially correct. It doesn't account for the widespread rise of fascism in many European countries following WWI. In fact, during the period between the two world wars, every government from the Rhine to the Pacific underwent drastic changes. In many of those fascism had ample support but in the end was rejected. Some of the problem can be laid to the beginning dissolution of the British Empire and the arbitrary way in which maps were redrawn following WWI without regard to ethnic or natural barriers. An example would be the cobbled mess of ethnic groups that formed the former republic of Yugoslavia, an area that remains a hot spot today.
Britain and the United States were about the only two governments that did not undergo a major change during the period between the wars. However, neither was immune to the rise of fascism. The U. S. saw a rise of a great many fascist groups and groups closely aligned with the fascist in the period between the wars. The German Bund, the Silver Shirts and the mother's movement were all aligned closely with fascism. It was also this period that seen the greatest membership in the Ku Klux Klan.
The United States avoided full-blown fascism by essentially adopting

fascist methods on a milder scale. This was a shameful period in the history of America. The infamous Palmer raids rounded up those with communist connections. The I.W.W was harassed constantly by Hoover and the FBI. In short, only those with non-approved political beliefs would be prosecuted. This suppression of liberty had actually begun around 1900. At the turn of the century, both conservative and liberal elements combined to pass a blizzard of new laws. This effort aimed at curbing lawless quickly became dominated by conservative elements and evolved in a tool for the right wing for the remainder of the century.
As head of the FBI, Hoover quickly targeted the leaders of the left for prosecution, ignoring the criminal actions of the hard right groups. This has left the United States without any noticeable left wing compared to the rest of the industrial world.
Perhaps one of the first and most notable events was the trial of Sacco and Vanzetti, two immigrants charged with murder in Massachusetts. They were found guilty more on their political beliefs than on evidence. They were anarchists, atheists, and reportedly draft dodgers, beliefs that threatened the industrialists of the time.64
Both were executed after considerable protest. Their trial set a dangerous standard that people could be prosecuted for their political beliefs. The inclusion of this trial here is to serve as a reminder of a new problem that is emerging to confront the hard right, jury nullification. Today there is considerable debate from both sides of the political spectrum on jury nullification arising in death penalty and drug cases. It warrants close observation. If the public becomes too polarized, it could spell the end to the trial by jury system, which has served admirably for over 200 years.
Various members of the right wing are now using this as an issue in another attempt to polarize the electorate for their own selfish purposes. These members of the right wing are promoting a system of justice backed by mob or vigilante justice. Essentially, it's a system backed by violence that is not unlike the tactics used by the Posse Comitatus, the Freemen, or various militias to corrupt the justice system.
The first example of political repression came in Minnesota. The then Republican Governor Burnquist used the newly created Minnesota Commission of Public Safety to suspend New Ulm's Mayor Fritsche and City Attorney Pfaender for their pacifist views after war had been declared on Germany in 1917. The following quote details some of the shameful actions taken by the commission and its connection to the hard right.
In April 1917, soon after America declared war on Germany, the Minnesota Legislature, following ferocious debate, created the Minnesota Commission of Public Safety. This remarkable body, chaired and appointed by the governor, was given "all necessary power" to maintain order and enhance Minnesota's contribution to the war effort. Technically limited by the state and federal constitutions, the commission essentially wielded all the authority of state government during the 18 months of its active existence. >

The commission came to be dominated by representatives of the Twin Cities business community. It used its sweeping authority with gusto, not only to root out ``disloyalty'' but to combat labor unionism and agrarian activism as well.
The commission dispatched detectives throughout Minnesota to investigate people and organizations suspected of disloyalty. It regulated food prices and the liquor trade, imposing prohibition in some parts of the state. It banned union organizing and intervened on the side of management in a bitter Twin Cities streetcar strike. It created a ``Home Guard'' of some 8,000 troops to back up its decrees. The commission served as a virtual campaign committee for Republican Gov. Joseph Burnquist in his 1918 re-election bid. It turned a blind eye toward frequent mob harassment of his opponents. It interrogated and intimidated Minnesotans who declined to purchase Liberty Bonds to finance the war effort.63
Nor was such action confined to just Minnesota, many states set up similar commissions. State sponsored violence against leaders from the left was common place. One group that suffered immeasurably was the I.W.W, the Wobblies. On Nov 5, 1916, Washington State suffered its bloodiest labor battle of all time. The resulting carnage between a local sheriff and the Wobblies left seven dead and over fifty wounded in the city of Everett.65
All three of these events illustrate that the United States repressed those with radical ideas in the time period of WWI and immediately thereafter. Pacifist, labor leaders, and leftist political leaders were all prosecuted with equal zeal. Remember, this was the time period of the Rosewood incident and other atrocities. The prosecution was lead by the hard right and business leaders.
But the real answer to the question is that fascism following WWI was a reaction to the Bolshevik revolution and the rise of liberalism ideals. Up until the Russian revolution, the only economic system was capitalism. Communism was a new revolutionary system. It threatened the power elite directly and gave way to a rise not only in communism but socialism and liberalism as well. It was no accident that fascism arose first in Italy, where in the period of 1919-1922, socialists ruled in many localities. Here fascism arose in the countryside were old practices such as sharecropping were giving way to new methods. In 1920, the largest strike in Italian agriculture ever was settled when the landowners capitulated. Elsewhere, unions were wringing out concessions from the owners through strikes and boycotts.58

>
The real appeal of European fascism was the protection it afforded against working class movements, socialism, and communism.59 Hobsbawm states it even more forcefully in claiming that without the October revolution and Leninism there would have been no need for fascism. For up until that time, the demagogic right, although politically active and noisy in many countries, had been kept in check.60 The entire Nazi movement was a reactionary movement. The reaction to the Treaty of Versailles is well known and needs no further comment, as is the

opposition of fascism to liberalism, socialism and communism. Rather, the following quote will show how complete the reaction was to the events of the time.

"Today Christians... stand at the head of Germany... I pledge that I never will tie myself to parties who want to destroy Christianity...We want to fill our culture again with the Christian spirit... We want to burn out all the recent immoral developments in literature, in the theater, and in the press- in short, we want to burn out the poison of immorality which has entered into our whole life and culture as a result of liberal excess during the past...few years."61 <

The quote above was taken from a speech delivered by Hitler. It provides the illustration that the Nazi movement was completely a reactionary movement, reacting not only to global power politics and the rise of the left, but also to the changes in arts and culture of the time. It also provides the link to demonstrate that today's hard right movement in the U. S. is equally reactionary, in particular, the element of the so-called religious right. Contrast it with the quote by Pat Robertson below.

"The Constitution of the United States, for instance, is a marvelous document for self-governmentby Christian people. But the minute you turn the document into the hands of non-Christian and atheistic people they can use it to destroy the very foundation of our society."-Pat Robertson (The 700 Club, Dec. 30, 1981)62

Apparently, Robertson is under the impression that the constitution applies to only those he chooses and is null and void for the rest of us. Hitler held a similar contempt for democracy. However, the point that the Nazis were reactionary has been established beyond any doubt. The reaction was not just confined to the global political scene or economic conditions, but extended into the very roots of the culture. Starting around 1980, fascism reared its ugly head globally. Unlike the rise of fascism in the 1920s, this time the Reagan administration embraced it. The administration openly promoted class warfare, allowed the LaRocuhians access to security and intelligence agencies, filled the EPA with Coor's lackeys, and openly supported none but the elite. In essence, the Reagan administration was the American equivalent of the passage of the Enabling Act.

There is no need to expand on the violent behavior of the Nazis or fascists, as there is no dispute of their long history of violence. Instead, the violence of various groups in the United States will be explored. Many readers will immediately think of the violence that arose in the 60s during the war protests. In fact, that is the great illusion of the media. The truth is that little violence was directly attributed to war protestors. In fact much of the violence that did come out of the war protests was the work of the FBI.

The real story of violence in the 60s was the violence inflicted upon the civil rights workers by the Klan. The early part of the 60s was marred by violence, inspired by the Klan and racial hatred of right wing groups. Eisenhower had to use National Guards to integrate the Little Rock school system. Kennedy had to use federal marshals to integrate Old Miss. When the Supreme Court order that busing was to be

used as a tool for integration, the violence spread nationally. The Klan burnt school busses in Michigan to prevent integration.
Since 1980, right wing groups such as the Order, which murdered the Denver talk show host, Berg, likewise have dominated the violence. The leader of the Order was killed in a shoot out with law enforcement. Another right wing group, the Posse Comitatus became a household word only after the Kahl shoot out with law enforcement in North Dakota. And of course there was the bombing of the Oklahoma federal building by the right winger McVeigh. Perhaps the greatest widespread use of violence since the Klan has been the bombing and violence directed against abortion clinics by members of the religious right.
Violence has been the hallmark of the hard right in America dating back at least as far as the Know Nothing Party in the 1800s and their hatred of Catholics. It was business leaders that hired Pinkertons to murder union organizers in earlier times. Yet there is relatively little in the way to support that left wing groups were equally violent. Groups like the Weathermen were violent, but the group was never more than a small fringe group. Its extremely small size limited the extent of its violence. One of the reasons for the lack of widespread violence from leftist groups has already been mentioned, the suppression of left wing groups by the FBI.
The last two traits of fascism will be explored together, as they are related by an underlying use of symbols and the inseparable nature of cults and religions. There is no doubt that both Hitler and Mussolini were in effect leaders of a cult. Their extremist views would rule out a major following otherwise. In fact, both promoted imagines consistent with cults. Both chose to use propaganda to promote larger than life imagines of themselves. Both Hitler and Mussolini were Catholics; neither appeared to be particularly active members of the church. Hitler referred to Christianity throughout Mein Kampf, as already shown by quotes of which a few more will be included here.
"The sword will become our plow, and from the tears of war the daily bread of future generations will grow."
"The more the linguistic Babel corroded and disorganized parliament, the closer drew the inevitable hour of the disintegration of this Babylonian Empire and with it the hour of freedom for my German-Austria people."
< " the Lord's grace smiled on his ungrateful children." >
Officially, the Nazis were a Christian group, if one can assign a religion to the group by the public policies they enacted. In this case, the assignment is based on the following prayer that the Nazis required to be recited in all public schools.
"Almighty God, dear heavenly Father. In Thy name let us now, in pious spirit, begin our instruction. Enlighten us, teach us all truth, strengthen us in all that is good, lead us not into temptation, deliver us from all evil in order that, as good human beings, we may faithfully perform our duties and thereby, in time and eternity, be made truly happy. Amen."67
It is also true that the Nazis dabbled in mysticism as well. Certainly some of the philosophers were pantheistic. But what really underlies

both the religious and mysticism aspects of the Nazis is the symbolism buried underneath. In fact, one follower of fascism believed that the masses were unable to understand anything other than mere slogans. From Mein Kampf the following quote concerns the symbolism hidden behind the Nazi flag.

" Not only that the unique colors, which all of us so passionately love and which once won so much honor for the German people, attest our veneration for the past; they were also the best embodiment of the movement's will. As National Socialists, we see our program in our flag. In red we see the social idea of the movement, in white the nationalistic idea, in the swastika the mission of the struggle for victory of the Aryan man, and by the same token, the victory of the idea of creative work, which as such always has been and always will be anti-Semitic."66

At first in the quote above, Hitler is referring to the old flag of Germany. The choice of red was based on stealing from the communists and was chosen deliberately to enflame the Marxists. Throughout Mein Kampf, Hitler refers to the value of propaganda and made extensive use of symbols to convene a subtle message of hatred.

The similarities to the right wing in America is seen. The Republicans have introduced a flag desecration amendment to protect their symbolism. Even more revealing was the letter Newt Gingrich distributed to members of GOPAC. In this letter, members were to use the following words to impart a negative image: decay, failure, sick, liberal, unionized, welfare, corrupt, greed and intolerant. The following words were to impart a positive imagine: share, legacy, control, truth, and courage.68

Cults are inherently fascist in nature. The leader demands total submersion into the cult. America today has seen far too many examples of cults and cult behavior. A recent example, would be the Waco incident that ended badly. However, there are several right wing groups that do exhibit cult behavior besides the religious groups; the LaRouchians, many of the militias, and the Order would all qualify as cults. In addition, much of the hard right inside the Republican Party has taken on a cult like behavior in their idolizing Reagan. The 105th Congress renamed the Washington airport after him. In the present Congress Congressman Matt Salmmon of Arizona has introduced a bill to deface Mt Rushmore by adding Reagan's imagine to the monument.69

It has been shown beyond any reasonable doubt that Hitler and the Nazis were right wing extremists best described as social darwinists, the antithesis of socialism. It was showed that the Nazis were best described by syndicalism model and that syndicalism is neither socialistic nor capitalistic, inherently. Syndicalism can be either depending upon the makeup; the Nazis were definitely capitalists in that there was no input from labor. All input was reserved for the industrialist. Further, it was shown that the industrialists openly defied Nazi desires in the case of the use of low-grade ores. It was also shown that many of the businesses that was government owned were taken over by the government prior to the Nazis, some dating all the way from the monarchy. Likewise, it was shown that many of the Nazi

programs would be classified as corporate welfare today. And it was shown that the real power behind the Nazi movement was the top elitist. This should be sufficient for anyone to dispel the myth that the Nazis were socialist, when in fact they were capitalistic extremists.
In defining fascism, three traits stand above all others, totalitarian, nationalism, and extreme corporatism. In fact, one can not have fascism without corporatism. Other traits of fascism, such as destructive divisionism and the use of violence are secondary. As fascist ideology evolved in the later half of the 20th Century, a happy face was put on fascism by its leaders as they down played the violence and racism. This can be seen best in the far right wing extremist groups currently active in the United States.
Additionally, there is one fact that absolutely places the Nazis and fascism in the extreme right wing portion of the political spectrum, and not the left. No one disputes that a communist revolution attacks the ruling elite of a country. Similarly, socialism and liberalism also attacks the same ruling elite, but the right wing extremists try to claim the opposite. In reality these systems merely seek methods to ease the burden and allow the lower classes to prosper rather than attacking the elite. The Nazis, on the other hand, did not attack the ruling elite of Germany. The rich industrialists were allowed to continue their ways, eased by laws that the Nazis enacted for their benefit. Likewise, the nobility of Germany was supported by the Nazis. In short, the Nazis adopted the ruling elite in Germany and supported them, the exact opposite of what a left leaning political ideology would support.
There is no better proof of the Nazi support for the ruling elite than looking at who supported Hitler in the 1930s in America. Granted, many lower class people were involved in the pro-Hitler movement just as in Germany. But like Germany, it was the rich industrialists that funded these groups. Hearst ordered his newspapers to print pro-Nazi articles. In fact, he had them print the Nazi propaganda directly from Gobbels. Irenee du Pont funded several pro-fascist groups. Henry Ford was well known for his praise of Hitler and funded many pro-Nazis in the 30s. Andrew Mellon and John D. Rockefeller were supporters of Hitler as well. No one is foolish enough to argue that these men were not part of the ruling elite or rich industrialists in America at the time. In fact, support for Hitler among the rich industrialists was rampant.
The continued propagation of such nonsense by the present right wing is nothing short of propaganda. It fits closely with the Nazis' use of propaganda and the symbolism proposed by Gingrich and his negative words. nor will it change the history of the right wing support of the Nazis.

neoliberal thinking
Hayek: the Daddy of Neoliberalism Friedrich von Hayek was the daddy. He was the Thatcher government's philosophical anchor. He was one of the high priests of neoliberalism. Hayek was the man whose book Thatcher famously slammed down on a table and declared "This is what we believe in"! The book in question was Hayek's second attack on socialism titled The Constitution of Liberty. His first, The Road to Serfdom is given similar veneration by Conservatives and is no less visceral in its straw man critiques of socialism and liberalism. This is an odd position for a man who was wedded to the ideals of classical liberalism but it is the social aspects of liberalism that Hayek rails against, not its economic message.
In the first chapters of the book, Hayek rails against both liberalism and socialism. He holds Britain (or England as he says) as a model economy and it is through Britain's free trade policies of the 19th century that his notion of liberty is predicated. he says,
The rule of freedom which has been achieved in England seemed destined to spread throughout the world
He ignores the methods by which the British idea of freedom was exported throughout the world: by the barrel of a gun. The Road to Serfdom was published in 1944. Hayek, an Austrian economist had taken a position at the London School of Economics. In Vienna he had been influenced by Ludwig von Mises, the founder of the Austrian School of Economics whose name has gone on to grace the title of a US right wing libertarian think tank. Interstingly enough for a self-confessed 'liberal', von Mises gave his support to Englebert Dollfuss's Austrofascist regime. Von Mises served as economic advisor to Dollfuss until the latter was assassinated by the Nazis. The Jewish von Mises would have found it difficult to live under a Nazi regime because of its racial purity laws.
The von Mises Institute 'scholar', Lew Rockwell has a selective take on fascism here. He completely rewrites history by airbrushing out von Mises involvement in Dollfuss's regime. Indeed apologists for von Mises will brush aside any suggestion of his collaboration with the "it was a lesser evil [than communism]" defence. We can see the start of a pattern here: those who would describe themselves as classical liberals would go on to offer their support for authoritarian regimes. Hayek and Friedman both lent their support to Pinochet's Chile; Hayek visited there in 1984. The libertarian rhetoric obscures the reactionary and authoritarian tendencies that are present within their strain of classical liberalism. He left Austria for the United States and together with Hayek and Friedman they created the Société du Mont- Pèlerin, which became a sort of anti-Kenynesian think-tank; a hothouse for neoliberal thinkers. You can read their Statement of Aims here.
Neoliberalism is essentially a late 20th century variant of classical liberalism. Whereas the the emphasis of classical liberalism was on free trade, limited government and so forth, Hayek and his contemporaries Ludwig von Mises and Milton Friedman, placed greater

emphasis on the notion of the individual as a sovereign being unfettered by regulation and free to act as agents consumers within a ‘liberal democracy’. This they posited would move human society along a progressive path because competition is supposed to be the natural human condition. A system that entirely deregulated economic activity would produce greater wealth and thus greater happiness and provide an outlet for competition. All social relations would become market relations: everything would be bought and sold in a market place (Gilbert, 2008). This included the welfare state, much of which was largely dismantled by Thatcher in the 1980′s. Neoliberalism is classical liberalism that has been taken to an extreme. Everything and everyone must make a profit. Thatcher once declared that she wanted to see a “nation of entrepreneurs”. Everyone would become an entrepreneur, un petit capitaliste, a shopkeeper, a spiv whether they wanted to be one or not. The former nationalized companies were expected to make profits for their shareholders, the lessons of history were apparently forgotten as the government sold the public a romanticized image of the age of the great railway companies. Nostalgia was a new way of selling government ‘products’. Gil Scott-Heron says in his beat poem, B-Movie

The idea concerns the fact that this country wants nostalgia. They want to go back as far as they can – even if it’s only as far as last week. Not to face now or tomorrow, but to face backwards.

What the government failed to mention was the fact that all the so-called Big 4 railway companies (Southern, LNER, GWR and LMS) were struggling before they were nationalized in 1945. LNER never made a profit. It is impossible for an enterprise that serves the public interest, such as a publicly-owned railway, to turn a profit. They are public enterprises. Such enterprises are necessary for the greater good of the nation because they stimulate the economic growth of which Hayek and his disciples claim to be in favour. Publicly-owned enterprises are therefore too important to be left to the devices of the market. As we have seen with rail privatization, the situation is chaotic: there are multiple train operating companies, a separate rail infrastructure company and at least 3 different regulators which includes the Department for Transport.

Material wealth underpinned this notion of the individual and the human being was magically transformed into a rational calculating machine free only to consume commodities. This is best illustrated by Adam Curtis’s examination of Nash’s game theory and its employment in the neoliberal project in The Trap – What Happened to our Dream of Freedom? (BBC2, 2007). In the film he says that the theory was employed by the West during the Cold War. It produced the so-called theory of Mutually Assured Destruction. Nash’s theory also filtered into the sphere of economic thought and resonated with Hayek. It was posited that human beings are rational beings that act only in their own self interest. There is no room for altuism. There is no alternative (TINA). One of the cornerstones of neoliberalism is its insistence on personal responsibility

Freedom to order our own conduct in the sphere where material circumstances force a choice upon us, and responsibility for the arrangement of our own life according to our own conscience, is the air in which alone moral sense grows and in which moral values are daily recreated in the free decision of the individual.
Responsibility, not to a superior, but to one's own conscience, the awareness of a duty not exacted by compulsion, the necessity to decide which of the things one values are to be sacrificed to others, and to bear the consequences of one's own decision, are the very essence of any morals which deserve the name.
Nietzsche would question the use of the word "morality" here. He said "morality is the herd instinct of the individual". Morality is imposed on others by those who dishonestly claim that they have some form of moral authority or a superior framework of morals to the Other.
The Tories were in the electoral wilderness for 13 years. During this time they had 4 leaders, 3 of whom offered little different to the standard Hayekian formula that had been fused with romanticism (Hague's Save the Pound campaign slogan). The election of David Cameron in 2007 was portrayed as a break with the past. He was a fresh- faced old Etonian with some blue blood in his veins. In spite of his evident poshness, Cameron was immediately compared to Blair but the comparison relied solely on the fact that they were both relatively young when they became party leaders. Blair had no philosophical anchor unless you count Giddens. Indeed Blair claimed to be "beyond ideology". He was neither right nor left (sic).
There is no such confusion with the Tories, they are right wing. But Cameron
A is A had to make some kind of break with the past. Hayek was deemed too old fashioned; too closely associated with the Thatcher years. So they turned to Ayn Rand.
Last year, I was watching Newsnight, I don't remember the exact month but they were running an item on Rand. If I remember correctly, Douglas Carswell, MP for Clacton, whom I had never heard of at the time, came on to talk about her.
That was the first sign of what was to come.
I also noticed that Rand was being talked about more in the quality press. There was talk of Brad Pitt and Angelina Jolie making a film based on Atlas Shrugs. Pitt and Jolie are self-confessed fans of Rand. There are others too ranging from Oliver Stone to Ronald Reagan. In April of last year, Carswell penned this blog.
Rand 's ideas are back. Or more accutrately, Rand's ideas never went away. They were simply ignored by that leftist elite that presides over our culture and our institutions. But now the internet means all those quangocrats, bogus academics and Guardianistas no longer call the cultural shots like they did.
The left are going to hate it.
Not just the left but anyone with a shred of humanity in their soul, Doug. Carswell talks of a "leftist elite" but what is this "leftist

elite”? He assumes that because the UK hasn’t fully embraced the authoritarian libertarianism of Hayek et al, then the country is dominated by these “leftist elites”. To be sure, this is a phrase that Carswell has borrowed from the US where Rand is still very big business. Carswell also ignores the fact that his own party, the Conservatives is a party full of elitists – many of them are millionaires and sit in cabinet.

Rand, like Hayek, placed the individual at the centre of her philosophy. The Noble Soul was the habitus for her ideas of rational self-interest or, as I would suggest it be called, rationalized selfishness. This selfishness was further rationalized as ‘freedom’. For Rand, freedom could only be achieved through unbridled laissez-faire capitalism which she described as “the unknown ideal”.

When I say “capitalism,” I mean a full, pure, uncontrolled, unregulated laissez-faire capitalism—with a separation of state and economics, in the same way and for the same reasons as the separation of state and church.

The sudden fetishization and appropriation of Rand’s philosophy by some Conservatives is odd. On the surface, there is little to choose between Hayek and Rand. In both cases, the arguments against collectivized activity by Hayek and altruism by Rand ignore the complexities of human existence which reduces humanity to its most bestial level; a lump of flesh that either has the capacity for money- making or not. Emotions, community and family ties, empathy, sympathy and kindness are all erased by Rand. If one should show kindness to another, she would argue, then it is done entirely out of self interest. She does not say why. Regarding emotions, she wrote,

Emotions are the automatic results of man’s value judgments integrated by his subconscious; emotions are estimates of that which furthers man’s values or threatens them, that which is for him or against him— lightning calculators giving him the sum of his profit or loss.

This is a rather strange rationalization of emotions, which are in themselves, hard to pin down. What this passage certainly reveals to us is Rand’s coldness. Perhaps it is because she thought of relationship with other people as a means to an end. So cold was she that she rationalized emotions as products in a system of exchange, profit and loss. Her coldness is further revealed in her pronouncements on humour.

Humor is the denial of metaphysical importance to that which you laugh at. The classic example: you see a very snooty, very well dressed dowager walking down the street, and then she slips on a banana peel . . . . What’s funny about it? It’s the contrast of the woman’s pretensions to reality. She acted very grand, but reality undercut it with a plain banana peel. That’s the denial of the metaphysical validity or importance of the pretensions of that woman. Therefore, humor is a destructive element—which is quite all right, but its value and its morality depend on what it is that you are laughing at. If what you are laughing at is the evil in the world

(provided that you take it seriously, but occasionally you permit yourself to laugh at it), that's fine. [To] laugh at that which is good, at heroes, at values, and above all at yourself [is] monstrous . . . . The worst evil that you can do, psychologically, is to laugh at yourself. That means spitting in your own face.

It is arguable that Rand had no sense of humour; it does not figure in the calculus of profit and loss.

Ayn Rand has been portrayed as a philosopher. Her philosophy, which she named Objectivism, has become the template for those who are either unfamiliar with Hayek or have been persuaded to read her fiction because it is supposed to be some sort of rite of passage.

It is possible to argue that Rand was deeply misanthropic, seeing only the potential for making money and rejecting human complexities as an almighty inconveniences – which she categorically ignored. She once said,

Money is the barometer of a society's virtue.

It is not clear what she means by the word "virtue" but she employs the word in the title of her book The Virtue of Selfishness. When Rand died her followers placed a wreath in the shape of a 6 foot high dollar sign beside her grave. It was an oddly pertinent symbol of her cupidity, though her supporters thought otherwise. Here she declares her selfishness

I swear, by my life and my love of it, that I will never live for the sake of another man, nor ask another man to live for mine.

Other people are simply there for their usefulness. Not because there is any desire for companionship or anything like it. Rand had no use for companions. She had disciples. She was a cult leader.

It is easy to see where phrases like "socialized medicine" comes from too,

Socialism may be established by force, as in the Union of Soviet Socialist Republics—or by vote, as in Nazi (National Socialist) Germany. The degree of socialization may be total, as in Russia—or partial, as in England. Theoretically, the differences are superficial; practically, they are only a matter of time. The basic principle, in all cases, is the same.

The alleged goals of socialism were: the abolition of poverty, the achievement of general prosperity, progress, peace and human brotherhood. The results have been a terrifying failure—terrifying, that is, if one's motive is men's welfare.

Of course this presupposes that capitalism has never been responsible for countless deaths, the loss of liberties or the imposition of an authoritarian regimes who were wholly supportive of the idea of neoliberalism. I am thinking here of Pinochet's Chile.

As this article from Mother Jones suggests, the world of Rand is an upside down one. In an deliberate inversion of logic, Rand's thesis is that the rich and powerful are the oppressed, while the poor, the vulnerable and the low-waged – whom she labelled "looters" and "moochers" – are the oppressors. It is now easier to recognize the source of the coalition's policies in relation to those on the lowest

income scales. Those who receive state welfare benefits (including those on Disability benefits) have been consistently painted as “scroungers” regardless of their circumstances. The Tory press has been at the forefront of this war against by printing a drip-feed of stories about “chavs”, “dole cheats” and so on. They have acted as the Conservative Party’s unofficial information service. It is arguable that the only reason the Conservatives have adopted Rand’s philosophy is to legitimate selfishness and greed. Rand’s ideas provide and instant justification to the false premise that the poor and the unemployed are stealing money directly from their pockets through taxation.

A better world is out there.

Engelbert Dollfuss Engelbert Dollfuss

Engelbert Dollfuss (b. October 4, 1892 d.July 25, 1934; in German spelled Dollfuß) was an Austrian Christian Social and Patriotic Front statesman, who was chancellor of Austria from 1932 and dictator of Austria from 1933 until his assassination by Nazi agents in 1934.

Born in Texing in Lower Austria as the child of the single and deeply religious mother Josepha Dollfuss by an unknown father, Dollfuss was educated at a Roman Catholic seminary before deciding to study Law at the University of Vienna and then Economics at the University of Berlin. Dollfuss had difficulty gaining admission into the Austro-Hungarian army in World War I due to his short stature – according to The New York Times he stood at 150 cm (4'11"),[1] but was eventually accepted and sent to the Alpine Front.

He was a highly decorated soldier and was briefly taken prisoner by the Italians as a POW in 1918. After the war he worked for the Agriculture ministry as secretary of the Farmers' Association and became director of the Lower Austrian Chamber of Agriculture in 1927, and in 1930 as a member of the conservative Christian Social Party was appointed president of the Federal Railway System. (One of the founders of the CS was a hero of Dollfuss's, Karl Freiherr von Vogelsang.) The following year he was named minister of agriculture and forests.

Chancellor of Austria

Dollfuss became Chancellor on May 20, 1932 as head of a coalition government, with the pressing goal of tackling the problems of the Great Depression, in a state (post-Versailles Austria) that was economically disadvantaged by the loss of a large part of its manufacturing industry situated in Bohemia. Much of Austria-Hungary's industry had been situated in the areas that were separated into Czechoslovakia and Yugoslavia with the Treaty of Versailles, and thus this manufacturing power was lost to Austria after World War I. Dollfuss's majority in Parliament was marginal (he had only a one-vote majority); deflationary policies implemented by his chief economic advisor, the famous Ludwig von Mises, would prove unpopular among the Social Democratic Workers' Party of Austria (SDAPÖ).

Dollfuss as Dictator of Austria

In March 1933, an argument arose over irregularities in the voting procedure. The president of the National Council (the lower house) resigned to be able to cast a vote as a parliament member. As a consequence the two vice presidents, belonging to other parties, resigned as well to be able to vote. As a consequence, the parliament could not conclude the session due to formal reasons. Dollfuss took the resignation of all three presidents as a pretext to declare that the National Council had become unworkable, and advised President Wilhelm Miklas to issue a decree adjourning it indefinitely. When the National Council wanted to reconvene days after the resignation of the three presidents, Dollfuss barred entrance to parliament by police force, effectively eliminating democracy in Austria. From that point onwards he governed as dictator by emergency decree with absolute power.

One motive of Dollfuss' actions was that with Adolf Hitler becoming German Chancellor in 1933, it looked increasingly likely that the Austrian National Socialists (DNSAP) would gain a significant minority in future elections. On the other hand, the Soviet Union's influence in Europe had increased throughout the 1920s and early 1930s. Dollfuss thus banned the DNSAP in June 1933 and the communists later on. Under the banner of Christian Social Party, he later on established a one- party dictatorship rule largely modelled after fascism in Italy, banning all other Austrian parties including the social democrats.

Austrofascism

Due to Austrofascism's modelling after Italian fascism, Dollfuss looked to Italy in support, especially also against Nazi Germany and gained a guarantee for Austria's independence by Italy in August 1933. He also exchanged 'Secret Letters' with Mussolini about ways to guarantee Austrian independence. Mussolini was interested in Austria forming a buffer zone against Nazi Germany. Dollfuss always stressed the similarity of Hitler's and Stalin's regime, and was convinced that Austrofascism under his reign and Italofascism under Mussolini could counter both national socialism and communism in Europe.

In September 1933 Dollfuss merged his Christian Social Party, the Nationalist paramilitary Heimwehr (Home Guard) (which encompassed many workers who were unhappy with the radical leadership of the socialist party) and other nationalist and conservative groups to form the Vaterländische Front. Dollfuß escaped an assassination attempt in October 1933 by Rudolf Dertill, a 22-year old who had been ejected from the military for his national-socialist views.

Austrian civil war and new constitution

In February 1934, Nazi agents in the security forces provoked arrests of social democrats and unjustified searches for weapons of the social democrat's already outlawed Republikanischer Schutzbund. Due to the steps of the Dollfuss dictatorship against known social democrats, the social democrats called for nationwide resistance against the Government. A civil war began, that lasted from February 12 until February 15, with partly fierce fighting primarily in the East of Austria, especially in the streets of some outer Vienna districts, where large fortress-like municipal workers' buildings were situated, and in the northern, industrial areas of the province of Styria, where Nazi agents had great interest in a bloodbath in between security forces and worker's militias. As a consequence of the resistance, that was put out by police and military power, the social democrats were outlawed, and its leaders were imprisoned or fled abroad.

New Constitution

Dollfuss staged a parliamentary session with just his party members present in April 1934 to have his new constitution approved as well as made all the decrees already passed since March 1933 "legal". The new constitution became effective on May 1, 1934 and swept away the last remains of democracy and the system of the first Austrian Republic.

Assassination

Dollfuss was assassinated in July 25, 1934 by eight Austrian Nazis (Paul Hudl, Franz Holzweber, Otto Planetta and others[2]) who entered the Chancellery building and shot him in an attempted coup d'état, the July Putsch.[3] It was only thanks to the Heimwehr which attacked the forming units of Nazi agents that the coup did not succeed. Another reason for the failure of the putsch was Italian intervention. Mussolini assembled the Italian army on the Austrian border and threatened Hitler with a war with Italy in the event of a German invasion of Austria as originally planned. The assassination of Dollfuss was accompanied by Nazi uprisings in many regions in Austria, resulting in further deaths. In Carinthia a large contingent of northern German Nazis tried to grab power but were subdued by the patriotic Heimwehr units. Similarly, the Nazi assassins in Vienna surrendered and were executed. Kurt Schuschnigg became the new chancellor of Austria.

Dollfuss is buried in the Hietzing cemetery in Vienna, alongside his wife Alwine Dollfuss and two of his children, Hannerl and Eva.

Trivia

Dollfuss was a very short man and his diminutive stature (5' 2" = 155 cm) was the object of satire, among his nicknames were 'Millimetternich' (referring to the autocratic imperial chancellor of Austria from 1815 - 1848, Prince Klemens Wenzel von Metternich), and the 'Jockey'. The New York Times also reported a series of jokes, including how in the coffee houses of Vienna, one could order a 'Dollfuss' cup of coffee instead of a 'Short Black' cup of coffee (black being the colour of the Christian Democratic political faction). In contrast to his own diminutive stature, his personal assistant and secretary Eduard Hedvicek, who later played a significant role in the unsuccessful attempt to save his life was very large and tall man (200 cm = 6'8").

As a consequence of the resistance, that was put out by police and military power, the social democrats were outlawed, and its leaders were imprisoned or fled abroad.

New Constitution

Dollfuss staged a parliamentary session with just his party members present in April 1934 to have his new constitution approved as well as made all the decrees already passed since March 1933 "legal". The new constitution became effective on May 1, 1934 and swept away the

last remains of democracy and the system of the first Austrian Republic.

Assassination

Dollfuss was assassinated in July 25, 1934 by eight Austrian Nazis (Paul Hudl, Franz Holzweber, Otto Planetta and others[2]) who entered the Chancellery building and shot him in an attempted coup d'état, the July Putsch.[3] It was only thanks to the Heimwehr which attacked the forming units of Nazi agents that the coup did not succeed. Another reason for the failure of the putsch was Italian intervention. Mussolini assembled the Italian army on the Austrian border and threatened Hitler with a war with Italy in the event of a German invasion of Austria as originally planned. The assassination of Dollfuss was accompanied by Nazi uprisings in many regions in Austria, resulting in further deaths. In Carinthia a large contingent of northern German Nazis tried to grab power but were subdued by the patriotic Heimwehr units. Similarly, the Nazi assassins in Vienna surrendered and were executed. Kurt Schuschnigg became the new chancellor of Austria.

Dollfuss is buried in the Hietzing cemetery in Vienna, alongside his wife Alwine Dollfuss and two of his children, Hannerl and Eva.

Trivia

Dollfuss was a very short man and his diminutive stature (5' 2" = 155 cm) was the object of satire, among his nicknames were 'Millimetternich' (referring to the autocratic imperial chancellor of Austria from 1815 - 1848, Prince Klemens Wenzel von Metternich), and the 'Jockey'. The New York Times also reported a series of jokes, including how in the coffee houses of Vienna, one could order a 'Dollfuss' cup of coffee instead of a 'Short Black' cup of coffee (black being the colour of the Christian Democratic political faction). In contrast to his own diminutive stature, his personal assistant and secretary Eduard Hedvicek, who later played a significant role in the unsuccessful attempt to save his life was very large and tall man (200 cm = 6'8").

Look carefully at the Madison crowd. There are Tea Party members uniting
with the liberal public employees supporters. They know who's really at
fault.

- Why not short the center conductor to ground?

One time I did have a Aluminum Ground Plate ~30"x45"
on Top of the Radio Desk with a SO-239 Plug and some
times I even remembered to disconnect the Antenna from
the Radio. Found that the Alpha-Delta Antenna Switch
with the 'Center' "COMM" {Disconnected & Grounded}
Position was easier to use and and hard to forget. :o)

Well,well,well. Some of us have radios that are priceless,yet it is
not very polite to brag about it ... This is how I look at it .

Understood. I may have heard it once or twice, but right now there's
a potent RTTY or some such thing right on top of that frequency 24/7.

FWIW, I also do not have a RAI Italy QSL (Back when they still
broadcast, they never replied to my reports), so either way I'm good
with it.

The "neoconservatives" were actually the successors of
FDR/Kennedy/Nixon/Rockefeller pro-business pro-war big-government liberals,
as opposed to the hippie/Carter/Obama anti-business anti-war big-government
liberals. As were both "neoconservative" Bushes. Neither Bush was less laws
or less programs as were Reagan and Gingrich prior to his strange
personality change after 9/11.

How about a 3G Netbook? Verizon is giving them away aren't they?

Do you have an HDTV? You can get a Roku standalone webstream device
for $60, and a Netflix account for $8 and watch old movies on demand.
Put an antenna on the roof for WLBT Channel 3. You'll need a DSL Elite
(3-6 Mbps) connection for about $35 a month and a $50 router. Oh, and a
TV antenna WLBT is now UHF so even a crummy bowtie on top of the
bookcase would probably work.

Not priceless, $2,000. I have spent maybe $4,000 total my whole life on
radio hobby stuff. Two years ago I had a Drake I bought with inheritance
and sold for cash. Then I had a Ten-Tec 516 while I got my feet wet in 2
way HF. Then I sold that, put in some Xmas bonus money, and got the
Elecraft, because I don't expect to be around for Cycle 25. This is my
last Solar Max and I'm not going through it without adequate equipment.
I deserve to be spoiled. I've earned it. I am not wealthy by any means.
Since I quit smoking 11 years ago I spend the $200 a month on fun
stuff, as a reward.

"Sometimes you gotta just say "what the fuck"

Irish Times online newspaper was the very first website I went to when I first glomped onto the Internet.
http:///www.onlinenewspapers.com

Heh, when I did, a red WARNING! thingy (at Irish Times online) popped up on my WebTV screen.

say cuzz, do you ever click on the SONIC 9565 Irish Music channel? I park my DirecTV thingy on that channel More than a LOT of times.

I've been using SW for about 40 years; but I don't recall TX location
details of European stations very well from that time, except who was
in business. Sicily would be fun, as would Malta and Corsica.

You can turn old, or new, Microwave ovens into Weapons.I once saw a website how to do that.

Do you remember the Amana Radar Range? In World War Two in England, some Americans were setting up a Radar.They had it set on too much power, or aimed too low/whatever.The nails in that old wooden Aircraft hanger started getting hot and popping.

the association of socialism with libertarianism predates that of
capitalism, and many anti-authoritarians still decry what they see as a
mistaken association of capitalism with libertarianism in the United
States. As Noam Chomsky
Noam Chomsky
Avram Noam Chomsky is an American linguist, philosopher, cognitive
scientist, and political activist. He is an Institute Professor and
professor emeritus of linguistics at the Massachusetts Institute of
Technology...

put it, a consistent libertarian "must oppose private ownership of the
means of production and the wage slavery
Wage slavery
Wage slavery refers to a situation where a person's livelihood depends
on wages, especially in a total and immediate way. The term's analogy
between slavery and wage labor may refer only to an "[un]equal
bargaining situation between labor and capital," particularly where
workers are paid...

which is a component of this system, as incompatible with the
principle that labor must be freely undertaken and under the control of
the producer."

In a chapter recounting the history of libertarian socialism, economist
Robin Hahnel
Robin Hahnel
Robin Hahnel is a Professor of Economics at Portland State University. He is best known for his work on participatory economics with Z Magazine editor Michael Albert. He is currently a visiting professor at Lewis & Clark College....

relates that thus far the period where libertarian socialism has had its greatest impact was at the end of the 19th century through the first four decades of the twentieth century.

Early in the twentieth century, libertarian socialism was as powerful a force as social democracy and communism. The Libertarian Internationalï¿½ founded at the Congress of Saint Imier
Anarchist St. Imier International
The Anarchist St. Imier International was an international anarchist organization formed in 1872 when the anarchist sections were expelled from the First International after the Hague Congress .The St...

who ever this nut is, the nut uses tried and true fascist techniques.

follow the principle that when one lies, one should lie big, and stick
to it. They keep up their lies, even at the risk of looking
ridiculous.

never allow the public to cool off; never admit a fault or wrong;
never concede that there may be some good in your enemy; never leave
room for alternatives; never accept blame; concentrate on one enemy at
a time and blame him for everything that goes wrong; people will
believe a big lie sooner than a little one; and if you repeat it
frequently enough people will sooner or later believe it.

The key-word here is blackwhite. Like so many Newspeak words, this
word has two mutually contradictory meanings. Applied to an opponent,
it means the habit of impudently claiming that black is white, in
contradiction of the plain facts."[6]
"To tell deliberate lies while genuinely believing in them, to forget
any fact that has become inconvenient, and then when it becomes
necessary again, to draw it back from oblivion for just so long as it
is needed...

If you tell a lie that's big enough, and you tell it often enough,
people will believe you are telling the truth, even when what you are
saying is total crap.

The aristocrats and gentlemen of the Right who made up the majority of
Hitler's cabinet hated the concept of democracy even more than the
Nazis did, All over Germany, thugs in brown shirts took possession of
the streets and roughed up Communists, socialists, and Jews; they
chased socialist mayors and officials out of government buildings

http://www.buy.com/prod/hitler-and-his-secret-partners/q/loc/106/30426378.html

Chapter 1: Financing the 1933 Elections
On the cold winter weekend of January 28, 1933, Germany was officially
without a government. Chancellor Kurt von Schleicher and his cabinet
had resigned on Saturday afternoon, and eighty-six-year-old President
von Hindenburg had not yet appointed a new chancellor. A nervous
tension spread over Berlin. Everyone waited for news; most felt

Germany was at an historic turning point.
Who would be the next chancellor? Hitler - the leader of the largest party, the Nazis, who pledged to destroy democracy? Papen - the aristocratic horseman who had been chancellor before Schleicher, but who had no popular following? Perhaps Schleicher again, if he could persuade the Social Democrats, the second largest political party in the country, to join him in a coalition? Governing Germany in the middle of an economic depression with nine million unemployed was not an enviable task. The country had just had three different chancellors in rapid succession. By tradition, the leader of the largest party was usually appointed chancellor. But the Nazis had been the largest party for over a year, and so far intrigues and political maneuvering had succeeded in keeping Hitler out of power. Everyone guessed what a Hitler government would mean. He had not kept his militarism, anti-Semitism, and dictatorial ambitions a secret.
Political intrigues were so numerous that weekend that no one really knew what was going on. Sensational rumors were being spread throughout the city. Some said an army coup was imminent, that Schleicher and the generals were about to abduct President von Hindenburg and declare martial law. There were also rumors of an armed Nazi uprising and a general strike by the socialist workers.
Hitler and Hermann Goering, the second most powerful man in the Nazi party, stayed up all night on Sunday, January 29, trying to figure out what Hindenburg might do. It was not until after 10 A.M. on Monday that Hitler received a summons to the president's office. Even at that point, the Nazis were not certain whether Hitler would be appointed chancellor or Hindenburg would ask him to serve as vice-chancellor.
Across the street from the Chancellery, in the Kaiserhof Hotel, Hitler's lieutenants were waiting, unsure of what was going on. Goebbels, the Nazi propaganda chief, said:

In the street the crowd stands waiting between the Kaiserhof and the Chancellery. We are torn between doubt, hope, joy and despair. We have been deceived too often to be able, wholeheartedly, to believe in the great miracle. [S.A.] Chief of Staff Roehm stands at the window (with binoculars) watching the door of the Chancellery from which the Fuehrer [the leader, Hitler] must emerge. We shall be able to judge by his face if the interview was a success. Torturing hours of waiting.
At last, a car draws up in front of the entrance. The crowd cheers. They seem to feel that a great change is taking place....
A few moments later, he is with us. He says nothing. His eyes are full of tears. It has come! The Fuehrer is appointed Chancellor. He has already been sworn in by the President of the Reich. All of us are dumb with emotion. Everyone clasps the Fuehrer's hand....Outside the Kaiserhof, the masses are in a wild uproar....The thousands soon become tens of thousands. Endless streams of people flood the Wilhelmstrasse. We set to work...at once.
Hitler's victory was not a complete one by any means. He had been appointed chancellor in a coalition government. Papen was to be his vice-chancellor, and all the powerful cabinet posts were held by

Papen's conservative allies, rather than the Nazis. But at the moment, Hitler's followers weren't worried about the details; for them the only thing that mattered was that Hitler was chancellor. They had come to power! All day, crowds gathered in the square outside the Kaiserhof Hotel and the Chancellery.

At dusk Nazi storm troopers in their brown uniforms gathered in the Tiergarten park, along with men of the Stahlhelm, an ultranationalistic veterans' organization, for a torchlight victory parade through the center of Berlin. As soon as it was dark, they came marching by the thousands through the Brandenburg Gate, carrying swastika flags and the black, white, and red flags of the German empire. Bands marched between the units, beating their big drums as the men sang old German military songs. But as each band came to the Pariser Platz, where the French embassy was located, they stopped whatever they were playing and, with an introductory roll of drums, broke into the tune of the challenging war song "Victorious We Will Crush the French."

The torches carried by the marchers glowed hypnotically in the darkness. To foreign witnesses, it was a frightening sight. "The river of fire flowed past the French Embassy," Ambassador François-Poncet wrote, "whence, with heavy heart and filled with foreboding, I watched this luminous wake." Liberal Germans found it an "ominous sight." It was, wrote one German reporter, "a night of deadly menace, a nightmare in...blazing torches."

As the marchers came by the Chancellery, there were tumultuous cheers for Hitler, who stood in an open window saluting them. He was so excited that night, he could hardly stand still. He was raising his arm up and down heiling, smiling, and laughing so much, his eyes filled with tears. "It was an extraordinary experience," recalled Papen, who was standing behind Hitler. "The endless repetition of the triumphal cry: 'Heil, Heil, Sieg Heil!' rang in my ears like a tocsin." When Hitler turned to speak with Papen, his voice choked with emotion. "What an immense task we have set for ourselves, Herr von Papen - we must never part until our work is accomplished." Hitler and Papen were much closer allies than anyone at the time imagined.

It was after midnight when the parade ended. Being too excited to sleep, Hitler, Goering, Goebbels, and a few other Nazis sat up talking for hours. They could hardly believe it had actually happened: they were in the Chancellery at last. That evening, Hitler said to Goebbels, "No one gets me out of here alive." It was one of the few promises he kept.

On the morning of January 31, Hitler's storm troopers gave the German people a glimpse of what Nazi rule would be like. All over Germany, thugs in brown shirts took possession of the streets and roughed up Communists, socialists, and Jews; they chased socialist mayors and officials out of government buildings and even broke into the private homes of their political enemies. When people complained to Papen, he laughed. "Let the storm troopers have their fling." Among his friends at the Herrenklub, an exclusive gentlemens club, he boasted: "We've

hired Hitler." To a skeptic he replied: "What do you want? I have Hindenburg's confidence. Within two months we will have pushed Hitler so far in the corner that he'll squeak."
The facts seemed to support Papen's optimism. Not only did Papen have Hindenburg"s confidence, but in fact the old president had promised never to receive Hitler unless he was accompanied by his vice-chancellor. Papen also held the important post of minister-president of Prussia, Germany's largest and most powerful state. From the composition of the cabinet, it seemed all the real power was in the hands of the conservatives: the aristocratic General von Blomberg was minister of defense, Baron von Neurath, a career diplomat, was foreign minister, and the old archreactionary Hugenberg was both minister of economics and minister of agriculture. The Nazis were outnumbered six to two.
The two Nazis in the cabinet, Wilhelm Frick and Goering, held posts that were thought to be insignificant. Frick was minister of the interior, but he did not control the police, which in Germany was under the jurisdiction of the individual state governments. Goering was made minister without portfolio, but with the promise that he would be minister of aviation as soon as Germany had an air force. He was also named minister of the interior of Prussia, an office that did not receive much notice by the public but did control the Prussian police.
The aristocrats and gentlemen of the Right who made up the majority of Hitler's cabinet hated the concept of democracy even more than the Nazis did. These men belonged to the old ruling class of the kaiser's Germany. They wanted to regain their old position of supremacy, lost in 1918. They wanted to restore the monarchy, suppress the socialist unions, avenge the loss of World War I, and make Germany the dominant power in Europe. It was obvious why such reactionary nationalists helped put Hitler in power: their goals and his were very similar.
Few people knew the full extent of Papen's collaboration with Hitler. Historians have said he "did more than anyone else outside the Nazi party to help Hitler to power." Papen helped Hitler because he was trying to control him and use the Nazis for his own aims.
Papen was a handsome aristocratic-looking man with distinguished gray hair and an officer's mustache. From an impoverished family of the Westphalian nobility, he became a General Staff officer, a skillful horseman, and a man of great charm. After a successful marriage to the daughter of a wealthy Saar industrialist, he bought a large block of shares in the Center party's newspaper, Germania. For a short time in 1932, Papen was chancellor, but his government had no popular support.
Papen believed it would be rather easy for an aristocratic officer like himself to manipulate a former corporal, like Hitler, and thus be able to use the Nazi's mass following to accomplish the aims of the upper-class conservative nationalists.
Hitler immediately began to outmaneuver his conservative colleagues. He reported to the cabinet that the Center party was making impossible demands and could not be counted on to form a coalition with the Nazis

and the Nationalists that would have a majority in the Reichstag. Because of this situation, Hitler argued he would have to call for new elections. The only "demand" the Center party made was that Hitler promise to govern constitutionally, but none of the other members of the cabinet bothered to check Hitler's statement. They agreed to new elections on the condition that Hitler promise that the composition of the cabinet would not change regardless of the outcome of the voting. New elections would provide Hitler with a chance to improve on the poor results the Nazis had received at the polls the past November. If the Nazis won a clear majority in the elections, they might be able to get rid of their coalition partners. Hitler had every reason to believe the election campaign would be a big success. The entire machinery of government, including the radio, was now under Nazi control and could be used for campaigning. The party had been flooded with new applicants for membership since he had become chancellor. In the cabinet meeting on February 2, Hitler discussed his preparations for the elections. Wilhelm Frick, the Nazi minister of the interior, proposed that the government set aside a million marks for the election campaign. Count von Schwerin von Krosigk, the minister of finance, rejected this suggestion. Hitler did not force the issue. He would have to get the money elsewhere.

The theme of the Nazi election campaign was to be the fight against communism. Hitler opened the attack in a late-night radio broadcast to the nation on February 1. He blamed the hard times Germany had gone through since 1918 on the Social Democrats, which had been the largest party in the Reichstag during most of those years. The Social Democrats, he reminded his listeners, were actually a Marxist party. "Fourteen years of Marxism," he said, "have ruined Germany; one year of bolshevism [communism] would destroy her. The richest and fairest territories of the world would be turned into a smoking heap of ruins. Even the sufferings of the last decade and a half could not be compared to the misery of a Europe in the heart of which the red flag of destruction has been hoisted." He went on to promise to put the unemployed back to work and save the peasants from bankruptcy.

On his fourth day in office, just after opening the election campaign, Hitler took time off to attend a very important dinner. He had been invited to the home of General von Hammerstein, chief of staff of the army, to meet the leading officers of the army and navy. In a speech that lasted almost two hours, Hitler explained his plans for rebuilding German military power.

The generals were the real power in Germany during the Weimar period. After World War II, many Germans tried to cover up the role certain members of the Officer Corps had played in helping to put Hitler in power. Many historians naively accepted this view, but the real story is quite different. Traditionally, the German Army ruled from behind the scenes and had the final "power to veto" any important issue. After the loss of World War I, the Versailles Treaty severely restricted the size of the German Army. The only way the generals could maintain mass training and develop new weapons was to finance

private paramilitary units, like the Free Corps, with secret army funds.
Hitler not only began his career as an army agent, but even in the 1930s he was supported by a powerful faction in the army. Over several years, General von Schleicher, who was in charge of a secret informal political department of the army, funneled over ten million marks to Hitler. Why? Many military officers wanted an authoritarian government that could unify the nation. The people needed to be infused with a new spirit of patriotism because powerful interests were planning a war of revenge against the Allies. Naturally there was a division of opinion among the generals as to how much power to give Hitler. Hindenburg originally had strong reservations about appointing a man from a lower-class background, like Hitler, chancellor. However, the aggressive action the Nazis took against Communists was admired by Hindenburg, and his relationship with Hitler rapidly improved.
One day, Hindenburg summoned Hitler when Papen was away from Berlin. Hitler informed the president that Papen was out of town and reminded him of the rule he (Hindenburg) had made, that the chancellor could visit him only when accompanied by the vice-chancellor. "The old gentleman [Hindenburg]," said Hitler, "replied that he wished to see me alone, and that in the future the presence of Papen could be regarded as unnecessary. Within three weeks, he had progressed so far that his attitude towards me became affectionate and paternal. Talking of the elections fixed for the 3rd of March, he said, 'What are we going to do if you fail to get a majority? We shall have the same difficulties all over again.'"
At the beginning of the election campaign, Hitler and Papen persuaded old President von Hindenburg to sign an emergency decree to protect law and order. The decree gave Nazi officials the right to prohibit public meetings. Newspapers could be suppressed if they "incited" civil disobedience or published "false" reports.
---

hitler the conservative:As a master of the "big lie", he was able to build substantial grass-roots support, based on a platform of anti-Semitism and anti-communism, conservative values

http://www.harley.com/people/adolph-hitler.html

Interesting People ADOLPH HITLER
If there is one person in history whose activities changed the world the most, that person is Adolf Hitler. Hitler (1889-1945) was the German dictator who founded the National Socialism (Nazi) movement in 1920. Within twonty years, Hitler had led Germany and its allies into World War II (1939-1945), by any measure, the most devastating war in history, with over 60 million people killed.
As a young man, Hitler served in the Bavarian army during World War I. (Bavaria is a part of Germany.) Although he was recognized for bravery, the experience embittered him, and he blamed Germany's defeat on Jews and Marxists.

In 1921, Hitler became the leader of the German National Socialist (Nazi) Party. In 1923, he unsuccessfully attempted to overthrow the Bavarian government — the so-called Beer Hall Putsch — and was imprisoned for nine months. During that time, Hitler wrote the book Mein Kampf ("My Struggle"), in which he laid bare his theories of hate and anti-Semitism, and his plans for world domination, a vision in which the German master race would create the so-called Third Reich. ("Germany will either become a World Power or will not continue to exist at all." — Vol. 2, Ch. XIV)

In time, Mein Kampf would become the bible of the Nazi party. The grew slowly, however, until the Great Depression, during which Hitler's skills as a speaker and organizer allowed him to capitalize on the growing social and economic unrest. As a master of the "big lie", he was able to build substantial grass-roots support, based on a platform of anti-Semitism and anti-communism.

Although he had some false starts, Hitler became Chancellor of Germany in 1933 and, within a year, was given full dictatorial powers by the government. In concert with other Nazi leaders — principally Goering, Himmler and Goebbels — Hitler crushed all opposition and took control of most facets of German life. In 1934, laws were passed to establish official anti-Semitism and to create the first concentration camps.

On August 2, 1934, the elderly president of Germany died. Within hours, Hitler declared himself Fuhrer (supreme ruler) of Germany. Technically, the declaration was illegal. However, less than three weeks later, a special election was held in which 90 percent of the German people voted to confirm Hitler as Fuhrer. Hitler was now the absolute ruler of Germany, a law unto himself.

Over the next few years, Hitler prepared Germany for war, carrying out many political maneuvers that allowed him to extend his power into smaller, less powerful countries. On September 1, 1939, Germany invaded Poland. Two days later, Britain, France, Australia and New Zealand (the Allies) declared war on Germany, formally starting World War II.

At first, Germany had a great deal of military success, invading and conquering much of Europe, North Africa and Russia. On December 11, 1941, Germany declared war on the United States, upon which the U.S. entered the war on the side of the Allies. Still, it was some time before the Germans would be stopped. Indeed, on April 26, 1942, Hitler declared, "This war no longer bears the characteristics of former inter-European conflicts. It is one of those elemental conflicts which usher in a new millennium and which shake the world once in a thousand years."

In the fullness of time, Hitler was proved to be wrong. On February 2, 1943, he received his first major setback when the Germans were defeated at Stalingrad in southwest Russia. Over the next two years, the Allies began to defeat Germany, one battle at a time and, by the spring of 1945, virtually all of Europe and North Africa had been liberated.

With the Third Reich collapsing around him and the Russians

approaching, Hitler hid in an underground bunker in Berlin. On April 29, 1945, as the Russians approached the city, Hitler married his longtime mistress Eva Braun. The next day, both Hitler and Braun committed suicide.

Do not mix both problems...

BBC world service is a real service for a lot of people around the world.
In a lot of countries it is difficult to get real information about what
is occurring on earth...

The fact that taxes are about to raise in UK is probably due to the fact
that companies did not pay enough taxes in the past...

Sebastien.

"A political movement beginning in the 1960s that blends traditional
liberal concerns for social justice with an emphasis on economic
growth."

Tell me again how Fox *actually* combines these things?

Most of the people watching TV at that time are probably (still)
women, although not so much anymore. Gotta cater to your audience.
Just switch on TCM - that's almost always better than any other
channel.

Yes, but conservative governments rarely believe in educating the
masses. Idiots are their best friends.

Interestingly enough, the jet engine deal was one of -three- things Cry-Baby Boehner tried to get passed -- and he failed on all three. So far, a much less effective House leader than Pelosi.

Well, at least Boehner now has something to -really- cry about. :-)

P.S. IMHO, Boehner is either incompetent or a liar. He was whining about Obama "creating" 200,000 Federal jobs. What he did not say, either due to incompetence (poor research) or just plain lying, was that 150,000 of those jobs were PART-TIME, temporary jobs, due to the Census. Heck, even if Ronnie Regan himself came back from the dead to be President, they -still- would have had those 150,000 temp Census jobs.

Yes, NASCAR is certainly in the national interest.

NASCAR is a Pentagon recruiting tool, and a pretty effective one from most
accounts.

Takes me to the message

"We apologize for any inconvenience. WWeek.com has recently redone its website to be more powerful, more user-friendly and more interactive. Occasionally, however, there's a ghost in the machine. Please use the search function to find the content you're looking for. If you have any questions or concerns,"

Then searches for tigger, tiger, ans Wu find nothing. Maybe they deleted whatever it was.

1227. "stations active at 23h UTC"

Newsgroup: rec.radio.shortwave
Date: 2011-02-19 00:06:11 UTC

I cut the lists of Eibi etc so I can see what is active at 23h utc:

Could make a web site like I did for language / station.

eg 6040 gives:
2300-0000;6040;0800-0400;sum;B;Radio Clube Paranaense;P;B;;;;;23
2300-0000;6040;0300-0200;;BLR;Belaruskoye Radio 1;BY;EEu;;;;;23
2300-0000;6040;2300-2400;;CHN;China Radio Int.;E;ENA;;;;;23
2300-0000;6040;2300-0030;;CHN;CNR 2 China Business R.;M;CHN;;;;;23
2300-0000;6040;2150-0300;;CHN;PBS Nei Menggu;MO;CHN;;;;;23

eg 5035:
2300-2345;5035;0900-2345;;B;R.Educacao Rural, Coari;P;B;;;;;23
2300-0000;5035;0700-0200;;B;Radio Aparecida;P;B;;;;;23

eg 9620
2300-0000;9620;2300-0100;;CHN;CNR 2 China Business R.;M;CHN;;;;;23
2300-0000;9620;2300-0500;;E;Radio Exterior Espaa;S;SAm;;;;;23
2340-2345;9620;2340-2345;Mo-Fr;E;Radio Exterior Espaa;CT;SAm;;;;;23
2345-2350;9620;2345-2350;Mo-Fr;E;Radio Exterior Espaa;GL;SAm;;;;;23
2350-2355;9620;2350-2355;Mo-Fr;E;Radio Exterior Espaa;V;SAm;;;;;23
2300-0000;9620;2200-0030;;USA;Voice of America;IN;INS;;;;;23

wrth.com made some coloured schedules like the Sony or Panasonic schedules
were.. but wrth uses only 10 colours for languages ...

Postscript is a language that could be used, or svg ..

Liberty Net: February 12, 2011

http://3950.net/2011/02/liberty-net-february-12-2011/

by Kevin Strom, WB4AIO

A CORONAL MASS EJECTION event almost blanked the 75 meter band this week ï¿½ many signals were more than 50 dB down from normal strength ï¿½ but the check-ins to the Liberty Net, and exciting ideas and debate, continued at an energetic pace nevertheless.

Hereï¿½s a brief summary of some of the ideas put forth this time on amateur radioï¿½s most impressive discussion net:

ï¿½ In a recent marketing campaign, J.P. Morgan has been practically begging its customers to let it hold their physical gold. What Morgan isnï¿½t telling them is that the firm is often shorting gold on the market and ï¿½borrowingï¿½ its customersï¿½ assets (without compensation) when they must cover, to avoid driving up the price. All of this is directly contrary to their customersï¿½ interests and constitutes fraud. (36 minutes)

ï¿½ Is race-mixing Supreme Court Justice Clarence Thomas going to get in trouble over the ï¿½financial disclosureï¿½ laws of the very establishment he has supported his entire professional life? (44 minutes)

ï¿½ The replacement of the dollar as the IMFï¿½s reserve currency (itï¿½s being replaced with the SDR, or Special Drawing Rights) is a game-changer for Americans. Bankers and their politician employees will now be able to engage in massive inflation (ï¿½quantitative easingï¿½) far beyond anything seen before. (1 hour 3 minutes)

ï¿½ The US dollar is now judged to be a ï¿½second-rate currencyï¿½ by the Chinese ï¿½ who give their own currency the same rating. (1 hour 8 minutes)

ï¿½ Itï¿½s time for ï¿½reverse foreign aidï¿½: The parasites of the world, especially Israel and the puppet Egyptian regime, have been living off the American taxpayer long enough. As W1WCR puts it, ï¿½itï¿½s payback time for parasites.ï¿½ (1 hour 10 minutes)

ï¿½ Sure, Mubarak was a torturing, lying, murdering puppet of Zionism and the CIA ï¿½ but he did balk at attacking Iran. Is the military junta that replaced him any less bought and paid for? Will they have even his minimal scruples? (1 hour 15 minutes)

ï¿½ Now that traitors in the British government have flooded the UK with tens of millions of Third Worlders, the native British have lost millions of jobs and spent trillions of pounds for their own dispossession ï¿½ much the same process that has occurred in the United States. (1 hour 43 minutes)

ï¿½ One hopeful thing about the Internet era is that the news and entertainment monopoly of the ethnically-distinct billionaire elite can be broken by anyone with a modem and a computer. But are the American people intelligent enough to really break free? (2 hours 40 minutes)

The Liberty Net ï¿½ amateur radioï¿½s longest-running discussion net ï¿½ is on the air every Saturday night at 10PM Eastern Time on or around 3950 kHz SSB (lately itï¿½s been higher in frequency ï¿½ as high as 3989 ï¿½ to avoid DRM interference).

Remember, thanks to N2SAG and N2IRJ and W1WCR, you can listen live ï¿½ and chat live ï¿½ via the Web whenever the Liberty Net is on the air. And, as always, you can download the net right here at http://3950.net and listen at your leisure.

The LIBERAL FASCIST Path to Socialism:
Pt.1 http://www.youtube.com/watch?v=fPyoEbU_wc4
Pt.2 http://www.youtube.com/watch?v=Dvuxr7v4xzk

"Just as the Left was drawn to the communist killing machines of Lenin, Stalin, Mao, Pol Pot, and Castro, so too it is now attracted to radical Islam."

"The contempt that German Hitlerytes had for "Bolshevism" or "marxist Jews" generally should also not mislead us in assessing the similarity between National Socialism and Communism. Leftist sects are very prone to rivalry, dissension, schism and hatred of one-another. One has only to think of the Bolsheviks versus the Mensheviks, Stalin versus Trotsky, China versus the Soviet Union etc. Similarity does not preclude rivalry. Hitler and Stalin were literally brothers in arms BEFORE they became rivals. That socialist brothers sometimes fall out should not prevent us from noting the brotherhood concerned."

[...]

"The fundamental dogma of all brands of socialism and communism is that the market economy or capitalism is a system that hurts the vital interests of the immense majority of people for the sole benefit of a small minority of rugged individualists. It condemns the masses to progressing impoverishment. It brings about misery, slavery, oppression, degradation and exploitation of the working men, while it enriches a class of idle and useless parasites."

"This doctrine was not the work of Karl Marx. It had been developed long before Marx entered the scene. Its most successful propagators were not the Marxian authors, but such men as Carlyle and Ruskin, the British Fabians, the German professors and the American Institutionalists. And it is a very significant fact that the correctness of this dogma was contested only by a few economists who were very soon silenced and barred from access to the universities, the press, the leadership of political parties and, first of all, public office. Public opinion by and large accepted the condemnation of capitalism without any reservation."

[...]

Dr. Ludwig von Mises - http://mises.org/midroad.asp

[...]

"The term 'planning' is mostly used as a synonym for socialism, communism, and authoritarian and totalitarian economic management. Sometimes only the German pattern of socialism-Zwangswirtschaft-is called planning, while the term socialism proper is reserved for the Russian pattern of outright socialization and bureaucratic operation of all plants, shops, and farms. At any rate, planning in this sense means all-around planning by the government and enforcement of these plans by the police power. Planning in this sense means full government control of business. It is the antithesis of free enterprise, private initiative, private ownership of the means of production, market economy, and the price system. Planning and capitalism are utterly incompatible. Within a system of planning production is conducted according to the government's orders, not according to the plans of capitalists and entrepreneurs eager to profit by best filling the wants of the consumers.

"But the term planning is also used in a second sense. Lord Keynes, Sir William Beveridge, Professor Hansen, and many other eminent men assert that they do not want to substitute totalitarian slavery for freedom. They declare that they are planing for a free society. They recommend a third system, which, as they say, is as far from socialism as it is from capitalism, which, as a third solution of the problem of society's economic organization, stands midway between the two other systems, and while retaining the advantages of both, avoids the disadvantages inherent in each.

"These self-styled progressives are certainly mistaken when they pretend that their proposals are new and unheard of. The idea of this

third solution is very old indeed, and the French have long since baptized it with a pertinent name; they call it interventionism. Hardly anybody can doubt that history will link the idea of social security, more closely than with the American New Deal and with Sir William Beveridge, with the memory of Bismarck whom our fathers did not precisely describe as a liberal. All the essential ideas of present-day interventionist progressivism were neatly expounded by the supreme brain-trusters of imperial Germany, Professors Schmoller and Wagner, who at the same time urged their Kaiser to invade and to conquer the Americas. Far be it from me to condemn any idea only on account of its not being new. But as the progressives slander all their opponents as old-fashioned, orthodox, and reactionary, it is expedient to observe that it would be more appropriate to speak of the clash of two orthodoxies; the Bismarck orthodoxy versus the Jefferson orthodoxy.

[...]

Dr. Ludwig von Mises - 1952 - http://mises.org/books/planningforfreedom_mises.pdf

The origins of the modern left can be traced back to the famous passage in Rousseau’s Discourse on the Origin and Foundations of Inequality, in which he condemned the institution of private property:

“The first man, who after enclosing a piece of ground, took it into his head to say, ‘this is mine,’ and found people simple enough to believe him, was the real founder of civil society.”

Added Rousseau: “How many crimes, how many wars, how many murders, how many misfortunes and horrors, would that man have saved the human species, who pulling up the stakes or filling up the ditches should have cried to his fellows: Beware of listening to this impostor; you are lost, if you forget that the fruits of the earth belong equally to us all, and the earth itself to nobody!”

Around the 1830s, a faction of French liberals gravitated toward Romanticism and the philosophy of the late Rousseau, proclaiming that capitalism, private property, and the increasing complexity of modern society were agents of moral decay -- both for the individual and for society at large. This is essentially the worldview that has made its way, through history, into the collective mind of the modern left; it is a worldview calling for a revolution that not only will topple the existing capitalist order and punish its corrupt leaders, but that also will replace that order with a socialist regime where the utopian ideals of perfect justice and equality will reign. Such an ambition can be put into effect only by a totalitarian state with the authority to micromanage every facet of human life, precisely the end-point toward which the policies and crusades of the modern left are directed.

When the term “liberalism” (from the Latin word liberalis, meaning “pertaining to a free man”) first emerged in the early 1800s, its hallmarks were a belief in individual rights, the rule of law, limited government, private property, and laissez faire economics. These would remain the defining characteristics of liberalism throughout the liberal epoch (generally identified as the period of 1815-1914). Yet the modern left, which portrays itself as the agent of enlightened commitment to “liberal” causes, in fact stands for the antithesis of each of the foregoing liberal ideals. Contrary to its self-definition, the left is neither “liberal” nor “progressive,” but rather a reactionary force that seeks to resurrect the traditions that characterized the epoch which preceded the rise of classical liberalism.

http://www.discoverthenetworks.org/viewSubCategory.asp?id=1217

The following is from The World Book Encyclopedia, 1947 edition:
The chief characteristics of Fascism are as follows:

THE CULTIVATION OF IGNORANCE

Fascism, like all forms of government, rests firmly on the sincere consent of a large part of the population... To maintain this consent, the Fascist leadership must cut off the people from any information which might cause them to doubt the complete correctness of the fixed Fascist principles... All forms of communication are carefully censored, so that the public will receive only those facts that the dictators want known... Travel to other countries must be controlled, and freedom of speech and assembly must be rigorously suppressed...

http://www.americanthinker.com/blog/2010/10/arrest_warrant_filed_for_rahms.html
http://www.youtube.com/watch?v=sce0TLA5UYE
http://bigjournalism.com/dloesch/2010/10/13/exclusive-cbs2-reporter-threatens-journalist-over-rahm-questioning/

SUPPRESSION OF LABOR AND INDUSTRY

Fascism in Italy and Germany at first won the support of the wealthy classes, both landed and industrial...

http://www.discoverthenetworks.org/individualProfile.asp?indid=977
http://www.discoverthenetworks.org/viewSubCategory.asp?id=589
http://www.keywiki.org/index.php/George_Soros

These people saw in Fascism a protection against the demands of farmers and other workers... Both regimes at first upheld the rights of private property... They subjected the working classes to a rigorous discipline... As soon as they were firmly established, the dictators began to limit profit, impose capital levies, and regulate business in great detail...

Employment Rates under Liberal Fascism
http://www.youtube.com/watch?v=9ssIhiD8kKM

.....sound..familiar?.....

THE POLICE STATE

Fascism depends upon the police to crush all opposition or dissent. Secret police spy on the whole population, and any casual remark against the regime leads to swift and severe punishment... Opposition parties are dissolved. Intellectual, athletic and recreational organizations are usually brought under the control of the Fascist authority... The ruthlessness of the police gradually becomes less noticeable... This is because within a year or so after a Fascist government takes power, vigorous opponents of the regime have either left the country, been killed or jailed...

LIBERAL FASCIST union thugs trying to upend the results of Wisconsin elections by force.
http://www.jsonline.com/news/opinion/116355379.html

Read more:
http://www.chicagonow.com/blogs/publius-forum/2011/02/teachers-union-thugs-comparing-people-to-hitler-shutting-down-schools-losing-their-argument.html#ixzz1EGR2iKwW

(Both Fascist and Communist leaders make use of the police state... Every absolute government has used the police state to some degree... It was highly developed among the ancient Assyrians...)

.....sound..familiar?.....

EXTREME NATIONALISM

Fascism is highly nationalistic... It tries to identify its principles with the country, so that disagreement will look like treason... Some other country, or some group within the country, is chosen to serve as the "enemy" and made to appear as the cause of all evils or misfortunes... For example, the Nazis in Germany represented their movement first as a crusade against the Jews, then as a fight against Communism and later as a struggle against the "attacks" from whatever neighboring country they wished to subdue or occupy... Extreme nationalism often becomes a kind of racial fanaticism... Sometimes it combines racial and religious bigotry...

When you hear the Liberal Fascist JackAss propaganda that THEY are the true patriots then you know the time is near. Look for it from the socialist Labor Unions such as the SEIU!
http://www.discoverthenetworks.org/groupProfile.asp?grpid=6535

MILITARISM

Fascism maintains among the people a permanently warlike frame of mind... Every citizen feels that he is mobilized against enemies of the regime from within, and against possible foreign foes... The dictator usually comes to power during a period of economic crisis or depression... He relieves the depression partly by employing many people in the making of armaments... To justify this procedure, he must convince the people that the country is threatened, and must point toward some of the enemies against whom the armaments may be

needed...

Listen to 0baMa0's rhetoric and his fascistic support from the
Liberals
.....sound..familiar?.....

Here are the Three (3) Phases of Liberal Decay into Fascism:

1. Liberalism (Well Meaning, Nice Sounding, "Do-Gooder" Policies
Always Doomed to Fail)

2. Liberal-Progressivism (The Drive for Social Improvement through
Change and Promising Hope;
More Draconian Liberal Polices are Implemented to Transform The People
into a New Society that
Is Guided by 'The Party') The Party Elite Have Complete Power and Rule
Un-Checked.

3. Liberal-Fascism (The Rise of the Party Leader over 'The Party'
Ensuring the Unity and Uniformaty of 'The Party' and Enforcing The
Will of 'The Party' Over the People.) The Party Leader will Cleanse
'The Party' of All those Who Are NOT of 'The Party'; and 'The Party'
Will Cleanse the People of All Those Who Do NOT Support 'The Party'
and The Party Leader. The Party Leader Now Has Complete and Total
Power and Rules by the Force of His Iron Will.

Brother/Sister Are You "OF" 'The Party' ?

Does The Teaching Of 'The Party' Abide Within You ?

Does The Thoughts Of 'The Party' "Leader" Guide Your Thoughts ?

Let 'The Party' Change Your Life and Transform You !

Let 'The Party' Give You Hope and Renew You !

When you vote cut them off at the knees from your Tax Dollars.
Vote with your wallet.

That's right - the British conservative government has lost interest
in educating.

Where'd that come from?

Fresh off the wikipedia:

Neoliberalism describes a market-driven[1] approach to economic and
social policy based on neoclassical theories of economics that stresses
the efficiency of private enterprise, liberalized trade and relatively
open markets, and therefore seeks to maximize the role of the private
sector in determining the political and economic priorities of the state.

The "conservatives" (not like Dirksen or Goldwater) need the zombie army of idiots to vote for them. The queers are gonna take your guns away!

It's a fairly old structure. Wasn't as strong as modern conditions
require (as we found out on 9/11) .

When people can't get get food on a daily basis-- a lot of shady
radicals come out from the underground . Spanish Civil War is just a
small example . Ever heard of Bonaparte ? He was promoted from a
obscurity to support the Revolution !

OK, well - I guess there's more than one perspective on it. In any
case, it does not sound exactly like what Fox is doing.

I got some in the 1950's because my dad was cheap.

I was building some electronic equipment for the 1958 local science fair. Rather than buying a chassis, my dad had this great idea of getting some of the transcription disks from a local radio station, and then having me make the chassis by having a local repair shop do the bending.

So, we spent a long evening at KMOX transmitter outside St. Louis and came home with a couple of 16" transcription disks. I stripped off the black plastic and marked the disks for bending.

The local shop bent them for me, commenting on my cheap dad. He was well known for cheapness.

Yes, they were indeed aluminum as I found out for sure the hard way in attempting to solder ground leads directly to the chassis.

It was a heck of a lot of work to save just a few bucks, but that was my old man and his cheapness.

Who knows what treasures I destroyed, or what daily drivel I destroyed, in saving a few bucks.

Then too, many people didn't value radio that much in the twilight of the OTR shows, and the dawning of TV as the medium of entertainment.

Fox News, and a bunch of radio talk show hosts are all we conservatives have standing between us and a socialistic state where the government runs and controls everything and there is no more free market enterprises left. And the socialists are even now trying to make laws against them to put them off the air....Whatever happened to Michael Savage? (for example)

RAI was pretty strong in 2002...but they were not paying attention to
reports any more, either by snail mail or e-mail.

Unfortunately, these two things are incompatable. Traditional liberal concerns involve, "spreaqding the wealth" by stealing from the rich and giving to the poor. This is the antithesis of capitolism, where the smart, hard working, succeed, and the measure of their success is seen in their bank accounts. Stealing their money taks away their incentive to learn more and work harder. So it effectively kills off the best in the society and turns a greater percentage of the people into ner-do-wells and bums that just live off the system and do nothing. And, as a result, the society goes downhilol as has ours during the last 50 years. We graduate less and less engineers and more and more basket weavers, while other countries are rushing past us at an ever increasing rate. We will not survive this....Trust me.

- Fresh off the wikipedia:
http://en.wikipedia.org/wiki/Neoliberalism
-
- Neoliberalism describes a market-driven[1] approach
- to economic and social policy based on neoclassical
- theories of economics that stresses the efficiency of
- private enterprise, liberalized trade and relatively open
- markets, and therefore seeks to maximize the role of
- the private sector in determining the political and
- economic priorities of the state.

I've seen some info that indicates that they sent out some cards after 2002, but it seems as
though they were generic n/d cards.

Not sure about BBC, but Deutsche Welle certainly had a relay station.

I have QSL's from IBRA Radio which I think used the DW station, as well as Xandir Malta which used 9670 back in 1982 for their "Malta Calling" program.

I think Libya also used Malta as a relay for a time as I think I have a QSL for that as well.

Yes it's much better to have Goldman Sachs and ExxonMobil run and control everything. Without government, how does the little guy stand up to big business?

I listen to the Savage Weiner on KKOB 770 every weekday evening. He is a liberal putting on a show. He is an old school macrobiotic hippie who pals around with Jerry Brown. His angry unhinged right-wing "Savage" personna is shtick. Pure shtick,

The public airwaves belong to the people, who deserve to have their needs met by the radio. It serves no one but a select view if 95% of the opinion on the radio is the same.

Wow. That's pretty convoluted. Progressive taxes have been around a lot longer than modern capitalism. Jefferson said the rich should pay more because the country needs it and they can afford it. Import tariffs were extra stiff on luxury goods because the rich were the people who bought them.

There was no capitalism in 1775. It came as a result of the Industrial Revolution.

High taxes on business profits encourage entrepreneurs to put the money back in the business, not in their "bank accounts" where it does no one any good.

You don't listen (although it is quite musical); you see text printed on your computer screen.

My internet radio uses WiFi to connect to the web.

I have 2 HF radios on right now, one on 7035 the the other on 10140. I have a BCT* winking away in my face, and yes I'm listening to the Beeb via the web. So fuck you.

Liberal Democracy is the type of government

Constitutional Republic is the form of Liberal Democracy we currently use. (Personally I'd prefer a Parliamentary government where minorities have a voice and the head of state can be recalled by a simple majority vote of no confidence).

An informed electorate is required for healthy representative government. This requires good schools and good mass media. We have neither. The oligarchs planned it that way. They hate common people and do not feel they should have a voice.

Here is a Table with the Weights of AWG Wires :

* Feet-per-Pound of Wire
http://www.interfacebus.com/Copper_Wire_AWG_SIze.html
Roughly 80 Feet of # 14 AWG is around One Pound Weight.

* Weight of 1000 Feet of Wire
http://www.engineersedge.com/copper_wire.htm
http://www.rfcafe.com/references/electrical/wire-cu.htm
Roughly 1000 Feet of # 14 AWG is around 12 Pounds Weight.

AWG = American Wire Gauge
http://en.wikipedia.org/wiki/American_wire_gauge

It ain't "Obama's" idea and it ain't a "Kill Switch". Lieberman
introduced the bill to which you refer, in the 111th Congress. The
bill died in committee and was wiped off the books when the 111th
ended. Lieberman has introduced Bill S. 413 in a second attempt.

See:

http://hsgac.senate.gov/public/index.cfm?FuseAction=Press.MajorityNews&ContentRecord_id=e3
633456-5056-8059-7606-
849a53cbff1a

"Lieberman: "Yet, some have suggested that our legislation would
empower the President to deny U.S. citizens access to the Internet.
Nothing could be further from the truth. We would never sign on to
legislation that authorized the President, or anyone else, to shut
down the Internet. Emergency or no, the exercise of such broad
authority would be an affront to our Constitution."

The Kill Switch falls into the same category as Death Panels.

From:

http://www.internetindustrywatch.com/2011/02/internet-kill-switches-big-time-and-small-tim
e/

"In the U.S., Sen. Joe Lieberman (pictured) has drafted, with the
administrationï¿½s support, the ï¿½Protecting Cyberspace as a National
Asset Actï¿½ ï¿½ a wide-ranging and unprecedented set of legal powers
that would give the U.S. Department of Homeland Security (DHS) the
authority to regulate, restrict, reroute, or completely cut off
Internet traffic in the U.S. Still, the debunkers say that thatï¿½s
still not a ï¿½kill switch.ï¿½ Free speech advocates call that
quibbling, and counter that technological ability follows soon after
legal authority."...

"But critics ask: If the authority is really intended to be so benign, why is there is provision in the bill forbidding any review of executive branch shutdown orders by the courts?"

With all good wishes,

Kevin, WB4AIO.

The, "Industrial revolution" was just an improvement in technology that is a natural result of capitolism, and not the cause of it. It could be argued that without capitolism, there would have never been an industrial revolution. For sure, it started here in the US under a free enterprise system. thousands of years of fudalism sure didn't produce it. It was the result of greed, and the prospect of making more money which you could KEEP, and not have to give to the government in taxes, so they could blow it into space by sending a dozen ass-naughts to the moon, or whatever other hare-brained schemes they came up with.

And, the dumbest statement I have heard on this forum in the last couple of years, is, "> High taxes on business profits encourage entrepreneurs to put the
> money back in the business, "

But it sure tells me that you think just like the present Democratic administration does.....Do you really think that entrepeneurs are encouraged to invest more money in their businesses by having to pay higher taxes? Give me a break!

The, "Industrial revolution" was just an improvement in technology that is a natural result of capitolism, and not the cause of it. It could be argued that without capitolism, there would have never been an industrial revolution. For sure, it started here in the US under a free enterprise system. thousands of years of fudalism sure didn't produce it.

From Wikipedia:

The Industrial Revolution was a period from the 18th to the 19th century where major changes in agriculture, manufacturing, mining, transportation, and technology had a profound effect on the socioeconomic and cultural conditions of the times. It began in the United Kingdom, then subsequently spread throughout Europe, North America, and eventually the world.

And, the dumbest statement I have heard on this forum in the last couple of years, is, "> High taxes on business profits encourage entrepreneurs to put the
> money back in the business, "

But it sure tells me that you think just like the present Democratic administration does.....Do you really think that entrepeneurs are encouraged to invest more money in their businesses by having to pay higher taxes? Give me a break!

The statement is true. The tax code is set up with various incentives (tax breaks) for companies that reinvest capital (not CAPITOL, that's a building) back into their business (hiring, research and development, infrastructure, etc.)

100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?

100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again.
Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also

increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?

A) Industrial Revolution did NOT originate in the US . B) We have
to understand that the general word 'Capitalism' includes many
variations, eg. Merchant Capitalism, Industrial Capitalism, Banking
and etc. C) Business prospers most when the role of gov't is anemic
or totally nonexistent ! D) High taxes can destroy the most
vibrant economy D) Feudalism did not disappear totally in our
times . E) In these tough economic times severe budget cutbacks have
crippled one of the most advanced scientific organizations that ever
existed on the face of the Earth (NASA) . Space exploration is pretty
much reduced right now . E) Despite what we hear from various
sources, it was the PRESENT administration that bailed out
GM,Chrysler,several banksters and insurance crooksters . One hand
washes the other .

NnUa,

There you go again talking about 'Hitler' and the 1930s
{Ancient History back in grand papa's days . . .}

While I am Talking About Prez-A-Duntz Obama and
the Obama Regime Right Here in the 21st Century
{Today's Realities : The Here and Now ! }
.
?Q? : Why Did Prez Obama Use The Hate Speech
Code Word "ATTACK"-wrt- To the State of Wisconsin
and The Union Workers !
http://groups.google.com/group/rec.radio.shortwave/msg/af57867c1c50aa53

* ? Is Prez Obama Trying To Cause More Civilian
Unrest in the State of Wisconsin !
* * Obama The Fear Monger
* * Obama The Hate Monger
* * Obama The Agitator
* * Obama The Revolutionary
? IS THIS HOPE AND CHANGE !

* US Prez-A-Duntz's Should Not Use Hate Speech
Code Words like "ATTACK" Against Other Americans
and Make Them Enemies of 'The State'.

* Prez Obama Needs To Apologize for Using The
Word "ATTACK" -wrt- The State of Wisconsin and
that State's Union Workers.

* "BO"ing© = "BO"-Bashing© = Blaming Prez "BO" !
.
-but- IMHO : Barack H. Obama 'the man' is a NICE Man
and a GOOD American : Just Not a Leader of Presidential
Stature and Ability*. {Weak & Inapt & Ineffective}
* Maybe It's His White House {Wall Street Insiders} Team ?
Conclusion -wrt- Prez-A-Duntz "BO" {Obama}
SEND "BO" HOME TO CHICAGO, IL in 2012 !
"BO" Stinks ! = "BO" Stinks ! = "BO" Stinks !
.
Jimmy Carter as the US Prez-A-Duntz lost Iran :
Due to his Inaptness and Lack of Leadership.
.
Barack Obama as the US Prez-A-Duntz Losing {Giving Away}
the Entire Muslim/Arab Middle East : Due to "BO"s Weakness,
Inaptness and Lack of Strong Leadership :
http://www.cnn.com/2011/WORLD/meast/02/19/mideast.africa.unrest/
* Tunisia : Blame Obama {It's Obama's Fault}
* Algeria : Blame Obama {Obama's Weak}
* Lybia : Blame Obama {Obama's Inapt}
* Egypt : Blame Obama {Obama's No Strong Leader}
* Lebanon : Blame Obama {It's Obama's Fault}
* Jordan : Blame Obama {Obama's Weak}
* Syria : Blame Obama {Obama's Inapt}
* Yeman : Blame Obama {Obama's No Strong Leader}
* Bahrain : Blame Obama + Blame Obama + Blame Obama
-cause- Obama Is Eight-Times [8X] Worse That Carter
.

Why one cannot compare BHO to his immediate predecessor ? And an
approximate ratio (at least 64X) of negative units .

Why one cannot compare BHO to his immediate predecessor ? And an
approximate ratio (at least 64X) of negative units .

Aside from that, Obama is not the leader of any of those countries, and has
virtually no say in those country's internal affairs (nor SHOULD he.)

Re: RON : So Like the Internet Kill Switch You Now Admit Obama-Care
Death Panels Exist -we-agree-

No, NumbNads. Neither one is real. You didn't read ANY of the
comments by Lieberman.

All that I have personally read about this "kill switch" denotes that it
applies only to US government assets. i.e. the ability to disconnect the
entire federal government from the internet in the event of an attempted
massive cyber attack. The military already has a separate network that does
not use normal internet links (SIPRNET), along with their normal network
(NIPRNET). The plan is to apparently build such an alternate network for all
government agencies. Basically, if the throw the switch, it would leave the
World Wide Web undisturbed, other than we would no longer have access to
.gov websites.

- Why one cannot compare BHO to his immediate predecessor ?

That's Right We Have To Compare Obama to Carter :
Just to have them both on the same 'relative' Scale
of TOTAL FAILURE as a US Prez-A-Duntz.
-failure--failure-failure-failure-failure-failure-failure-
.
- And an approximate ratio (at least 64X) of negative units .

Isn't Down-Grading Obama 64 Points Below Bush
Overdoing It A Bit Too Much . . . ;;-}}

? Question ? : -history-fact-check-
How Many of America's Allies {Client-States} Did
former prez Bush's : Weakness & Inaptness &
Not Being A Strong Leader Directly Cause Their
Governments To Fall . . .
Let's Make a List :
Ah # 1 was . . . .
.
? Question ? : -history-in-the-making-fact-check-
Where-As Prez Obama's : Weakness & Inaptness &
Not Being A Strong Leader Has/Is/Will Directly Cause
These Governments To Fall . . .
1 - Tunisia : Blame Obama {It's Obama's Fault}
2 - Algeria : Blame Obama {Obama's Weak}
3 - Libya : Blame Obama {Obama's Inapt}
4 - Egypt : Blame Obama {Obama's No Strong Leader}
5 - Lebanon : Blame Obama {It's Obama's Fault}
6 - Jordan : Blame Obama {Obama's Weak}
7 - Syria : Blame Obama {Obama's Inapt}
8 - Yemen : Blame Obama {Obama's No Strong Leader}
9 - Bahrain : Blame Obama + Blame Obama + Blame Obama
-cause- Obama Is Eight-Times [8X] Worse That Carter
* Russia Knows It !
* China Knows It !
* Saudi Arabia Knows It !
* Iran Knows It !
* Israel Knows It !
* All the Euro-Landers Know It !
* The World Now Knows It
PREZ OBAMA IS WEAK & INAPT & NOT A STRONG LEADER
.
.
Obama Is Eight-Times [8X] Worse That Carter :
Weak & Inapt & No Strong Leader

"The US Government paid tens of millions of dollars to Dennis Montgomery because he said he had created software that could decode secret Al-Qaeda messages embedded in Al-Jazeera broadcasts. Even though the CIA figured out that his software was fraud in 2003, other defense agencies continued to believe in it. To date, the government has not prosecuted Montgomery, most likely to save itself the embarrassment."

Here is a quote from Mein Kampf:

"The fight which Fascist Italy waged against Jewry's three
principal weapons, the profound reasons for which may not have been
consciously understood (though I do not believe this myself) furnishes
the best proof that the poison fangs of that Power which transcends
all State boundaries are being drawn, even though in an indirect way.
The prohibition of Freemasonry and secret societies, the suppression
of the supranational Press and the definite abolition of Marxism,
together with the steadily increasing consolidation of the Fascist
concept of the State--all this will enable the Italian Government, in
the course of some years, to advance more and more the interests of
the Italian people without paying any attention to the hissing of the
Jewish world-hydra.
"The English situation is not so favorable. In that country
which has 'the freest democracy' the Jew dictates his will, almost
unrestrained but indirectly, through his influence on public opinion."

To all Anonymous Press Pioneer fans: please excuse the delay in publishing this new interview – but here it is.

http://appinterviewscontinue.blogspot.com/

Phone rings and rings… Where the hell is she? Finally, she picks up…

BARBARA SCHWARZ: Hello…

APP: Hey, Barbara! Got snow?

BARBARA SCHWARZ: More than enough. Polar bears envy me.

APP: Thought so. Any comment on the article "The Apostate" in the New Yorker?

BARBARA SCHWARZ: Oh, please, don't get me started on this one…

APP: Come on, say something, any comment is alright with me. I won't censor you, I promise.

BARBARA SCHWARZ: Okay, but don't forget that you got me started!

APP: I'd never dare.

BARBARA SCHWARZ: I googled Paul Haggis' name and his photos are placed between all these sausages and meat bags. That stuff is still more famous than he is.

APP: Come on, that can't be true. Let me check this… (checking Google images) Holy Moly, you're right… How funny!

BARBARA SCHWARZ: Lots of haggis around Paul Haggis on Google. Maybe I try the vegetarian version one day.

APP: Of Paul Haggis?!

BARBARA SCHWARZ: No, silly, the dish! I hate to admit it but when I was a kid in Germany, I was served some Haggis version. They called it Blutwurst (black pudding) with apple sauce. It was gross! The apple source was alright but the Blutwurst was awful! I remember that I was looking at my plate and thought to myself: this can't be healthy... Hey, did you call me to exchange recipes or what?

APP: Nope, I asked you already on your thoughts about the New Yorker article.

BARBARA SCHWARZ: Lawrence Wright is as blind as most others. It is such a shame that reporters don't compare photos and other footage of

L. Ron Hubbard and Mark or Marty Rathbun because if they would, they could see that the originals are being impostored by doppelgangers. Wright's article is joke because he is one of those who do not understand that the main problem of the Scientology orgs is infiltration and alteration. So, whatever negative stuff is going on in and is around of Scientology, it is NOT Scientology as by the founder but by the infiltration who do not honor the founder’s writings.

APP: Barbara, if you could prove that you are L. Ron Hubbard's kidnapped daughter, would you be a Million Dollar Baby?

BARBARA SCHWARZ: Most certainly.

APP: What would you do with all that cash?

BARBARA SCHWARZ: I would find Ron again and give him all his cash back.

APP: He is dead, remember?

BARBARA SCHWARZ: No, he is not. He just has a new body.

APP: What is your impression of Paul Haggis?

BARBARA SCHWARZ: My goodness! That article is embarrassing for him too. Breaking into the principal office and changing his school record, writing false check… Isn't that a felony? And he is a bad father too. He was a nobody before Scientology. "Nice" guy who stabs Scientology who helped him to success in the back. I think he is scum. You could not pay me to see his movies.

APP: He says that he left Scientology because the church agrees and he disagrees with Proposition 8 that asserted that California should sanction marriage only between a man and a woman. Did you read that?

BARBARA SCHWARZ: Who knows what his real motives were to join and later leave Scientology? I don't think either one were honest. Many churches think that homosexuality is immoral. Haggis knew already 35 years ago where Scientology stands on that subject. He is an atheist, and didn't join Scientology for religious or spiritual reasons. He seems to me like a celebrity mole who infiltrated Scientology with his out-ethical agenda. In Scientology, a smart person can figure out the reason for homosexuality. After death of a body, secret service psychiatrists trap beings (thetans) against their will in bodies of the other gender. A person who was in his former lifetimes a man is suddenly stuck in a body of a woman. A person who was in her former lifetimes a woman is suddenly stuck in the body of a man. If they would be not tricked and manipulated into taking that body of the other gender but allowed to pick up a baby body with the gender that they always had and preferred, there would be no homosexuality. People not being in the self-chosen body they had for many lifetimes before are the causes of being gay or lesbian. Anybody gay and lesbian has a

legal claim against secret service psychiatrists and mind controllers for deceiving and ticking them. We need laws against these kind of crimes.

APP: Being pro-gay and pro-lesbian is politically correct. Are you aware that your statement is politically incorrect?

BARBARA SCHWARZ: I give a damn what's political incorrect or not. After a person dies, she is not free but tricked in the opposite gender. Don't expect me to be quiet about. Do you like your gender?

APP: Yeah sure!

BARBARA SCHWARZ: Do you want to be a woman in your next lifetime but still feel like a man?

APP: Nope. It won't happen to me. Nobody is tricking me into a wrong gender body…

BARBARA SCHWARZ: That is what those who have now a gender that they didn't choose were once thinking too.

APP: How can one trick a spirit?

BARBARA SCHWARZ: Spirit can hear. They play on its emotions, e.g. are telling it that it has to hurry otherwise the body is be picked up by another being and they won’t get any other body. Before they can see the gender developing, they dive into the fetus and melt in it. Frequencies are then used to make it forget its former memory and a boy will be born 9 months later who was formerly a girl, or a girl will be born who was formerly a man, and they either keep their feelings for the same sex to themselves or they become lesbians and homosexuals.

APP: Somebody in Haggis’ family isn’t straight… Don’t you think that this is a reason to resign?

BARBARA SCHWARZ: (interrupts). If he would have been a real Scientologist, he would have figured out why that family member is attracted to the same gender and never have resigned from Scientology. His resignation was just a justification for hidden other reasons. The New Yorker wrote that he wasn’t emotionally close to this children and that makes this resignation even phonier.

APP: Did you ever meet him?

BARBARA SCHWARZ: No, and I don't want to meet him. He got his first writing jobs through Scientology and after he got enough success, he dumped and attacked it. How “noble” and “impressive”. On the photo in The New Yorker, he looks like the people who standing in line at soup kitchens. I wonder if he isn't some kind of leftish agent who is trying to force Scientology to give up on its ethical principles.

APP: Was L. Ron Hubbard anti-gay?

BARBARA SCHWARZ: He was not anti anybody. He was helping anyone. People have to understand that if they don't ever learn why people have gay and lesbian feelings, the abuse of people being tricked and born in the wrong gender will continue. One day all people will be "gender-switched" against their will. Is that what everyone wants? L. Ron Hubbard was helping anyone with his research. I know that there are people who suffer quite a bit by having a body of the gender they didn't chose. Some have surgery to get in that gender that they would have picked if they would have been not mind controlled to take a body of the other gender. L. Ron Hubbard wanted anyone to know the truth. After they know the truth who they are and why they feel for the same gender, they can make an informed decision for the future.

APP: Are Scientologists making derogative comments about gay people?

BARBARA SCHWARZ: If they do, they are no Scientologists because a Scientologist knows that gay and lesbians are thetans too.

APP: Haggis says that he is against violence and abuse within the C of S management. Can he be blamed for that?

BARBARA SCHWARZ: I don't trust him an inch. The impostor of the original Marty Rathbun in Scientology, Mosey's husband in Texas admitted having beaten people, and Haggis has no moral problem befriending him. However, I also don't think that David Miscavige never stepped over the line. The problem is that abusive non-Scientologists and former or current infiltrators are within the rows of the apostates, the Independents, the Freezone but also still within the Church of Scientology, and WHATEVER THEY DO, IT HAS NOTHING TO DO WITH OUR RELIGION SCIENTOLOGY OR FOUNDER RON!

APP: Haggis talks disconnection too. What do you think of it?

BARBARA SCHWARZ: If people are being told to disconnect from family, it is not Scientology either. But be reminded that any other adult never related to Scientology disconnects too when people or also family members don't leave him alone. I was kidnapped by Cyril Vosper and two other men because I had not disconnected from a dangerous family member, and she knew where to find me. However, the culture of disconnection comes rather from the founder's impostor who I have named Jack Vistaril. L. Ron Hubbard valued family highly. He knew that bad family relations can be repaired, and he would have only approved disconnection within a family if the well-being of a person is otherwise in danger. Nobody disconnected when I was in Scientology. Back then, Scientologists went through great efforts to maintain good relationships with their families.

APP: I heard of that kidnap story. How did you get over it?

BARBARA SCHWARZ: I just did because I know how to apply Scientology correctly.

APP: Haggis says he is a deeply broken person…

BARBARA SCHWARZ: (interrupts) He calls himself a broken person and does not connect with his children and is emotionally "not there" for them. It says so in the New Yorker of Feb. 2011! Emotionally "not there"? He should have never been allowed to call himself a Scientologist. He sure didn't apply real Scientology as of the real founder L. Ron Hubbard, otherwise, he would have been "emotionally there" for his children. If he is emotionally not there, did he really write his emotional scripts? He can't quit smoking? He had a heart attack! He has no willpower! A real Scientologist can quit any addiction and can move mountains with his willpower. I don't know if Paul Haggis realizes this but that article is no compliment for his character.

APP: Sky Dayton, the EarthLink founder is a Scientologist?

BARBARA SCHWARZ: All I know is that notorious liar, harasser and abuser Garry Scarff from Los Angeles attacked and forged me (a Scientologist) for a long time on Usenet with an e-mail account that he had with EarthLink. I complained to EarthLink many times and despite it is known to the top management of Scientology that Garry Scarff tries also to ruin the religion Scientology, nobody of EarthLink told him to stop violating TOS and stop harassing, abusing and forging a Scientologist or trying to bring Scientology down.

APP: What do you say about Haggis' childhood?

BARBARA SCHWARZ: I'm shocked. He said, he didn't kill anybody but that he tried. Such people in Scientology creep me out. He picked locks and sneaked into the prefect's office and eliminated his demerit! He forged a check. That's a felony. Jail is the place for these kind of people not the orgs of Scientology! He was drifting and hanging with drug dealers. Can it get any lower?

APP: But he got very successful later, the guy won an Academy Award. Doesn't this count for something?

BARBARA SCHWARZ: He admits that he got his first writing jobs through Scientology connections and then he stabs Scientology in the back. What a "lovely" fellow. His grandfather told him not to waste his life but he keeps on smoking. Haggis thinks he just lives one lifetime. Scientologists believe in past lives. Haggis was no Scientologist because he never run a past live in is many auditing sessions as if he would be afraid of looking what he did. It needs courage and honesty to be a Scientologist. He says himself in this article that he does not believe in reincarnation. In all these years, he remained a non-Scientologist because past lives are essential in Scientology. I also think that Narconon should have a program to help people to get over their smoking habits when they are like Haggis and can't quit on their own. I am sure that under the real Ron, there was such a program but that the smoking impostor removed it.

APP: Can you call it an infiltration when people in the streets are randomly approached by book sellers?

BARBARA SCHWARZ: If an infiltrator secret service organizes who walks by and approaches who, yes, that can be organized infiltration. Jim Logan who was married Annie Broeker approached Haggis in the streets. Her former husband Pat Broeker wasted L. Ron Hubbard's money. I heard that the Broeker's dropped each week a million Dollars on the desk of the impostor of L. Ron Hubbard. I asked Jim Logan if he knew anything about it. He chose to keep quiet about it. I am certain that people are actively brought to Scientology by secret services to ruin it. In other words, book sellers approach deliberately bad apples.

APP: Why didn’t Logan reply?

BARBARA SCHWARZ: He is just as irrational as many other people. They constantly think that anyone is from OSA, the external affairs unit of the Church of Scientology. I am not but even if I would be, if nothing foul happened and Jim Logan has a good conscience, he could have replied and answered that question.

APP: Haggis took a course and became a Hubbard Qualified Scientologist. Doesn’t that mean he is a Scientologist?

BARBARA SCHWARZ: What a joke. He must have cheated through the course. He just read 30 pages of the DMSMH...

APP: DMSMH?

BARBARA SCHWARZ: Dianetics book, also called Book 1. He attested to Clear but didn't read the DMSMH! I am beyond shocked. I don’t think that Haggis is clear because engrams didn’t just happen in this lifetime. If somebody only run engrams in this lifetime and never those from former lifetimes, he impossibly can be Clear.

APP: Please explain engrams.

BARBARA SCHWARZ: An engram is mental image picture, memory or recording or an incident containing pain and unconsciousness of a person and Dianetics auditing eliminated the charge or harmful effect of such an incident. Jim Logan didn't make sure that Haggis understood the book. He just sold it. Good grief! Jim Logan opened some kind of academy to deliver the "technology of Scientology" in the USA. Let's hope he doesn't just sell something but also makes sure that people understand what he sells.

APP: Lawrence Wright, the New Yorker author of "The Apostate" mentioned the famous acting school Beverly Hill Playhouse. He wrote that Scientologist Milton Katselas who died a couple of years ago was the link between that acting school and Scientology but that no such connection exists anymore. Do you know anything about it?

BARBARA SCHWARZ: I am not star struck. I rarely keep up with celebrity news or any acting scene but if you go to the website of that school, Anne Archer's statement is still on the front page. So, whatever Mr. Wright says or writes, I would not bet the farm on it. http://www.bhplayhouse.com/Acting-Classes/

APP: Did you read that he researched and wrote 10 months on that article?

BARBARA SCHWARZ: 10 months research, and he didn’t figure that L. Ron Hubbard and the original Marty Rathbun were/are impostored. What a shame and waste of time.

APP: Haggis says he was Operating Thetan VII. Don’t you believe this?

BARBARA SCHWARZ: Are you kidding me? That man never read the DMSMH. He didn't apply ethics, the tonescale or other Scientology technology. He is an Atheist and isn’t aware of past lives and being an spiritual being. He can't stop smoking. That is not an OT. He is worse than a Catholic Cardinal who doesn’t believe in Christ! He never should have been allowed to anything but being a non-Scientologists.

APP: He was sort of a conformist within organized Scientology. Isn’t that possible?

BARBARA SCHWARZ: Not me. I was always a constructive rebel, inside or outside of Scientology because I am a real Scientologist.

APP: Haggis said he didn't raise his IQ, perception, and he got a heart attack… Doesn’t he deserve your sympathy?

BARBARA SCHWARZ: He didn’t raise his IQ because he was too lazy to think for himself. People who just hang out in Scientology and wait for a magic bullet to get supernatural abilities don’t raise their IQs. Scientology is intensive study for thinking people who try in real life to implement these things. How often did I say already that the SEGNPMSS organized infiltration of Scientology altered L. Ron Hubbard’s scriptures to make him look non-scientific. Duh! He smokes and anybody knows that it is bad for any health. But hand in hand with getting rid of engrams and with going OT, L. Ron Hubbard, the real one, advocated a very healthy lifestyle in a protected environment. As the medical/psychiatric infiltration of Scientology removed these components and technologies from Scientology, also Scientologists are aging and getting sick and die. As so much was removed from Scientology, apparently only the very smart people are getting smarter and dummies stay dummies.

APP: What is SEGNPMSS again?

BARBARA SCHWARZ: Abbreviation that stands for Still Existing German Nazi Psychiatrists' Mindcontroller Secret Service. In German: INBDNPGB: Immer noch bestehender Deutscher Nazi-Psychiatrie bewusstseinskontrollierende Geheimdienst.

APP: This secret service was formed under Hitler?

BARBARA SCHWARZ: No, it was formed much earlier but during the Nazi time, they showed their real psychiatric monster faces very clearly. That is why I included the Nazis in that name. I had to name that very secret and very ugly child…

APP: Haggis said that he had chosen to ignore the Lisa McPherson case when he was on the inside. Any comment?

BARBARA SCHWARZ: That is not what a real Scientologist does. I didn't ignore the case and wrote often about it. I figured that Lisa McPherson was psychiatric ambushed in her hotel room in Orlando when she was on a business trip and was psychiatric altered, hypnotizes, implanted, e-shocked and programmed to "lose her mind" and scheduled to die in the hands of so-called Scientologists. As Scientology is so infiltrated and altered that it doesn't produce many real OTs anymore, so-called Scientologists fall for any psychiatric trick in the book. I am sure that the Lisa McPherson case was a psychiatric set up to make the orgs accept psychiatry. And her case wasn't the only such psychiatric attempt. Haggis doesn't get anything.

APP: Haggis said at the end of his life in Scientology, he wanted auditing to be over with. Doesn't that indicate that something is wrong?

BARBARA SCHWARZ: Maybe Haggis was afraid that his auditor might find out that he isn't a Scientologist and that is why he didn't like to be in session. If the real founder's technologies wouldn't be altered by psychiatric controlled agents, nobody would hate auditing. But the problem with Haggis is that he doesn't figure out WHY he rejected it and WHAT was/is wrong. He is still not asking hard questions.

APP: Scientology raises the IQ?

BARBARA SCHWARZ: Non-altered Scientology raises the IQ of any person. Evidently, the apostates prove that psychiatric altered Scientology didn't raise their IQs. Only already very intelligent individuals become smarter despite of the altered writings because they are able to DUPLICATE THE PERSONALITY OF L. RON HUBBARD AND LEARN TO READ BETWEEN THE LINES. They know what is missing and add the missing data to their knowledge. But if somebody isn't very bright, he thinks that there is no alteration and becomes a psychiatric appreciated cultist. That is why only Haggis'ability to make money and some other abilities were raised but not his IQ to understand Scientology and the universe.

APP: Where you an atheist like Haggis before you joined Scientology?

BARBARA SCHWARZ: Not at all. I talk to God like a daughter to her father. I wasn't praying by repeating the same verses all over as if God would be deaf and didn't hear me the first time. I had and still have a daughter/father relationship to God. Scientology made that personal relationship even a lot deeper.

APP: Haggis was disappointed that he couldn't fly on level Clear. Is he not entitled to disappointment?

BARBARA SCHWARZ: This man is really something! He hasn't read the Dianetics book. He doesn't really know what Clear means. If he would have applied L. Ron Hubbard's study technology, he would have been

able to understand the book and anything else in Scientology. It means getting rid of engrams, e.g. painful experiences of this and former lifetimes, e.g. being afraid of flying, childbirth, water, dogs, or whatever bothers a person. It does not teach you to fly. L. Ron Hubbard said that when a cannibal is cleared, he still is a cannibal. It just takes care of engrams. If Haggis would have run real engrams, it would have been life changing for him. But he didn't even read the book! It is not an easy read but I was able to read and understand it and so did others.

APP: Did psychiatrists change the DMSMH too?

BARBARA SCHWARZ: They changed just about anything but as it was so broadly available, psychiatrists and their infiltration in Scientology couldn't completely hide that there is a thing as engrams and once they are no longer there, people are a lot better in shape and happier.

APP: Did the Food and Drug Administration compel the church to declare that the e-meter has no curative powers and is ineffective in diagnosing or treating disease?

BARBARA SCHWARZ: Ron, the founder never said that the e-meter has curative powers and would treat diseases. I received 140 pounds records from the US Dept. of Health and Human Services about their e-meter witch hunt. Waste of tax payers' money! It measures spiritual energy.

APP: Scientologists re-live past lives in auditing sessions under use of the e-meter?

BARBARA SCHWARZ: When they are not like Haggis and not afraid to look back, they often enter past lives. If they make it up to the OT levels and their auditors didn't notice that they never entered a past life but allow them to graduate, their auditors and C/S are no real Scientologists either.

APP: Did you enter past lives?

BARBARA SCHWARZ: Yes, I did. My first past life pictures took my breath away. I KNEW it had happened. It is not just memory from a movie or fantasy. Those can be three dimensional pictures with emotions that blow your socks off up. It is quite an adventure.

APP: Are you convinced that other people lived before too?

BARBARA SCHWARZ: 100% without the smallest doubt. People die and are born again. It is a fact. If you ask me, Haggis is a very non-spiritual person and doesn't feel the present of God or the fact that he is a spiritual being that lived before he had this meat body. He said that he always was a selfish bastard, and he didn't change. He didn't change because he didn't even try to apply Scientology. I pity him. Ethics needs personal effort. Just as he had not enough willpower

to quit smoking, he had not enough willpower to apply ethics to his life.

APP: He mentioned Skip Press. Do you know this guy?

BARBARA SCHWARZ: I know Skip Press only through some of his postings to alt.religion.scientology. He posts there as Skipper and is one very rude person. He attacks and defames. I am as little impresses by Haggis acquaintances as I am by him.

APP: Lawrence Wright referred to an editorial in a 1959 issue of the Scientology magazine Ability that notes that “neither Lord Buddha nor Jesus Christ were O.T.s…” How do you comment?

BARBARA SCHWARZ: Whatever! L. Ron Hubbard wasn’t the author or editor of the Ability mag. One of these atheist infiltrators had an urge to smear some crap into a Scientology magazine. Buddha and Jesus most certainly had OT abilities.

APP: Some people say that OT levels are written in Hubbard’s handwriting. Doesn’t that mean that they are authentic?

BARBARA SCHWARZ: The OT levels were the first that the psychiatric infiltration altered in Scientology because they don’t want OTs. OTs are smart and able to figure them out. They prefer non-OTs. There are many forgeries.

APP: Is it true that most of the upper level of Scientology involve exorcising spirits?

BARBARA SCHWARZ: As I said, Scientology is altered. I am convinced that secret services, e.g. the CIA has anything in their files that Ron, the real founder ever said and wrote because he was under “protective surveillance”. As far as spirits are concerned, they do exist and they can invade a body. Have a look at them: See my blog: http://barbaraschwarz.wordpress.com/2010/09/02/i-attracted-approx-35-orbs-thetans-without-bodies-a-few-nights-ago/
But you don’t have to be afraid of them. Without a human body, you look just like them.

APP: Did you read Russell Miller’s and Bent Corydon’s books?

BARBARA SCHWARZ: Yes, I read these book years ago, and they are a waste of time because these “Einsteins” didn’t figure out that Scientology was altered and L. Ron Hubbard impostored and forged. Or they know it and cover it up.

APP: Is Dan Sherman a Scientologist?

BARBARA SCHWARZ: I don’t think so. I believe that DM or Mike Rinder hired him to write L. Ron Hubbard’s biography and also that of DM. No official biography on Ron is yet officially published because it is not that easy to mix the life of two very different individuals (the founder and his impostor) in one story.

APP: People have two different opinions of L. Ron Hubbard: the most important person who ever lived and the world's greatest con man…

BARBARA SCHWARZ: (interrupts) They all basically know but nobody but I have the guts to say so: Ron, the founder was indeed the most important man who ever lived and his impostor was a con man. I read Lawrence Wright's article in the New Yorker, and he makes the same stupid mistakes that other made: they don't figure out that L. Ron Hubbard was impostored. Don't ask me about the war history, the education, and the wives of Mr. Nebraska. It is not the founder's life story.

APP: Hubbard's name is often mentioned with of Jack Parsons who was a member of the Ordo Templi Orientis… Who knew him, the founder or the imposter?

BARBARA SCHWARZ: I am 100% certain that Ron, the real founder never had anything to do with Parson, and he never was interested in any other person but his own wife. That Parson's stuff refers to the impostor's life.

APP: Are you serious with your statement that the impostor was a CIA agent?

BARBARA SCHWARZ: You bet. I think that Mr. Nebraska was a SEGNPMSS/CIA double agent and it is likely that the CIA had him infiltrate Parson's black magic group for whatever purpose. I have memories that identify the real Ron, the founder as son of Dwight Eisenhower and that the CIA gave him the name Lafayette Ronald Hubbard to "protect him from Nazi attacks" but I am sure that they didn't tell him that the fellow born by that name looked exactly like him and was still alive.

APP: Can you prove it?

BARBARA SCHWARZ: One can't prove anything to a planet that is run by the SEGNPMSS that controls just about any person on Earth through over six Billions of ear implants.

APP: Wright says that Dianetics and Scientology is dismissed by scientists. Do you know scientists who approve of it?

BARBARA SCHWARZ: I don't think that any real scientist dismissed anything that the real founder Ron wrote and discovered. CIA allowed SEGNPMSS/CIA double agent to change Ron's writing and that resulted in that Dianetics and Scientology are no longer that scientific and potent as before, or even look ridiculous now. Just as the doctor (psychiatrists) ordered because they feel threatened by a sane world that can be created with original Scientology.

APP: What do you think about the Sea Org?

BARBARA SCHWARZ: I love Ron's original Sea Org. Dedicated, decent good, intelligent people not wasting time do collect personal riches but working together to change the world to the better but since the Sea Org is infiltrated by non-Scientologists and agents of all kinds,

it is not that place that is was under the real L. Ron Hubbard. Ron never would approve of what the Apollo impostor, DM, and others turned the Sea Org into, an infiltrated place with many people who are no Scientologists, where women abort, children don't matter and people are roughening each other up.

APP: Do you know Janis Grady?

BARBARA SCHWARZ: I don't think so. Just briefly ran into her on Usenet. She sailed on the Apollo and that was the impostor's vessel.

APP: Mary Sue, the Controller of the Guardian Office and law breaker was the impostor's wife?

BARBARA SCHWARZ: Yes. I am very sure of this.

APP: Sea Org staff earn only 200 Dollars per month?

BARBARA SCHWARZ: It is not that bad of a deal if Scientologists could live in environments in which they can preserve their youth and health but as these don't exist anymore and ideal orgs are not being built how the real Ron would want Scientologists to live and as also other technology was altered, they age too and also get sick and die.

APP: 200 bucks is not a great income.

BARBARA SCHWARZ: If you have your apartment in a beautiful village in which you can preserve your youth and health, free medical or dental assistance if you need it, free room and board, free utilities, free clothes and shoes, free laundry services, free child care, free hair cuts, free transportation, free auditing and training, free education for you and your children, etc. it is not a bad deal. I learned many people have nothing left of their pay checks at the end of the month after they paid their basics. Having all cared for and 200 Dollars on top of it isn't that bad a deal when working in a religious order, provided that all those above rights are granted to good people.

APP: Would you re-join the Sea Org?

BARBARA SCHWARZ: If it would be exactly like the founder had laid it down, yes, in a heartbeat. Under him, the individual was respected highly. Originally, Scientology was the anti-cult.

APP: Sea Org members are not allowed children?

BARBARA SCHWARZ: That is David Miscavige's squirrel version of the Sea Org and non-Scientologists, the infiltrators apparently do abort. L. Ron Hubbard (the founder) made clear that having children is a dynamics and in other writings he stressed how important children are for the future. He would be outraged if he would know about abortions.

APP: Do you believe that the claims of the abortions are true?

BARBARA SCHWARZ: Yes, because when I was on staff I heard it from one of my juniors who wanted to join the SO. She had no reason to lie to me. She told it to me in confidence from woman to woman. The non-Scientologist RTC recruiter told her indirectly to abort if she wanted to join the RTC. I told her not to and join rather another org in which kids were allowed and as far as I know she didn't abort. When I heard that, I was already on the SEGNPMSS list to be kicked out Scientology, and I was no longer in the position to raise hell on the inside. It is such a violation of everything L. Ron Hubbard stood for. Ron explained detailed in the DMSMH what abortion does to a person and what kind of people do abort. No compliment for all those who abort or tell others to abort.

APP: When was that?

BARBARA SCHWARZ: Spring of 1984.

APP: Hubbard in Creston was the founder or the impostor?

BARBARA SCHWARZ: … the impostor.

APP: What happened to the founder if he isn't the one who died on January 26, 1986?

BARBARA SCHWARZ: I am sure the CIA can answer that.

APP: Did you read the script "Influencing the planet" that Haggis mentioned?

BARBARA SCHWARZ: No. Even the headline sucks and isn't something the founder would write. Was probably written by a psychiatrist and the impostor. The real Ron wrote his own scripts. The real Ron knew that there was only one way to change the world to the better and that was through science and truth, and that is what he did.

APP: What is all that talk of Fair Game?

BARBARA SCHWARZ: An old "policy" that was never by the real founder but by infiltrators and the impostor.

APP: Wollersheim, Christofferson-Titchbourne, and some other sued Scientology and were awarded millions of dollars... What do you think about that?

BARBARA SCHWARZ: It is the old song. Non-Scientologists infiltrate Scientology, other infiltrators in the orgs deny their rights, and Scientology has to pay despite it has nothing to do with the founder or Scientology. If – with the help of God – these people are one day convicted of working on illegal psychiatric secret service programs to infiltrate and destroy Scientology, they might have to pay all back, and maybe sent to prison.

APP: I don't understand why the Church of Scientology tries to keep OT III data under wraps. Most religions make claims that are hard if not impossible to prove.

BARBARA SCHWARZ: I am sure that the real Ron kept no secrets. He wanted people to know as fast and much as possible. There are two Scientologys. That of the real founder Ron, and the altered version of the impostor. By having infiltrators protecting the altered OT III version, the SEGNPMSS wants to make the world believe that those are the real OT levels.

APP: David Miscavige announced that L. Ron Hubbard moved to the next level and discarded his body. What level is that?

BARBARA SCHWARZ: The level is called “psychiatric lies about Ron”. We Scientologists believe that the person comes back in a new body. What DM said made sure that nobody searched for L. Ron Hubbard on this planet, where he still is. It is a lie that L. Ron Hubbard has no new body on Earth. All worked after plan, except that they made that plan without me.

APP: In former publications, Paul Haggis expressed his excitement about Scientology and how it improved his life. He also recommended the Purification Rundown. Did you do that Rundown?

BARBARA SCHWARZ: Yes, I did and I had great wins too, I noticed particularly an improved speed of my ability to read, study, and understand. It took away lots of “mind fog” and I felt also physically fit. The problem with Paul Haggis is that he is a person without spiritual awareness. That is typically for atheists. If he would, he would have had a lot more wins, despite Scientology is altered, a smart person that duplicates the character of the founder can read between the lines and can still reach the stars. Haggis liked the motto: makes the able more able but he figured nothing of what I figured.

APP: Haggis took drugs when he was young. Did you take drugs?

BARBARA SCHWARZ: No.

APP: You were in Scientology for many years. Is Haggis right that Scientologists have no sense of humor?

BARBARA SCHWARZ: Ron, the founder had a great sense of humor and people say that about me too. There is something about infiltrators that I noticed: real Scientologists do have a great sense of humor but cultic infiltrators have none. Birgitta Harrington who kicked me out of FOLO EU left and attacked Scientology right after she denied my right to be in it. I remember that another girl and I had fun (something very different than joking for the purpose of degrading) on the decks while working hard. We were not lazy. But we made each other laugh to make the work more enjoyable. Birgitta was such a cultic robot. She came in and forbid us to laugh. It is not the real Ron’s Scientology. It is the psychiatric version of Scientology. L. Ron Hubbard said so often to see life as a game not as dead serious penalty but infiltrators want to take the game and fun away and make life hard and unfriendly. As not otherwise expected, Birgitta became an attacker of Scientology. Infiltrators as like her make the orgs to

unfriendly and non-scientology places.

APP: Let’s talk again about Haggis… He says he directed a Dianetics ad but it never aired.

BARBARA SCHWARZ: He admitted that never read the Dianetics book. He made an ad about something that he never understood! We can all can be glad that we never saw this ad on TV. I think that without getting his first writer jobs through Scientology connections, he might have never made it in the writer business. But he doesn’t admit this, doesn’t he?

APP: Haggis told that he was not made to atone to ethics as other people in Scientology because he was famous. What is out ethics?

BARBARA SCHWARZ: When you do something against your own or anybody’s else’s survival. Haggis was long enough in Scientology to know that he has to correct his out ethics on his own. By being out ethics, he is harming himself and that will never change, if he is in Scientology or not. This is how a thetan, a human being is designed. It basically knows what is wrong and what is right. By doing wrong and shameful things, a being becomes vulnerable, smaller, shameful, degraded, and stupid. To somebody being in Scientology for a longer time, an ethics officer shouldn’t have to tell that he is out ethics. He should know that before he commits the out ethics act. I am shocked that Paul Haggis children rather wanted to go to boarding school than staying with their father. That article is an embarrassment for him... He may think that it would harm Scientology but this article isn’t good PR for him either. But interesting is that Haggis children apparently competed High School at a Delphi school while Amy Scobee blames Scientology for having not completed High School, and despite she could make her High School diploma now, she rather talks bad about Scientology than going back to school. If that High School diploma is so important for her, why doesn’t she get it? In that New Yorker article she indicated that the FBI didn’t want her to talk about any investigation against Church of Scientology but she retaliated against the FBI because they didn’t do what she wanted the FBI to do and blows the whistle on their pending secret investigation? Wonder if that violates laws what she did.

APP: Hey, this is supposed to be an interview. I am asking the question. Haggis told Deborah Rennard in the 90s that he had a “crisis of faith” and doesn’t believe that he is a spiritual being. Did you ever have a crisis of faith?

BARBARA SCHWARZ: No. Scientology is about knowledge. I am shocked about just anything that I read about Haggis. How can a person be so unaware of himself than this man is? He doesn’t believe that he is a spiritual being! 35 years in Scientology and never got in touch with his spiritual side. It is unbelievable. How can a meat body have feelings or be aware of something?

APP: He feels he’s invincible. Is that bad in your opinion?

BARBARA SCHWARZ: Nobody’s body is invincible. And he is just a body because he does not believe that he is a spiritual being. He says on page 2 that he was a bad kid that he didn’t kill anybody but that he tried. He really gives me the creeps.

APP: Do you know that he paid a lot of money into Scientology?

BARBARA SCHWARZ: So he says but as they helped him to become a successful writer, he made a lot more money through Scientology. Steven Spielberg noticed that Scientologists are the nicest people, and Paul Haggis who was never a Scientologists (didn’t even read Book 1 and does not believe in being a spiritual being) has the guts to represent himself as Scientologist to Steven Spielberg and answered: “WE keep the evil once all in a closet.” I think that joke is just funny when it is told by a person who is not evil himself.

APP: Haggis wanted Scientology to take a public stand against Prop. 8. Do you think that was wrong?

BARBARA SCHWARZ: Who is Paul Haggis to make such a demand? He was trying to blackmail Scientology, either you do that or else… And he wasn’t ever a Scientologist. He said himself that he should have been never in Scientology. So, why the heck is he trying to force his demands onto a religion to which he does not belong?

APP: Wasn’t Deborah Rennard the secretary of JR?

BARBARA SCHWARZ: Yes, she played Sly on Dallas but she did not kill JR. (Laughs) Lawrence Wright threw just about any celebrity name in that article to give it more weight and indicates his own obsession with celebs.

APP: Her parents were not allowed to see their grandchildren, and they sued the church?

BARBARA SCHWARZ: So Lawrence Wright says, but he mentioned no case number. If Scientology would be applied as by the founder and the church not infiltrated by non-Scientologists, such situations would not occur. The real founder regarded family highly.

APP: Do you understand that many people don’t like that disconnection practice?

BARBARA SCHWARZ: Sure. A family that loves each other is sticking together until the end of time, it doesn’t matter what anybody else says. What I am saying is that family members who love each other are working things out together, even if it means that some of them have to make compromises.

APP: Haggis was visited by 10 Scientologists among Tommy Davis, Mark Isham, Terry Jastrow, Anne Archer, Sky Dayton who are celebrities and they were not able be to change his mind about his resignation. What is your conclusion of this?

BARBARA SCHWARZ: There was no reason for Paul Haggis to resign because he never was a Scientologist. He didn't read the first book that Scientologists study, he never believed that he was a spiritual being, he doesn't believe in past lives, etc. This is like a Christian who doesn't believe in Christ. Haggis can shovel his resignation. Only a person can resign who was a Scientologist, and a real Scientologist will not resign because he or she knows that real Scientology does work and contains very valuable truth.

APP: There are more allegations in the New Yorker about physical abuses. Do you believe that the current leader David Miscavige of the Church of Scientology is abusive?

BARBARA SCHWARZ: I didn't believe that there were abuses until Tommy Davis admitted to the SP Times that there were many beatings but he insisted that the man who is now married to Mosey in Texas did the beatings. He is now DM's major opponent. My point is: even if DM never did beat anyone, he kept the abuser(s) and non-Scientologists on staff (no real Scientologist is an abuser because that is contrary to the religion) for many years and that makes him not innocent, capable or a Scientologist.

APP: Police isn't called because a church policy forbids it?

BARBARA SCHWARZ: I know for sure that L. Ron Hubbard never wanted a violent person or offender on orgs lines. He would have called the authorities and so should David Miscavige and others. Scientology Ethics Officers are there to guide Scientologists to ethical behavior. But unethical behavior that are law violations must be reported to the authorities. I know that the real Ron want the authorities to lead away those who commit crimes. The orgs are no place for such people and no such people should be protected by orgs.

APP: What is KSW?

BARBARA SCHWARZ: Keeping Scientology Working. Ron noticed that people altered it, so he wrote a policy and asked Scientologists to keep the religion and technology pure and original and keep Scientology working. But if alteration of Scientology drops into Scientology from the highest level through an impostor, Scientology is altered despite KSW.

APP: Can you explain what Tom Cruise is talking on that YouTube Video?

BARBARA SCHWARZ: He is not nuts but talking to Scientologists who understand what he is saying. He basically says that he is proud to be a Scientologist and feels that it is privilege. He wants to help people and says that he knows that Scientology technology helps people beyond just putting their bodies together after an accident. He means spiritual help. He says that Keeping Scientology Working is most important to keep the technology pure to help other people. He had big spiritual wins in Scientology and that he wants other people having them too. He wants Scientologists to be more active in helping people through Scientology. He wants Scientology to be disseminated and tells

Scientologists to reach out and make the planet more ethical and not being held back by own out-ethical behavior. He says that he doesn't hesitate to stop out ethical-behavior committed by others because he is applying ethics strictly to himself. He respects people who do that with others and he is willing to help.

APP: Why didn't he say so in a way anyone can understand?

BARBARA SCHWARZ: Scientologists understand what he is talking about. It was an internal video just for Scientologists not for other people. I have no doubt that Tom Cruise considers himself to be an Honorary Sea Org member and there is nothing wrong with it. He asks Scientologists to give it all they got to build a better world. He says that Scientology works in all areas of the world better than anything else and that's why he considers Scientology the authority in many fields. He doesn't suggest anything illegal. He says just feeling good as Scientologist is not good enough and that Scientologists should be more engaged. He says that he met many leaders in all walks of life and that they are very happy getting help and that they depend on people who are able to help and that Scientologists can help them. He says that if Scientologists don't know how to do it, they should study more to apply Scientology correctly because people are turning to Scientologists for help. He says by studying, Scientologists wouldn't be overwhelmed by whatever is being thrown at them. He cracks up mentioning that he was asked by some non-Scientologist if he ever met a SP. (A SP is a person that suppresses others. SPs are people like for example Hitler or any other person who keeps people down.) What he is saying about SPs is that hopefully one day, there is peace and the last SP surrenders and leaves people alone, and people surround that SP and say: Wow, you are of these guys who suppressed others, I read about your kind in history books. He says that Scientologists should not run from these people but that there is technology to handle such suppressive persons. He says that SPs don't come to him because don't have the guts to confront him. (I think he is talking of big time SPs. Not all SPs are having same influence. Some run countries and others e-shock people, and yet others are just bums in the street with as good as no power whatsoever.)

APP: Are we talking the same video? The one that made Anonymous so angry?

BARBARA SCHWARZ: Yes, that one. He says that he would like to go on vacations and take life easy but he doesn't do it because he rather works to distribute Scientology because he knows that Scientology can help so many people. He says when he looks at the condition of the world, he can't just sit there and do nothing. He has to do something to change things to the better. He can't live with himself if he doesn't do that. He is trying to encourage Scientologists to be less passive in distributing Scientology technology. He says that he carries his responsibilities in this regards but he still feels he has to do more. He says that he can see it in the look of the eyes of some

Scientologists who are as active as he is and some are spectators who think that it is easy for him to distribute Scientology because he is Tom Cruise. He said, he cut that attitude from his life. He tells people that they either are Scientologists or not. He feels that there is no time to distribute Scientology slowly because the planet needs help fast. He says that Scientologists have the responsibility to educate and create the reality that Scientology can indeed make things better for people by changing old ways of the planet that didn't really work. He asks Scientologists to have compassion, love and consistency to change the world, and he says despite it is a rocky road often, he has a blast doing so and it is fun because nothing is better than improving conditions. He asks himself everyday if he did everything he could to better the world. He is feeling for the people who are not having the Scientology technology that he and other Scientologists are having because they depend on Scientologists to bring it to them. He needs more help by Scientologists to get Scientology distributed and don't want them to just stand around but he is asking them to be more hands-on in helping others to understand and applying the technology that he discovered as so valuable. He says he is very direct in the ways he does all things and he doesn't dance around things. As a sum, he a nice person who had great spiritual wins in Scientology and wants to help other people to better lives.

APP: Wow. Thanks for translating that. But you didn't like the Stauffenberg movie?

BARBARA SCHWARZ: Right. Tom Cruise's first intuition that something is foul with that story was correct.

APP: Did Hubbard ever say that a lot of money can be made with religion?

BARBARA SCHWARZ: Sounds like something L. Ron Hubbard's impostor would say. The real Ron knew that we need a better world and that all the money in the world won't help you much when the planet sucks.

APP: Do you think that Jason Beghe was a Scientologist?

BARBARA SCHWARZ: No. I think just like Haggis, he joined for other but religious reasons. He is close with Mosey's husband who is an impostor. I find Jason Beghe instable in his opinions. He once highly recommended Scientology and later attacked it. A Scientologist might be in disagreement with His Cobness or others, but he never will defame the religion or L. Ron Hubbard as Beghe has done.

APP: Who is His Cobness?

BARBARA SCHWARZ: David Miscavige, Chairman of the Board.

APP: Beghe calls his auditing a rip off.

BARBARA SCHWARZ: If not real auditing as by L. Ron Hubbard, the real founder, auditing might not help that much, and in view of that, yes,

that would be a rip off. But Beghe never called it a rip off in all these years before, only when he heard of the Anonymous Mob, he felt inspired to attack what he recommended before. My point is, those people who are many years in Scientology (which also includes Tory Christman) and then attack it, look like complete idiots. I knew within a few days if I am going in the right direction or not.

APP: Do you believe that Mark Rathbun's blog received 55,000 hits when he published the Haggis resignation?

BARBARA SCHWARZ: For me, there is just one Mark or Marty Rathbun, and he is the original Inspector General for Ethics. The Blog-Marty is his impostor. Yes, it is possible to get these many hits and by not telling that he is not the original Marty, he is basically lying to all these people that he is the original Marty. I am sure there are laws against this kind of deception.

APP: Do you work for OSA?

BARBARA SCHWARZ: No. DM is their highest boss, and he knows that I think that he should not lead Scientology and that he received the lead over Scientology by Jack Vistaril and not by the founder. Accordingly, there are reservations on both sides. On top of it, they know that Mosey's husband is an impostor and they don't tell me where the original Marty is. In other words, there is no Scientological relationship between me and OSA.

APP: Do you believe that there is a FBI investigation of the C of S?

BARBARA SCHWARZ: That investigation sure can't involve L. Ron Hubbard because just about any FBI field office wrote to me that he was never of investigatory interest or electronic surveillance. But it is possible that the FBI opened the case, although I find it odd that the C of S doesn't know of that and never got any FBI visit. If what they have doesn't justify a visit at the INT Base, what do they have?

APP: INT Base?

BARBARA SCHWARZ: Highest management base, David Miscavige's Org.

APP: Claire Headley said she was pressured in having two abortions. Do you believe this?

BARBARA SCHWARZ: It is possible, and abortions are violating the founder's findings. Ron explained in the DMSMH, also called Book 1 what horrible effects abortion has on thetans. He says, the woman who aborts is on tonelevel 1.1., which is covert hostility. There you can see the difference between Claire and me. I would have not aborted under any circumstances. Claire rather aborted than leaving the Sea Org for a Class IV org.

APP: Do you think that David Miscavige leaves a luxurious lifestyle?

BARBARA SCHWARZ: Seems so but he probably thinks that the Pope does that too, so it’s okay with him.

APP: Did he received a Vyrus 985 C3 4V, a motorcycle with a retail price of seventy thousand dollars by Scientologists?

BARBARA SCHWARZ: I believe Tommy Davis acknowledged this. The founder, L. Ron Hubbard didn’t get any expensive gifts. I remember some in the Munich org discussing buying him Bavarian Lederhosen, of which I know he wouldn’t have worn them. Well, I think the real Ron never received any gift not even that gift that I sent him for his birthday from the Munich org. It was a small side table, perfect for an office. The top showed the chart of the old world. It was beautiful. Ron was worth all the gold and silver of the world but that table didn't cost more than 100 German Marks.

APP: The New Yorker indicated that the church spoils Tom Cruise with expensive parties, and gifts, and that Sea Org members fixed his airport hangar in Burbank. Is that something you would approve of?

BARBARA SCHWARZ: I don’t think that Tom Cruise can’t afford these things and he might not even want them. To me it looks as those are the ideas of DM, and he shouldn’t throw MEST at Tom Cruise. Original Scientology and a healthy, sane, and true place where he can study and be himself without traitors turning one day on him, that is probably what he likes just as any other Scientologist likes and those are the best gifts.

APP: Did you get that Paul Haggis hasn't changed his opinion on psychotropic drugs being overprescribed for children?

BARBARA SCHWARZ: Overprescribed? That means that he approves of them in some poor children. Makes me understand why his kids rather wanted to go to a boarding school than staying with him. If that was his opinion while in the orgs, I am shocked again. This proves again that he never was a Scientologist because a real Scientologist thinks that NO CHILD should be put on psychotropic drugs and that they are also harmful for adults.

APP: The New Yorker mentions Gerry Armstrong. Is that the guy who said “We don’t have to prove a goddam thing. We don’t have to prove shit. We just have to allege it.”?

BARBARA SCHWARZ: That's him. He's one of those who conceal that Jack "Apollo" Vistaril was the founder's impostor, and he blames Ron on what the founder did. I always thought that Armstrong just attempted to forge L. Ron Hubbard but I learned now in the New Yorker that he didn't just attempt it but that he really forged.

APP: You are talking "affirmations"?

BARBARA SCHWARZ: They were never the founder's. I learned that Armstrong destroyed these papers deliberately but repeats the lie that those were the founder's. What is more suspicious than Armstrong

destroying his "evidence" to protect a forgery? Mosey's husband posted not long ago that he puts his hat off before Armstrong. The original Marty Rathbun in Scientology never would.

APP: What was in those church files that Armstrong took with him?

BARBARA SCHWARZ: I assume other forgeries or stuff about the impostor's life. By not clarifying that the founder was impostored by a doppelganger and by asking the impostor's records back through the courts, the Church of Scientology made these papers valuable. People thought that when the church wants them back, they must be authentic. It is stupid. They should have told Armstrong to clean his windows with those because those are not the records of the founder.

APP: The church paid him USD 800,000 to keep his mouth shut?

BARBARA SCHWARZ: He also violated that agreement and by paying him this money, the Church indirectly confirmed that they cover something up. But they cover up the impostor's actions because there is nothing to cover up in the life of the real founder Ron.

APP: Some people drew quite a lot of money from the Church…

BARBARA SCHWARZ: I believe some people infiltrate the church for no other purpose to sue later and to get rich.

APP: There is a lot of talk of OT III. Independents want to skip the level and the church says it needs to stay word for word as it is now applied in the church. What do you think?

BARBARA SCHWARZ: The real founder wrote OT level but I am sure that they were altered shortly after they left his desk by the psychiatric infiltration and pushed down the church lines in altered form in the handwriting of the impostor or another forger.

APP: Why didn't the founder walk into his organizations and correct what was changed.

BARBARA SCHWARZ: I am sure that he did until the point where he could not go in any organization anymore because SEGNPMSS hired snipers with sharp monition to stop him going in and discovering the massive psychiatric takeover.

APP: So, you think Scientology as by the real founder is lost?

BARBARA SCHWARZ: Not necessarily. If the CIA and other American secret services can be compelled to come forward with all their footage of what the real Ron did, wrote and said, it could be perfectly restored. But I don't see anyone but me who wants that. Seems most others are happy with the impostor version, because they are complete fools.

APP: Didn't Speaker Tommy Davis tell the New Yorker that the technology used in Scientology orgs was checked against "Hubbard's original dictation".

BARBARA SCHWARZ: Recordings can be altered, besides the impostor had a similar voice and they checked against his dictations.

APP: Do you think that a homosexual person or lesbian person is a pervert?

BARBARA SCHWARZ: As I explained already, it is a person who was tricked into taking a body of the gender that he didn't have in his or her former lifetimes and that he wouldn't had chosen on himself. We can either overlook these psychiatric secret service crimes and wait until it is done to anybody and until anybody is gay or lesbian and until there are no straight people anymore, or we rather tell all those people who are attracted to their own sex what happened to them and make sure that they have the right to chose the gender that they really want.

APP: The New Yorker wrote that Tommy Davis acknowledged that some of Hubbard's medical records don't add up to what is being told. How do you explain that?

BARBARA SCHWARZ: Duh! Two different men, two different lives. The founder and Jack "Apollo" Vistaril were not the same men.

APP: Fletcher Prouty said that Hubbard had an "intelligence background" and some of his records were sheep-dished…

BARBARA SCHWARZ: (interrupts) I am telling you, Jack Vistaril was a SEGNPMSS/CIA double agent and particularly, the records that he isn't the real founder of Scientology were sheep-dished… The CIA has a lot of explaining to do.

APP: What about Paul Haggis' therapy? He said it was helpful, and he doesn't blame others anymore for his problems.

BARBARA SCHWARZ: You should add that this "therapy" appears to be psychiatric or psychological therapy. It's funny what he said he doesn't blame others anymore because all of what he told to the New Yorker sounds like nothing but blame on Scientology, Scientologists, and L. Ron Hubbard. He said, he finds psychiatric or psychological therapy helpful but despite that Deborah Rennard left the church too, they separated. So, how did this therapy help? It sure didn't help their relationship.

APP: It's scandalous that Daniel Montalvo didn't knew who Robert Redford is. Do you agree?

BARBARA SCHWARZ: (laughs) There might be many 19-years old who sit glued on the TV who don't know who Robert Redford is because they are mainly interested in their own generation. Jason Beghe says that Daniel never watched TV. Like most of his generation, he seems to be a guy who rather sits behind a computer or watches on his computer. That "innocent" 19-year old knew what computer hard drives and zip drives are, and I believe he was accused of stealing such technical property from the Scientology orgs. I don't buy Jason's Behge's version of

"Amish" Scientology. I think that Daniel was rather tech sassy just like most kids of his generation.

APP: Do you think that the church will fairgame Haggis in two years on a scandal that has nothing to do with Scientology?

BARBARA SCHWARZ: Real Scientologists never would fairgame anyone and as for the non-Scientologists who hang out in the orgs for short or very long, I am sure that Paul Haggis knows what they are capable of. It takes one to know one. He really is a piece of work. He covered his tracks. He can do now whatever he wants and when the scandal blows open, he thinks he can get away with it by saying: "See, I told Lawrence Wright from the New Yorker in February 2011, I am being fairgamed by Scientologists… I am an innocent bastard…"

APP: What do you say to those people who say that I'm your sock puppet interviewer?

BARBARA SCHWARZ: Are you?

APP: That is getting us nowhere. But thanks for that interview and your unique opinions. It's always a pleasure, Barbara. Take care.

BARBARA SCHWARZ: You too. Bye.

Why SUVs at all? It's not like DC officials go off road or pull
trailers.

Put 'em in a Crown Vic or a Lumina, if they need a back seat.

Curt

I to have not seen Republicans on their knees, praying to RR before going to bed. Speaking publicly, Republicans sure have. They'd love to have sex with him. They'd bow down to him.

But in reality, RR is too liberal for your typical rightwinger today. He's morphed into a myth.

We were not talking about, "the tax code". We were talking about, "higher taxes". These are two different things.

Whats a, "long term tax shelter"? What are you talking about? Do you really think the government can invest your money better than you can? You know what they have been doing with your social security money, don't you? - They have been spending it! That's what they do with every cent they get their grubby little hands on. the lower the taxes on profits, the more money I can

reinvest in my business and the faster it will grow, and the more employees I will hire to keep up with the increased business. That's a fact. And it doesn't depend on your liberal keneysian double talk, either.

Well, we were talking about higher taxes, not the tax code. I have no
argument with the tax code. ASAMOF, I think the form 1040 is one of the very
few really useful government documents......

I to have not seen Liberals & Democrats on their knees,
Praying to "BO" before going to bed.
Speaking publicly, Liberals & Democrats sure have.

They'd love to have sex with "BO".

They'd bow down to "BO".

But in reality, "BO" is too liberal
for your typical left-winger today.

"BO"s morphed into a OMG {Obama}.

> So why should the British [UK] Taxpayers Pay For The News and
> Information of Other Nations ?

You know, if I and You can write on this newsgroup it is probably because the BBC was so active during past dark days.

French people like me know very well what they owe to the BBC. Thanks to the existence of the BBC a lot of people understood that it was possible to resist against the facism. In those dark days, UK was suffering a lot from constant bombing. If there were no resistance in France and in other countries (east front too), UK would have had a lot more problems to succeed in fighting against the oppressor.

Today, the problem does not come from hostile governments (well... sometimes yes...), but from hostile groups who recruit people who does not know nothing about the world they live in. Switching off the BBC world service is just like leaving the place for people who can act against our interests.

Switching off the BBC world service, is not only switching off "News and Information", but it is also like switching off a light house in the darkness for a lot of people.... that you will get on your back..... one day.... if you don't provide them a good quality of information.

> Shouldn't the Citizens-of-the-World "UN" Be Paying for the BBC then...

Playing this game will give you a little bit extra money now, but you cannot imagine the amount of money you will have to pay in the future...

A government can scramble a foreign satellite feed.... but succeeding in blurring the BBC World Service in LW/MW/SW.... Even the Russians were not able to do that everywhere...

Sebastien.

We are facing the same kind of problem in France... When you get a tool, you can use it in a good wan or not... When you get no tools you cannot use it anymore.

If you switch off the BBC World Service, you will have no tool, ever, to be used when you will be facing a problem.

> Anyway, from 2014 it will be funded from licence revenue, not from a
> direct government grant.

So what? What can be done by the law, can be undone by the law. The is the law of reciprocity :)

> Sebastien's point about tax evasion is a fair one. The UK government has
> been colluding in it for years.

My point was not to put any focus on that, but when I see what was England and the kind of problems you get now... But, you know, in France, we get the same kind of problems... When you get companies who get one leg in Europe and one leg in the low cost working rate countries... What would you expect...

Sebastien.

I have solutions manuals to all problems and exercises in these textbooks. To get one in an electronic format contact me at: kalvinmanual(at)gmail(dot)com and let me know its title, author and edition. Please this service is NOT free.

solutions manual to A Course in Game Theory by Osborne, Rubinstein
solutions manual to A Course in Modern Mathematical Physics by Peter Szekeres
solutions manual to A First Course in Abstract Algebra (7th Ed., John B. Fraleigh)
solutions manual to A First Course in Differential Equations - The Classic Fifth Edition By Zill, Dennis G
solutions manual to A First Course In Probability 7th Edition by Sheldon M. Ross
solutions manual to A First Course in Probability Theory, 6th edition, by S. Ross.
solutions manual to A First Course in String Theory, 2004, Barton Zwiebach
solutions manual to A First Course in the Finite Element Method, 4th Edition logan
solutions manual to A Practical Introduction to Data Structures and Algorithm Analysis 2Ed by Shaffer
solutions manual to A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
solutions manual to A Short Course in General Relativity 2e by J. Foster and J. D. Nightingale
solutions manual to A Short Introduction to Quantum Information and Quantum Computation by Michel Le Bellac
solutions manual to Accounting Principles 8e by Kieso, Kimmel
solutions manual to Adaptive Control, 2nd. Ed., by Astrom, Wittenmark
solutions manual to Adaptive Filter Theory (4th Ed., Simon Haykin)
solutions manual to Advanced Accounting 10E international ED by Beams , Clement, Anthony, Lowensohn
solutions manual to Advanced Calculus Gerald B. Folland
solutions manual to Advanced Digital Design with the Verilog HDL by Michael D. Ciletti
solutions manual to Advanced Dynamics (Greenwood)
solutions manual to Advanced Engineering Electromagnetics by Constantine A. Balanis
solutions manual to Advanced Engineering Mathematics 3rd ed zill
solutions manual to Advanced Engineering Mathematics 8Ed Erwin Kreyszig
solutions manual to Advanced Engineering Mathematics by Erwin

Kreyszig, 9th ed
solutions manual to Advanced Engineering Mathematics, 6th Edition by Peter V. O'Neil
solutions manual to Advanced Engineering Mathematics,2E, by Zill, Cullen
solutions manual to Advanced Financial Accounting by Baker
solutions manual to Advanced Industrial Economics, 2nd ED Stephen Martin
solutions manual to Advanced Macroeconomics, by David Romer
solutions manual to Advanced Modern Engineering Mathematics 3rd Ed Glyn James
solutions manual to Advanced Modern Engineering Mathematics, 3rd Ed., by G. James
solutions manual to Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
solutions manual to Algebra & Trigonometry and Precalculus, 3rd Ed By Beecher, Penna, Bittinger
solutions manual to Algebra Baldor
solutions manual to Algebra-By Thomas W. Hungerford
solutions manual to Algorithm Design (Jon Kleinberg & Ã%va Tardos)
solutions manual to An Interactive Introduction to Mathematical Analysis 2nd E (Jonathan Lewin)
solutions manual to An Introduction to Database Systems (8th Ed., C.J. Date)
solutions manual to An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
solutions manual to An Introduction to Numerical Analysis By Endre Süli,David F. Mayers
solutions manual to An Introduction to Ordinary Differential Equations (James C. Robinson)
solutions manual to An Introduction to Signals and Systems by John Stuller
solutions manual to An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
solutions manual to An Introduction to Thermal Physics by Schroeder, Daniel V
solutions manual to An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
solutions manual to Analog Integrated Circuit Design, by Johns, Martin
solutions manual to Analysis and Design of Analog Integrated Circuits (4th Edition) by Gray , Lewis , Meyer
solutions manual to Analytical Chemistry, Higson
solutions manual to Analytical Mechanics 7E by Grant R. Fowles, George L. Cassiday
solutions manual to Antenna Theory 2nd edition by Balanis
solutions manual to Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
solutions manual to Applied Calculus for the Managerial, Life, and Social Sciences, 7 E, by Soo T. Tan

solutions manual to Applied Econometric Time Series, 2nd Edition by Enders
solutions manual to Applied Finite Element Analysis 2ed, by LJ SEGERLIND
solutions manual to Applied Fluid Mechanics (6th Ed., Mott)
solutions manual to Applied Numerical Analysis, 7th Edition, by Gerald, Wheatley
solutions manual to Applied Numerical Methods with MATLAB for Engineers and Scientists(Steven C. Chapra)
solutions manual to Applied Partial Differential Equations (4th Ed., Haberman)
solutions manual to Applied Partial Differential Equations by J. David Logan
solutions manual to Applied Quantum Mechanics (A. F. J. Levi)
solutions manual to Applied Statistics and Probability for Engineers (2nd Ed., Douglas Montgomery & George Runger)
solutions manual to Applied Statistics and Probability for Engineers (3rd Ed., Douglas Montgomery & George Runger)
solutions manual to Applied Strength of Materials (4th Ed., Mott)
solutions manual to Applying Maths in the Chemical and Biomolecular Sciences, Beddard
solutions manual to Artificial Intelligence A Modern Approach 2e by Russell, Norvig
solutions manual to Auditing and Assurance Services- An Integrated Approach 12E by Arens
solutions manual to Auditing and Assurance Services, 12th edition, Alvin A Arens, Randal J Elder, Mark Beasley
solutions manual to Automatic Control Systems, 8E, by Kuo, Golnaraghi
solutions manual to Basic Electrical Engineering By Nagrath, D P Kothari
solutions manual to Basic Engineering Circuit Analysis, 8th Edition by J. David Irwin, R. Mark Nelms
solutions manual to Basic Heat and Mass Transfer by A. F. Mills
solutions manual to Basic Probability Theory by Robert B. Ash
solutions manual to Bioprocess Engineering Principles (Pauline M. Doran)
solutions manual to Business Statistics - Decision Making 7th E by David F. Groebner
solutions manual to C++ for Computer Science and Engineering by Vic Broquard
solutions manual to C++ How to Program 3rd edition - Deitel
solutions manual to Calculus - Early Transcendentals, 6th E, by Anton, Bivens, Davis
solutions manual to Calculus - Early Transcendentals, 7E, by Anton, Bivens, Davis
solutions manual to Calculus - Late Transcendentals Single Variable, 8th Ed by Anton, Bivens, Davis
solutions manual to Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
solutions manual to Calculus 2nd edition-M. Spivak

solutions manual to Calculus A Complete Course 6th Edition by by R.A. Adams
solutions manual to Calculus and its Applications (11th Ed., Larry J Goldstein, Schneider, Lay & Asmar)
solutions manual to Calculus by Gilbert Strang
solutions manual to Calculus early transcendentals 8th Ed, by Anton Bivens Davis
solutions manual to Calculus Early Transcendentals, 5th Edition, JAMES STEWART
solutions manual to Calculus George Thomas 10th ed Vol 1
solutions manual to Calculus of Variations MA 4311 LECTURE NOTES (Russak)
solutions manual to Calculus One & Several Variables 8e by S Salas
solutions manual to Calculus Vol 2 by Apostol
solutions manual to Calculus With Analytic Geometry 4th (Henry Edwards & David E. Penney)
solutions manual to Calculus with Applications 8 Edition by Lial, Greenwell, Ritchey
solutions manual to Calculus, 4th edition stewart
solutions manual to Calculus, An Applied Approach, 7E, by Larson
solutions manual to Calculus, Single and Multivariable, 4E.,Vol 1& Vol 2 by Hughes-Hallett,McCallum
solutions manual to Calculus, Single Variable, 3E by Hughes-Hallett,McCallum
solutions manual to Chemical and Engineering Thermodynamics 3Ed by Stanley I. Sandler
solutions manual to Chemical Engineering Design (Coulson & Richardson's Chemical Engineering - Volume 6) - (4th Ed., Sinnott)
solutions manual to Chemical Engineering Volume 1, 6th Edition, by Richardson, Coulson,Backhurst, Harker
solutions manual to Chip Design for Submicron VLSI CMOS Layout and Simulation, John P. Uyemura
solutions manual to Cisco Technical Solution Series IP Telephony Solution Guide Version 2.0
solutions manual to Classical Dynamics of Particles and Systems, 5th Ed, by Marion, Thornton
solutions manual to Classical Dynamics, A Contemporary Approach (Jorge V. Jose)
solutions manual to Classical Electrodynamics by John David Jackson
solutions manual to Classical Mechanics (Douglas Gregory)
solutions manual to Classical Mechanics 2nd Ed by Goldstein
solutions manual to CMOS Analog Circuit Design, 2ed by Phillip E. Allen, Douglas R. Holberg
solutions manual to CMOS- Circuit Design, Layout, and Simulation, Revised 2nd Ed by R. Jacob Baker
solutions manual to Cmos Digital Integrated Circuits , Sung-Mo Kang,Yusuf Leblebici
solutions manual to CMOS Mixed-Signal Circuit Design, 2nd Ed by R. Jacob Baker
solutions manual to Communication Networks, 2e, Alberto Leon-Garcia,

Indra Widjaja
solutions manual to Communication Systems (4th Ed., Simon Haykin)
solutions manual to Communication Systems An Introduction to Signals and Noise in Electrical Communication, 4E, A. Bruce Carlson
solutions manual to Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
solutions manual to Complex Variables with Applications, 3rd ED by David A. Wunsch
solutions manual to Computational Techniques for Fluid Dynamics Srinivas, K., Fletcher, C.A.J.
solutions manual to Computer Architecture - A Quantitative Approach, 4th Ed by Hennessy, Patterson
solutions manual to Computer Architecture Pipelined & Parallel Processor Design by Michael J Flynn
solutions manual to Computer Networking A Top-Down Approach Featuring the Internet, 3E Kurose,Ross
solutions manual to Computer Networking: A Top-Down Approach (4th Ed., James F. Kurose & Keith W. Ross)
solutions manual to Computer Networks A Systems Approach, 2nd Edition, Larry Peterson, Bruce Davie
solutions manual to Computer Networks, 4th Ed., by Andrew S. Tanenbaum
solutions manual to Computer Organization 3rd Edition by Carl Hamacher , Zvonoko Vranesic ,Safwat Zaky
solutions manual to Computer Organization and Architecture: Designing for Performance (7th Ed., William Stallings)
solutions manual to Computer Organization and Design The Hardware Software Interface, 3rd edition by David A Patterson and John L Hennessy
solutions manual to Computer system architecture 3rd Ed Morris Mano
solutions manual to Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
solutions manual to Concepts of Modern Physics 6th ED by Arthur Beiser
solutions manual to Contemporary Engineering Economics (4th Ed., Chan Park)
solutions manual to Continuum Electromechanics by James R. Melcher
solutions manual to Control Systems Engineering, 4E, by Norman Nise
solutions manual to Control Systems Principles and Design 2e by M. Gopal
solutions manual to Convex Analysis and Optimization Dimitri P. Bertsekas
solutions manual to Corporate Finance The Core plus MyFinanceLab Student Access Kit (Jonathan Berk & Peter DeMarzo)
solutions manual to Corporate Finance, 7E, by Ross
solutions manual to Cost Accounting-A Managerial Emphasis 13th Ed by Charles Horngren
solutions manual to Cryptography and Network Security (4th Ed., William Stallings)
solutions manual to Data & Computer Communication, 7th Ed, by William Stallings
solutions manual to Data Communications and Networking by Behroz

Forouzan
solutions manual to Data Structures with Java by John R. Hubbard, Anita Huray
solutions manual to Database Management Systems, 3rd Ed., by Ramakrishnan, Gehrke
solutions manual to Database System Concepts 5th ED by Silberschatz, Korth, Sudarshan
solutions manual to Design Analysis in Rock Mechanics by William G. Pariseau
solutions manual to Design and Analysis of Experiments, 6E, by Montgomery
solutions manual to Design of Analog CMOS Integrated Circuits by Razavi
solutions manual to Design of Analog CMOS Integrated Circuits, 2 Edition, by Razavi Douglas C. Montgomery
solutions manual to Design of Fluid Thermal Systems, 2nd Edition janna
solutions manual to Design of Machinery (3rd Ed., Norton)
solutions manual to Design of Reinforced Concrete, 8th Ed by McCormac, Brown
solutions manual to Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
solutions manual to Device Electronics for Integrated Circuits 3rd Edition by muller kamins
solutions manual to Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, Hall, McDill & West)
solutions manual to Differential Equations and Linear Algebra (C. Henry Edwards & David E. Penney)
solutions manual to Differential Equations and Linear Algebra 3e by Stephen W Goode
solutions manual to Differential Equations with Boundary Value Problems (2e, John Polking, Al Boggess & Arnold)
solutions manual to Digital Communications Fundamentals and Applications 2e Bernard Sklar
solutions manual to Digital Communications, 4E, by Proakis
solutions manual to Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
solutions manual to Digital Design: Principles and Practices Package (4th Ed., John F. Wakerly)
solutions manual to Digital Fundamentals (9th Ed., Thomas L. Floyd)
solutions manual to Digital Image Processing, 2e, by Gonzalez, Woods
solutions manual to Digital Integrated Circuits, 2nd Ed., by Rabaey
solutions manual to Digital Logic Design by Mano
solutions manual to Digital Signal Processing - A Modern Introduction, by Ashok Ambardar
solutions manual to Digital Signal Processing Principles, Algorithms and Applications, 3rd Edition by John G. Proakis
solutions manual to Digital Signal Processing a computer based approach (2nd Ed.) (Mitra)
solutions manual to Digital Signal Processing a computer based approach (Mitra)

solutions manual to Digital Signal Processing by Proakis & Manolakis
solutions manual to Digital Signal Processing by Thomas J. Cavicchi
solutions manual to Digital Systems - Principles and Applications (10th Ed., Ronald Tocci, Neal Widmer, Greg Moss)
solutions manual to Discrete and Combinatorial Mathematics 5e by Ralph P. Grimaldi
solutions manual to Discrete Mathematics (6th Ed., Richard Johnsonbaugh)
solutions manual to Discrete Mathematics (6th Edition) by Richard Johnsonbaugh
solutions manual to Discrete Random Signals and Statistical Signal Processing Charles W. Therrien
solutions manual to Discrete Time Signal Processing, 2nd Edition, Oppenheim
solutions manual to DSP First A Multimedia Approach-Mclellan, Schafer & Yoder
solutions manual to Dynamic Modeling and Control of Engineering Systems 2 E T. Kulakowski , F. Gardner, Shearer
solutions manual to Dynamics of Flight- Stability and Control, 3rd Ed by Etkin, Reid
solutions manual to Dynamics of Mechanical Systems by C. T. F. Ross
solutions manual to Econometric Analysis, 5E, by Greene
solutions manual to Econometric Analysis, 6E, by Greene
solutions manual to Econometrics of Financial Markets, by Adamek, Cambell, Lo, MacKinlay, Viceira
solutions manual to Econometrics: A Modern Introduction (Michael P. Murray)
solutions manual to Electric Circuits (7th Ed., James W Nilsson & Susan Riedel)
solutions manual to Electric Circuits (8th Ed., James W Nilsson & Susan Riedel)
solutions manual to Electric Machinery 6th ed. A.E. Fitzgerald,Kingsley,Umans
solutions manual to Electric Machinery and Power System Fundamentals (Chapman)
solutions manual to Electric Machinery Fundamentals (4th Ed., Chapman)
solutions manual to Electric Machines Analysis and Design Applying MATLAB,Jim Cathey
solutions manual to Electric Machines By D. P. Kothari, I. J. Nagrath
solutions manual to Electrical Engineering Principles and Applications (3rd Ed., Allan R. Hambley)
solutions manual to Electrical Engineering Principles and Applications (4th Ed., Allan R. Hambley)
solutions manual to Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
solutions manual to Electromagnetic Fields and Energy by Haus, Melcher
solutions manual to Electromagnetics Problem Solver (Problem Solvers) By The Staff of REA
solutions manual to Electromagnetism. Principles and Applications by LORRAIN, PAUL ; CORSON, DAVID

solutions manual to Electromechanical Dynamics Part 1, 2, 3 by Herbert H. Woodson, James R. Melcher
solutions manual to Electronic Circuit Analysis, 2nd Ed., by Donald Neamen
solutions manual to Electronic Devices 6th ed and electronic devices Electron Flow Version 4th ed, Floyd
solutions manual to Electronic Devices and Circuit Theory 8th Ed by Robert Boylestad
solutions manual to Electronic Physics Strabman
solutions manual to Electronics, 2nd Ed., by Allan R. Hambley
solutions manual to Elementary Differential Equations (Werner E. Kohler, Johnson)
solutions manual to Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
solutions manual to Elementary Linear Algebra 5th edition by Stanley I. Grossman
solutions manual to Elementary Linear Algebra by Matthews
solutions manual to Elementary Linear Algebra with Applications (9th Ed., Howard Anton & Chris Rorres)
solutions manual to Elementary mechanics & thermodynamics jhon w.Nobury
solutions manual to ELEMENTARY NUMBER THEORY AND ITS APPLICATIONS, (5TH EDITION, Bart Goddard, Kenneth H. Rosen)
solutions manual to Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
solutions manual to Elementary Statistics Using The Graphing Calculator 9 Ed by MILTON LOYER
solutions manual to Elementary Statistics Using the Graphing Calculator For the TI-83-84 Plus (Mario F. Triola)
solutions manual to Elements of Information Theory - M. Cover, Joy A. Thomas
solutions manual to Elements of Chemical Reaction Engineering by Fogler hubbard, hamman , johnson , 3rd edition
solutions manual to Elements of Deductive Inference by Bessie, Glennan
solutions manual to Elements of Electromagnetics , 2 ed by Matthew N. O. Sadiku
solutions manual to Elements of Electromagnetics , 3ed by Matthew N. O. Sadiku
solutions manual to Embedded Microcomputer Systems Real Time Interfacing, 2nd Edition , Jonathan W. Valvano
solutions manual to Engineering and Chemical Thermodynamics (Koretsky)
solutions manual to ENGINEERING BIOMECHANICS (STATICS) by Angela Matos, Eladio Pereira, Juan Uribe and Elisandra Valentin
solutions manual to Engineering Circuit Analysis 6Ed, Luay Shaban
solutions manual to Engineering Circuit Analysis 6th ed by Hayt
solutions manual to Engineering Circuit Analysis 7th Ed. by William H. Hayt Jr
solutions manual to Engineering Electromagnetics 6E by William H. Hayt Jr. and John A. Buck
solutions manual to Engineering Electromagnetics 7E by William H. Hayt

Jr. and John A. Buck
solutions manual to Engineering Fluid Mechanics - 8th Ed by Crowe, Elger & Roberson
solutions manual to Engineering Fluid Mechanics 7th Ed by Crowe and Donald
solutions manual to Engineering Materials Science, by Milton Ohring
solutions manual to Engineering Mathematics (4th Ed., John Bird)
solutions manual to Engineering Mechanics - Dynamics by Boresi, Schmidt
solutions manual to Engineering Mechanics - Dynamics, 5th Ed (J. L. Meriam, L. G. Kraige)
solutions manual to Engineering Mechanics - Dynamics, 6th Ed (J. L. Meriam, L. G. Kraige)
solutions manual to Engineering Mechanics - Statics (10th Edition) by Russell C. Hibbeler
solutions manual to Engineering Mechanics - Statics (11th Edition) by Russell C. Hibbeler
solutions manual to Engineering Mechanics - Statics by Boresi, Schmidt
solutions manual to Engineering Mechanics - Statics, 4th Ed (J. L. Meriam, L. G. Kraige)
solutions manual to Engineering Mechanics - Statics, 6th Ed (J. L. Meriam, L. G. Kraige)
solutions manual to Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
solutions manual to Engineering Mechanics Dynamic (10th Edition) hibbeler
solutions manual to Engineering Mechanics Dynamics (12th Ed., Hibbeler)
solutions manual to Engineering Mechanics Dynamics, Bedford & Fowler, 5th Edition
solutions manual to Engineering Mechanics Dynamics, by R. C. Hibbeler, 3rd
solutions manual to Engineering Mechanics Statics (12th Ed., Hibbeler)
solutions manual to Engineering Mechanics Statics, Bedford & Fowler, 5th Edition
solutions manual to Engineering Statistics (4th Ed., Douglas Montgomery, George Runger & Norma Faris Hubele)
solutions manual to Essentials of Soil Mechanics and Foundations: Basic Geotechnics (7th Ed., David F. McCarthy)
solutions manual to Feedback Control of Dynamic Systems (4th Ed., Franklin, Powell & Emami-Naeini)
solutions manual to Feedback Control of Dynamic Systems (5th Ed., Franklin, Powell & Emami-Naeini)
solutions manual to Field and Wave Electromagnetics 2nd Ed by David K. Cheng
solutions manual to Financial Accounting 6th Ed by Harrison
solutions manual to Financial Management- Theory and Practice 12 th ED by Brigham, Ehrhardt
solutions manual to Finite Element Techniques in Structural Mechanics Ross

solutions manual to First Course in Probability (7th Ed., Sheldon Ross)
solutions manual to Fluid Mechanics (5th Ed., White)
solutions manual to Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
solutions manual to Fluid Mechanics by CENGEL
solutions manual to Fluid Mechanics Egon Krause
solutions manual to Fluid Mechanics Fundamentals and Applications by Çengel & Cimbala
solutions manual to Fluid Mechanics with Engineering Applications, 10th Edition, by Finnemore
solutions manual to Foundations of Colloid Science 2e , Hunter
solutions manual to Foundations of Electromagnetic Theory by John R. Reitz, Frederick J. Milford
solutions manual to Fourier and Laplace Transform - Antwoorden
solutions manual to Fractal Geometry Mathematical Foundations and Applications, 2nd Ed Kenneth Falcone
solutions manual to fracture mechanics ; fundamentals and applications, 2E, by T.L. Anderson
solutions manual to From Polymers to Plastics By A.K. van der Vegt
solutions manual to Fundamentals of Aerodynamics (3 Ed., Anderson)
solutions manual to Fundamentals of Aerodynamics (2 Ed., Anderson)
solutions manual to Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
solutions manual to Fundamentals of Chemical Reaction Engineering by Davis
solutions manual to Fundamentals of Complex Analysis (3rd Ed., E. Saff & Arthur Snider)
solutions manual to Fundamentals of Computer Organization and Architecture by Abd-El-Barr, El-Rewini
solutions manual to Fundamentals of Corporate Finance 8th edition by Ross
solutions manual to Fundamentals of Corporate Finance 9th edition by Ross
solutions manual to Fundamentals of Corporate Finance, 4th Edition (Brealey, Myers, Marcus)
solutions manual to Fundamentals of Differential Equations 7E Kent Nagle, B. Saff, Snider
solutions manual to Fundamentals of Digital Logic with VHDL Design (1st Ed., Stephen Brown Vranesic)
solutions manual to Fundamentals of Electric Circuits (2nd.ed.) by C.K.Alexander M.N.O.Sadiku
solutions manual to Fundamentals of Electric Circuits (4E., Charles Alexander & Matthew Sadiku)
solutions manual to Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
solutions manual to Fundamentals of Electronic Circuit Design , Comer
solutions manual to FUNDAMENTALS OF ENGINEERING ELECTROMAGNETICS, by DAVID CHENG
solutions manual to Fundamentals of Engineering Thermodynamics, 6th Ed

(Michael J. Moran, Howard N. Shapiro)
solutions manual to Fundamentals of Engineering Thermodynamics, 7th Ed (Michael J. Moran, Howard N. Shapiro)
solutions manual to Fundamentals of Financial Management 12th edition James C. Van Horne, Wachowicz
solutions manual to Fundamentals of Fluid Mechanics, 4E (Bruce R. Munson, Donald F. Young, Theodore H.)
solutions manual to Fundamentals of Heat and Mass Transfer - 5th Edition F.P. Incropera D.P. DeWitt
solutions manual to Fundamentals of Heat and Mass Transfer (4th Ed., Incropera, DeWitt)
solutions manual to Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
solutions manual to Fundamentals of Logic Design, 5th Ed., by Charles Roth
solutions manual to Fundamentals of Machine Component Design (3rd Ed., Juvinall)
solutions manual to Fundamentals of Manufacturing 2nd Edition by Philip D. Rufe
solutions manual to Fundamentals of Materials Science and Engineering- An Integrated Approach, 3rd Ed by Callister
solutions manual to Fundamentals of Modern Manufacturing: Materials, Processes, and Systems (2nd Ed., Mikell P. Groover)
solutions manual to Fundamentals of Organic Chemistry, 5E, by T. W. Graham Solomons
solutions manual to Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
solutions manual to Fundamentals of Physics, 8th Edition Halliday, Resnick, Walker
solutions manual to Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
solutions manual to Fundamentals of Quantum Mechanics (C.L. Tang)
solutions manual to Fundamentals of Semiconductor Devices, 1st Edition by Anderson
solutions manual to Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Kamen & Bonnie S Heck)
solutions manual to Fundamentals of Solid-State Electronics by Chih-Tang Sah
solutions manual to Fundamentals of Thermal-Fluid Sciences, 2nd Ed. by Cengel
solutions manual to Fundamentals of Thermodynamics 5th Ed by Sonntag, Borgnakke and Van Wylen
solutions manual to Fundamentals of Thermodynamics 6th Ed by Sonntag, Borgnakke & Van Wylen
solutions manual to Fundamentals of Wireless Communication by Tse and Viswanath
solutions manual to Gas Dynamics (3rd Ed., John & Keith)
solutions manual to General Chemistry 9 Edition by Ebbings, Gammon
solutions manual to General Chemistry, 8th Edition by Ralph H. Petrucci; William S. Harwood; Geoffrey Herring

solutions manual to Geometry and Discrete Mathematics Addison Wesley
solutions manual to Guide to Energy Management, 6th Edition by Klaus Dieter E. Pawlik
solutions manual to Guide to Energy Management, Fifth Edition, Klaus-Dieter E. Pawlik
solutions manual to HARCOURT MATHEMATICS 12 Advanced Functions and Introductory Calculus
solutions manual to Harcourt Mathematics 12 Geometry and Discrete Mathematics
solutions manual to Heat and Mass Transfer: A Practical Approach (3rd. Ed., Cengel)
solutions manual to Heat Transfer A Practical Approach ,Yunus A. Cengel 2d ed
solutions manual to Heating, Ventilating and Air Conditioning Analysis and Design, 6th Edition McQuiston, Parker, Spitler
solutions manual to History of Mathematics: Brief Version (Victor J. Katz)
solutions manual to Hydraulics in Civil and Environmental Engineering 4 E by Chadwick , Morfett
solutions manual to Industrial Organization Theory & Applications by Shy
solutions manual to Intermediate Accounting Kieso 12th ed
solutions manual to Introduction to Algorithms, 2nd Ed by Cormen, Leiserson
solutions manual to Introduction To Analysis (3rdEd) -by William Wade
solutions manual to Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
solutions manual to Introduction to Commutative Algebra by M. F. Atiyah
solutions manual to Introduction to Digital Signal Processing (in Serbian) by Lj. Milic and Z. Dobrosavljevic
solutions manual to Introduction to Econometrics (2nd ed., James H. Stock & Mark W. Watson)
solutions manual to Introduction to Electric Circuits 7th Edition by Dorf, Svaboda
solutions manual to Introduction to Electric Circuits, 6E, Dorf
solutions manual to Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
solutions manual to Introduction to Elementary Particles 2nd Ed by David Griffiths
solutions manual to Introduction to Environmental Engineering and Science (3rd Ed., Gilbert M. Masters & Wendell P. Ela)
solutions manual to Introduction to Environmental Engineering and Science, Edition 2, Masters
solutions manual to Introduction to Ergonomics 2E by Robert Bridger
solutions manual to Introduction to Fluid Mechanics (6E., Robert Fox, Alan McDonald & Philip)
solutions manual to Introduction to fluid mechanics 5th edition by Alan T. McDonald, Robert W Fox
solutions manual to Introduction to Graph Theory 2E - West

solutions manual to Introduction to Heat Transfer by Vedat S. Arpaci, Ahmet Selamet, Shu-Hsin Kao
solutions manual to Introduction to Linear Algebra, 3rd Ed., by Gilbert Strang
solutions manual to Introduction to Materials Science for Engineers (6th Ed., Shackelford)
solutions manual to Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
solutions manual to Introduction to Operations Research - 7th ed by Frederick Hillier, Gerald Lieberman
solutions manual to Introduction to Probability 2nd Ed by Bertsekas and Tsitsiklis
solutions manual to Introduction to Probability by Dimitri P. Bertsekas and John N. Tsitsiklis
solutions manual to Introduction to Probability by Grinstead, Snell
solutions manual to Introduction to Quantum Mechanics (2nd Ed., David J. Griffiths)
solutions manual to Introduction to Quantum Mechanics 1st edition (1995) by David J. Griffiths
solutions manual to Introduction to Queueing Theory 2nd Edition by R.B. Cooper
solutions manual to Introduction to Scientific Computation and Programming, 1st Edition by Daniel Kaplan
solutions manual to Introduction to Solid State Physics 8th Ed by Kittel & Charles
solutions manual to Introduction to Statistical Physics by Kerson Huang
solutions manual to Introduction to Statistical Quality Control (5th Ed., Douglas C. Montgomery)
solutions manual to Introduction to the Theory of Computation by Ching Law
solutions manual to Introduction to Thermal and Fluids Engineering by Kaminski, Jensen
solutions manual to Introduction to Thermal Systems Engineering Moran Shapiro Munson
solutions manual to Introduction to VLSI Circuits and Systems, by John P. Uyemura
solutions manual to Introduction to Wireless Systems by P.M Shankar
solutions manual to Introductory Econometrics A Modern Approach, 3Ed by Jeffrey Wooldridge
solutions manual to Introductory Quantum Optics (Christopher Gerry & Peter Knight)
solutions manual to Introdution to Solid State Physics, 8th Edition by Kittel
solutions manual to Investment Analysis and Portfolio Management 7th Edition by Frank K. et al. Reilly
solutions manual to Journey into Mathematics An Introduction to Proofs ,Joseph Rotman
solutions manual to Kinematics, Dynamics, and Design of Machinery, 2nd Ed., Waldron & Kinzel

solutions manual to Kinetics of Catalytic Reactions by M. Albert Vannice
solutions manual to Laser Fundamentals (2nd Ed., William T. Silfvast)
solutions manual to Lectures on Corporate Finance 2006, 2 Ed by Bossaerts, Oedegaard
solutions manual to Linear Algebra - 2 Ed - Poole
solutions manual to Linear Algebra and Its Applications 3rd ed by David C. Lay
solutions manual to Linear Algebra Done Right, 2nd Ed by Sheldon Axler
solutions manual to Linear Algebra with Applications (6th Ed., S. Leon)
solutions manual to Linear Algebra With Applications, 2nd Edition by W. Keith Nicholson
solutions manual to Linear Algebra, 4th Ed, by Stephen H. Friedberg , Arnold J. Insel , Lawrence E. Spence
solutions manual to Linear Algebra, by J. Hefferon
solutions manual to Linear Circuit Analysis Time Domain, Phasor and Laplace.., 2nd Ed, Lin
solutions manual to Linear Systems And Signals, 1stE, B P Lathi
solutions manual to Logic and Computer Design Fundamentals, 2E, by Morris Mano and Charles Kime
solutions manual to Logic and Computer Design Fundamentals, 3d edition by Morris Mano and Charles Kime
solutions manual to Logic and Computer Design Fundamentals, 4/E, by Morris Mano and Charles Kime
solutions manual to Machine Design : An Integrated Approach (3rd Ed., Norton)
solutions manual to Managing Business Process Flows: Principles of Operations Management(2nd Ed., Anupind, Chopra, Deshmukh, et al)
solutions manual to Managing Engineering and Technology (4th, Morse & Babcock)
solutions manual to Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
solutions manual to Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black,Kohser)
solutions manual to Materials Science and Engineering- An Introduction (7th Ed., William D. Callister, Jr.)
solutions manual to Materials Science and Engineering- An Introduction (6th Ed., William D. Callister, Jr.)
solutions manual to Mathematical Analysis, Second Edition by Tom M. Apostol
solutions manual to Mathematical Methods for Physicists 5 Ed, Arfken
solutions manual to Mathematical Methods for Physics and Engineering, (3rd Ed., Riley,Hobson)
solutions manual to Mathematical Methods in the Physical Sciences; 3 edition by Mary L. Boas
solutions manual to Mathematical Models in Biology An Introduction (Elizabeth S. Allman & John A. Rhodes)
solutions manual to Mathematical Techniques 4th ED by D W Jordan & P Smith

solutions manual to Mathematics for Economists, by Carl P. Simon , Lawrence E. Blume
solutions manual to Mathematics for Physicists by Susan Lea
solutions manual to Matrix Analysis and Applied Linear Algebra by Meyer
solutions manual to Mechanical Engineering Design 8th Ed by Shigley & Budynas
solutions manual to Mechanical Engineering Design, 7th Ed. by Mischke, Shigley
solutions manual to Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
solutions manual to Mechanical Vibrations (3rd Ed., Rao)
solutions manual to Mechanics of Aircraft Structures, 2nd Ed by Sun
solutions manual to Mechanics of Fluids (8th Ed., Massey)
solutions manual to Mechanics of Fluids 3rd ED Vol 1 by Merle C. Potter
solutions manual to Mechanics of Materials 5 edition by James M. Gere
solutions manual to Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
solutions manual to Mechanics Of Materials Beer Johnston 3rd
solutions manual to Mechanics of Materials, 6E, by Russell C. Hibbeler
solutions manual to Mechanics of Materials, 6th Edition - James M. Gere & Barry Goodno
solutions manual to Mechanics of Materials, 7E, by Russell C. Hibbeler
solutions manual to Mechanics of Materials, 7th Edition - James M. Gere & Barry Goodno
solutions manual to mechanics of solids by C. T. F. Ross
solutions manual to Mechanics of Solids, ross
solutions manual to Mechanism Design Analysis and Synthesis (4th Edition) by Erdman, Sandor, Kota
solutions manual to Microeconomic Analysis, 3rd Ed., by H. Varian
solutions manual to Microeconomic Theory by Segal Tadelis Hara Chiaka Hara Steve Tadelis
solutions manual to Microeconomic Theory, by Mas-Colell, Whinston, Green
solutions manual to Microelectronic Circuit Analysis and Design, 3rd Edition, by D. Neamen
solutions manual to Microelectronic Circuit Design (3rd Ed., Richard Jaeger & Travis Blalock)
solutions manual to Microelectronic Circuits By Adel Sedra 5th Edition
solutions manual to Microelectronic Circuits, 4th Ed. by Sedra and Smith
solutions manual to Microelectronic Circuits, 5th Ed. by Sedra and Smith
solutions manual to Microelectronics Digital and Analog Circuits and Systems by Millman
solutions manual to Microelectronics I & II by Dr.Chang
solutions manual to Microelectronics,Solution MANUAL,5thEd,MAZ
solutions manual to Microprocessors and Interfacing, Revised 2nd

Edition by Douglas V Hall
solutions manual to Microwave and Rf Design of Wireless Systems, 1st Edition, by Pozar
solutions manual to Microwave Engineering, 2nd Ed., by David M. Pozar
solutions manual to Microwave Engineering, 3rd Ed., by David M. Pozar
solutions manual to Microwave Transistor Amplifiers Analysis and Design, 2nd Ed., by Guillermo Gonzalez
solutions manual to Mobile Communications 2nd ed by Jochen Schiller
solutions manual to Modern Control Engineering 3rd Ed. - K. OGATA
solutions manual to Modern Control Engineering 4th Ed. - K. OGATA
solutions manual to Modern Control Systems 11E by Richard C Dorf and Robert H. Bishop
solutions manual to Modern Control Systems 9 E by Richard C Dorf and Robert H. Bishop
solutions manual to Modern Digital and Analog Communication Systems, 3rd Ed., by Lathi
solutions manual to Modern Digital Electronics,3E by R P JAIN
solutions manual to Modern Digital Signal Processing-Roberto Cristi
solutions manual to MODERN OPERATING SYSTEMS 2nd ed A.S.TANENBAUM
solutions manual to Modern Organic Synthesis An Introduction by George Zweifel, Michael Nantz
solutions manual to Modern Physics for Scientists and Engineers 3rd E by Thornton and Rex
solutions manual to Modern Quantum Mechanics (Revised Edition) by J. J. Sakurai
solutions manual to Multivariable Calculus, Applications and Theory by Kenneth Kuttler
solutions manual to Nanoengineering of Structural, Functional and Smart Materials, Mark J. Schulz, Ajit D. Kelkar
solutions manual to Network Flows: Theory, Algorithms, and Applications by Ravindra K. Ahuja , Thomas L. Magnanti , James B. Orlin
solutions manual to Nonlinear Programming ,2ndEdition , Dimitri P.Bertsekas
solutions manual to Numerical Methods for Engineers (3rd Ed. Steven C. Chapra)
solutions manual to Numerical Methods for Engineers (5th Ed. Steven C. Chapra)
solutions manual to Numerical Methods Using MATLAB (3rd Edition)by John H. Mathews & Fink
solutions manual to Numerical Solution of Partial Differential Equations- An Introduction (2nd Ed., K. W. Morton &D)
solutions manual to Operating System Concepts, 6E, Silberschatz, Galvin, Gagne
solutions manual to Operating System Concepts, 7E, Silberschatz, Galvin, Gagne
solutions manual to Operating systems Internals and Design principles 4th Edition Stallings
solutions manual to Operating systems Internals and Design principles 5th Edition Stallings

solutions manual to Operations Management 5th Ed by Nigel Slack, Chambers, Johnston
solutions manual to Optics 4th Edition by Hecht E., Coffey M., Dolan P
solutions manual to Optimal Control Theory An Introduction By Donald E. Kirk
solutions manual to Optimal State Estimation Dan Simon
solutions manual to Options, Futures and Other Derivatives, 4E, by John Hull
solutions manual to Options, Futures and Other Derivatives, 5E, by John Hull
solutions manual to Organic Chemistry - Clayden et.al.
solutions manual to Organic Chemistry 2nd Edition by Hornback
solutions manual to Organic Chemistry 7ed, McMurry
solutions manual to Organic Chemistry, 4E., by Carey, Atkins
solutions manual to Organic Chemistry, 5E., by Carey, Atkins
solutions manual to Parallel & Distributed Computation Numerical Methods by Bertsekas & Tsitsiklis
solutions manual to Parallel Programming: Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
solutions manual to Physical Chemistry (7E, Peter Atkins & Julio de Paula)
solutions manual to Physics - Concept and Connections - Book Two by Brian Heimbecker, Igor Nowikow, et al
solutions manual to Physics - Concept and Connections -by Brian Heimbecker, Igor Nowikow, et al
solutions manual to Physics , Fifth Edition, Volume One (Halliday, Resnick, Krane)
solutions manual to Physics for Scientist and Engineers, 5E, by Tipler, Mosca
solutions manual to Physics For Scientists & Engineers 5th Ed (vol.I,vol.II) by Serway & Beichner
solutions manual to Physics For Scientists & Engineers Vol.1& 2 3rd Ed. by Serway & Jewett
solutions manual to Physics For Scientists & Engineers Vol.1& 2 4th Ed. by Serway & Jewett
solutions manual to Physics For Scientists & Engineers Vol.I 6th Ed. by Serway & Jewett
solutions manual to Physics For Scientists & Engineers Vol.II 6th Ed. by Serway & Jewett
solutions manual to Physics for Scientists and Engineers with Modern Physics (3rd Edition) by Douglas C. Giancoli
solutions manual to Physics for Scientists and Engineers, 1st E by Knight
solutions manual to Physics for Scientists and Engineers, 2/E by Knight
solutions manual to Physics, 2nd Ed James S. Walker
solutions manual to Physics, 5th Edition, Vol 1 by Halliday, Resnick, Krane
solutions manual to Physics, 5th Edition, Vol 2 by Halliday, Resnick,

Krane
solutions manual to Physics: Principles with Applications with Mastering Physics, 6/E, Douglas C. Giancoli
solutions manual to Power Electronics Converters, Applications, and Design 3rd ed By Ned Mohan, Tore M. Undeland, William P. Robbins
solutions manual to Power System Analysis and Design, 3 E., by Glover, Sarma
solutions manual to Power System Analysis and Design,4E., by Glover, Sarma
solutions manual to Power System Analysis,John J. Grainger William D. Stevenson
solutions manual to Power Systems Analysis - 2nd Edition by Hadi Saadat
solutions manual to POWER SYSTEMS ANALYSIS by HADI SAADAT
solutions manual to Principles and Applications of Electrical EngineeringG. Rizzoni
solutions manual to Principles of Communications- Systems, Modulation, and Noise (5th Ed.,Ziemer & W.H. Tranter)
solutions manual to Principles of Digital Communication and coding by Andrew J. Viterbi and Jim K. Omura
solutions manual to Principles of Dynamics 2nd ED, Donald T. Greenwood
solutions manual to Principles of Electronic Materials and Devices 2ed by Safa O. Kasap
solutions manual to Principles of Geotechnical Engineering 6th edition by Braja M. Das
solutions manual to Principles of Neurocomputing for Science and Engineering, Fredric M. Ham,Ivica Kostanic
solutions manual to Probability & Statistics for Engineers & Scientists (8th Ed., Walpole,Myers, Ye)
solutions manual to Probability and Random Processes for Electrical Engineering by Alberto Leon-Garcia
solutions manual to Probability and Statistical Inference (7th Ed., Hogg & Tanis)
solutions manual to Probability and Statistics for Engineering and the Sciences, 6th Ed., by Jay L. Devore
solutions manual to Probability and Statistics for Engineers 7 Ed Johnson Miller Freund
solutions manual to Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
solutions manual to Probability and Stochastic Processes 2E, by Roy D. Yates , David J. Goodman
solutions manual to Probability Concepts in Engineering Emphasis on Applications to Civil and Environmental Engineering 2nd ED by Alfredo Ang and Wilson Tang
solutions manual to Probability For Risk Management, Hassett, Stewart
solutions manual to Probability Random Variables, and Stochastic Processes, 4th Ed., by Papoulis, Pillai
solutions manual to Probability, Random Variables and Stochastic Processes, 3rd Edition Athanasios Papoulis
solutions manual to Probability, Statistics, and Random Processes for

Engineers, Richard H. Williams
solutions manual to Problems and Solutions on Electromagnetism by Lim Yung-Kuo
solutions manual to Problems in general physics by I. E Irodov
solutions manual to Problems in General Physics vol.I & vol.II Irodov
solutions manual to Psychology and Life by Gerrig & Zimbardo ,16th edition
solutions manual to Quantitative Methods for Management by PINNEY, McWILLIAMS, ORMSBY, ATCHISON
solutions manual to Quantum Field Theory Mark Srednicki
solutions manual to Quantum Mechanics - B. Brinne
solutions manual to Quantum Mechanics: An Accessible Introduction (Robert Scherrer)
solutions manual to Quantum Physics, 3rd Edition, by Stephen Gasiorowicz
solutions manual to Quantum theory of light 3 Ed by Rodney Loudon
solutions manual to Real Analysis 1st Edition by H. L. Royden
solutions manual to Recursive Methods in Economic Dynamics, (2002) by Irigoyen, Rossi- Hansberg, Wright
solutions manual to Reinforced Concrete: Mechanics and Design (5th Ed., James G. MacGregor & James K. Wight)
solutions manual to RF Circuit Design: Theory & Applications, by Bretchko, Ludwig
solutions manual to Satellite Communications 2nd Ed By Timothy Pratt, Charles W. Bostian
solutions manual to Scientific Computing with Case Studies by Dianne P. O'Leary
solutions manual to Semiconductor Device Fundamentals by Pierret
solutions manual to SEMICONDUCTOR DEVICES Physics and Technology 2nd Ed by SZE
solutions manual to Semiconductor Physics and Applications by Balkanski, Wallis

SENIOR SMARTS

A lawyer and a senior
citizen are sitting next to each
other on a long flight.

The lawyer is thinking
that seniors are so dumb that he
could get one over
on them easy.

So the lawyer asks
if the senior would like to play a fun
game.

The senior is tired
and just wants to take a nap, so he
politely declines
and tries to catch a few winks.

The lawyer persists,
saying that the game is a lot of fun. I
ask you a question,
and if you don't know the answer, you
pay me only $5. Then
you ask me one, and if I don't know
the answer, I will
pay you $500, he says.

This catches the
senior's attention and to keep the lawyer
quiet, he agrees
to play the game.

The lawyer asks the
first question. 'What's the distance
from the Earth to
the Moon?'

The senior doesn't
say a word, but reaches into his pocket,
pulls out a five-dollar
bill, and hands it to the lawyer.

Now it's the senior's
turn. He asks the lawyer, 'What
goes up a hill with

three legs, and comes down with four?'

The lawyer uses his
laptop and searches all references he
could find on the Net.

He sends e-mails
to all the smart friends he knows; all to
no avail. After
an hour of searching, he finally gives
up.

He wakes the senior
and hands him $500. The senior
pockets the $500
and goes right back to sleep.

The lawyer is going
nuts not knowing the answer. He wakes
the senior up and
asks, 'Well, so what goes up a hill with
three legs and comes
down with four?'

The senior reaches
into his pocket, hands the lawyer $5 and
goes back to sleep.

Why SUVs at all? It's not like DC officials go off road or pull
trailers.

Pimp City, USA. Plus all the drug dealers be drivin' them.

Once every thirty or so years. I was there for the Air Florida storm. Eight
hours to get home - 12 miles - mostly flat.

I doubt that. The only place more extreme than this Hell hole is Iran or
maybe that 'stan where they boil people in oil. We are fed propaganda
and jingoism all day long. We are offered the same mediocre product with
4 different labels and we think we have a choice. Help.

"In principle, every American citizen has an equal say in our political process. In practice, of course, some of us are more equal than others. Billionaires can field armies of lobbyists; they can finance think tanks that put the desired spin on policy issues; they can funnel cash to politicians with sympathetic views (as the Koch brothers did in the case of Mr. Walker). On paper, weï¿½re a one-person-one-vote nation; in reality, weï¿½re more than a bit of an oligarchy, in which a handful of wealthy people dominate.

Given this reality, itï¿½s important to have institutions that can act as counterweights to the power of big money. And unions are among the most important of these institutions.

You donï¿½t have to love unions, you donï¿½t have to believe that their policy positions are always right, to recognize that theyï¿½re among the few influential players in our political system representing the interests of middle- and working-class Americans, as opposed to the wealthy. Indeed, if America has become more oligarchic and less democratic over the last 30 years ï¿½ which it has ï¿½ thatï¿½s to an important extent due to the decline of private-sector unions."

> Poppycock!

No 'poppycock' at all. The Wisconsin unions offered financial cuts and
give-backs towards their pensions and health care, but the governor
rejected their offer out of hand.

In the governor's case, the finances had nothing to do with his agenda;
he -does- want to get rid of collective bargaining. The guv wants to
bust unions, pure and simple.

Steve, from your posts here, you appear to be just a little guy, not a
wealthy individual. Why are you so hell-bent on giving away the store to
Big Business?

100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?

100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again.
Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also

increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?
in soc.support.fat-acceptance, alt.support.big-folks

Well, at least Big Government will provide a large variety of services for its citizens -- libraries, paved roads, traffic lights, fire and police departments, Social Security, Medicare, etc, etc, etc.

Big Business will grab you by the ankles, turn you upside down and shake every last nickel out of your pocket. The GREED of Wall Street (Big Business) brought you the Great Recession that we are in. Big Business, with a Trillion (with a 'T') dollar, all-time high, record profits, will not resume hiring. Now that they have down-sized the daylights out of the work force, they love those record profits that they are getting out of a reduced work force.

I hope you have and/or can afford medical insurance with YOUR pre-existing medical condition(s). The Big Business insurance companies can, have and will again deny coverage to people with pre-existing conditions.

Watchin WLBT 12 (Please tell me there is no WLBT 12 tee vee here) 5:00 PM tee vee news (noos).
Breaking News! A shooting at the Walmart store on Greenway Drive and intersection of Highway 18.

I reckon there will be more noos (news) on that later on.I was inside that self same Walmart store abouts three - four hours ago, looking at iPads and just before that, I was inside the AT&T retail store too, about two blocks South (South is always best) of doggy's couch, looking at iPads and Samsung Galaxy thingys.Metinks I don't want an iPad.I am still thinkin Motorola.

Old Motorola commercial from the 1950's I remember,,, [Hit it, Silver!] Open your eyyyes and you will seeeee,,, a Motorola Teeeee Veeeee,,,,,, cuhulin, I damn sho am Glad I wasen't in that Walmart store when somebody was slingin Lead.Durn Tootin!

Have worked before, but the weird thing was the VK call. It was the
middle of the night there, so I sent the ham an e-mail to see if he
was actually on. He did not answer me on frequency, but I had to wait
for some QRM to stop. So, he could have changed frequency or he did
not hear me or someone was playing a recording. Hopefully, I will find
out.

Tried working South Korea on 40 meters today but big crowd and short
opening. Sometimes I hate the DX Cluster.

Seeing as the new plan has not yet been implemented, this would presume
that you are referring to what we have 'today' -- Medicare -- which does
NOT deny coverage because of pre-existing conditions.

If you are referring to the new, not yet implemented universal health
care, one of the widely touted features of this plan is that you would
NOT be denied coverage if you had a pre-existing condition.

DP, what you say seems contradictory, could you please 'splain yourself...

The Simple Fact is that All Employ Benefits* should
be on the Same 50%/50% "PAR" as Social Security

50% Paid by the Employer =&= 50% Paid by the Employee
* Retirement
* Health Coverage & Insurance
* Life Insurance
* Disability Insurance
* etc etc etc . . .

Tax Golden Benefit Union Employees as Excessive
Income that the Employer Pays More Than 50%

Government Employees Benefits Should Be The
Same As Regular Hard Working Average American
Tax Payers :
* Fairness For One Is Fairness For All
* Equality For One Is Equality For All
* End The Excesses of Big Government Give-A-Ways
* Government Employees Work For The People
{The People Do Not Exist To Be Taxed Into Slavery To
Support Excessive Benefits For Government Employees}

Sustainable Benefits =&= Sustainable Taxes ~ RHF
{A Just Society =&= A Justly Taxed Society}

The only way the little guy has a chance against big business is to have
a powerful government keeping big business in line. Otherwise you have
people like BP and Goldman Sachs pushing everybody around.

A lot of folks report getting an 8880 with a blown FET. Result:
Reduced
sensitivity. Otherwise it's pretty equivalent to an RF2200. Both are
outstanding for MW DX.

Not true. It was actually a handful of people at a handful of institutions making greedy (and stupid) decisions. 2 acts of Congress, criminal behavior by Moody's and S&P and some below the radar "waivers" created a derivatives bubble. Barney Frank just provided the bubble material. Phil Gramm, Alan Greenspan, Clinton, Geightner, etc. all went crazy reversing the laws Roosevelt put in place. This is what happens when business is deregulated.

These people crashed the economy on purpose so they could destroy the New Deal. We paid off AIG 100 cents to the dollar. Pension plans took a hit. People were wiped out. The whole time, rich people have been having their taxes cut. This is wrong. This is how revolts get started.

An advanced directive is something one chooses for oneself.
I don't want to be on life care for months without consciousness
or to leave hospital care a functional vegetable. Why do you
not support my right to an informed decision about such matters?
Why must I pay for any advice on such matters out of pocket
rather than to have the councel of my doctor paid by my insurance?

The real death pannels are those of the AZ governer who has
decided some people don't deserve to live because they don't
have the financial wherewithal to have an organ transplant.

1438. SILENT KEY: An Dx'ers Eulogy for Tom C Gleeman (KE6YNH)

Newsgroup: rec.radio.shortwave
Date: 2011-02-22 03:36:51 UTC
From: "Dave U. Random" <anonymous@anonymitaet-im-inter.net>

"...most people that are creative people...are pretty much different from the average person, they don't think the same way, they're not motivated by the same things and...they're usually very very difficult people to get along with. ...they're not like you or well most of us." [The Summer of 2010, 3840khz (2:30 in the morning), Comment from Jim (KI6GU) A rare qso on worldviews].

"Just relax a little bit...c'mon Kevin. Ya know laid there four days on the floor, ya know and you're alive. Ya gotta be thankful for that. C'mon man, if somebody at your work didn't have a reason to care about you a little bit. You wouldn't be here with the rest of us. Now you gotta be thankful for that c'mon. Lotta people have their problems and have their issues in life. Everybody's not the same mold, everybody's different, everybody's built different, everybody has different wants and needs. Some people need somethin' to hang on to too make 'em feel better. Or people...ridicule other people because they don't feel good of themselves unless they do ridicule someone. Just c'mon...man. Just relax." [The Summer of 2010, 3840khz (2:40 in the morning), Comment from John "Cosmo" (KI6VPR) to AD8Q on cooling Kevs nerve because somebody did not identify].

Jim's comment from the summer of 2010 (Tom sat back on this qso) alludes to the youthful mindset of, shortwave maven, Tom Gleeman's (KE6YNH), friendly personality gift. One of the nicest ham operators to operate from the Pacific shores. Tom has passed on from a massive stroke at the age of sixty Feb. 12 2011. (see source)

Tom Gleeman was one of the original founders of the late morning frequency rag chew - on 3840KHz, one created by the semi-retired broadcaster Art Bell. I will never the first time I tuned in and found Tom and Kenny (fondly known as the Llama Man (KG6HKM) in a 2AM qso, anybody's who was fortunate to hear Tom and Kenny in a solitary qso, were reminded of the characters from Cervantes novel "Don Quixote". Odd confessions like Tom admitting that in all the years living in San Diego "he never surfed but only boogie boarded [with his spontaneous chuckle]", exemplified his earthiness. Both Kenny and Tom in qso were classic examples of rag chewers. I will never forget Tom's "Annnnnnyway" punctuation and his distinctive youthful sign "This is Tom innnnnn Sannnnn Diiiiiiiiiego" .

Tom was proud of his Chinese pen pal girlfriend, a knowledgeable Trekkie, loved his dog (who got stuck in the dog door), his cat, hated the 500 pound concrete table that rusted in his back yard, and was very grateful to the American Radio Relay League (ARRL) in

addition to respecting the old dogma of shortwave communications,
he lived life to the fullest.

In the last seven months his probing conversations that at times were
taken out of context. In all sincerity, and from I what I've heard from
his qsos, his so called, contorting statements occurred when he started
taking pain killers. Somebody on qrz.com noticed the subtle change too.
Tom was more like a moderator, keeping other hams at bay from killing
each other, but at times he would rather lay low through the occasional
war zone that would erupt on 3840kHz.

Somebody at the qrz.com obituary commented Toms fondness for calling
cq. "This is Tom calling cq, calling cq, this is KE6YNH calling cq"
sometimes I heard him do that for 10 minutes and usually he'd get a
response. Right around Christmas of last year Tom commented that his
earliest memory when learning about ham radio was "he always wanted to
call cq" and was amused when he roused a senior ham from his sleep who
chastised him "Don't ever call CQ. It is a thing of the past." Always
grateful to make making a contact he acknowledged ham operators from
the East Coast of the United States, the Midwest, Alaska, Canada, South
Africa, Hawaii, Australia, New Zealand, Mexico, Central America, Japan
and Costa Rica. What was interesting about Tom's personality, he
admitted that he would sometimes talk with non licensed operators who
were respectful and had something to say. That was so cool and
represents the young'un hams who did eventually get their tickets
because of Toms encouragement.

Let us now celebrate Tom with two nice musical selections.

Shelly Y Nueva Generacion - Vestido Azul [1966]
(http://www.youtube.com/watch?v=9bRTq3t7q0U)

The Staple Singers - Be Careful of the Stones You Throw [1964]
(http://www.youtube.com/watch?v=vBthgVHdy0g)

A moment of silence was called at Feb 18, 2010 2:29 A.M. (PST) on
3840Khz by a stellar group of fellow hams.
My condolences to Toms survivors.

You are an embarrassment. Our current health care system kills 50,000 people a year. Minimum. And those are just the ones that never see the inside of a doctor's office until it's too late.

You support doctors gaming the system while denying people care, so that only the most profitable medicine is practiced? You think people should get rich from other people getting sick? No moral issues there?

Lets not forget that when George "the Greatest Prez Ever" Bush was Governor of Texas he signed the "Texas Advanced Directives Law" that brought the life of Sun Hudson to an end after 6-months, because it wasn't "economically feasible" to continue his respirator. MORE evidence that rightards who love fetuses couldn't give a shit about them once they are born.

Wow. Radio worse than American commercial radio. Unlistenable after a
few minutes. Obviously designed for people with short commutes.

Can you give any examples of this -- or just 'urban legend'? What specific "Government medical planS" (plural) are you referring to other than Medicare? (although if not overtly stated before, I believe this discussion was focused on either Medicare or the yet to be implemented new government plan).

The only "Government medical plan" that I know of is Medicare. Like many old geezers, at this stage in life, I have a few "pre-existing conditions" and when I went on Medicare, I was truly amazed at how transparent and seamless the transition to Medicare was. And no, none of my pre-existing conditions were an issue under Medicare.

The righties give themselves away when they accuse their opposition of doing weird off the wall stuff. They are "turning things around" they call it. Just lie and say the other guy is doing what you're actually guilty of.

If they talk "death panels" it's because they do "death panels".

Luckily the people are waking up. Fascists always lose once the people wake up.

Just an idle answer...

I have a 130 foot long, 25-30 foot high, bent dipole between two trees, fed with ladder line, used on 80-10 (including WARC bands) with a Johnson KW Matchbox balanced tuner. On 160 meters, I reconfigure the antenna to what is essentially a top loaded vertical, using a T-match tuner.

Obviously not as good as a tower and beam, but I work lots o' DX with it, for example the VK0IR (Heard Island) dx'pedition and North Korea. (If you are not a ham, trust me, these are nice catches). Needless to say, it also works nicely for SWL'ing with my vintage receivers.

A tower would be nice, but not worth the hassle of dealing with the (overly) strict city and subdivision restrictions.

I was speaking with a ham buddy of mine, over the weekend, and he
recommended such an antenna for low noise and great digging in
crowded bands. And particularly for MW Dx. I'm tempted to do it here.

Which vintage receivers are you using?

> You don't spend any time talking to veterans, do you.

No, I've had neither the occasion nor the opportunity. Furthermore, I
have no idea what "medical plan" the vets are under. Possibly you are
referring to the Agent Orange issue or the spent uranium bullets? If so,
the root problem may be that the science just hasn't caught up yet --
although I seem to recall that they are finally realizing some of the
Agent Orange issues. My son did his Residency at a VA hospital, so
I will have to ask him about this.

Again however, I believe this thread was essentially focused on Medicare
-- which is MUCH larger than the vet issue -- and with Medicare,
pre-existing conditions do NOT appear to be a problem.

I wonder if there is a pole reversal coming....

==========
The magnetic north pole had moved little from the time scientists first
located it in 1831. Then in 1904, the pole began shifting northeastward
at a steady pace of about 9 miles (15 kilometers) a year.

In 1989 it sped up again, and in 2007 scientists confirmed that the pole
is now galloping toward Siberia at 34 to 37 miles (55 to 60 kilometers)
a year.

I doubt there's a dynamo in the center of the earth. My theory is the magnetism is generated by solar radiation interacting with our iron nickel molten core. The sun has a magnetic field that we travel through as well. I don't how the earth's magnetic poles could reverse if they were being generated inside the earth by liquid metal spinning. How could you reverse that without major surface trauma?

The sun, being made entirely of plasma and gas, is much more amenable to such radical shifts, in my humble opinion.

Well, it won't hurt to try it...

Your buddy says it is a quiet antenna. Compared to what? It is commonly acknowledged that noise is more vertically polarized and thus a vertical antenna is a bit noisier than a horizontal antenna like a dipole. I really don't think the dipole I described is any quieter than any other dipole AFAIK.

The reason I used the antenna was mostly because of its benefits when transmitting. With the tuner and the ladder line feed, it will operate on many bands with relatively low line loss. For SWL'ing, I'm not sure

if it would have any particular benefit.

> Which vintage receivers are you using?

I've had many over the years, from an R-390 on down, but now that I am at the Gateway to Geezerdom, I've been trying to thin out the herd. The current fleet:

1912 Loose Coupler crystal set

circa 1921 Westinghouse Aeriola Jr. (crystal set, first mass produced radio?)

circa early 30s National SW-3 Thrill Box (regen)

two Hallicrafters SX-28s--just in case owning one doesn't stretch your arms enough-- 80 pounds each.

Drake T-4XB and R-4B

It may be more a matter of it being a good antenna than what he
was previously using. A lot of random cuts, a Windom, and some
twinlead dipoles have been on his property in the past.

I still have and use my grandfather's Hammarlund BC-794 Super
Pro. Got your SX-28 beat by a 39 lb power supply. :)

I've always wanted an SX-28. Never found one that hadn't been cut
to shards by a previous owner.

Nice stable.

From Wikipedia:

The Commonwealth Fund, in its annual survey, "Mirror, Mirror on the Wall", compares the performance of the health care systems in Australia, New Zealand, the United Kingdom, Germany, Canada and the U.S. Its 2007 study found that, although the U.S. system is the most expensive, it consistently under-performs compared to the other countries.[15] One difference between the U.S. and the other countries in the study is that the U.S. is the only country without universal health insurance coverage.

The Commonwealth Fund completed its thirteenth annual health policy survey in 2010.[16] A study of the survey "found significant differences in access, cost burdens, and problems with health insurance that are associated with insurance design".[16] Of the countries surveyed, the results indicated that people in the United States had more out-of-pocket expenses, more disputes with insurance companies than other countries, and more insurance payments denied; paperwork was also higher although Germany had similarly high levels of paperwork.[16]

Again, from Wkipedia:

"The Commonwealth Fund, in its annual survey, "Mirror, Mirror on the Wall", compares the performance of the health care systems in Australia, New Zealand, the United Kingdom, Germany, Canada and the U.S. Its 2007 study found that, although the U.S. system is the most expensive, it consistently under-performs compared to the other countries.[15] One difference between the U.S. and the other countries in the study is that the U.S. is the only country without universal health insurance coverage.

The Commonwealth Fund completed its thirteenth annual health policy survey in 2010.[16] A study of the survey "found significant differences in access, cost burdens, and problems with health insurance that are associated with insurance design".[16] Of the countries surveyed, the results indicated that people in the United States had more out-of-pocket expenses, more disputes with insurance companies than other countries, and more insurance payments denied; paperwork was also higher although Germany had similarly high levels of paperwork.[16]"

I presume that this information is available in more detail, and I'll keep looking.

The thing that annoys me about most religious people and Republicans is
their complete refusal to consider that maybe, just maybe, they might
not have everything quite correctly sussed. That unflinching absolute
certitude is scary to a scientific mind.

Why Isn't Wall Street in Jail?
Financial crooks brought down the world's economy • but the feds are doing more to protect them than to prosecute them
By Matt Taibbi
FEBRUARY 16, 2011 9:00 AM ET

Over drinks at a bar on a dreary, snowy night in Washington this past month, a former Senate investigator laughed as he polished off his beer. "Everything's fucked up, and nobody goes to jail," he said. "That's your whole story right there. Hell, you don't even have to write the rest of it. Just write that."
I put down my notebook. "Just that?"
"That's right," he said, signaling to the waitress for the check. "Everything's fucked up, and nobody goes to jail. You can end the piece right there."
Nobody goes to jail. This is the mantra of the financial-crisis era, one that saw virtually every major bank and financial company on Wall Street embroiled in obscene criminal scandals that impoverished millions and collectively destroyed hundreds of billions, in fact, trillions of dollars of the world's wealth • and nobody went to jail. Nobody, that is, except Bernie Madoff, a flamboyant and pathological celebrity con artist, whose victims happened to be other rich and famous people.

<snip>

. . . As for President Obama, what is there to be said? Goldman Sachs was his number-one private campaign contributor. He put a Citigroup executive in charge of his economic transition team, and he just named an executive of JP Morgan Chase, the proud owner of $7.7 million in Chase stock, his new chief of staff. "The betrayal that this represents by Obama to everybody is just • we're not ready to believe it," says Budde, a classmate of the president from their Columbia days. "He's really fucking us over like that? Really? That's really a JP Morgan guy, really?"

Which is not to say that the Obama era has meant an end to law enforcement. On the contrary: In the past few years, the administration has allocated massive amounts of federal resources to catching wrongdoers • of a certain type. Last year, the government deported 393,000 people, at a cost of $5 billion. Since 2007, felony immigration

prosecutions along the Mexican border have surged 77 percent; nonfelony prosecutions by 259 percent. In Ohio last month, a single mother was caught lying about where she lived to put her kids into a better school district; the judge in the case tried to sentence her to 10 days in jail for fraud, declaring that letting her go free would "demean the seriousness" of the offenses.

So there you have it. Illegal immigrants: 393,000. Lying moms: one. Bankers: zero. The math makes sense only because the politics are so obvious. You want to win elections, you bang on the jailable class. You build prisons and fill them with people for selling dime bags and stealing CD players. But for stealing a billion dollars? For fraud that puts a million people into foreclosure? Pass. It's not a crime. Prison is too harsh. Get them to say they're sorry, and move on. Oh, wait &#65533; let's not even make them say they're sorry. That's too mean; let's just give them a piece of paper with a government stamp on it, officially clearing them of the need to apologize, and make them pay a fine instead. But don't make them pay it out of their own pockets, and don't ask them to give back the money they stole. In fact, let them profit from their collective crimes, to the tune of a record $135 billion in pay and benefits last year. What's next? Taxpayer-funded massages for every Wall Street executive guilty of fraud?

The mental stumbling block, for most Americans, is that financial crimes don't feel real; you don't see the culprits waving guns in liquor stores or dragging coeds into bushes. But these frauds are worse than common robberies. They're crimes of intellectual choice, made by people who are already rich and who have every conceivable social advantage, acting on a simple, cynical calculation: Let's steal whatever we can, then dare the victims to find the juice to reclaim their money through a captive bureaucracy. They're attacking the very definition of property &#65533; which, after all, depends in part on a legal system that defends everyone's claims of ownership equally. When that definition becomes tenuous or conditional &#65533; when the state simply gives up on the notion of justice &#65533; this whole American Dream thing recedes even further from reality.
--
--
Every gun that is made, every warship launched, every rocket fired signifies in the final sense, a theft from those who hunger and are not fed, those who are cold and are not clothed. This world in arms is not spending money alone. It is spending the sweat of its laborers, the genius of its scientists, the hopes of its children. This is not a way of life at all in any true sense. Under the clouds of war, it is humanity hanging on a cross of iron.
- Dwight D. Eisenhower, 16 April 1953

Sorry, Dave is incorrect. You need to get your information somewhere other than your DNC handlers.

As soon as you and Rickmers offer something of substance rather than your
obviously Liberal/Democrat/Marxist/Socialist twaddle.

The Fund is currently led by president Karen Davis, a nationally recognized
progressive economist....

"Progressive", the new code word for Liberal/Democrat/Marxist/Socialist.

Your survey is poppycock.

Actually the people do count, and the people have spoken at the polling place.

The people want change in Wisconsin, and they'll get it.

The people want change in Indiana, and they'll get it.

The people want change in Ohio, and they'll get it.

The people want change in Michigan, and they'll get it.

The list goes on.

Twenty six states have sued the Federal Government over health care, and
they'll get change.

A Federal Judge has ruled 'Obamacare' to be unconstitutional, yet the Obama
Regime continues to implement it. Boy, there's gonna be some change coming.

A prominent talk show host this afternoon intimated that before this is all
over there'll be some bloodshed.

As I stated a while ago, the revolution has begun, the people have woken up,
and are not going to be bullied by union thugs, not going to be bullied by
Liberal/Democrat/Marxist/Socialist politicians, and are not going to be
bullied by Big Government.

This is not the first time I've heard this mentioned. In casual conversations, I've heard talk of revolution, if there isn't an accounting after the election.

At his victory gathering in Grant Park the first words out of Obiteme's mouth were, "Change has come to America."

Prophetic. Profound. And very likely far more reaching than he ever could have envisioned.

And YOU need to get your information from somewhere other than Rush 'Oxycontin' Limpballs, the Nazi gas bag that gets paid $50 million dollars to shill for Big Business. ;-)

C'mon Steve, you're just a little working class guy like the rest of us. Why are you getting in bed with the greedy rich bastards?

P.S.
I truly don't remember the country being *this* divided during the reign of Bush Senior OR Clinton. It seemed to start with Bush Jr, possibly because of his two wars. And make no mistake, this country is truly, seriously divided, probably more so than any time since the Civil War. Heck of a job, George W.

P.P.S.
It does indeed look like actual class warfare -- and Wisconsin is the opening battle.

Speaking of Wisconsin, why doesn't Governor Walker man up and have the balls to admit his main goal is to bust the unions.

1) Walker said it is (and continues to be) economic.

2) The unions said they would give him the economic concessions he wanted.

3) Walker turned them down cold.

Ergo, it -wasn't- economic after all and Walker is not being honest with us (as in lying).

Per back issues of the Milwaukee Journal, when Walker was the county exec for Milwaukee County, he fired all the union security guards and replaced them with guards from Wackenhut, a BRITISH company (thanks for getting rid of those Wisconsin jobs). Then an independent auditor ruled that he illegally fired the original guards and that they had to be re-hired, with back pay, costing the county $500,000. I'm seeing a pattern here: Walker seems to have a major league grudge against unions.

Walker also said to the 14 Dems in the Wisconsin legislature "Come back and we will debate it". Then he said the whole issue is totally non-negotiable. So, Guv, if it's *non-negotiable*, what's to debate, hmmm?

And while we are on the subject of Wisconsin politicians putting their foot in their mouths, Rep. Paul Ryan went on national TV and said the people in Madison were RIOTING.

Either he is incompetent (does not understand the meaning of the word "rioting") or is just flat out lying. If he watched even 5 minutes of the Madison TV coverage, he would have seen it was about as peaceful as it could be.

Shooting more Democrats? I thought you said the last time was done by a
crazy person, not a radio talk show instigator. Palin and her cross
hairs must have been more than you were letting on.

Once the fruitcakes on the fringes start shooting at each other,
democracy in the US will cease to be...at least what little there is
left of it after the Patriot Act was brought in.

Rumour has it that the Act was composed and complete, ready to go, some
months before the Twin Towers.

Some parts of the Patriot Act were written by John Mitchell. They passed
a wish list, not a plan.

Fo shizzle, got to be as bling as the homies..

Curt

When I was living back there the DC cops once pulled a big on street drug
bust by jumping out the back of a van with the Schlitz Malt Liquor Bull
emblazoned on the sides. Cops were all yelling "Bull's Here!" and there was
film at 11!

In my even more humble and borderline worthless opinion, I agree. The
core turning in and around the sun's field is probably what does it.

They know the poles can change, though. There's lake sediment with
alternating layers of iron bearing silt deposited at the bottom.
hardened Magma shows different directions too.

http://www.viewzone.com/poleshift.html

I remember reading Immanuel Velikovsky when I was younger. He had some
pretty good ideas concerning pole shifts and astronomical happenings.
There was an explanation of why, in the Old testament, there are
references to the sun rising in the west.

Too bad this article is on a page of dubious quality. Velikovsky's books
make excellent reading, however. The library is sure to have them.

I know the poles reverse on occasion. I think there's some concurrent
evidence of solar variability.

Have you ever heard of the phrase "checks and balances"?

Do your homework, review the auto companies of the 1930s, before the unions came into being. There was a very good reason why the unions were needed, namely Capital's rampant abuse of Labor.

Unions have had their share of excesses, as has Big Business (witness the current Great Recession, courtesy of Big Business greed). You NEED checks and balances. If the Repubs get their way and make the unions disappear, there will be no protection for labor, nothing, NOTHING to balance runaway greed.

It's that simple -- unions, even with their imperfections, are needed to balance the greed of Capital. Again, do your homework and find out about all the abuses that took place before unions.

Finally, you complain about "those who will steal your money via taxation". What are you saying? That you don't want taxes at all? That you only want some taxes? How much is too much? I don't know about you, but I -like- our libraries, paved roads, traffic lights, police and fire departments, all paid for by taxes. I presume your disability benefits

are helpful to you. You can be against taxes, but make sure you don't shoot yourself in the foot.

I went back to that AT&T retail store again, this afternoon soon as the WLBT 3 (somebody already said there is no such thing as WLBT 3 in backwater hick Mississippi, devilfinder.com it, WLBT Jackson,Mississippi [[Missy Sippy]] 12:00 PM tee vee noos was over.

I espyed a Motorola ATRIX laptop dock with the keyboard and flip up/fold down screen monitor thangy sittin on display in the AT&T retail store, that store is just across Highway 80, about 750 foot steps South of doggy's couch, except I drove over there in my van.

I asked one of those ladies who works there, Do y'all have the Motorola ATRIX smart phone and the Motorola ATRIX laptop dock keyboard for sale? She disappeared into the stock room for a few minutes.She stepped back out and she had two boxes she was toteing.I told her, I need to go to the bank first and check my balance.Then I went back to that self same AT&T retail store and I wrote a check for $748.98.
$49.00 of that is Mississippi RIP OFF sales taxes.

So now I am on a whole new learning curve, learning how to operate my new Motorola ATRIX stuff.

I am thinking I am going to get on AT&T U-Verse, next month.
U-Verse, (according to the guy at that AT&T retail store) will cost me $142.00 per month, includes more channels than I am getting with DirecTV and I can get high speed broad band internet service and keep my same old phone number too.

Then I can dump my DirecTV service and my WebTV service.But I need first to learn up on using my Motorola ATRIX.
cuhulin, the ATRIX

It's a fun operating system. If you can work WebTV you'll have no
problem. Linux rules! Congrats on your self-indulgence.

And yet I didn't snip what you wrote, I snipped what I wrote.
How does that play? I will reply in kind. If that's an indication
of "Winning An Argument" then I have won. But winning a silly
argument isn't my goal. I come here to inform and be informed.
The only arguments I care about are logical argument, that is
from premis to conclusion.

See it any way you wish. You have my permission.

I seem to remember Motorola having a lot of technical difficulties with
their radios during the New York fiasco. Then they had the nerve to
advertise their 'expertise' in emergency communications. Lots of firemen
were cursing that outfit.

There were a dozen TV transmitters running full blast until the building
they were in fell down. Very difficult RF environment. Transmitters
should not be on occupied structures.

No doubt, I will keep my phone docked onto my laptop keyboard all the time/most of the time, because I don't tote.There isn't any sense me toteing my ATRIX phone to the Walmart food store and the Animal Health Products store, about every three months when I go there to buy doggy's dog food.Yesterday, inside the Dangerous Walmart store, I saw a guy pushing a shopping cart, he had his laptop computer sitting on that little kiddy seat thingy of that shopping cart.Somebody could have followed him to his vehicle and stold his laptop camputer.

I want to put my favorite news sites and alternative news sites and online newspapers websites around the World, science, technology, whatever, (automobiles, trucks, classic and vintage) and online newsgroups/news forums such as rec.radio.shortwave into my ATRIX internal storage, so than when I want to turn on my ATRIX, I can easily click on those sites, same as I do with WebTV.
Facebook, twitter, damn crap such as that, I never go there.google is the default search thingy (it appears to me) in my ATRIX.I want to make http://www.devilfinder.com my favorite default search engine in my ATRIX.

Having spent (literally) years in the steel and concrete structures
(WTC is one of them) one thing is certain : unless repeaters are
present--- the VHF/UHF coverage is poor . Don't blame Motorola for
it . The NYFD personnel didn't know that ...

The transmitters were NOT running full blast when the N.Tower
collapsed . All power was cutoff immediately following the impact . I
couldn't use my 2 cell phones or pager as of 9 AM . Nearly everything
was located on that single roof !

You know them thar famous Saks stores?
LQQKA here,,,
http://www.devilfinder.com
Saks Jackson,Mississippi

I pass right by that place (not once, but twice, goin and ahcomin) Saks place/building everytime I head East of doggy's couch, Highway 80, or over behind there, Lynch Street.It's over next to Metrocenter Mall, that Mall is 275 foot steps from doggy's front yard, I once counted my foot steps when I walked over thar ah few years ago.I rekon that thar Saks place is about two blocks from doggy's couch.

I would have thought there are at least a few Dangerous Walmart mini marts in crowded New York City, the home of the yellow taxi cabs.

I'm not so sure about the Motorola end of things...

==========
THE U.S. SUPREME Court yesterday upheld a ruling that families of
firefighters killed at the World Trade Center cannot sue the city and
Motorola over allegedly faulty radios used on 9/11.

The high court backed an earlier decision that the families waived their
right to file a lawsuit because they had accepted money from the federal
September 11th Victim Compensation Fund.

http://tinyurl.com/4ooqjmd

==========
The reports, prepared by high-ranking department officials and
management consultant McKinsey & Co., found the rescue effort -- while
heroic and largely successful -- was hurt by poor organization, faulty
radio equipment and the departments' failure to work together.

http://www.freqofnature.com/index.php?news=2002_08_01_archive.html
==========

NIST calculated that about one third of radio messages transmitted
during the surge of communications were not complete messages or were
not understandable.[2] Documentary footage suggests the tactical
channels were also overloaded: some footage captured audio of two or
three conversations occurring simultaneously on Tactical 1

http://tinyurl.com/48x4l6p

==========
It□s been three years since the attack on the World Trade Center, which was undeniably one of public safety radio□s blackest moments. In particular, poor performance by the Fire Department of New York□s (FDNY) aged Motorola Saber III radios remains a source of controversy. As a result of not hearing the radioed order to evacuate, more than 100 firefighters, who were following procedure by resting inside the World Trade Center□s North Tower, died needlessly when the tower fell at 10:29 a.m.

Not a single Walmart in NYC . Not mini ,not micro , nada ! That yellow
is closer to orange lately , in my opinion .

As a former union member, my homework was done a long time ago. I suggest YOU do your homework regarding this issue vis-a vis Wisconsin. This has nothing to do with private

sector unions, but rather public sector unions.

But in typical Liberal/Democrat/Marxist/Socialist fashion, you have attempted to twist the issue into something else entirely.

Please, try to pay attention!

When you get to my age, you're allowed to be self indulgent. I understand where Chu is coming from. Once I would ask myself if it was something I would get value from. Nowadays, If I see something I want, I just buy it. No more guilt trips!

The megacorporations and their special privileges are creatures of
the state, and the state today (including the now-metastasized New
Deal) is a creature of the megacorporations.

You're both being played.

If you believe that the ethnically-distinct billionaire oligarchs represent "free enterprise" and "liberty," then you have been played by the neocon side of the beast -- the billionaire's kept Right.

If you believe that "democracy" and "redistributing wealth" are the people's counterweights against the oligarchs, you have been played by the billionaire's kept Left, which created and supports the near-total surveillance (necessary for redistribution) and police state we suffer under (necessary to enforce redistribution) and which delights the oligarchs and enables their wars.

Starve such a beast? Absolutely, if you're not quite ready to put out its eyes and drive it back to the eternal unknown.

With every good wish,

Kevin Alfred Strom.

Your latter statement is one that all of us should note well. Also consider that the very neocons who came to power under Boy George -- the same people who pushed the misnamed Patriot Act -- had, five years earlier, proposed attacking Iraq to remove a "threat to Israel." 9/11 gave them their opportunity to do both.

It's also worthwhile to perpend the long and complex "anti-terror" bill that was, amazingly, ready to be enacted and signed almost immediately after the Oklahoma City bombing.

I have to disagree, though, with your use of the word "democracy" when you really mean "freedom." The majority of people are craven, easily led, willingly trade real freedom for imagined security, and are, frankly, not too bright. Thus, the unspeakably evil Patriot Act was a perfectly "democratic" piece of legislation.

The US Constitution was supposed to protect us from that sort of democracy. It is inexpressibly sad to me that it has failed to do so.

Honor bright,

Kevin Alfred Strom.

Not too bright.... hmmmmm, isn't that like pleading guilty to a charge that you now claim to be totally innocent of?

Yep, that's not too bright!

1573. OT: Warren Buffet and Class Warfare (attn: P. Maus)

Newsgroup: rec.radio.shortwave
Date: 2011-02-23 13:03:14 UTC
From: dave <dave@dave.dave>
Message-ID: <4d650563$0$5642$bd467cd0@news.dslextreme.com>

Mr. Buffett compiled a data sheet of the men and women who work in his office. He had each of them make a fraction; the numerator was how much they paid in federal income tax and in payroll taxes for Social Security and Medicare, and the denominator was their taxable income. The people in his office were mostly secretaries and clerks, though not all.

It turned out that Mr. Buffett, with immense income from dividends and capital gains, paid far, far less as a fraction of his income than the secretaries or the clerks or anyone else in his office. Further, in conversation it came up that Mr. Buffett doesnï¿½t use any tax planning at all. He just pays as the Internal Revenue Code requires. ï¿½How can this be fair?ï¿½ he asked of how little he pays relative to his employees. ï¿½How can this be right?ï¿½

Even though I agreed with him, I warned that whenever someone tried to raise the issue, he or she was accused of fomenting class warfare.

ï¿½Thereï¿½s class warfare, all right,ï¿½ Mr. Buffett said, ï¿½but itï¿½s my class, the rich class, thatï¿½s making war, and weï¿½re winning.ï¿½

Big time network TV stations use diesel generators when the power goes
out. They switch on automatically.

It's not Motorola's fault that the City didn't deploy and operate the radios correctly. I'm sure the radios performed exactly as they were built to perform. Do not blame Motorola. I suspect Harris or Johnson or whomever was behind some of the bad press.

The failure of the radios was secondary to the failure of the 5/16" bolts that were holding the outside walls to the cantilevers.

Funny how Charles Rangel and other liberal democrats can simply not
pay taxes and you're just fine with it.
Guess you would view it more favorably if Buffet simply did as Rangel
and broke the law instead of using tax loppholes.

When you decide to get just as pissy about all of your liberal icons
doing worse than the occasional rich prick you can pick out of a 5
year old headline then maybe you won't appear to be just another
hypocritical asshole.

I am 12 miles from the part of the San Andreas fault that has been
locked-up for 151 years. Needless to say, we have very little
unreinforced masonry construction around here.

Oakland is on a similar fault to the one in Christchurch. Bruce can tell
you.

Yeah, back in November we put over 700 folks into positions nationwide which were formerly held by Liberal/Democrat/Marxist/Socialists.

And who makes more on a gallon of gasoline than the oil companies do?

Why it's government! Be it local, state or federal, they extract more $$$$'s
out of the consumer in total than those 'greedy capitalists' do.

All that without doing any exploration, drilling, transportation, or refining.

Unions are a side issue. This is about Republicans over-reaching,
claiming mandates where none exist, and politically attacking
democratic-leaning institutions for purely political reasons.

It is about the Koch Brothers' war on the Middle Class (and sanity in
general). It is about greed and oppression. It didn't start in Madison.
It started in Tunisia.

The Religious Right Calvinist morality and Social Darwinism you support
got the Pilgrims kicked out of England, kicked out of Holland, and
should have gotten them kicked out of Massachusetts (damn those
Indians!) Being rich doesn't mean you are any better than a beggar in
the City of God as long as you live like Limbaugh.

He gives the money away directly via a charitable trust, like moral rich people do, rather than using it to usurp the Constitution of your birthplace, like the Koch Brothers do. (Full disclosure: The Kochs do donate to the opera).

I have no opinion of Charles Rangel one way or the other. He is not the subject, and to equate a rocky form 1040 with what the Koch Brothers are doing is proof that you sir are a pinhead.

I do know Rep. Rangel is from Adam Clayton Powell's old district (where George Carlin grew up). I also know he was re-elected.

The question still remains: If Mr. Buffet felt that it was so unfair that his employees paid more of a percentage of their income to the Feds than he did, then why did he not write a check to the Feds for the difference.

Giving to a charitible trust just ain't the same, if, a big if, Mr. Buffet is being honest about 'being fair'.

Paul G. Allen

For 20 years the Paul G. Allen Family Foundation has focused its philanthropy in the Pacific Northwest, where I live and work. Iï¿½m proud to have helped fund great work done by non-profit groups throughout the region. But thereï¿½s always more to do. There are many challenges, both here in the northwest and around the world that I know will keep us broadening our reach and looking for ways to help. My philanthropic efforts will continue after my lifetime. Iï¿½ve planned for many years now that...

For 20 years the Paul G. Allen Family Foundation has focused its philanthropy in the Pacific Northwest, where I live and work. Iï¿½m proud to have helped fund great work done by non-profit groups throughout the region. But thereï¿½s always more to do. There are many challenges, both here in the northwest and around the world that I know will keep us broadening our reach and looking for ways to help.

My philanthropic efforts will continue after my lifetime. Iï¿½ve planned for many years now that the majority of my estate will be left to philanthropy to continue the work of the Foundation and to fund non-profit scientific research, like the ground breaking work being done at the Allen Institute for Brain Science.

Bill and Melinda have done so many great things around the world and Iï¿½m happy we were able to be partners in projects to increase teacher effectiveness, fund science and technology high schools and produce the documentary, Rx for Survival, a Global Health Challenge. Bill, Melinda and Warren have issued a worthy challenge to make our giving plans public, and Iï¿½m happy to add my name to the effort.

As our philanthropy continues in the years ahead, we will look for new opportunities to make a difference in the lives of future generations.

Laura and John Arnold

We look upon our financial position with a mix of disbelief and humility, never having dreamed that we would be in this situation. Our backgrounds are similar to that of many Americans. We each had a solid middle-class upbringing with an emphasis on values, work ethic and social responsibility. We each attended public secondary school and worked our way through private universities. And, of course, we dreamed of one day being ï¿½rich,ï¿½ in the way that all young people fantasize...

We look upon our financial position with a mix of disbelief and humility, never having dreamed that we would be in this situation. Our backgrounds are similar to that of many Americans. We each had a solid middle-class upbringing with an emphasis on values, work ethic and social responsibility. We each attended public secondary school and worked our way through private universities. And, of course, we dreamed of one day being ï¿½rich,ï¿½ in the way that all young people fantasize about having everything they want. To our great surprise, we now fit that very elementary label. We have more than ample resources to be good providers for our family and mentors to our children, and we have a lifestyle that is comfortable and then some.

We are deeply indebted to our community and our country for the many opportunities granted to us, and for a social and economic environment in which we could make the most of those opportunities. We consider it our responsibility to ensure the same opportunities for others. We view our wealth in this light ï¿½ not as an end in itself, but as an instrument to effect positive and transformative change. To this end, we have contributed a significant portion of our wealth to the Laura and John Arnold Foundation and will continue to do so during our lifetime. Upon our death, the vast majority of our assets will be left to the Foundation.

At the Foundation, we focus on areas where (1) philanthropic investments can lead to solutions that are self-sustaining in the long-term, (2) we can leverage a relatively small investment to create a large impact on total societal benefit and (3) the market does not presently yield optimal results, due to inefficiencies, lack of adequate information or other reasons. These guiding principles have led us to invest in a number of areas including education reform, health care, social services and social justice.

We are blessed to embark on this critical endeavor at a relatively early stage in our lives and with a great sense of urgency. We will devote the majority of our wealth, time and resources to philanthropy in the coming years, and we fully intend to achieve transformative results during our lifetime. There is no more worthwhile work and no greater mission. And there is no reason for delay in making a difference.
Nicolas Berggruen

Everyone is dealt a group of cards at birth. With them come possibilities and responsibilities. What one does with them is up to each one of us; and the sum of those choices, constitute our lives. I

have been blessed with the chance to build the Nicolas Berggruen Charitable Trust. My dedication to making the Trust a success will be similarly applied to its related non-profit activities...

Everyone is dealt a group of cards at birth. With them come possibilities and responsibilities. What one does with them is up to each one of us; and the sum of those choices, constitute our lives.

I have been blessed with the chance to build the Nicolas Berggruen Charitable Trust.

My dedication to making the Trust a success will be similarly applied to its related non-profit activities. I believe that this approach best pairs my own abilities and the assets of the Nicolas Berggruen Charitable Trust.

It is in this spirit that I join the Giving Pledge.
Michael R. Bloomberg

One of the senior managers at my company, Bloomberg LP, recently told me that part of his new hires recruiting pitch is to ask, ï¿½What other company can you work for where the owner gives nearly all the profits to charity?" Nothing has ever made me prouder of my company than that one story. In the 1990s, a generous individual planned to leave Johns Hopkins University, my alma mater, $50 million upon his death. But I asked him: Why wait? Why deny financial aid to this generation...

One of the senior managers at my company, Bloomberg LP, recently told me that part of his new hires recruiting pitch is to ask, ï¿½What other company can you work for where the owner gives nearly all the profits to charity?" Nothing has ever made me prouder of my company than that one story.

In the 1990s, a generous individual planned to leave Johns Hopkins University, my alma mater, $50 million upon his death. But I asked him: Why wait? Why deny financial aid to this generation? Why deny a possible cure for a disease to this generation? That convinced him - and he gave the money right then and there.

As I wrote in my autobiography around that same time, the reality of great wealth is that you can't spend it and you can't take it with you. For decades, I've been committed to giving away the vast majority of my wealth to causes that I'm passionate about - and that my children are passionate about. And so I am enthusiastically taking the Giving Pledge, and nearly all of my net worth will be given away in the years ahead or left to my foundation.

Making a difference in people's lives - and seeing it with your own eyes - is perhaps the most satisfying thing you'll ever do. If you want to fully enjoy life - give. And if you want to do something for your children and show how much you love them, the single best thing - by far - is to support organizations that will create a better world for them and their children. Long term, they will benefit more from your

philanthropy than from your will. I believe the philanthropic contributions I'm now making are as much gifts to my children as they are to the recipient organizations.

Giving also allows you to leave a legacy that many others will remember. Rockefeller, Carnegie, Frick, Vanderbilt, Stanford, Duke - we remember them more for the long-term effects of their philanthropy than for the companies they founded, or for their descendents. And by giving, we inspire others to give of themselves, whether their money or their time.

In my third career, as Mayor of New York, I've seen just how needed - and how powerful ï¿½ private donations are. Public-private partnerships are at the heart of our efforts to improve public health and safety, fight poverty, fix a once-broken school system, expand economic opportunity, promote the arts, protect our environment, and so much more.

As a philanthropist, I've also had the opportunity to see the impact private donations can have in other countries - and just how far each dollar can go. For instance, with private funding, we can prevent tens of millions of premature deaths caused by tobacco-related diseases and traffic accidents -just two areas where my foundation has been active.

In my public and private lives, I have seen how small groups can make a very big difference ï¿½ in cleaning up a park, starting a school, or helping others in need, whether in their own community or halfway around the world. I am thrilled that my friends Bill Gates and Warren Buffett are bringing together this group, which could have an unprecedented impact on what philanthropy can achieve. And the larger this group grows, the more people will share in the pleasure of giving, as well as the benefits that it will bring to the world.
Eli and Edythe Broad

We wholeheartedly endorse the Giving Pledge and hope that others will share in the inherent and immensely rewarding benefits of philanthropy. Those who have been blessed with extraordinary wealth have an opportunity, some would say a responsibility ï¿½ we consider it a privilege ï¿½ to give back to their communities, be they local, national or global. Though neither of us was raised in an affluent family, our parents taught both of us the importance of giving back and helping others less...

We wholeheartedly endorse the Giving Pledge and hope that others will share in the inherent and immensely rewarding benefits of philanthropy.

Those who have been blessed with extraordinary wealth have an opportunity, some would say a responsibility ï¿½ we consider it a privilege ï¿½ to give back to their communities, be they local, national or global. Though neither of us was raised in an affluent family, our parents taught both of us the importance of giving back and helping others less fortunate.

When the company we founded, SunAmerica, merged into AIG in 1999, our shareholders and employees made a lot of money, and so did we. After

providing for our family and our two sons, we knew we wanted to use the rest to make a difference. The Giving Pledge allows us to formalize our longtime intention of giving away 75 percent of our wealth during or after our lifetimes.

About 10 years ago, we decided to focus full-time on philanthropy. We asked ourselves what was the greatest problem facing America. We both attended public schools and credit education as the foundation of our success. But we were dismayed by the state of Americaï¿½s K-12 public education system, and we wanted to work to restore it to greatness. We are convinced the future of the middle class, our standard of living, our economy and our very democracy rests on the strength of our public schools. And we have a long way to go.

While we spend the most time on education reform, we invest the greatest resources in scientific and medical research, primarily in the areas of human genomics, stem cell research and inflammatory bowel disease. It is our hope that through our investments in these areas and our creation of the Broad Institute of MIT and Harvard, the scientific and medical research we are funding will ultimately improve the human condition.

The third area of our philanthropy is the arts. We have both been enriched not only by the visual and performing arts but also by the artists we have met, whose view of the world has broadened our perspectives and enlightened our conversations. Our support of the arts is driven by the desire to make art accessible to the broadest public.

We view charity and philanthropy as two very different endeavors. For many years, we practiced charity, simply writing checks to worthy causes and organizations. Since leaving the world of commerce, we have engaged in what we term ï¿½venture philanthropy.ï¿½ We approach our grant-making activity with much the same vigor, energy and expectation as we did in business. We view our grants as investments, and we expect a return ï¿½ in the form of improved student achievement for our education reform work, treatments or cures for disease in our scientific and medical research, and increased access to the arts.

Before we invest in something, we ask ourselves three questions that guide our decision:

1. Will this happen without us? If so, we donï¿½t invest.
2. Will it make a difference 20 or 30 years from now?
3. Is the leadership in place to make it happen?

Philanthropy is hard work. Many people think itï¿½s easy to give money away. But we are not giving money away. We want our wealth to make a measurable impact. And after running two Fortune 500 companies, weï¿½re having more fun now ï¿½ and working harder ï¿½ than ever.

Philanthropy is intensely personal. No two people have identical views on what causes to champion and what approaches will fix social ills. There is no monopoly on philanthropy, and the needs will always far outpace resources ï¿½ which is why the Giving Pledge unlocks the door to a

world of new opportunities. There is no doubt that when the wealthy few open their pocketbooks, the impact will be extraordinary.
Warren Buffett

In 2006, I made a commitment to gradually give all of my Berkshire Hathaway stock to philanthropic foundations. I couldn't be happier with that decision. Now, Bill and Melinda Gates and I are asking hundreds of rich Americans to pledge at least 50% of their wealth to charity. So I think it is fitting that I reiterate my intentions and explain the thinking that lies behind them. First, my pledge: More than 99% of my wealth will go to philanthropy during my lifetime or at death. Measured by...

In 2006, I made a commitment to gradually give all of my Berkshire Hathaway stock to philanthropic foundations. I couldn't be happier with that decision.

Now, Bill and Melinda Gates and I are asking hundreds of rich Americans to pledge at least 50% of their wealth to charity. So I think it is fitting that I reiterate my intentions and explain the thinking that lies behind them.

First, my pledge: More than 99% of my wealth will go to philanthropy during my lifetime or at death. Measured by dollars, this commitment is large. In a comparative sense, though, many individuals give more to others every day.

Millions of people who regularly contribute to churches, schools, and other organizations thereby relinquish the use of funds that would otherwise benefit their own families. The dollars these people drop into a collection plate or give to United Way mean forgone movies, dinners out, or other personal pleasures. In contrast, my family and I will give up nothing we need or want by fulfilling this 99% pledge.

Moreover, this pledge does not leave me contributing the most precious asset, which is time. Many people, including -- I'm proud to say -- my three children, give extensively of their own time and talents to help others. Gifts of this kind often prove far more valuable than money. A struggling child, befriended and nurtured by a caring mentor, receives a gift whose value far exceeds what can be bestowed by a check. My sister, Doris, extends significant person-to-person help daily. I've done little of this.

What I can do, however, is to take a pile of Berkshire Hathaway stock certificates -- "claim checks" that when converted to cash can command far-ranging resources -- and commit them to benefit others who, through the luck of the draw, have received the short straws in life. To date about 20% of my shares have been distributed (including shares given by my late wife, Susan Buffett). I will continue to annually distribute about 4% of the shares I retain. At the latest, the proceeds from all of my Berkshire shares will be expended for philanthropic purposes by 10 years after my estate is settled. Nothing will go to endowments; I want

the money spent on current needs.

This pledge will leave my lifestyle untouched and that of my children as well. They have already received significant sums for their personal use and will receive more in the future. They live comfortable and productive lives. And I will continue to live in a manner that gives me everything that I could possibly want in life.

Some material things make my life more enjoyable; many, however, would not. I like having an expensive private plane, but owning a half-dozen homes would be a burden. Too often, a vast collection of possessions ends up possessing its owner. The asset I most value, aside from health, is interesting, diverse, and long-standing friends.

My wealth has come from a combination of living in America, some lucky genes, and compound interest. Both my children and I won what I call the ovarian lottery. (For starters, the odds against my 1930 birth taking place in the U.S. were at least 30 to 1. My being male and white also removed huge obstacles that a majority of Americans then faced.) My luck was accentuated by my living in a market system that sometimes produces distorted results, though overall it serves our country well. I've worked in an economy that rewards someone who saves the lives of others on a battlefield with a medal, rewards a great teacher with thank-you notes from parents, but rewards those who can detect the mispricing of securities with sums reaching into the billions. In short, fate's distribution of long straws is wildly capricious.

The reaction of my family and me to our extraordinary good fortune is not guilt, but rather gratitude. Were we to use more than 1% of my claim checks on ourselves, neither our happiness nor our well-being would be enhanced. In contrast, that remaining 99% can have a huge effect on the health and welfare of others. That reality sets an obvious course for me and my family: Keep all we can conceivably need and distribute the rest to society, for its needs. My pledge starts us down that course.
Jean and Steve Case

From the early 1980s, we were both privileged to play a part in ushering in the Internet revolution. AOL was, in essence, a social enterprise. While we were focused on building a business, what really drove us was the mission of building a new medium that could empower individuals and become as ubiquitous as the television or telephone, but be even more valuable. We are proud of the success AOL achieved ï¿½ and in awe of the profound impact the Internet has had globally...

From the early 1980s, we were both privileged to play a part in ushering in the Internet revolution. AOL was, in essence, a social enterprise. While we were focused on building a business, what really drove us was the mission of building a new medium that could empower individuals and become as ubiquitous as the television or telephone, but be even more valuable. We are proud of the success AOL achieved ï¿½ and in awe of the profound impact the Internet has had globally.

Since launching the Case Foundation in 1997 we have sought to tap the power of the Internet, new technologies and entrepreneurial approaches to help strengthen the social sector. The Case Foundation has invested in hundreds of organizations, initiatives and partnerships in the U.S. and around the globe. Built on the principles of leadership, collaboration and entrepreneurship, we seek to inspire individuals to realize their potential to create change, while helping social institutions achieve sustainable scale and impact.

While the Case Foundation is our primary philanthropic vehicle, it is not our only avenue as we seek to make a difference. We have also made personal gifts to schools, churches and other organizations that support our local communities. Further, while our commitment to charitable giving is fundamental to our efforts to address societal challenges, we think it is important to note that we also believe ï¿½ and back our words with dollars ï¿½ that societal objectives can often also be met through the prism of entrepreneurial businesses.

While there is often a defined division between ï¿½for profitï¿½ and ï¿½not for profitï¿½ sectors ï¿½ with for profit focused on making money and not for profit focused on making a difference ï¿½ our experiences suggest that can be an overly simplistic way of looking at the world. Instead, we first focus on a societal problem or opportunity that needs to be addressed, and then decide the right strategy to achieve the greatest gains. Sometimes that is backing or starting a non-profit organization. Other times, that is backing or starting a business that is focused on doing well while doing good.

We want to use all the tools available to us, to have the greatest impact, and achieve the greatest good. Our missions for the Case Foundation and our investment firm Revolution are therefore identical: we invest in people and ideas that can change the world. We deploy our capital ï¿½ and our time ï¿½ to have the greatest possible impact. We are privileged to have this opportunity to give back in so many ways.

We share the view that those to whom much is given, much is expected. We realize we have been given a unique platform and opportunity, and we are committed to doing the best we can with it. We do not believe our assets are ï¿½oursï¿½ but rather we try to be the responsible stewards of these resources ï¿½ and we recognize we have an obligation to reinvest them in a positive, constructive and flexible manner.

We are pleased to join The Giving Pledge and publicly reaffirm our commitment to give away the majority of our wealth to fund worthy charitable causes. We also look forward to working with the dozens of others who have made the Giving Pledge commitment to share lessons, perspectives and best practices. We have learned a lot over the years both through our philanthropic successes and our failures, and believe that by working together and exchanging lessons learned, the impact of the backers of the Giving Pledge can be enhanced. Our individual commitments are significant, but the power of our collective commitments can be greater than the sum of the parts. That is why we are joining with Bill, Melinda, Warren, and so many others to make this public

commitment.

While we are proud to be part of this distinguished Giving Pledge group, in closing we also want to reaffirm our ongoing commitment to encouraging a citizen-centered approach to philanthropy, which is rooted in the belief that small gifts from many are just as powerful as large gifts from a few. We hope the Giving Pledge will inspire many others, and we stand ready to do whatever we can to share what we learn and shine a spotlight on the extraordinary commitments millions of people make each and every day.
Michele Chan and Patrick Soon-Shiong

Our passion, our mission is to transform health and health care, in America and beyond. Our family foundation was established for that purpose. Growing up in South Africa during the time of apartheid, we had direct experience of inequality, including great disparities in health and access to good care. After thirty years living in the United States, we see similar disparities in health care on our doorstep in Los Angeles, and across the nation. What was unconscionable to us in South Africa ï¿½

Our passion, our mission is to transform health and health care, in America and beyond. Our family foundation was established for that purpose.

Growing up in South Africa during the time of apartheid, we had direct experience of inequality, including great disparities in health and access to good care. After thirty years living in the United States, we see similar disparities in health care on our doorstep in Los Angeles, and across the nation. What was unconscionable to us in South Africa in the twentieth century is just as unconscionable in the United States in the twenty-first.

America has been a land of opportunity for us, as it has for so many immigrants. We are proud to be Americans and we want to see our country strong and healthy. We are blessed to have resources and expertise to contribute.

Our pledge is that, through our family foundation, we will work to erode and eliminate disparities in health care, and to help bring about a system of health care which aims first to keep people healthy, and secondly to ensure that everyone has access to the best quality health care when they need it. We and our children are dedicating our time and our resources to that end.

Toby and I very much enjoyed our dinner with you, Bill, Melinda and Mayor Mike. The graciousness of the Mayor's hospitality was matched only by the interesting guests and the quality of the dinner conversation! The concept of the Giving Pledge is intriguing and meritorious. The fact that Toby and I are even candidates to make the pledge is a testimony to the American Dream. Let me explain...

Dear Warren:

Toby and I very much enjoyed our dinner with you, Bill, Melinda and Mayor Mike. The graciousness of the Mayor's hospitality was matched only by the interesting guests and the quality of the dinner conversation! The concept of the Giving Pledge is intriguing and meritorious. The fact that Toby and I are even candidates to make the pledge is a testimony to the American Dream. Let me explain.

I am the son of a plumber who practiced his trade in the South Bronx. I am the first generation American born in my family as well as the first to get a college degree. My education is largely public school based -- public grade school, high school and college all in the Bronx. I had a short stint at the Columbia University Graduate School of Business where I earned an MBA and this opened the door for me to Goldman Sachs. I joined the Firm the day after graduation as I had a National Defense Education Act Student Loan to repay, had no money in the bank, and a six month old child to support. I had a near 25 year run of happiness and good fortune at Goldman Sachs. The last 19 years at Omega have also been years of happiness and good fortune with a few bumps along the way. While I worked hard, I must say I had more than my share of good luck.

Toby and I feel it is our moral imperative to give others the opportunity to pursue the American Dream by sharing our financial success. The case for philanthropy has been stated by others in a most articulate way and in words that have impressed me: In the early 1900's Andrew Carnegie said ï¿½He who dies rich, dies disgraced.ï¿½ In the 1930's, Sir Winston Churchill observed that ï¿½We make a living by what we get, but we make a life by what we gives.ï¿½ In 1961, President John F. Kennedy in his inaugural address stated ï¿½Ask not what your country can do for you, ask what you can do for your country.ï¿½ Well before all these gentlemen expressed their thoughts, it was written in the Talmud that ï¿½A man's net worth is measured not by what he earns but rather what he gives away.ï¿½

It is in this spirit that we enthusiastically agree to take the Giving Pledge.

Sincerely,

Leon G. Cooperman

Many years ago, I put virtually all of my assets into a trust with the intent of giving away at least 95% of my wealth to charitable causes. I have already given hundreds of millions of dollars to medical research and education, and I will give billions more over time. Until now, I have done this giving quietly ï¿½ because I have long believed that charitable giving is a personal and private matter. So why am I going public now...

To whom it may concern,

Many years ago, I put virtually all of my assets into a trust with the intent of giving away at least 95% of my wealth to charitable causes. I have already given hundreds of millions of dollars to medical research and education, and I will give billions more over time. Until now, I have done this giving quietly ï¿½ because I have long believed that charitable giving is a personal and private matter. So why am I going public now? Warren Buffett personally asked me to write this letter because he said I would be ï¿½setting an exampleï¿½ and ï¿½influencing othersï¿½ to give. I hope heï¿½s right.

I greatly appreciated the recent opportunity you provided to update me on the successes and challenges of the Giving Pledge, and to allow me to share my own related thoughts and experience. As you know, shortly after the announcement of the Giving Pledge in June 2010, which followed our meeting at the first exploratory gathering in May 2009, I made an initial decision to withhold participation. Because I had already transferred virtually all of my personal and family assets...

Dear Bill,

I greatly appreciated the recent opportunity you provided to update me on the successes and challenges of the Giving Pledge, and to allow me to share my own related thoughts and experience. As you know, shortly after the announcement of the Giving Pledge in June 2010, which followed our meeting at the first exploratory gathering in May 2009, I made an initial decision to withhold participation. Because I had already transferred virtually all of my personal and family assets to The Atlantic Foundation (the precursor to The Atlantic Philanthropies) over 25 years ago, I did not think it appropriate to be among the early signatories of this undertaking. Nevertheless, I have been carefully following the Giving Pledge initiative and am heartened by the great response. Though I cannot pledge that which I already have given - The Atlantic Philanthropies have made over $5.5 billion in grants since inception - I want now to publicly add my enthusiastic support for this effort and celebrate this great accomplishment.

I also want now to add my own personal challenge and encouragement for Giving Pledge donors to fully engage in sustained philanthropic efforts during their lifetimes. I cannot think of a more personally rewarding and appropriate use of wealth than to give while one is living - to personally devote oneself to meaningful efforts to improve the human condition. More importantly, today's needs are so great and varied that intelligent philanthropic support and positive interventions can have greater value and impact today than if they are delayed when the needs are greater. I urge those who are taking up the Giving Pledge example to invest substantially in philanthropic causes soon and not postpone their giving or personal engagement.

On now approaching my 80th birthday, I am content with my action, in 1982, to establish The Atlantic Foundation. I am convinced this was a sensible means for directing to good purpose a large and increasing wealth that exceeded my and my family's lifetime needs and which I believe would have become problematic. Reflection on the many worthwhile undertakings that these funds have since made possible always reaffirms for me the prudence of this decision. The process of - and, most importantly, the results from - granting this wealth to good causes has been a rich source of joy and satisfaction for me and for my family. Beginning with little more than a few nascent ideas, the experience of having made a few sizeable donations, and a passionate interest in assisting those whose life circumstances or experience resulted in deficit or vulnerability, I have been fortunate that many others with a wide range of backgrounds and expertise have been willing to participate in and enhance this grant making endeavor over many years.

Our efforts were organized somewhat loosely at first, consistent with my preferred working style and our needs, but over time as the volume of activities expanded, the work was arranged in a more formal organization. Over the course of this journey, and alongside others who contributed enormously, I learned and came to appreciate the challenges and complexities of philanthropy. And, together, much good work has been done. I think often of, and I am truly grateful to, the many people who have contributed in so many ways to the work of The Atlantic Philanthropies over the years.

While my approach to philanthropy has surely developed and matured through experience, fundamental guides for me have always been the same methods of working and values that served me well in my business career. Key among these, I believe, is the dynamism, vigilance and informed risk taking inherent in entrepreneurial work, together with priority on good relationships and personal engagement. In business, as in philanthropy, I have always sought an independent, strategic edge where potential is often greatest, as well as opportunities that I can understand and to which perhaps I can contribute personally.

A lot is expected from us in philanthropic endeavors - and not all good initiatives will be met with universal positive acclaim - but this challenge should not divert each of us from making philanthropic investments in what we thoughtfully believe to be the highest and best use of our resources. The challenges, even set backs, I have experienced in my decades of personal engagement in philanthropy pale in comparison to the impact and deep personal satisfaction we have realized.

As I indicated at our recent meeting, I don't pretend to have the answers to the many challenges facing those who choose to contribute their wealth to philanthropic activities. But I do have almost 30 years of personal and institutional experience engaging with the wide range of philanthropic issues and choices, and I would like to contribute this experience to the Giving Pledge effort.

Fundamental to all philanthropic efforts are choices about grant making focus and strategy, which naturally are strongly influenced by one's

passions and interests, as well as one's perception of how best to achieve good value and lasting impact with the intended grant funds. This typically is a frequently-revisited process as one learns and gains perspective from experience and granting opportunities evolve. Another key element is the myriad decisions associated with how to conduct grant making, such as the nature, size and cost of support staff and operations. Critically, one must also navigate the complexities inherent in establishing an appropriate governance and long-term leadership structure to carry out one's philanthropic intentions. This incorporates many aspects, such as whether or not to institutionalize a set of guiding principles; the size, role and scope of authority of an outside board, if any; the involvement of children and other family members; and the participation and function of outside advisors - and the approach decided upon must stand the test of time.

Thoughtful and effective philanthropy requires that the above issues, and more, be addressed with the same acumen, creativity and tenacity that many of us learned and applied in our business careers. Philanthropy, though, also brings with it a different set of complexities, attractions and distractions. I welcomed our initial discussions on these important issues and hope to have the opportunity to follow up on them with you and others.

My deepest thanks to you, Melinda and Warren for leading this transformative effort - and, again, congratulations on this historic achievement.

With best regards,

Charles F. Feeney
Ted Forstmann

For many years Iï¿½ve been quietly doing my own version of ï¿½the giving pledgeï¿½ trying to help disadvantaged children around the world. Iï¿½ve always believed that you donï¿½t really talk about giving; you just do it. For many years Iï¿½ve been quietly doing my own version of ï¿½the giving pledgeï¿½ trying to help disadvantaged children around the world. Iï¿½ve always believed that you donï¿½t really talk about giving; you just do it.

However, Mayor Bloomberg convinced me that by lending my name to ï¿½The Giving Pledgeï¿½ it would help encourage others to participate and would result in helping many needy causes.

Iï¿½ve tried to live by the motto ï¿½you save one life and you save the world.ï¿½ I hope that by joining ï¿½The Giving Pledgeï¿½ it will encourage others to do the same.
Bill and Melinda Gates

Parents all over the world do their best to give their children great opportunities. They work to give their children every chance to pursue their own dreams. However for too many parents, their dreams of giving their families better lives are dashed. In the United States, their children donï¿½t get the education they need to succeed in life. In the developing world, their children succumb to diseasesï¿½

Parents all over the world do their best to give their children great opportunities. They work to give their children every chance to pursue their own dreams.

However for too many parents, their dreams of giving their families better lives are dashed. In the United States, their children donï¿½t get the education they need to succeed in life. In the developing world, their children succumb to diseases that have long since been eradicated in rich countries.

Years ago, when we began to learn about global health, we were especially shocked to read that one highly preventable disease ï¿½ rotavirus ï¿½ was killing half a million children every year. Airplane crashes are always front-page news, yet here was a killer of half a million children every year, and most people couldnï¿½t put a name to it, much less put a stop to it.

We have committed the vast majority of our assets to the Bill & Melinda Gates Foundation to help stop preventable deaths such as these, and to tear down other barriers to health and education that prevent people from making the very most of their lives. Our animating principle is that all lives have equal value. Put another way, it means that we believe every child deserves the chance to grow up, to dream and do big things.

We have been blessed with good fortune beyond our wildest expectations, and we are profoundly grateful. But just as these gifts are great, so we feel a great responsibility to use them well. That is why we are so pleased to join in making an explicit commitment to the Giving Pledge.

The idea of the pledge came out of discussions we had with other givers about what they were doing, about what had worked in philanthropy and what had not worked. Everyone shared how giving had made their lives richer. Everyone who attended was inspired by listening to the othersï¿½ passion and encouraged to do even more.

For the two of us, because we see amazing progress every day, but also, how much more work remains, weï¿½re honored to be a part of this pledge effort.

For example, to us, vaccines are miracles, tiny vessels of hope and promise. And the world has made progress in vaccinating millions of children. But there are still millions more who die of preventable diseases.

So we want to make sure lifesaving vaccines reach everyone who needs them, and that the world develops new vaccines.

Weï¿½ve seen similar progress in Americaï¿½s education system. We have visited schools that are breaking down old barriers and preparing every child for college and life. These are great schoolsï¿½but there are not nearly enough of them. Now the task is to make sure that every student gets the same opportunity to succeed in college and in life.

Both of us were fortunate to grow up with parents who taught us some tremendously important values. Work hard. Show respect. Have a sense of humor. And if life happens to bless you with talent or treasure, you have a responsibility to use those gifts as well and as wisely as you possibly can. Now we hope to pass this example on to our own children.

We feel very lucky to have the chance to work together in giving back the resources we are stewards of. By joining the Giving Pledge effort, weï¿½re certain our giving will be more effective because of the time we will spend with this group. We look forward to sharing what a wonderful experience this has been for us and learning from the experience of others.

Best Wishes,

Bill and Melinda Gates
David and Barbara Green

Coming from a family of preachers, the idea of giving back has been part of my life as long as I can remember. My parents and their parents before them were what some would consider poor, but they gave back whenever they could whether through small contributions of money, or through acts of kindness. God has blessed me with a wonderful family, a successful business and outstanding employees. I do not take these blessings lightly. I am honored to join this remarkable idea...

Coming from a family of preachers, the idea of giving back has been part of my life as long as I can remember. My parents and their parents before them were what some would consider poor, but they gave back whenever they could whether through small contributions of money, or through acts of kindness. God has blessed me with a wonderful family, a successful business and outstanding employees. I do not take these blessings lightly. I am honored to join this remarkable idea called The Giving Pledge.

When Hobby Lobby was created in the early 1970s, I was committed to use profits to help ministry work. I knew from an early age that ministry work, at least in the sense of preaching from a pulpit, was not my calling. But I also knew that God gifted me with a mind for understanding business, and that gift would allow me to carry out His work through contributions to great missions throughout the world. We honor the Lord in all we do by operating the company in a manner consistent with Biblical principles. From helping orphanages in faraway lands to helping ministries in America, Hobby Lobby has always been a tool for the Lordï¿½s work.

For me and my family, charity equals ministry, which equals the Gospel of Jesus Christ.

2 Corinthians says, ï¿½Each of you should give what you have decided in your heart to give, not reluctantly or under compulsion, for God loves a cheerful giver. And God is able to bless you abundantly, so that in all things at all times, having all that you need, you will abound in every good workï¿½You will be enriched in every way so that you can be generous on every occasion, and through us your generosity will result in thanksgiving to God.ï¿½

Like my parents and their parents before them, you donï¿½t have to be wealthy to give. You can give your time, your talents and your passion. We congratulate those who have taken on this wonderful pledge.
Jeff Greene

After I made my first billion dollars a few years ago, I set up a foundation and worked with my estate planning attorney to provide for 80% of my estate to go to that foundation. I started with absolutely nothing and I've certainly lived the American dream. I've had the opportunity to meet and get to know a number of people who were what I would say "cursed" with very large inheritances. While some have done good things with their inheritances...

Dear Warren:

After I made my first billion dollars a few years ago, I set up a foundation and worked with my estate planning attorney to provide for 80% of my estate to go to that foundation. I started with absolutely nothing and I've certainly lived the American dream.

I've had the opportunity to meet and get to know a number of people who were what I would say "cursed" with very large inheritances. While some have done good things with their inheritances, many have lost all incentive to accomplish anything on their own, and as a result, have had much less fulfilling lives. I've often thought that while these folks had the disadvantage of the advantaged, I had the advantage of the disadvantaged, having to learn to take care of myself at a young age.

While you and I have been able to achieve financial success that just a generation ago would have been impossible, today too many Americans are in very difficult financial situations. We have a lot of work to do as a country to revitalize our economy, so that the opportunities I had are available to each and every American. Through our foundation, we hope to play a major role in helping to make a better America.

I got married three years ago for the first time at the age of 52 and Mei Sze and I have a one year old son. While I intend to provide him a level of security, I would never consider leaving him the vast amount of wealth that I have been fortunate to accumulate. The bulk of my estate will go to our foundation.

I didn't come forward and discuss our commitment in August because I was in the middle of a campaign for US Senate here in Florida, and it would have looked like I was trying to exploit this for political gain. I am not running for anything now, and I am delighted to join you and the others that have publicly made this "giving pledge." I am certain that

your example has changed the way people the world over organize their estates and I am proud to be part of your group.

Very truly yours,

Jeff Greene
Lyda Hill

I wish to make the world a better place by advancing solutions to medical and environmental issues through investments in and donations to science. My focus is early stage life science companies with a special interest in oncology. At my death my entire estate and my foundation will be distributed to charities I have designated.

To Whomever It May Concern:

I wish to make the world a better place by advancing solutions to medical and environmental issues through investments in and donations to science. My focus is early stage life science companies with a special interest in oncology.

At my death my entire estate and my foundation will be distributed to charities I have designated.

Sincerely,

Barron Hilton

I am happy to reiterate the pledge I made in 2007 to donate the vast majority of my personal wealth to the humanitarian work of the Conrad N. Hilton Foundation. For me, the decision was easy -- not just for how the money will be spent, but for how the money was earned. My father, Conrad Hilton, was one of Americaï¿½s business giants. He was the first to link hotels together in a coast-to-coast chain, and to turn his name into a world-famous brand. During his career, ï¿½Hiltonï¿½ literally became...

I am happy to reiterate the pledge I made in 2007 to donate the vast majority of my personal wealth to the humanitarian work of the Conrad N. Hilton Foundation. For me, the decision was easy -- not just for how the money will be spent, but for how the money was earned.

My father, Conrad Hilton, was one of Americaï¿½s business giants. He was the first to link hotels together in a coast-to-coast chain, and to turn his name into a world-famous brand. During his career, ï¿½Hiltonï¿½ literally became synonymous with the word ï¿½hotel.ï¿½ He personified his personal creed, ï¿½Think big, act big, dream big.ï¿½

While he reached amazing heights in business, he also suffered through the kind of economic downturns that are all too familiar to people coping with todayï¿½s recession. In fact, the milestones of my fatherï¿½s career often followed a long, determined climb from the worst economic periods in modern history.

In 1919, during the post World War I recession, my father bought his first hotel, the Mobley in Cisco, Texas. He built up a collection of eight hotels in Texas, only to lose all but one during the Great Depression. By refusing to declare bankruptcy, he was among the first hoteliers to emerge from the Depression, only to endure the dramatic business slowdown during World War II. Eventually he was able to grow by acquiring several hotels for cents on the dollar, including the then-largest hotel in the world, the Stevens in Chicago. In 1946, Hilton Hotels Corporation became the first hotel company to be listed on the New York Stock Exchange. When the post-war recession slowed U.S. expansion, my father began to expand overseas, but not before he fulfilled his longtime goal of acquiring the lease for the Waldorf-Astoria in New York City.

After my service in the Navy in World War II, I spent 20 years as an entrepreneur, investing in Vita-Pakt citrus products and founding such diverse companies as Air Finance Corporation, Carte Blanche Credit Card and, 50 years ago, the Chargers of the American Football League. In 1966, the board of Hilton Hotels Corporation invited me to become President of Hilton Hotels, provided I drop my football responsibilities. Thatï¿½s when I took the reins of the company.

Just after the recession that followed the Vietnam War, and just before the Arab oil embargo, I managed to enter the Las Vegas gaming market by acquiring the Flamingo and the International (renamed the Las Vegas Hilton) from financier Kirk Kerkorian. That added a valuable revenue stream for our company that, when combined with franchising, greatly increased the value of Hilton stock.

Not every deal worked out well in the short term, however, such as our sale of Hilton International to TWA in 1967. It took us another 30 years to reunite the companies. With more hotels of over 1,000 rooms than the rest of the industry combined, our strength in the convention market made us the envy of the lodging business.

In the midst of our domestic expansion, my father passed away in 1979 at age 91. Throughout his life, he embraced the power of prayer, and felt it was our God-given responsibility to alleviate the suffering of the most disadvantaged among us. He generously supported Catholic sisters and other worthy causes, writing personal notes to accompany his checks. But his $160 million estate created a new opportunity.

Under the leadership of Don Hubbs, and now my son, Steven, the Conrad N. Hilton Foundation has become a real agent for change. We focus on a need, find the right people or organization to fill that need, and then provide enough funding to create real systemic change. My brother, Eric, is among the family members and outside directors that are following my fatherï¿½s philanthropic vision as board members. In his will, my father directed us to make our grants without regard for race, religion or geography. The reason was as simple as it was genius -- the customers that built our wealth hailed from all parts of the world.

In 1996, I retired after 30 years as CEO of Hilton Hotels Corporation, and convinced Stephen Bollenbach to succeed me while I continued to chair the board. He ushered in a new era of consolidation for both Hilton and for the industry, while utilizing technology to improve efficiency and customer service. We continued to expand our gaming and hotel networks, adding brands like Ballyï¿½s, Caesars, Embassy Suites, Doubletree and Hampton Inn.

In 2006 and 2007, our gaming company and then our hotel company were both acquired by private equity firms at a considerable premium over the trading price of the stock. Despite my tremendous family pride, I knew Hilton Hotels Corporation had grown to the point where it could thrive, even without a Hilton family member at the helm. I had been a member of the Hilton Foundation board since 1954. It was only after the sale of our companies that I proudly became Chairman of the Conrad N. Hilton Foundation.

As one of Hiltonï¿½s principal shareholders, I decided to immediately pledge my proceeds of the sales -- $1.2 billion -- to the Conrad N. Hilton Foundation. In making the gift, I also pledged to follow my fatherï¿½s example and donate 97 percent of my wealth to the Hilton Foundation. That gift, together with other personal assets, should bring the Foundationï¿½s corpus to more than $4 billion.

Today we concentrate on a few strategic initiatives: Safe water development, homelessness, children, substance abuse and Catholic sisters. Other major programs include blindness prevention, hotel and restaurant management education, multiple sclerosis, disaster relief and recovery, and Catholic schools. We are constantly reviewing our practices while remaining faithful to the values and principles that guide us.

I recite our saga to consolidate information that was already a matter of public record over the past 90 years. I am gratified that our Foundation will live on forever, aiding the most vulnerable populations in the world. It will operate in perpetuity as a tribute to the customers, executives and hotel employees who created our wealth in the first place.

I salute Warren Buffett, Bill and Melinda Gates and other philanthropic leaders who have subscribed to the Philanthropic Pledge. It is my hope that others are inspired by my fatherï¿½s story, and by our familyï¿½s steadfast adherence to his charitable philosophy.
Jon and Karen Huntsman

It has been clear to me since my earliest childhood memories that my reason for being was to help others. The desire to give back was the impetus for pursuing an education in business, for applying that education to founding what became a successful container company, and for using that experience to grow our differentiated chemicals corporation into the global enterprise it has become. The journey which began in poverty somehow led to my nameï¿½s inclusion on the Richest Americans...

It has been clear to me since my earliest childhood memories that my reason for being was to help others. The desire to give back was the impetus for pursuing an education in business, for applying that education to founding what became a successful container company, and for using that experience to grow our differentiated chemicals corporation into the global enterprise it has become.

The journey which began in poverty somehow led to my nameï¿½s inclusion on the Richest Americans list for several years running. We progressed from being leveraged to the eyeballs to realizing a degree of wealth of which we had never dared to dream, always with the understanding that it was not ours to keep. Through hard work, luck at the right times, and a determination to succeed, we built a company which filled our coffers with money intended for others.

My pledge to give my entire fortune to curing cancer and assisting related other charities was formalized decades ago. As my sweet mother took her last breath in my arms and succumbed to the cancer she could no longer fight, I realized that our humanitarian focus must center on cancer. I saw with clarity the vision that the Huntsman fortune is a means to cure cancer and that my purpose on earth is to facilitate the research which will illuminate its mysteries.

Most of my shares of our companyï¿½s stock have already been donated to our family charitable foundation and are not at our familyï¿½s disposal. Moreover, most of our other assets are already pledged to charitable causes. The Chronicle of Philanthropy listed our family as donating $1.2 billion to past charitable causes or foundations.

Cancer terrifies us and often takes our lives, irrespective of age, gender, or walk of life. As I have publicly stated countless times, my duty is to make sure cancer is vanquished. Virtually all of my financial resources are already pledged to this lofty goal.
Carl Icahn

I began my career on Wall Street nearly 50 years ago. From a modest upbringing in Queens, New York, I have been fortunate enough to accumulate great wealth. And with that wealth comes responsibility - those who have benefitted the most from our economic system have a responsibility to give back to society in a meaningful way. That is why I made a commitment over 20 years ago that substantially all of my assets would be used to fund a charitable foundation...

I began my career on Wall Street nearly 50 years ago. From a modest upbringing in Queens, New York, I have been fortunate enough to accumulate great wealth. And with that wealth comes responsibility - those who have benefitted the most from our economic system have a responsibility to give back to society in a meaningful way. That is why I made a commitment over 20 years ago that substantially all of my assets would be used to fund a charitable foundation. Until Bill, Melinda and Warren started this project, I never considered going public with my intentions. However, I certainly see the value of a project that encourages wealthy individuals to step forward and commit to use their

wealth for the common good. I hope that by adding my voice with those who are supporting this project, we will all encourage others to participate.

The principles that have guided my career in investing are the ones that I use in my approach to philanthropy. As a shareholder activist, I have focused on acquiring control of undervalued companies (which are often poorly managed). I believe I have unlocked substantial shareholder and bondholder value and have improved the competitiveness of American companies. In a similar vein, I want to maintain America's position as the world economic leader by improving the competiveness of its educational system. America's children, especially those from underprivileged backgrounds, are in a sense undervalued assets. I believe that this goal can best be accomplished by teaching our students the specific skills to succeed. Accordingly, my foundation supports the education and care of underprivileged children and the operation of vocational schools.

Out of this belief, I created the Icahn Scholars Program at Choate Rosemary Hall. Each year the Program provides scholarships for financially challenged students from across the country. And the Program works. Invariably, each year not only do the Icahn Scholars get accepted into the top colleges, but they also win a disproportionate number of the School's top prizes. In fact, the first Bill and Melinda Gates Scholarship at Choate was awarded to an Icahn Scholar. I also endowed Choate's state of the art Science Center as well as the Carl C. Icahn Laboratory for Princeton University's Institute for Integrated Genomics and the Icahn Medical Institute at Mt. Sinai Hospital.

As a product of the New York City public school system, I have a particular interest in improving the education of the City's children. I have sponsored and constructed public charter schools in the Bronx. These schools draw students from areas marked by poverty and high crime rates who would otherwise be at risk of academic failure. The mission of the Icahn charter schools is based on the belief that all students deserve a rigorous academic program which will increase their capacity to learn. The expectations have proven out as our charter students consistently score at or above the state average on standardized tests. The school programs provide the background knowledge necessary for continued academic success beyond the public school system and success as adults.

My work in education was recognized by the Center for Education lnnovation ï¿½ Public Education Association in 2004. In 2006, I was honored with the 100 Women in Hedge Funds Effecting Change Award. Through recognition of my commitment to improving education, I hope to inspire others to make similar investments.

Improving child welfare is an important component of improving a child's likelihood of success. I built Icahn House, a 65-unit complex for homeless families consisting of pregnant women and single women with children in the hope of leveling the socio-economic playing field. I am

a trustee of the Randall's Island Sports Foundation and made a significant contribution to the construction of Icahn Stadium, a track and field facility for inner city youth. For my work in this area, I was honored with the Starlight Foundation's Founders Award and the 1990 Man of the Year Awards, and was named The Guardian Angel 2001 Man of the Year.

I believe, without significantly changing the method we use to educate our young students in this country, we will soon lose our hegemony. Through these commitments I hope to play a small part in making these changes. I am excited to join my friends Bill, Melinda and Warren in making a commitment to continue the charitable giving. I have been a longstanding proponent of improving America's educational system and am delighted to join this important initiative to combine our efforts and financial resources.

I suppose I arrived at my charitable commitment largely through guilt. I recognized early on, that my good fortune was not due to superior personal character or initiative so much as it was to dumb luck. I was blessed to be born in an advanced society with caring parents. So, I had the advantage of both genetics (winning the "ovarian lottery") and upbringing. As I looked around at those who did not have these advantages, it became clear to me that I had a moral obligation to direct my...

I suppose I arrived at my charitable commitment largely through guilt. I recognized early on, that my good fortune was not due to superior personal character or initiative so much as it was to dumb luck. I was blessed to be born in an advanced society with caring parents. So, I had the advantage of both genetics (winning the "ovarian lottery") and upbringing. As I looked around at those who did not have these advantages, it became clear to me that I had a moral obligation to direct my resources to help right that balance.

America's "social contract" is equal opportunity. It is the most fundamental principle in our founding documents and it is what originally distinguished us from the old Europe. Yet, we have failed in achieving that seminal goal; in fact, we have lost ground in recent years. Another distinctly American principle is a shared partnership between the public and private sectors to foster the public good. So, if the democratically-directed public sector is shirking, to some degree, its responsibility to level the playing field, more of that role must shift to the private sector.

As I addressed my charitable purposes, all of this seemed pretty clear: I was only peripherally responsible for my own good fortune; I was morally duty bound to help those left behind by the accident of birth; America's root principle was equal opportunity but we were far from achieving it. Then I had to drill down to identify the charitable

purposes most likely to right that wrong.

The discoveries of stem cell research and brain development in recent years provided some guidance for me. Though almost all of us grew up believing in the concept of equal opportunity, most of us simultaneously carried the unspoken and inconsistent "dirty little secret" that genetics drove much of accomplishment so that equality was not achievable. What the new research seemed to suggest, however, was that brain cells were functionally unformed at birth and that only through the communication among them - driven by trial and error interpretation of sensory stimulation shortly after birth - did our cognitive and social/emotional skills develop. As I sometimes joke, I remember vividly that place before birth as being warm, wet, dark...and boring. Then, suddenly, as I emerged, I was bombarded with sensory overload and had to interpret all of that strange stimulus. Most of that interpretation takes place by age three; after that, we can modify our destiny but it is a lot harder.

No child is responsible for the circumstances of her birth and should not be punished for it in this life. (I will leave the question of second chances to other pulpits.) I have therefore developed my charitable focus around the concept of providing the greatest opportunity for self fulfillment for each child, focusing on those who arrive in the least advantaged circumstances. (A purer focus would be in areas of much greater disadvantage in the world where fewer dollars accomplish more. I honor the Bill & Melinda Gates Foundation's commitment to the principle that "every life has equal value" but will leave my justification for a primarily American focus to another dissertation.) That governing concept has led us to those initiatives which attempt to reverse the generational cycle of poverty, especially for very young children and their families: prenatal healthcare; early learning and development for at-risk kids, birth to three; family healthcare; parenting training; job and income assistance for families with young children; operating a robust program to provide alternatives to incarceration for mothers who have committed non-violent crimes, et cetera.

These efforts focus most heavily on the causes of poverty but we also dedicate resources to the symptoms, especially in these difficult times and in our relatively poor part of the country - food, clothing, shelter, healthcare and civic projects that promote inclusiveness and vibrancy. We generate a mix of projects, some of which are leading edge and more that import best practices from the greater creativity and experience of others. We attempt to leverage other resources, public and private, by our example. We try not to let a budget drive our expenditures but rather pursue those efforts through which we can make a true difference at an appropriate cost, whether less than or more than our targeted allocation. We remain lean in our central organization and partner with the leading practitioners in our fields of endeavor. We tend to direct our purposes and carefully monitor targeted results on a contemporaneous basis rather than scattering gifts and trusting to

retrospective general narratives of success from the beneficiaries. All in all, it is an intoxicating and yet frustrating journey, led by an extraordinarily committed and talented cadre of leaders.

Now that I have told you far more than you wanted to know about how I arrived at my charitable commitment and direction, it is time to make the pledge: I am entranced by Warren's and Bill's visionary appeal to those who have accumulated unconscionable resources, to dedicate at least half of them back to purposes more useful than dynastic perpetuation. My family is very well provided for and they join me in my intention to devote virtually all of my financial resources to the same general charitable purposes I have pursued in life, better informed in specifics by our experience and the experience of others. If enough acolytes follow Bill's and Warren's example, then maybe we will more closely approach the ideal of equal opportunity throughout the United States and the world.
Sidney Kimmel

I have responded affirmatively to the Giving Pledge. In fact, I have fulfilled that pledge already, having given more than half my wealth to charitable causes, primarily cancer research. I have also committed, and reaffirm here, that the balance of my estate--other than what is needed to support my wife during her lifetime--will also be given to charity...

Dear Warren:

I have responded affirmatively to the Giving Pledge. In fact, I have fulfilled that pledge already, having given more than half my wealth to charitable causes, primarily cancer research. I have also committed, and reaffirm here, that the balance of my estate--other than what is needed to support my wife during her lifetime--will also be given to charity.

My thinking is rather simple: I learned as a young boy that sharing with others is the right thing to do, a lesson I observed from my father's willingness to share even our meager means with those less fortunate. Ever since, it has never been difficult for me to continue to do the right thing.

I trust your efforts in growing the ranks of those committed to the Giving Pledge will be matched by the effort to see those pledges fulfilled. Thank you for your leadership.

Warmest Regards,

Sidney Kimmel
Elaine and Ken Langone

Elaine and I were honored to receive your graceful letter. It conveys a spiritual purpose that has long been close to our hearts and, yes, we will gladly join you in making our own pledge. Much praise to you for making this a national calling. It is inspiring how such a simple idea puts faith into action for the community as a whole. Our family is thankful for the many blessings we have enjoyed. It is because we live

in a special country, where freedom of opportunity is a cherished virtue...

Dear Warren,

Elaine and I were honored to receive your graceful letter. It conveys a spiritual purpose that has long been close to our hearts and, yes, we will gladly join you in making our own pledge. Much praise to you for making this a national calling. It is inspiring how such a simple idea puts faith into action for the community as a whole.

Our family is thankful for the many blessings we have enjoyed. It is because we live in a special country, where freedom of opportunity is a cherished virtue that we can reach so high in the first place. But nothing makes our society better than when we live up to its most caring ideals of service and selflessness. So it is also with a deep sense of gratitude that we are pleased to be included in this wonderful undertaking.

I have been asked why Marguerite and I made the Giving Pledge. The first and compelling is the joy we experience in giving to worthwhile causes. Marguerite and I have given the bulk of our fortune away. Over the last ten years, we have created a scholarship fund to send needy young scholars from rural areas to the better colleges, have sponsored research used by others to introduce legislation protecting our oceans, have started the center for sustainable energy at Columbia University, have...

Dear Melinda,

I have been asked why Marguerite and I made the Giving Pledge.

The first and compelling is the joy we experience in giving to worthwhile causes. Marguerite and I have given the bulk of our fortune away. Over the last ten years, we have created a scholarship fund to send needy young scholars from rural areas to the better colleges, have sponsored research used by others to introduce legislation protecting our oceans, have started the center for sustainable energy at Columbia University, have been the principal supporter of Teach For America in Philadelphia and have given to over a hundred other cases during that period.

The second reason is that we do not want to give excessive wealth to our progeny. Giving wealth to young and future unborn children, in our opinion, reduces or eliminates the character building challenges ahead of them in life that they would otherwise face.

Perhaps a third reason is that one is not measured by how many homes, yachts or airplanes you have. The ultimate achievement in life is how you feel about yourself. And giving your wealth away to have an impact for good does help with that feeling.

Sincerely,

H. F. (Gerry) Lenfest
Lorry I. Lokey

Born in 1927 I remember vividly the worst of the depression years in terms of how they affected my familyï¿½1933 and 1937 especially. The depression taught me the value of money, and my mother gave me a lesson around 1937 I never forgot. She asked me to run down to the store and get a loaf of bread. I did and charged it as usual. When I got home and gave it to her, she started at me in disbelief. ï¿½Dummy!ï¿½ she said. ï¿½You bought the small nine-cent size. Donï¿½t you know you get half again...

Born in 1927 I remember vividly the worst of the depression years in terms of how they affected my familyï¿½1933 and 1937 especially. The depression taught me the value of money, and my mother gave me a lesson around 1937 I never forgot.

She asked me to run down to the store and get a loaf of bread. I did and charged it as usual. When I got home and gave it to her, she started at me in disbelief. ï¿½Dummy!ï¿½ she said. ï¿½You bought the small nine-cent size. Donï¿½t you know you get half again more for 11 cents?ï¿½ From that I learned the lesson of percentages.

But a bigger lesson grew from that experience. I began to realize the importance of money consists of buying what is worth the price. As I grew into adult years, I passed over things most people might grab because I didnï¿½t think the price justified the value. For decades I have applied that to hotels, plane fares, restaurants, clothes, hard goods. I drive a hybrid and fly coach, upgrading only with points, not money. I have only three luxuries: My Atherton, CA., home, a San Francisco luxury apartment 600 feet above sea level and a luxurious home on Pineapple Hill in Kapalua, Maui. All will end up in my foundation where three other homes are right now awaiting sale.

During even the Depressionï¿½s worst years my parents gave moneyï¿½about 8% of their annual income of $2200. I remember saying to my mother that we canï¿½t afford that. But she said we have to share with others. I learned from that to share.

Except for the first few years out of Stanford, I have given near the 10% mark for some 20 years. For the last 40 years the giving amounts to more than 90% of all monies earned. You might then ask, ï¿½What are your favorite recipients?ï¿½

Going back 40 years I began thinking where I should concentrate my grants. Back then all of it was going to Stanford University and a few other institutions like Leo Baeck high school in Haifa. Twenty years ago I locked into this conclusion:

What single factor most affected my being so successful in business? In a nanosecond the answer came up: Education.

Throughout the world without an exception, education is the determinant of a personï¿½s intelligence level and possible success. And success is not making a million a month or a year. Itï¿½s earning enough to live comfortably and being able to finance childrenï¿½s education.

As my thoughts wandered from Alameda grammar school and Grant high school in Portland to Stanford, I soon came to the conclusion that the most critical part of my education was Alameda with Stanford taking on the role of pointing a direction for my futureï¿½journalism later to be public relations and still later to be founding a very profitable businessï¿½Business Wire, now a subsidiary of Berkshire Hathaway.

Each year I ask Alamedaï¿½s principal what they need. This year itï¿½s a fully equipped rolling computer wagon to move among the classrooms as needed. In earlier years I equipped all classrooms with computers and built a new library there.

By the latter 1960s, I was concentrating on Stanford with endowed chairs and student scholarships. It climaxed in 2008 with a $75 million pledge for what might be the worldï¿½s largest stem cell laboratory as well as the new Stanford Daily building. The Daily is paid for, and the stem cell lab money is in the Stanford Donor Advised Fund.

Around 1990 I realized I needed to broaden the base of giving to educational institutions. I wanted to concentrate on education because by putting all the money into a single subject effort, it might make a difference. I never have slipped into giving $500 here and $1000 there to 100 or 200 entities.

This brought into focus the major recipients, such as Santa Clara University, University of Oregon, Mills College, Portland State University, Oregon Health and Science University, two Oregon libraries, three San Francisco area Jewish day and grammar schools, two Hispanic schools in San Jose, several Israeli colleges (Technion, Weizmann, Ben Guerion) along with Hadassah Medical Center.

At several of the colleges, the grants have been so large that recipients use the word ï¿½transformationalï¿½ to describe their effect. This has been especially true for University of Oregon ($134 million), Mills College ($35 million), Santa Clara University ($37 million) and Technion Institute in Haifa ($33 million). What a good feeling this gives me. I would have it this way any day before wanting a jet plane or yacht.

As we went into the 21st century, I began quipping that I want to die broke. It wonï¿½t be quite that bad, but I will have set up machinery that my uncommitted assets today will be granted via such things as donor advised funds, charitable remained trusts and my foundation. The children, grandchildren and great grandchildren have been taken care of and will not be in the estate. Nor will my companion of 19 years, Joanne Harrington, who got her bequest many years ago and has been so helpful to me in the sharing process.

Thereï¿½s an old saying about farmers putting back in to the ground via fertilizer what they take out. So it is with money. The larger the estate, the more important it is to revitalize the soil.
George Lucas

Storytellers are teachers and communicators who speak a universal language. That was Homerï¿½s primary role, and both Plato and Aristotle used narratives and dialogues as a means of educating. Good storytelling is based on truths and insights, and a good storyteller is ultimately a teacher ï¿½ using the arts as a means of making education emotionally meaningful. These are all tools at our educational systemï¿½s disposal, but too often we arenï¿½t making use of them...

Storytellers are teachers and communicators who speak a universal language. That was Homerï¿½s primary role, and both Plato and Aristotle used narratives and dialogues as a means of educating. Good storytelling is based on truths and insights, and a good storyteller is ultimately a teacher ï¿½ using the arts as a means of making education emotionally meaningful. These are all tools at our educational systemï¿½s disposal, but too often we arenï¿½t making use of them.

When I was in high school, I felt like I was in a vacuum, biding time. I was curious, but bored. It was not an atmosphere conducive to learning. I was fortunate that I found my path and my language.

Itï¿½s scary to think of our education system as little better than an assembly line with producing diplomas as its only goal. Once I had the means to effect change in this arena, it became my passion to do so ï¿½ to promote active, life-long learning. I believe in the artisan school of learning, through apprenticeships and Aristotelian questions and discussion. This level of engagement dates back to the beginning of human life, but itï¿½s still the best way of doing things. There have to be universal standards ï¿½ particularly in education ï¿½ and while it seems unwieldy, there is a willingness among educators to share their best practices.

Ultimately, that is why I created Edutopia and the George Lucas Educational Foundation.

The focus of GLEF has been to share educational innovations ï¿½ cooperative and project learning, mentorship, parental involvement, and technological advances. This all comes straight from those on the front lines, from teachers who are putting these methods into practice. We are the facilitators. Our goal has been to showcase bold successes and inspire others to further increase the appetite for education. Our hope is that administrators, teachers, and parents will see the power of these collective efforts and join the fight for wider reforms.

But reform is just the beginning. We need to build new foundations, fostering independent thought and a desire to keep learning. Our students need to come away with more than just survival skills, and more than just what is required to complete the program. We need to promote critical thinking and emotional intelligence. We need to focus on

building an education system that promotes different types of learning, different types of development, and different types of assessment. We have an opportunity and an obligation to prepare our children for the real world, for dealing with others in practical, project-based environments. Itï¿½s about working together and building character ï¿½ being compassionate, empathetic, and civil as a means to a greater end.

As technology changes, so do students. So should classrooms, and so should our methods of teaching. In a few short years, connectivity has gone from a technological novelty to a daily necessity. Itï¿½s how our culture communicates, and our children are at the forefront of its use. Understanding those tools ï¿½ and how to integrate them into learning ï¿½ is an integral step in defining our future.

My pledge is to the process; as long as I have the resources at my disposal, I will seek to raise the bar for future generations of students of all ages.

I am dedicating the majority of my wealth to improving education. It is the key to the survival of the human race. We have to plan for our collective future ï¿½ and the first step begins with the social, emotional, and intellectual tools we provide to our children. As humans, our greatest tool for survival is our ability to think and to adapt ï¿½ as educators, storytellers, and communicators our responsibility is to continue to do so.

George Lucas
Duncan and Nancy MacMillan

It is with a great sense of responsibility and recognition of our own good fortune that we commit to the "Giving Pledge." We are aware, in our roles as family members, neighbors, colleagues, and friends, that we all rely on one another in both apparent and less obvious ways. Giving is one of the more clear and direct means to provide support, and it is satisfying to commit our resources to organizations that assist others and help to strengthen our society...

It is with a great sense of responsibility and recognition of our own good fortune that we commit to the "Giving Pledge." We are aware, in our roles as family members, neighbors, colleagues, and friends, that we all rely on one another in both apparent and less obvious ways. Giving is one of the more clear and direct means to provide support, and it is satisfying to commit our resources to organizations that assist others and help to strengthen our society.

We very much believe that the accumulation of wealth gets us nowhere. Money has the most value when it's used for others and the greater good, for sustaining and enriching our world. In our minds, foundational areas like education and health are the most critical. We support places like Rutgers University and Johns Hopkins, institutions at the nexus of education and medical research, as well as more local, grass-roots organizations that seek to maintain and enhance the health, education,

and well-being of our community.

We also support the arts, an area that we see as central to a flourishing culture, allowing individuals to thrive personally and creatively, and itself an area that perpetually gives back to the community. In many ways we see the arts as an extension of education, a place where we are inspired to create, cultivate talents, and be encouraged to excel.

Both of us have been lucky in our own lives, supported by the generosity of others when pursuing our own college educations. We have also been lucky to have been in the company of inspiring, motivated, and encouraging colleagues and friends, who have helped to put us in a position in which we now have the means to give in ways that we see as worthwhile and promising.

We are honored to be included within the group making this "Giving Pledge" and grateful not only because of its call to responsibility as members of society but also for its inspiring an attitude of generosity and hope - hope in the idea that we collectively have the resources among us to transform, buildup, and renew our society. This is a responsibility and challenge, but one we are thrilled to take on.
Alfred E. Mann

I have been very fortunate in having been born to exceptional parents in this great country. I came from humble beginnings and grew to become a young scientist pioneering in a field of electro-optical physics. The US Army needed my help and actually set me up in business in 1956. Two years later the Air Force came to me for help with our country's first spacecraft. The success of my first company (Spectrolab, now a subsidiary of the Boeing Co.) has enabled me to leapfrog from one success to...

I have been very fortunate in having been born to exceptional parents in this great country. I came from humble beginnings and grew to become a young scientist pioneering in a field of electro-optical physics. The US Army needed my help and actually set me up in business in 1956. Two years later the Air Force came to me for help with our country's first spacecraft. The success of my first company (Spectrolab, now a subsidiary of the Boeing Co.) has enabled me to leapfrog from one success to another, enabling me to amass a substantial fortune. I want to use those resources to make this a better world --- and to do as much as I can during my lifetime. I am therefore committing most of my estate to philanthropy, primarily focusing on development of medical products to improve and extend lives.

I began my extensive philanthropic program in 1985 with the founding of the Alfred Mann Foundation (AMF). AMF is an operating public medical research organization that has focused mostly on applications of neuromodulation. It employs about 100 people; all but a few are scientists and engineers. The contributions of AMF are numerous, including developments to enable the deaf to hear and soon for the lame

to walk. AMF also developed a long-term implantable glucose sensor (lasting ~1ï¿½ years) for diabetes and a number of other devices.

The success of AMF has led me to try to use a similar approach to harness the intellectual property at elite research universities. Rarely does that work end up in successful products or successful ventures. To address this I am creating biomedical institutes at a number of elite research universities. Each university receives an endowment of at least $100 million. Ideas born within the academic faculty are developed into products within separate industrial institutes owned by the universities. When developed the products are then licensed out to existing or start-up businesses for commercialization. So far institutes have been founded at the University of Southern California, Purdue and the Technion in Israel.

I have also created several other medical research foundations and two holding entities to distribute assets to fund my philanthropic activities. Additionally I have given to a variety of other charities especially related to music and education.

Early I was able to provide modest support for my family so that I intend for at least 90% of my estate to be devoted to philanthropy --- almost all directed to advancing medical technology.

This is my commitment.

Bernie and Billi Marcus

Thank you for calling to discuss my participation with you and Bill Gates regarding your philanthropy philosophy. It brought back memories of our conversation 15 years ago when I tried to convince you to do the very same thing. As you might remember, it has always been my belief that leaving enormous wealth for our children does nothing to stimulate their ability to make it on their own. I too believe that all our efforts in creating the wealth that we have would give us a great deal more joy...

Dear Warren,

Thank you for calling to discuss my participation with you and Bill Gates regarding your philanthropy philosophy. It brought back memories of our conversation 15 years ago when I tried to convince you to do the very same thing. As you might remember, it has always been my belief that leaving enormous wealth for our children does nothing to stimulate their ability to make it on their own. I too believe that all our efforts in creating the wealth that we have would give us a great deal more joy if we were to disperse as much of it during our lifetimes.

Weï¿½ve been focused on this work at The Marcus Foundation since our conversation many years ago. For example,The Georgia Aquarium, which is the largest in the world, has given over 12 million visitors the joy of

seeing fish and mammals that the overwhelming majority would have never had the opportunity to see in their lifetime. It also helped stimulate our downtown economy offering jobs and new opportunities. The work we do with hospitals, education, and children through the Marcus Autism Center (MAC), has enabled us to take care of well over 36,000 children since its inception and approximately 4,000 children annually. If it werenï¿½t for the MAC in Georgia there would be nowhere for many of these families to go.

I share this with you because of happiness one can conceive by watching the joys of their work. I remember very vividly a child that I had seen about a year ago that was severely autistic in my walk through MAC. Someone pointed this child out to me and when he looked at me he went into total hysteria, e.g. screaming, butting his head against the wall, etc. These actions happen with children of these disabilities. Approximately one year later we were doing a documentary with NBC and I walked into a classroom where the producer asked me to appear with one of the children. There was this same young man and I was horrified he would have another episode as he had in the past. Instead he came over, sat in my lap and talked! By the way, he had not spoken for the six years of his life before going to MAC. I cried, the teachers cried, the cameraman cried, and the parents cried. What a blessing this was to have changed one life and to have had such an impact on a life. I encourage you to always try to see the faces of the recipients you help.

This has happened to me many times over the last 15 years and itï¿½s made my life fuller. To make quarterly profits is one thing but changing just one life is so much better. However, I must say that just because we were involved with charity we didnï¿½t lose our fundamental business acumen. Our staff insists on outcomes for every grant we make. If outcomes are not achieved, we donï¿½t hesitate to withdraw funding. Our money has a value and it took lots of hard work to accumulate. I donï¿½t just write checks ï¿½ we try to make the organizations we fund better. The results have been rather outstanding.

So Warren, I want to thank you and Bill for doing what youï¿½re doing. I hope you convince many others to enhance their own lives by sharing with others in a smart and business like way. It truly is the secret to longevity of their health and state of mind.

I hope that you and Bill will visit and enjoy The Georgia Aquarium soon.

Sending my best wishes,

Bernie Marcus

I was born in Galveston, Texas, to Greek immigrant parents and was a teenager during the Great Depression. Although I grew up in a very meager, yet loving, environment, I always considered myself fortunate to

live in the United States where opportunities were unlimited, yet something we all seemed to take for granted. I quickly learned that a good education, hard work, dedication, willing mentors, and a few lucky breaks meant the difference between success and failure...

I was born in Galveston, Texas, to Greek immigrant parents and was a teenager during the Great Depression. Although I grew up in a very meager, yet loving, environment, I always considered myself fortunate to live in the United States where opportunities were unlimited, yet something we all seemed to take for granted. I quickly learned that a good education, hard work, dedication, willing mentors, and a few lucky breaks meant the difference between success and failure.

Throughout my life I've seen firsthand how even a little financial assistance could mean a chance for struggling students, dedicated scientists, and families to reach their goals. I've also witnessed how underwriting large-scale academic, performing arts, medical, and research programs can be quite appealing, as those ventures have far-reaching, long-term benefits for society as a whole, often extending for successive generations.

As I've been blessed with good fortune for decades and have lived the American dream, I'm pleased to take the Giving Pledge. Through The Cynthia and George Mitchell Foundation, I will continue to donate a substantial portion of my assets during my lifetime and through my will.

Bill and Melinda Gates and Warren Buffett have set an extraordinary example by their generosity and leadership, so I'm honored to join them in this remarkable philanthropic endeavor.
Thomas S. Monaghan

In 1998 when my sale of Dominoï¿½s Pizza was made public, the Detroit Free Press headline read, ï¿½I (Monaghan) Plan to Die Brokeï¿½. You could say that my giving pledge was made public at that time, but it was something I had contemplated for many years. So, when Bill (Gates) recently contacted me regarding the Giving Pledge project, I was more than happy to participate and share my story. I came into the world penniless and as a Catholic Christian, I know that I cannot take any of it with me...

In 1998 when my sale of Dominoï¿½s Pizza was made public, the Detroit Free Press headline read, ï¿½I (Monaghan) Plan to Die Brokeï¿½. You could say that my giving pledge was made public at that time, but it was something I had contemplated for many years. So, when Bill (Gates) recently contacted me regarding the Giving Pledge project, I was more than happy to participate and share my story.

I came into the world penniless and as a Catholic Christian, I know that I cannot take any of it with me, so it has long been my desire to use the material resources that I have been blessed with to help others in the most meaningful ways possible. My faith has always been a central part of my life; not that I have always lived it perfectly, but it has been the consistent guiding force as far back as I can remember. My

early experience of the Catholic faith, taught to me by the Felician sisters when I was in the orphanage during my formative years, served as a foundation for what I would believe to be the most important things in life. As I built and expanded Dominoï¿½s Pizza for 38 years, my desire to spread the faith also grew.

As a young man, I remember doing some deep soul searching and asking myself some questions that had to change the way I lived. I asked myself, does God exist? If He did, then I had better get with itï¿½ If He did exist, which I am convinced He does, it meant that the eternal state of my soul was the most important thing in the world. So, my logic tells me that the best thing that I can do for my fellow man is to help share this truth with others. Also, as a Catholic, I would not be living out my faith if I did not use the abundant resources God has given me to help others.

In the 80ï¿½s, as the material things in my life were ï¿½thrivingï¿½, I had a deep desire to give back to Godï¿½ He had been so good to me by blessing me with incredible material wealth and success. Dominoï¿½s Pizza was booming, I owned the Detroit Tigers, classic carsï¿½ ï¿½ it was like a dream come true ï¿½ yet, as mentioned above, I knew that the most important things in life were not material; I knew that all these things would pass away and that the only thing that really mattered was the state of my soul and for that matter the state of every personï¿½s soul. While I had given money away previously, I now began to look for how I could really be effective, really make a difference in what truly mattered; in peopleï¿½s eternal lives.

After selling Dominoï¿½s, I created a number of priorities that would guide my giving. However, I soon concluded that I needed to focus these priorities even more (as my resources were finite), and I eventually concluded that the most important thing I believed I could do with the resources that I had been blessed with was to help build quality, faithful Catholic education. A number of years before, I had started supporting Catholic education by getting involved with grade schools, and this was great, but building schools was expensive. I realized that to have a more global impact, I would need to focus on Catholic higher education ï¿½ to train the teachers, the principals, the future Catholic university and seminary professors.

So, from my experience of sitting on numerous college and university boards and the expertise of some well respected Catholic academics, we set out on a journey to establish Ave Maria University and Ave Maria School of Law. Since that time, I have not only committed my personal assets to these institutions, but they have become my lifeï¿½s work, as I am now going around the country raising money for them.

I am very grateful not only for the resources that I have been blessed with, but the opportunity to use these resources to help others in the best way I know how.
Tashia and John Morgridge

In 1955 we graduated from the University of Wisconsin-Madison, got married and headed west so John could attend the Stanford Graduate School of Business and Tashia could start her teaching career. All of our possessions fit into our 1950 Ford and all of our wealth fit into a back pants pocket. It was the start of a glorious adventure! But we left the Midwest with much more; with the values, confidence and capabilities learned from our parents, our community, our early public schooling in...

In 1955 we graduated from the University of Wisconsin-Madison, got married and headed west so John could attend the Stanford Graduate School of Business and Tashia could start her teaching career. All of our possessions fit into our 1950 Ford and all of our wealth fit into a back pants pocket. It was the start of a glorious adventure!

But we left the Midwest with much more; with the values, confidence and capabilities learned from our parents, our community, our early public schooling in Wauwatosa, Wisconsin, and from the University of Wisconsin. Early on we learned the art of giving small checks to causes important to us,. Through hard work, good fortune and the opportunities offered by our amazing country and the world, we have prospered beyond all expectation. As a result, we have been able to add many zeros to the amounts of the checks we are now able to write.

In 1992 we formed a family foundation with our children and the two of us as board members. It has been a learning process, but in spite of heartaches and setbacks, we have all learned to become involved, effective philanthropists. We have teamed with talented people and with many of the organizations that helped to form us. The more personally involved we have become with the causes we support the more effective we seem to be.

Through our foundation and also personally, we have now given away over half our net worth. It is our intent to remain involved and to continue to give. Our children intend to carry on their work after we are gone. The adventure continues.
Dustin Moskovitz

In 2004, I had the extraordinary opportunity to help create Facebook, which has grown to connect half a billion people, dramatically increasing communication and transparency worldwide. As a result of Facebook's success, I've earned financial capital beyond my wildest expectations. Today, I view that reward not as personal wealth, but as a tool with which I hope to bring even more benefit to the world. Iï¿½m grateful to my friends and family...

In 2004, I had the extraordinary opportunity to help create Facebook, which has grown to connect half a billion people, dramatically increasing communication and transparency worldwide. As a result of Facebook's success, I've earned financial capital beyond my wildest expectations. Today, I view that reward not as personal wealth, but as a tool with which I hope to bring even more benefit to the world.

Iï¿½m grateful to my friends and family for shaping my understanding of effective philanthropy, educating me on areas of need, and demonstrating time and again the power of a good idea, well executed.

I'm especially thankful to have found a partner in Cari who shares my priorities and commitment to this humbling work. Over the next few years, we will begin to identify the causes to which we can make the most leveraged contributions. We will donate and invest with both urgency and mindfulness, aiming to foster a safer, healthier and more economically empowered global community.
Pierre and Pam Omidyar

When eBay went public in 1998, Pam and I suddenly found ourselves in a position of great wealth. In a matter of days we went from making a modest living to landing a spot on Forbesï¿½ list of richest Americans. It was a surreal experience. But the responsibility we felt for being good stewards of that wealth was genuine - and has grown ever since. In 2001, I publicly stated that we intend to give away the vast majority of our wealth during our lifetime. Our view is fairly simpleï¿½

When eBay went public in 1998, Pam and I suddenly found ourselves in a position of great wealth. In a matter of days we went from making a modest living to landing a spot on Forbesï¿½ list of richest Americans. It was a surreal experience. But the responsibility we felt for being good stewards of that wealth was genuine - and has grown ever since.

In 2001, I publicly stated that we intend to give away the vast majority of our wealth during our lifetime. Our view is fairly simple. We have more money than our family will ever need. Thereï¿½s no need to hold onto it when it can be put to use today, to help solve some of the worldï¿½s most intractable problems.

In thinking about how we could be most effective, we began our work by reminding ourselves of our core values, including respect for others and a sense of service. Weï¿½ve made a conscious effort to remain true to these guiding principles as our efforts grow and evolve. The eBay community also taught us a valuable lesson: people respond to opportunity in inspiring ways. The organizations weï¿½ve created and the time and energy we spend on various causes is rooted in our belief that people are inherently capable but frequently lack opportunity.

Today we believe our philanthropic impact is amplified because our approach uses a wide variety of tools and resources. We donï¿½t just write checks; we engage deeply with the organizations we support to help them reach and improve the lives of millions, not just thousands. We invest in for profit businesses that serve overlooked populations with much-needed products and services. We reach out to like-minded investors and advocates to form coalitions that support issues that will benefit from a unified voice.

So while the focus of the Giving Pledge is on the philanthropists and amounts pledged, we are inspired by the organizations we support that are doing amazing things and the people we are here to serve.

We are pleased to stand alongside Bill and Melinda, Warren, and so many others who are working every day to create positive social impact in the world. Truthfully, itï¿½s not up to the small minority of those with money to spare; lasting change requires all of us working together across industries, sectors, and cultures. Our common challenge is not necessarily about dollars raised; itï¿½s about discovering the most efficient and effective use of our resources and leaving a legacy of hope for those to come.
Bernard and Barbro Osher

The Bernard Osher Foundation started in 1977 with contributions to higher education and the arts. Within the field of higher education, the Foundation has focused on postsecondary scholarships, especially for older returning students; lifelong learning institutes for seasoned adults; and integrative medicine programs. The Barbro Osher Pro Suecia Foundation, founded in 1995, supports Swedish-American educational and cultural exchange. We have been committed for more than thirty years...

The Bernard Osher Foundation started in 1977 with contributions to higher education and the arts. Within the field of higher education, the Foundation has focused on postsecondary scholarships, especially for older returning students; lifelong learning institutes for seasoned adults; and integrative medicine programs. The Barbro Osher Pro Suecia Foundation, founded in 1995, supports Swedish-American educational and cultural exchange. We have been committed for more than thirty years ï¿½ and remain committed -- to directing the majority of our means to philanthropy.
Ronald O. Perelman

One of the most memorable moments in my life was at a charity dinner I was attending for a breast cancer cause. A woman approached me and said, ï¿½I just wanted to say thank youï¿½because of you my sister is alive.ï¿½ I happened to be standing next to the man who was really responsible for that wonderful newsï¿½Dr. Dennis Slamon. I first learned of Dr. Slamonï¿½s research about 20 years ago when we were introduced by a mutual friend, Lily Tartikoff...

One of the most memorable moments in my life was at a charity dinner I was attending for a breast cancer cause. A woman approached me and said, ï¿½I just wanted to say thank youï¿½because of you my sister is alive.ï¿½ I happened to be standing next to the man who was really responsible for that wonderful newsï¿½Dr. Dennis Slamon.

I first learned of Dr. Slamonï¿½s research about 20 years ago when we were introduced by a mutual friend, Lily Tartikoff. He told me he had found abnormally large quantities of a gene called HER2 in about 30% of breast-cancer tumors. But he hadnï¿½t yet proven that the gene played a pivotal role in the disease. He wanted to begin testing antibodies that might slow some of the more aggressive forms of cancer. The trouble was the research wasnï¿½t developed enough for drug-company backing, and funding it with government grants would add years to the study. The idea of funding this immediately appealed to me. I have always been interested in giving to projects that may not get done otherwise. If the

research wasnï¿½t productive, I would have spent money to no avail, but, if the idea worked, the potential was enormousï¿½it was a risk I was willing to take. I asked Dr. Slamon what he needed and then told him to get to work.

The result of that research was Herceptin, the only drug known to cure certain types of breast cancer. And it started helping women, like that womanï¿½s sister whom I will probably never meet, a full 10 years earlier than if Dr. Slamon had not received my gift.

I can think of no greater example as to why giving now and seeing the benefits first hand can be the single most rewarding thing any of us can do. I support this pledge to designate half my assets for the benefit of charitable purposes during my lifetime and through my foundation.
Peter G. Peterson

I am very pleased to pledge that I plan to contribute the substantial majority of my assets to philanthropy. As you know, I am well on my way. I do so with great pleasure. And for several reasons. My parents were Greek immigrants who came to America at age 17, with 3rd grade educations, not a word of English and hardly a penny in their pockets. Their dream was the American dream, not just for themselves but for their children as well. My father took a job no one else would take...

Dear Warren:

I am very pleased to pledge that I plan to contribute the substantial majority of my assets to philanthropy. As you know, I am well on my way.

I do so with great pleasure. And for several reasons.

My parents were Greek immigrants who came to America at age 17, with 3rd grade educations, not a word of English and hardly a penny in their pockets. Their dream was the American dream, not just for themselves but for their children as well.

My father took a job no one else would take - - washing dishes in a steamy caboose on the Union Pacific railroad. He ate and slept there and saved virtually every penny he made. He took those savings and started the inevitable Greek restaurant, open 24 hours a day for 365 days a year for 25 years. Throughout this period, he always sent money to his desperately poor family in Greece and fed countless numbers of hungry poor who came knocking on the back door of his restaurant. Above all else, he wanted to save so as to invest in his childrenï¿½s education.

As I watched and learned from my fatherï¿½s example, I noticed how much pleasure his giving to others gave him. Indeed, today, I get much more pleasure giving money to what I consider worthwhile causes than making the money in the first place. As I checked with other philanthropists, I found this was a very common experience.

For example, I have been particularly pleased to support causes and institutions for which I have a passion and for which I contribute

myself, that is my personal capital, as well as my financial capital. For example, the Peterson Institute for International Economics, the Council on Foreign Relations and The Concord Coalition that I co-founded with Senators Warren Rudman and Paul Tsongas.

I was also informed by the great novelist, Kurt Vonnegut, who once told a story that seemed to capture my situation perfectly. He and Joseph Heller were at a party given by a wealthy hedge fund manager at his majestic beach house in the Hamptons, the summer playground on Long Island where the rich and famous congregate. Kurt and Joe both had made their marks by satirizing lifeï¿½s absurdities ï¿½ Kurt with best-selling novels like Slaughterhouse 5 and Breakfast of Champions, Joe with the incomparable Catch-22. During the course of the party, Kurt looked around at the surroundings and asked Heller: ï¿½Joe, doesnï¿½t it bother you that this guy makes more in a day than you ever made from the worldwide sales of Cach-22?ï¿½ Joe thought for a moment and then said, ï¿½No, not really. I have something that he doesnï¿½t have.ï¿½ ï¿½What could you possibly have that he doesnï¿½t have?ï¿½ Kurt asked. ï¿½I know the meaning of enough.ï¿½ My father often said the same thing.

When I enjoyed a most surprising billion dollar plus windfall from the public offering of The Blackstone Group, a firm co-founded, I pondered, what should I do with all of this money?

In 2007, I decided I already had far more than enough and was delighted to commit a billion dollars to the Peter G. Peterson Foundation and to some causes that I care deeply about.

My foundation made its first major contribution to a transcendent global threat, the proliferation of nuclear weapons. I have known former Senator Sam Nunn, for whom I have enormous respect, who is devoting much of his life to this cause.

I am also much concerned about domestic threats that I also consider transcendent. I refer to several such threats as undeniable, unsustainable and yet, politically speaking, untouchable. For example, our unfunded entitlement promises that so many depend upon, our ballooning debts to foreign lenders, which combined with our very low savings, leaves us very vulnerable and even threaten our national sovereignty. Then, of course, there are our mushrooming healthcare costs that threaten to bankrupt our economy.

We, at the Foundation, are deeply involved in educating, motivating and, hopefully, activating the public to do something about these problems.

I am a very lucky American dreamer but I want to see that dream alive for my five childrenï¿½s and nine grandchildrenï¿½s generations. On our current path, I fear we are imperiling their future by passing on massive, hidden debts and unthinkable taxes. At bottom, I consider this fiscal child abuse or mortgaging their future, or whatever one chooses to call it, it is not only an economic issue but a national security issue and, above all, a moral issue.

Given the serious political challenges and our countryï¿½s apparent reluctance to accept the required shared sacrifice, no doubt many are saying my Foundation is not only a presumptuous mission, but a foolhardy one. So, I quote my old University of Chicago professor George Stigler, ï¿½If you have no alternative, you have no problem.ï¿½ I asked myself this melancholy question: How will I feel 10 to 20 years from now if I look back and ask why, oh why did we all leave such a legacy? How could we have done this, not simply to America, but to our own children and grandchildren? Could there be a worse feeling? Can not trying really be an acceptable alternative?

Finally, Warren, you and Bill Gates know better than anyone how distinctly American private philanthropy is.

I thank you warmly and congratulate you and Bill Gates both mightily for your leadership role in this most worthwhile cause.

Best,

Peter G. Peterson
T. Boone Pickens

Iï¿½ve long stated that I enjoy making money, and I enjoy giving it away. I like making money more, but giving it away is a close second. To date, Iï¿½ve given away nearly $800 million to a wide-range of charitable organizations, and I look forward to the day I hit the $1 billion mark. Iï¿½m not a big fan of inherited wealth. It generally does more harm than good. I want to thank my friends Bill and Warren for their leadership ï¿½ I am pleased to join them.

Julian H. Robertson, Jr.

My parents and their friends in the little town in North Carolina where I grew up were always very philanthropic. They wanted our schools to be the best they could be, and they worked hard to get them that way. They worked on our parks. They worked with the local hospital to make it the best. We had two local colleges, Livingstone and Catawba - one black, one white - and the townspeople were supportive of both. When I moved to New York, I worked with the Boysï¿½ Club of New York, namely at...

My parents and their friends in the little town in North Carolina where I grew up were always very philanthropic. They wanted our schools to be the best they could be, and they worked hard to get them that way. They worked on our parks. They worked with the local hospital to make it the best. We had two local colleges, Livingstone and Catawba - one black, one white - and the townspeople were supportive of both.

When I moved to New York, I worked with the Boysï¿½ Club of New York, namely at 110th Street in Harlem and at Pitt Street which is on the lower East Side. My doctor got me interested in something called the Cancer Research Institute where I eventually became board chairman. This led to a lifelong interest in medical research. Early on, I also met a man named Bill Milliken, who in my opinion is the greatest venture capitalist in the good-works field. He was a refugee of the gang warfare which existed in Pittsburgh and New York and became an incredible leader with his Communities in Schools, which is now in 26 states and in 3,400 schools serving 1.4 million children annually. My late wife, Josie, and I worked jointly for Central Park and Lincoln Center. Her work with the Boysï¿½ Clubs eventually far exceeded my own. Philanthropy was a part of our lives that we both enjoyed greatly.

In 1990 I set up the Tiger Foundation, with a young man named John Griffin, to help alleviate poverty in New York. In my business, I was then working with some great young people who had marvelous leadership credentials, and I wanted to encourage them to be philanthropists. This has turned out well, as the foundation has become extremely respected in its quest to alleviate poverty and has spawned a number of young people who have become great philanthropists in their own right. Frankly, I count the Tiger Foundation as the most successful venture I have had a hand in starting.

In 1993, Josie and I started our own foundation. It was designed to address issues in medicine, education, spirituality and, finally, the environment, which I had come to rather late in life.

I met a man named Fred Krupp who nurtured a latent effort on my part to get into issues of environmental concern. Fred is responsible for the most successful speculation I ever made. Fred called one day and told me that the California legislature was in limbo over a bill pushing the toughest auto emissions standards ever proposed. The speaker was willing to do whatever was necessary, even keeping the legislature in session into all hours of the night until a positive vote could be obtained. Fred and I went to work, and with just a little lobbying money, and a lot of help from a friend in California, got the three votes needed to pass the bill. This was a huge thrill for me personally. The California bill became the model that thirteen states adopted and eventually became the national standard for autos.

In the year 2000, Josie and I started the Robertson Scholars program designed to promote interaction between student leaders at Duke and the University of North Carolina at Chapel Hill. Sixteen scholarships are awarded annually at each school, and the scholarship has become internationally known and respected. Our summer programs send outstanding students to outposts all over the world on creative leadership projects.

One very fortunate thing is that I did not get nearly as enthusiastic about philanthropy early on as I am now; if I had there would be very little to give away. I have found so many great new projects to work with just in the last several years: the national parks, the families

of our military, stem cells, and now obesity. The Milken Institute calculates that if we could get Americans back to their weight level of 1991, we could save a trillion dollars a year. A trillion dollars, think of that! Besides making Americans healthier, we could now solve the fiscal crisis in the US.
David Rockefeller

Philanthropists, at their best, try to address serious societal problems and occasionally come up with innovations that lead to enduring change In the end, success requires much more than financial resources, although money is, of course, essential. Good ideas are just as important; otherwise one risks wasting both the funds and the opportunity. Effective philanthropy also requires patience - patience to deal with unexpected obstacles; patience to wait for the first, slight stirrings of...

Philanthropists, at their best, try to address serious societal problems and occasionally come up with innovations that lead to enduring change In the end, success requires much more than financial resources, although money is, of course, essential. Good ideas are just as important; otherwise one risks wasting both the funds and the opportunity. Effective philanthropy also requires patience - patience to deal with unexpected obstacles; patience to wait for the first, slight stirrings of change; and patience to listen to the insights and ideas of others.

For five generations, my family has experienced the real satisfaction and pleasure of philanthropy. Our engagement has helped to create a strong group of institutions, including the University of Chicago, The Rockefeller University, the Museum of Modern Art, and the Rockefeller Brothers Fund. The practice of philanthropy also has enabled many of us to become personally involved in efforts to address critical global challenges such as poverty, health, sustainable development, and environmental degradation. Our family continues to be united in the belief that those who have benefitted the most from our nation's economic system have a special responsibility to give back to our society in meaningful ways.

Warren Buffett and Bill and Melinda Gates share this belief and have challenged others to pledge half their assets to philanthropy during their lifetime or at their death. I am pleased to say this has long been my intent and my practice, and I am delighted to have been asked to participate in this important initiative. I hope that others will accept this challenge - and opportunity ï¿½ and will join us in this worthwhile endeavor.

I also hope that our efforts to expand the scope of philanthropy as individuals, in collaboration with others, and in ways that include not only financial resources but innovative ideas and patience, will be part of the gift we all bequeath to the future.
David M. Rubenstein

Like many of those who responded positively--and enthusiastically-- to Bill Gates' and Warren Buffett's call, I never expected, in my wildest dreams as a youth or as a young professional, to be in a position where anyone (other than my immediate family) would care what I would do with my money. That is because I did not expect to have much of it. I also did not see wealth accumulation as a likely professional outcome, or even a particularly desirable one...

Like many of those who responded positively--and enthusiastically-- to Bill Gates' and Warren Buffett's call, I never expected, in my wildest dreams as a youth or as a young professional, to be in a position where anyone (other than my immediate family) would care what I would do with my money. That is because I did not expect to have much of it. I also did not see wealth accumulation as a likely professional outcome, or even a particularly desirable one.

I was born and raised in modest, blue collar circumstances in Baltimore. The making of large sums of money--and the disposition of them--was just not on my radar screen.

My goal was simply to do well enough in school to secure scholarships to college and law school to practice law; and to fulfill a long-time desire--perhaps inspired by President Kennedy's inaugural address--to move back and forth from the practice of law into various public service positions. And I was on that course--I graduated from the University of Chicago Law School--with the assistance of considerable scholarship money--practiced law in New York at Paul, Weiss, Rifkind, Wharton & Garrison--and (through luck far more than skill) managed three years after law school to find myself as a deputy domestic policy assistant to President Carter.

I expected that I would stay at the White House for eight years--the voters obviously felt four years of my service was enough--and would then live a life of shuttling back and forth into government service from a Washington law firm perch, with the goal of hopefully doing some public good during each time in government service. The income level of a Washington lawyer does not allow for the accumulation of large wealth, but I felt it was more than enough to satisfy my somewhat spartan needs and the likely needs of any family I would produce and raise.

And then, as is the case with so many individuals who accumulate wealth, my life did not go in the direction I had expected or intended, or desired. After a few years of practicing law following my White House days, I realized that I was not all that great a lawyer; I had growing reservations about constantly uprooting my career to go back and forth into government, (especially as a family emerged); and I felt that I should try to do something I might enjoy more than law or government service.

And so I started a small investment firm in Washington--a rarity for the city in the late 1980's. My original partners and I struggled to raise the first $5 million to capitalize the firm, and we spent many years trying to get investors and others to take us seriously--an experience

not uncommon to most entrepreneurs in their early years.

But, nearly a quarter century later, this tiny firm grew to be one of the worldï¿½s largest private equity firms, producing for the founders and many others in the firm more wealth than we had ever expected or dreamed about.

In my own case, I had been relatively tunnel-visioned in trying to build the firm, and spent little time on philanthropic matters until I turned 54. I then read that a white male, on average, would live to 81, meaning that I had already lived, if I were to match the average, two thirds of my life. I then thought that I did not want to live the other third, get to my deathbed, and then ask someone to give away my accumulated resources as they saw fit (even if I left some guidance in a will). I also thought that my resources had become--and would likely be at deathï¿½far more than my family reasonably needed.

So I decided to put my toe into the world of philanthropy, and did get reasonably involved from that point forward. My approach in the ensuing seven years has not been as systematic as may be desired. I have begun to contribute to a wide variety of performing arts, educational, medical, literary, public service, and cultural causes and institutions--causes that have meaning to me, and institutions that were very helpful to me earlier in my life or I think are now being very helpful to others. I now serve on a few dozen non-profit boards--far too many to focus one's philanthropic interests. But I enjoy these boards and the causes and the purposes for which they serve.

However, I recognize that to have any significant impact on an organization or a cause, one must concentrate resources, and make transformative gifts--and to be involved in making certain those gifts actually transform in a positive way. And I am heading in that direction, and hope--if I do get to 81 - to have made many such transformative gifts by that time. And, with luck, some of them may actually have transformative benefits - hopefully during my lifetime - for the organization or the cause.

In signing the Pledge, I did not honestly do anything more than I had already intended to do, as I said to Bill Gates when he talked to me about the Pledge. I actually had already made arrangements to ensure that a good deal more than half of my resources would have gone to philanthropic purposes

So in participating in the Pledge, I cannot honestly say that I am now committing to do more than what I had been planning to do for some time, and was in the process of doing. But I felt that the Pledge was a quite positive undertaking, and was pleased - and honored - to be asked to be part of it, for these reasons:

1) To the extent that individuals with considerable resources are publicly committing to give away at least half of their wealth, other individuals with considerable wealth in this country may be inspired to

do so as well--and that would be a positive development, especially if the individuals had not previously thought about or felt obligated to give away that much.

2) To the extent that the publicity surrounding the Pledge affects other Americans, it is my hope that it will inspire individuals with resources of modest or average or even above average means to make similar pledges--to themselves, their families, or to the public. The giving away of money should not be seen as only an obligation - or as a pleasure - restricted to the wealthiest (and most fortunate) among us. Everyone can and should give, and everyone can and should feel that their gifts may make the world a little bit better place. And if every person with the ability to make some philanthropic gifts does so, the country will be much better for these gifts, and the donor will surely feel much better about himself or herself.

3) Philanthropic activity is, unfortunately, more of an American phenomenon than a global phenomenon. My hope is that the Pledge will inspire similar efforts to get under way abroad. And while it is likely such efforts will focus on the wealthiest of individuals in other countries, my hope, again, is that individuals of all levels of resources will also increase their giving, and feel they are helping their countries and humanity by doing so.

In my own case, I would add as a final point, one a bit beyond what the Pledge seeks. I hope to do my own giving--and to honor my Pledge - while I am alive. I recognize no one really knows how long he or she will be on the earth, and it is therefore difficult if not impossible to time one's giving perfectly to match one's longevity. But I enjoy seeing the benefits--when they arise--of my giving, and would like to have as much of this enjoyment while I am alive as possible.

I recognize that others signing the Pledge ï¿½ now or in the future - may have a different perspective, and their considerable resources (or age) may make the goal of honoring the Pledge during their lifetime a bit less realistic. But I do hope that others involved in this effort ï¿½ and those who are ultimately inspired to increase their giving - will accelerate their giving, so as to bring whatever benefits come from giving to the world a bit sooner. That can only make the world a bit better a bit sooner. Too, watching the product of oneï¿½s giving is one of lifeï¿½s greatest pleasures, and those with the ability to do so should do what they can to experience that pleasure when they are around to see the benefits. They will never regret doing so.
Herb and Marion Sandler

We are among the converted having committed to give all our net worth to philanthropy starting with a grant of $1.3 billion in 2006 to our spend-down Foundation. When you think about it, no other approach seems to make sense. Passing down fortunes from generation to generation can do irreparable harm. In addition, there is no way to spend a fortune. How many residences, automobiles, airplanes and other luxury items can one acquire and use...

We are among the converted having committed to give all our net worth to philanthropy starting with a grant of $1.3 billion in 2006 to our spend-down Foundation.

When you think about it, no other approach seems to make sense. Passing down fortunes from generation to generation can do irreparable harm. In addition, there is no way to spend a fortune. How many residences, automobiles, airplanes and other luxury items can one acquire and use?

The Buffett/Gates initiative is likely to be a major "game changer." Their partnership and dedication and their challenge to billionaires to share their wealth with the less fortunate will undoubtedly unlock a substantial amount of funds. Congratulations!

As former CEOs of a highly successful financial institution, we were rewarded monetarily beyond our wildest imagination, at the same time experiencing the emotional high associated with building a great company from scratch and winning in the competitive race. At the same time, we found equal gratification in working with employees and customers.

For example, an important part of our staff was composed of single working mothers. We provided training and counseling to these women, so that they could rise through the ranks and become managers with greatly enhanced earning power. On the lending side of our business, we found that there was no greater gratification than enabling a family to own their own home, especially when they thought it was an impossible dream. These are a few examples of the sense of fulfillment we experienced in "giving back" and which, among other things, led to our decision to devote our energy and money to making a difference in people's lives. Believe it or not, the psychic income - the highs if you will - associated with giving money away thoughtfully and effectively has been even more gratifying than running a successful business.

Our two children are totally involved with us in the Foundation's activities. Not only do they support our Pledge, but they also plan to follow our example with respect to their own net worth.

SANDLER FOUNDATION

We would like to share with you the attached two documents we produced before getting started:

ï¿½ Mission Statement and Values

ï¿½ Guiding Principles for Grants

We would like to elaborate on some of the information contained in the attachments and also spend a little time discussing how we operate.

We Want To Make As Big An Impact As Possible.

We are a spend-down foundation and therefore act with urgency to make significant contributions that have both an immediate and lasting impact.

We Are Focused On Achieving Results.

One of our core competencies stems from our experience as CEOs of the second largest savings bank in the country. We understand the critical importance of due diligence, an important part of which is evaluating the management of potential grantees. We offer technical assistance, i.e., how to improve strategic and business plans; goals and objectives; budgets; etc.

We Are Willing To Take Risks.

In essence, in many ways, we are venture capitalists. We are willing to take risks and make bold strategic investments in areas not adequately addressed by government, industry, universities or the non-profit sectors. We prefer to assist well-run organizations with additional funding, but where we have not been able to find an institution that can fill an important need, we have not hesitated to start one. During the last several years, we have created nine non-profits, all of which are performing beyond our original forecasts. We would like to give you two examples:

ï¿½ American Asthma Foundation (AAF). Asthma is a chronic lung disease affecting approximately 23 million Americans. It is the most disabling childhood disease in the country, and as you might expect, it is an especially serious problem for poor, inner city children. Sad to say, there has been no material improvement in treatments for over 50 years. Equally surprising, until we created the American Asthma Foundation, there was no institution devoted to funding research that would improve treatments, prevent and find a cure for the disease. Since its establishment ten years ago, through a highly innovative approach, AAF research has led to the discovery of 17 breakthroughs for new treatment, three of which are in clinical trials.

ï¿½ ProPublica - Journalism in the Public Interest. The economic crisis of American journalism potentially undermines the ability of a free press to call the powerful to account. Herein lies our motivation to create ProPublica, a new kind of institution: a non-profit newsroom staffed with top talent and having as its sole mission producing journalism in the public interest with what we call "moral force." Led by Paul Steiger, formerly Managing Editor of the Wall Street Journal, ProPublica already has won 30 honors, including a Pulitzer Prize for investigative reporting, since it began publishing in mid-2008.

We welcome the opportunity to add our names to the Pledge list and would like to express our thanks to Bill Gates and Warren Buffett for their leadership.

Sincerely,

Herbert M. Sandler Marion O.

We pledge we will gift to non-profit causes more than 90 percent of our assets during our lifetime or as planned gifts. We deeply appreciate the good fortune that allows us to make this commitment. Our support of various not for profit organizations has given us enormous satisfaction particularly where we have been personally involved with the boards or committees of those institutions. We would not be in this position if not for the extraordinary people that made AES a success...

We pledge we will gift to non-profit causes more than 90 percent of our assets during our lifetime or as planned gifts.

We deeply appreciate the good fortune that allows us to make this commitment. Our support of various not for profit organizations has given us enormous satisfaction particularly where we have been personally involved with the boards or committees of those institutions.

We would not be in this position if not for the extraordinary people that made AES a success. We deeply appreciate their commitment to expanding access to electricity around the world and the personal values they demonstrate. Giving to causes that will make the world a better place socially and environmentally is one of the ways we can express our thanks to them.

We have created a family foundation, with our four children and their spouses amongst our trustees, so that as a family we can address the issues that we feel are the most compelling. Our appreciation to each of our family members is unbounded as they have contributed their insights and ideas that have made our Foundation grants more effective. Our children and grandchildren have brought us joy beyond our imagining.

We encourage others to go down a philanthropic path of their choosing with the understanding that this road is full of opportunities and challenges. It is as hard to make good grants as it is to make good investments and it needs to be done with dedication. For this we thank our extraordinary staff, and our non-family trustees, who work diligently to help us realize our mission to assist in creating a world where nature can flourish and people can thrive. When done right, there is nothing more satisfying than grant-making - seeing positive results and learning from mistakes.

Finally, we thank Warren Buffett and Bill and Melinda Gates for their leadership in expanding the amount of philanthropy in the world.
Walter Scott, Jr.

While I'm pleased to respond to the appeal you are making with Bill & Melinda Gates to promote "Giving Pledges" among our peers, I made that commitment long ago. As you know, I've already contributed quite a bit, beginning in earnest 35 years ago with my first significant contribution to the Zoo. As long as health permits, Sue and I plan to be active and engaged philanthropists. Like our good friend Chuck Durham, who made some wonderful gifts in his final years, we enjoy seeing...

Dear Warren:

While I'm pleased to respond to the appeal you are making with Bill & Melinda Gates to promote "Giving Pledges" among our peers, I made that commitment long ago. As you know, I've already contributed quite a bit, beginning in earnest 35 years ago with my first significant contribution to the Zoo.

As long as health permits, Sue and I plan to be active and engaged philanthropists. Like our good friend Chuck Durham, who made some wonderful gifts in his final years, we enjoy seeing the fruits of our philanthropic efforts. Upon my death, virtually all of my remaining estate will go into the Walter Scott, Jr. Foundation.

My interests, that I hope my foundation's successor trustees continue, are twofold. Number one is causes that serve young people. I have nothing against old people. I am one! But I believe society will get the most bang-for-the-buck if I invest in things that help us produce educated and productive citizens, whether through youth social services or assisting them pursue a college education through scholarships.

My second major interest is causes that help improve our community. That can take many forms, beginning with our Zoo. But it can also include causes like helping Dr. Maurer build a world-class research institution, or helping improve engineering and information science education at the Peter Kiewit Institute. I like to invest in causes that move our community forward because if we don't, we will find that it has begun to deteriorate.

Our community is fortunate to have had a series of exceptionally generous philanthropists. I don't know if Mary Lucretia Creighton was first, but Creighton University is quite a legacy. The people of Omaha enjoy a higher quality of life because of the significant charitable investments made by wealthy individuals for more than a century.

In my remaining years, through my foundation, I'll continue to invest in our community, including additional gifts to our Zoo. There's still room for a Buffett exhibit. Call me when you're looking for an idea!

Sincerely,

Walter

work to be both challenging and deeply satisfying.

Jeff Skoll

I grew up in a middle class family in Canada. My dream was to be a writer who tells stories that make a difference in the world. Along the way, when I got out of business school, I became the first full-time employee and the first President of a fledgling company with an online auction service called AuctionWeb. That company later became better known by its corporate name, eBay. When the company went public in 1998, all of a sudden I went from being in debt and living in a house...

I grew up in a middle class family in Canada. My dream was to be a writer who tells stories that make a difference in the world. Along the way, when I got out of business school, I became the first full-time employee and the first President of a fledgling company with an online auction service called AuctionWeb. That company later became better known by its corporate name, eBay. When the company went public in 1998, all of a sudden I went from being in debt and living in a house with five roommates, to having hundreds of millions of dollars in the value of my eBay shares.

Until then, I had not thought much about philanthropy. But with my newfound paper wealth, I resolved to do good things for the world with that money, in smart ways.

The first thing I did, in 1999, was to start the Skoll Foundation. Today, the Skoll Foundation has become the leading organization in the world supporting social entrepreneurs to drive large-scale impact. Each year, we find innovative social entrepreneurs from around the world ï¿½ people like Paul Farmer of Partners in Health or Ann Cotton of Camfed ï¿½ and we support them over a multi-year period. We also convene the annual Skoll World Forum on Social Entrepreneurship, at Oxford University. I am proud of the work we are doing together with our partners and grantees. In the words of one of my heroes, John Gardner, we are ï¿½betting on good people doing good things.ï¿½

In 2004, I resurrected my original vision of telling stories that make a difference in the world by creating Participant Media. Since then, Participant has released over 25 movies, including Good Night and Good Luck, The Kite Runner, Charlie Wilsonï¿½s War, An Inconvenient Truth, The Cove and Syriana. Our films have won four Academy Awards and received 18 nominations. But I am most proud of the impact that these films have had on social issues ï¿½ human rights, Afghanistan, climate change and so on. We even have a social action network called TakePart that is rapidly becoming the online community for social activists and concerned citizens alike. For me, Participant is another form of philanthropy, as I believe that good stories well told can inspire and compel social change.

In 2009, I started a new foundation, called the Skoll Global Threats Fund, to deal with urgent threats that imperil humanity. The first five issues are climate change, Middle East peace, nuclear weapons, pandemics

and water scarcity. These are all issues that could bring humanity to its knees if we donï¿½t tackle them together now.

I have already donated about half of my net wealth to these organizations in the last eleven years. I expect to contribute almost all of my wealth to the betterment of humanity either during or after my lifetime.

In the meantime, I will continue to tell stories that awaken enlightened self-interest, activate citizen engagement, and galvanize political will. I will continue to double down on innovative solutions that have enduring social impact. And I will continue to support catalytic mechanisms, like the Skoll World Forum and TakePart, that unite the forces of change from all corners and cultures of humanity.

In doing so, I hope also to inspire others to do the same. The world is a vast and complicated place and it needs each of us doing all we can to ensure a brighter tomorrow for future generations. Conrad Hilton said it is the duty of successful people to give back to the society from which their success was derived. I feel privileged to have grown up in Canada and to now live in the US, two countries that value and reward education, hard work and good choices. I feel lucky to have been able to pursue my dreams and I hope that my contributions will in some small way lead to a sustainable world of peace and prosperity.

I am a 53-year-old married investor. My wife and I live in San Francisco, which we love. We have four kids, the oldest of whom is 22 and the youngest of whom is 16, whom we also love. Almost by accident ï¿½ weï¿½ve focused on good investing not making money ï¿½ we currently have more assets than we could reasonably spend in our lifetime. Our original impetus for saving money revolved around wanting our kids to enjoy the same educational opportunities that we had...

I am a 53-year-old married investor. My wife and I live in San Francisco, which we love. We have four kids, the oldest of whom is 22 and the youngest of whom is 16, whom we also love. Almost by accident ï¿½ weï¿½ve focused on good investing not making money ï¿½ we currently have more assets than we could reasonably spend in our lifetime. Our original impetus for saving money revolved around wanting our kids to enjoy the same educational opportunities that we had, so that they could succeed on their own terms, assuming that they worked hard. Thatï¿½s what our much appreciated parents did for us. We never aimed to endow our children with wealth. After honest conversations with each of them, singly and together, we know that they donï¿½t want that either. We also worried about affording excellent healthcare for our family. But otherwise, we enjoy our life here in California and donï¿½t require more material possessions.

We want to leave our kids a different kind of inheritance, an example of at least trying to lead a worthy life. In that regard, John Gardner long ago counseled us to ï¿½doï¿½ things as opposed to trying to ï¿½beï¿½

someone; in his opinion, seeking ï¿½to beï¿½ inevitably leads to egocentric outcomes. Traditionally, societies focused on ancestor-worship, but as Americans, we have mostly descended from penniless, indentured, or fugitive antecedents, so it really makes no sense to us to try to derive importance from our birth, and thank goodness for that.

As luck would have it, we live in a city named for a man famous for actively denying his birthright ï¿½ a birthright not of ambiguity or even scandal but of confirmed privilege. He stripped himself of his worldly goods (including clothes), identified with animals, and kissed the sores of lepers. Because what he did came to define him, St. Francis is our epitome of a ï¿½to doï¿½ kind of guy. While we might struggle to emulate his example in many ways (while keeping our clothes on), we can see that an active life like his ï¿½ he spent it famously consoling, understanding, loving, giving, and pardoning -- promises the greatest satisfaction.

Admittedly, in our case, ï¿½to doï¿½ is inextricably wound together with ï¿½to have.ï¿½ Having assets has enabled us to organize projects which we otherwise could not have and which we hope will leave our community and neighbors ï¿½ both near and far ï¿½ better off, at least in some small part. If we succeed, we will have left a wonderful legacy for our kids, and we canï¿½t dismiss ï¿½havingï¿½ resources as an irrelevant aspect of that. But our pleasure and pride in life come from working with valued partners, not owning things or totaling up our net worth. Therefore, along with Mr. Buffett and after due consideration, we pledge the bulk of our assets to philanthropic activities carried out over the course of our lifetimes.

We will not, however, do so heedlessly. We do not knock other approaches, but we have strong opinions based on lessons learned about how to ï¿½investï¿½ our resources on behalf of the common cause. For one, we harness wherever possible the power of markets to direct investment effectively, even as we recognize their inherent limitations. People of all income categories know what they value and will demonstrate that most convincingly by where they are willing to dedicate their scarce resources. At the same time, we know that markets do not price externalities and shouldnï¿½t be expected to support adequately public goods like education or clean water. There is, after all, an abidingly important place for government, social compact and social conscience. Muhammad Yunus and the Grameen Bank family of social businesses have made a major impression on us, as theyï¿½ve successfully engineered good incentives, rewarded industry and measured success ï¿½ and failure ï¿½to good outcomes for all people.

We will also strive to make our pursuits fun and constructive -- as an older and wiser friend advised us to do. We do plan to give the vast bulk of our money to charitable pursuits, not to our descendents, but we expect every minute of the ride will be exciting and engaging. That doesnï¿½t compare in our minds with the sacrifices that other Americans have made in terms of effort, danger, and life itself on behalf of their country and fellow citizens. But we relish the opportunity to do our

part and leave our collective campsite cleaner and better tended than we found it. Itï¿½s our pleasure at least as much as our obligation. We hope St. Francis approves.
Jim and Virginia Stowers

More than 99% of our wealth will go to philanthropy during our lifetime or at death. We have already started our giving. Our children have already been provided for. More than 99% of our wealth will go to philanthropy during our lifetime or at death. We have already started our giving. Our children have already been provided for.

Virginia and I wanted to give back something more valuable than money to the millions of people who made our success possible with American Century Investments. We wanted to give people "Hope for Life"- Hope for a better life. Our vision is to make a significant contribution to humanity through medical research by expanding our understanding of the secrets of life and by improving life's quality through innovative approaches to the causes, treatment and prevention of diseases.

In 1994 we began by creating the Stowers Institute for Medical Research to pursue a very distinctive approach to basic science. It took six years to plan and develop the world-class campus and its laboratories in Kansas City, Missouri. The doors finally opened in November 2000.

Today, the Institute is already recognized as one of the best basic biological research organizations in the world.

The Institute focuses on outstanding science.

Many of the scientists have been acknowledged both nationally and globally for their individual excellence.

The scientists are not given tenure - rather they are given term appointments that are renewable based on research excellence and productivity.

The Institute's Scientific Advisory Board composed of seven internationally recognized scientists. It is extremely important to note that this independent board must unanimously determine which investigators the Institute can accept and which it can retain.

The research scientists enjoy the benefits of a world-class campus and state-of-the-art Technology Centers, both of which enable them to make discoveries at an unprecedented rate. Our scientists have given all their intellectual property to the Institute so that they can receive 50% of the profits once it is commercialized.

Other features which are extremely important

Our scientific effort is made possible by the proceeds the Institute receives from the Hope for Life Endowment; which is truly the lifeblood of the Institute.

When you make a gift to the Stowers Institute, the experience is radically different from giving to other worthwhile causes. Why is it different?

ï¿½ Your money is not immediately spent. All proceeds are added directly to the "Hope for Life Endowment" of the Institute.

ï¿½ You will become personally involved in the long-term effort, because you are issued "Hope Shares."

Each year at least 3 ï¿½% of that dynamic long-term endowment will be spent for scientific research. The endowment is invested for long-term appreciation and, over time, should earn more than the 3 ï¿½% that is paid out for scientific research each year. This is endowment-based research.

The Institute issues you Hope Shares to indicate your degree of investment in the endowment for uninterrupted scientific research.

The minimum initial Hope Share investment is $1,000.

The Hope Shares are registered in your name, while the value remains with the endowment of the Institute. The value of your shares fluctuates along with the value of the endowment.

As an owner of Hope Shares, you will:

ï¿½ Become personally involved in the long-term effort to provide "Hope for Life" - Hope for a better life for everyone.

ï¿½ Be remembered forever for your gift to research, because your gift keeps on giving each year.

ï¿½ Receive regular Stowers Reports so that you can follow our progress in medical research.

ï¿½ Receive your "Hope Share Statement," informing you:

* The amount you invested during the year.

* Your total investment.

* The present value of your "Hope Shares"

* The amount you are contributing to scientific research this year.

We believe whenever the very best scientists work together as a team, supported by dedicated leaders, advanced technology and uninterrupted funding, great discoveries will happen.
Ted Turner

Giving back was instilled in me by my father at a young age. In addition to being active with Rotary and other civic organizations, my dad was also philanthropic with his own small resources. Not only did he make

contributions to causes that he cared about, he also supported the tuition of two African-American students at his alma mater, Milsaps College in the late 1950s. It made a big impression on me to see someone as hard-charging as my father take the time to quietly help out two young...

Giving back was instilled in me by my father at a young age. In addition to being active with Rotary and other civic organizations, my dad was also philanthropic with his own small resources. Not only did he make contributions to causes that he cared about, he also supported the tuition of two African-American students at his alma mater, Milsaps College in the late 1950s. It made a big impression on me to see someone as hard-charging as my father take the time to quietly help out two young people like this. Sometime during the 1970s, before I made a significant amount of money, I attended a seminar on philanthropy. At dinner I was seated next to a man who was quite a bit older than I and we began discussing charitable foundations. He told me about his familyï¿½s foundation and the good things they were doing around the world. I filed this away in my mind and told myself that if I were ever wealthy enough to have a foundation, Iï¿½d be sure to make it a family foundation so that my children would be involved and understand the importance of giving back.

Fast forward twenty years to September 1997. I was being honored as the 1997 Man of the Year by the United Nations Association and I was contemplating what Iï¿½d say that evening. Good thoughts about my familyï¿½s foundation, the Turner Foundation, starting flooding my mind, and I smiled at the fact that we had already invested several hundred million dollars in grants and had made a significant impact on so many people and organizations around the world. I wish I could remember who that man was who first gave me the idea for a family foundation, because I owe him a debt of gratitude. The Turner Foundation helped me understand the impact we all can have through philanthropic contributions. My experiences with organizations like the Better World Society opened my eyes to the power of assembling a team of international leaders to address global issues. Had I not experienced working with these two organizations, I donï¿½t think I would have had the confidence to move forward with what I was about to propose to the United Nations that evening. That was the night my $1 billion pledge was heard around the world and the United Nations Foundation was born. I also made it clear that while the amount I was giving away was certainly a lot of money, I was also putting other rich people on notice that I would be calling on them to be more generous. Now that I was pledging such a large amount, I could lead by example, and it was time for me to get out in front of the parade.

Over the years, the United Nations Foundation has done innovative work to make the world a better place and has helped strengthen the U.N. in the process. This gives me a lot of satisfaction, as have my efforts to influence other wealthy people to become more active in philanthropy. After the billion dollar pledge, I challenged my fellow billionaires to do more. I realized that many of them used their net worth as a way to

keep score and they enjoyed seeing where they ranked on lists put out by magazines like Fortune and Forbes. Understanding how competitive most of these people were, I called on the media to start publishing lists of people who gave away the most. I figured that this would not only motivate people to try to get to the top of the philanthropy list, it could also shame some whose names didnï¿½t show up. Slate.com was the first to take up the list idea and other media outlets joined in later.

To date, Iï¿½ve visited more than 60 countries in every part of the world. In addition to making a lot of friends, Iï¿½ve also seen firsthand the desperate challenges facing so many people. Itï¿½s been eye-opening for me and Iï¿½ve discovered that the more people you meet, the more you learn, and the more you learn, the more you want to help, and the more you help, the better you feel. These days, Iï¿½m putting my resources and energies toward tackling the worlds more important issues. The three problems that concern me the most are the threat of nuclear annihilation, climate change and the continuing growth of the worldï¿½s population. Sometimes these problems can seem overwhelming, and when they do, I remind myself of a conversation I had many years ago with Jacques Cousteau. I asked him if he ever got discouraged or worried that the problems he was working on were insurmountable. He looked at me and said, ï¿½Ted, it could be that these problems canï¿½t be solved, but what can men of good conscience do but keep trying until the very end?ï¿½ At that moment, his very words inspired me to want to do even more.

I donï¿½t measure success in numbers, but I consider my contributions of more than 1.3 billion dollars to various causes over the years to be one of my proudest accomplishments and the best investment Iï¿½ve ever made. Those dollars have improved lives, saved species, fought disease, educated children, inspired change, challenged ideas and opened minds; and at the time of my death, virtually all of my wealth will have gone to charity.

Looking back, if I had to live my life over, there are things I would do differently, but the one thing I would not change is my charitable giving. Iï¿½m particularly thankful for my fatherï¿½s advice to set goals so high that they canï¿½t possibly be achieved during a lifetime and to give help where help is needed most. That inspiration keeps me energized and eager to keep working hard every day on giving back and making the world a better place for generations to come.
Sanford and Joan Weill

We are delighted to lend our support to Bill and Melinda Gates and Warren Buffettï¿½s novel idea of a ï¿½Giving Pledge.ï¿½ We applaud their leadership and encourage others to join this effort at a very important time in our history given the severe economic impact virtually everyone and every institution has experienced over the last couple of years. Our Pledge is this: We will continue to give away all of the wealth we have been so fortunate to make except for a small percentage...

We are delighted to lend our support to Bill and Melinda Gates and Warren Buffettï¿½s novel idea of a ï¿½Giving Pledge.ï¿½ We applaud their

leadership and encourage others to join this effort at a very important time in our history given the severe economic impact virtually everyone and every institution has experienced over the last couple of years.

Our Pledge is this: We will continue to give away all of the wealth we have been so fortunate to make except for a small percentage allocated to our children and grandchildren between now and the time we pass because we are firm believers that shrouds donï¿½t have pockets. Furthermore, we pledge to continue to work tirelessly each and every day, donating our time, energy, experience, passion and intellect to the causes and organizations we have been involved with for many years because, for us, philanthropy is much more than just writing a check.

Philanthropy has been a large part of our lives over the last three decades and is something we are deeply passionate about and enjoy doing together. In the early days, we used to say that Joan took care of the streets and Sandy took care of culture. In any case, we look at a non-profit the same way we look at a company ï¿½ investing in a nonprofit is like buying stock in that organization.

Education and partnership are at the heart of everything we do philanthropically and we make long term commitments to the organizations we lead: Sandy is currently the Chairman of the National Academy Foundation (since 1980); Carnegie Hall (since 1991); and Weill Cornell Medical College (since 1996), while Joan is Chair of Alvin Ailey Dance Foundation (since 2000); Paul Smithï¿½s College of the Adirondacks (since 2005); and Co-Chair of the New York Presbyterian/Weill Cornell Medical Center Womenï¿½s Health Symposium (since 2000).

Each day we are touched by the incredible work people from the organizations we are associated with, as well as countless others are doing. They are changing the world and helping bridge cultural divides thru education, healthcare and the arts. Among some of our proudest moments in philanthropy to date include: opening up the first American medical school overseas in Qatar in 2001 following the tragic events of 9/11 and at a time when many questioned doing something in the Middle East, as well as aiding in the development of a medical school in Tanzania and an HIV/AIDS clinic in Haiti; seeing Alvin Ailey be recognized as one of the most acclaimed international ambassadors of American culture and having a home which is the nationï¿½s largest facility dedicated to dance; raising $60 million in one evening at Carnegie Hall to establish broad reaching music education programs; and working with nearly 50,000 students in over 500 academies of finance, hospitality and tourism, information technology and engineering each year and seeing 90% of them graduate, often the first in their family to do so.

Our journey together through life over the last 55 years has been nothing short of amazing. We have learned a lot and been blessed beyond our wildest imaginations. From our experiences in philanthropy, we have found the following lessons very useful: Keep it focused, you canï¿½t do everything; the busiest people can always do more; you can run a better

private business if you help run philanthropic enterprises; donï¿½t be afraid to hire people smarter than you; donï¿½t be afraid to make mistakes; and whatever you do, be passionate about it.

In the years we have left, we want to continue to try and do whatever small part we can to leave the world a little better than we found it. That return on investment would be unquantifiable and something we would cherish the most.

Sincerely,

Sanford and Joan Weill

Idiot! Bought and paid for typical American can't see past his wallet.

"In economics, conduct that re-allocates part of the cost of doing
business upon other parties without their consent (such as pollution of
public air and waters) is called an externality. To the extent that
environmental impacts are not reflected in the market price of
electricity, consumers are not paying the full cost of that power (i.e.,
their energy use is being subsidized), and energy markets become
distorted, resulting in inefficient use of resources.

Which is to say, our electricity is only cheap because we are forcing
someone else ï¿½ in large part future generations ï¿½ to pay a lot of the
true price. In terms of global warming, the massive emissions of carbon
dioxide (CO{-2}) from fossil-fuel energy production is widely recognized
by economists as an externality par excellence. Carbon-dioxide pollution
emitted by coal and oil-fired power plants distributes evenly throughout
the global atmosphere, damaging everyoneï¿½s air quality and threatening
our climate ï¿½ the worldï¿½s most precious public good."

You can't steal all the money, then claim a crisis for which the only
cure is to fire everyone. The people see a 14 billion dollar debt and a
17 billion dollar bailout of Wall Street. They see some of the thieves
trying to break up the Unions, and they are pissed.

You almost got away with it; the people always seem to wake up just in time.

Beware the British East India Company!

Nah, they just use the gas tax to build and maintain the Interstates and
local roads your petroleum powered vehicles need to move from point to
point (to say nothing of the expense of enforcing traffic laws, placing
and maintaining road signs and traffic signals). Oh, sorry, I almost
forgot. According to your thinking, that must all come for free.

Well, you would be wrong. The Wisconsin union gave the governor every economic concession he asked for...and the guv turned them down cold.

This CLEARLY proves that the guv's agenda had nothing to do with economics and EVERYTHING to do with busting the unions.

Please note that when guv Walker was the county exec in Milwaukee County, he tried to bust the union there...and ended up costing the taxpayers of Milwaukee County $500,000 for his folly when an independent auditor said he illegally fired them and they had to be re-hired with back pay. Walker has a long and sad history of trying to bust unions.

I find small pocket digital camera a better bet as I am more likely to carry it. I have two cheapies and they are handy for those candid shots that pop up unexpectedly. I might just buy another with higher resolution in the near future. The DSLRs just seem too bulky to carry around unless you're into some serious photography. I used to use my old SLR about 30 or 40 years back when I was travelling OS a lot and didn't mind carrying some gear. Hmm, now that I come to think of it, I wonder where that camera is? I haven't seen it for over 25 years.

My problem with small stuff is that I lose it. I have a very nice Fuji
4.4 MP camera slightly larger than a Minox. Somewhere.

I do serious photography, if you mean using depth of field and other
variations from the "point and shoot" Green setting. I have a 105 mm
lens and a 200 mm lens. I still have a 35mm SLR, but going to the Rite
Aid is a pain. I do have a killer picture of the comet I took on it. How
many you got one of those?

I said before, several times before, I don't tote, and that is the Truth,,, I Don't Tote, besides, I am scared I might drop my ATRIX phone and break it.
att.com/Tutorials

This afternoon, I taking my Motorola ATRIX phone and my Motorola ATRIX back over there to that AT&T retail store and get somebody over there to give me some OJT = On Job Training on how to Bookmark some of my favorite news sites (onlinenewspapers.com kidon.com thepaperboy.com online weather maps and weather sites and science and technology and electronics sites and electronic gadgets sites and rec.radio.com and rec.autos.tech and alt.gossip.celebrities and devilfinder.com and a bunch of other online sites that I like.

I want my Motorola ATRIX stuff to do sort of like I do everyday with WebTV.When I raise up my Motorola ATRIX laptop dock screen, (that turns it on) I want to know exactly what to do to get to those Bookmarked online sites that I want to go to everyday, a bunch of times everyday and night.

Cloud Based Motorola ATRIX, not suppose to get viruses, is that the way it works?

I reckon I am hopeing my Motorola ATRIX will sort of kind of take the place of WebTV, if/when WebTV pulls the plug.

Yeah, I need to learn up on ATRIX stuff.
I don't care anything about facebook, twitter, social networking, those two stupid cameras on there, in fact, I am going to put a little piece of masking tape over those two stupid camera lenses.
cuhulin, the ATRIX

I read somewhere that even a TEN percent tax and no deductions would
cause the upper class to pay three hundred percent more than they're
paying now. There's no chance in hell of the lapdogs in government
passing it.

The guy at the AT&T store said if I get on AT&T U-Verse, I can watch live Ireland and Scotland TV, if I have an HDTV set.I will buy an HDTV set in about a month or two.He said they can set up the installatiion (AT&T U-Verse) for me on March 2nd.Can't do it on that date, doggy has a dental apointment at Animal Medical Center on March 2nd, my little couch buddy doggy comes First!

I will be at that store again this afternoon, I will let them set it up for a later date.There is a wireless ATRIX keyboard and some other ATRIX accessories available too.I am interested in that wireless ATRIX keyboard.Metinks I Likes that.

I am going to find out if I can keep my AT&T land line, so I can also keep on using WebTV.Y'all would be Supprised how handy WebTV is/can be.

If you run a TV network, and the third biggest source of revenue is political advertising, are you going to be inclined to give campaign finance reform a fair hearing on your stations, even if it means losing said revenue? Fiduciary duty says I think not.

>
the Tea Act taxed the tea at source (i.e. in India) so there was no tax collection in the colonies. The act allowed the tea to go directly to America instead of having to be imported to Britain and then re-exported to the colonies. This made the tea 9d per lb cheaper, even with the 3d tax. It also allowed the East India Company to sell the tea exclusively to chosen merchants (consignees) in the American colonies. This established monopolies in America and offended colonial merchants.

In addition the government made a loan of ï¿½1.4 million to the East India Company which was to be allowed to ship tea directly and on its own account to America. The Company would pay the 3d duty on the tea's entry into the colonies but was exempt from reimbursing the English customs for the 1/- English duty which would previously have fallen on it. The consequence was that tea would sell at 10/- per lb in America, not the ï¿½1 which it had fetched recently. This would increase its consumption and so the Company would be helped out of its financial difficulties. Furthermore, the Company aided the government by taking measures against smuggling now that it was delivering direct to America. The tea was consigned in known quantities and to authorized merchants acting as Company agents. However, by that time, the colonists were suspicious of British motives and the Tea Act led directly to the Boston Tea Party.

On the way home from the Animal Medical Center yesterday, (Doggy's teeth cleaning appointment next Wednesday, March 2nd.At least she has teeth, I don't gots no teeth.I went to Animal Medical Center because I have to give doggy an antibiotic pill twice each day for a week before she gets her teeth cleaned) I stopped off at that pawn shop at the intersection of Ellis Ave and Lynch Street.I bought a Roto Zip electric tool thangy.It was priced at $20.00.I said to them, i said, What's y'alls price on this today? He looked in his computer, he says, I can let you have it for $15.00.I paid him $15.00 plus Mississippi RIP OFF sales taxes.Roto Zip is MADE iN AMERICA too.I Likes that!
I got my Roto Zip,,, How about YOU?

Seems that google SUCKS! is the default 'search engine' in my Motorola ATRIX.Yesterday and again today I told them people over thar at the AT&T retail store (it's next door to the Picadilly cafeteria on Highway 18, a couple of blocks South [South is always Best] of doggy's couch) I don't like google.(she said, Why?) I put devilfinder.com and dogpile.com and yahoo.com and searchenginewatch.com and searchenginecolossus.com in with some of my favorites/Bookmarks in my ATRIX.
SCREW google SUCKS!!!!

Yeah, in fact of the business,,,, I own a few Dremel tools too, one of them is a Dremel oscillating tool.I boughts it last year at the Lowe's store when I was fixin up my old house.It is a Great Dremel tool.You ought to gitcha one of those.
http://www.devilfinder.com/find.php?q=Dremel+oscillating+tool

I am tired, I haven't played with my ATRIX since I got back from the AT&T store this after noon.

We gots Winchester '73 on the Western channel.I will play with my ATRIX some more later on, maybe in the morning.
cuhulin, the Winchester '73

1645. 6005 sounds like PRC

This after noon, over there at the Murphy USA gas station in the parking lot area of that Dangerous Walmart, I saw gasoline priced at $3.10.It has probally gone up again now.
Somebody said Walmart ads say Motorola ATRIX will for sale there in March.

Sorry, my point was not understandable enough. I was raising an economic standpoint...

The U.S. is able to use a tool called "economic protectionism", but in Europe, none of this is possible...

In the U.S., the government finances in a direct or indirect way industries, in Europe we decided that it is bad...

In some ways, Europe is far more orthodox (economically speaking) than the U.S. This results in an absence of flexibility (in Europe). Everybody stays in his position and people suffer from the lack of imagination from their political leaders...

Sebastien.

Location: 40ï¿½ 45' 38" N / 111ï¿½ 53' 25" W
A large amount of money in the form of paper currency. Buried 272 feet in the earth encased in a stainless steel container. Money is estimated to be roughly $640 Billion, and belongs to the U.S. government. Secretly stolen by officials on the inside. First hand information has been determined by infared imaging of the area. It has been attempted to send geologists to investigate. None willing to take the risk. The area is surrounded by radio controlled security cameras, and it appears there may be explosives implanted to prevent tampering. Satellite images prove there is uranium deposits beneath location. This is dangerous condition. Please do not attempt to enter this area, and do not transmit radio waves in area, which may set off explosives.

It took long enough. I'm not a flawless grammarian, and I don't pretend to be. I probably over-punctuate for example.

Considering I left high school in a huff at the beginning of my second try to finish my junior year, and have never returned, my prose is quite stunning.

Just about all commodities these days have some kind of "favoritism" and "good ole boy network" pricing built in.

We are in a commodity bubble right now. It is helping foment revolution (Wall Street continues to fuck-up the world) because it is making the cost of consumer necessities skyrocket. "It's OK, just cut back on your eating and your use of fuel".

Do you have any idea how much space 640 billion dollars in paper money
takes up?

Also you have a plural subject with a singular verb.

I find it interesting that the financiers are telling us that -- and
Al Gore and the rest of the putative opposition to the financiers
are telling us essentially the same thing.

With every good wish,

Kevin Alfred Strom.

Do you know why cars in Europe drink less gasoline?

Because the governments forced the car makers to make them less thirsty.

Do you know how?

By raising the price of gasoline adding taxes...

A higher price on gasoline makes cars less thirsty.... At the end you pay
the same price for an equal distance but you better manage oil resources
and reject less shit in the air.

Sebastien.

Sure...he meant to say trillion, not billion, so, in effect, he
'demeaned' the billion. Conversely, that would imply he 'meaned' the
trillion.

mike

Everyone is entitled to their opinion...and mine is go FOR Uverse.

We've had it for a couple of years, works fine, lasts a long time. It
was cheaper than the previous service we had, you can have FOUR TV
programs simultaneously (3 record, one watching, 4 watching, any
combination of 4 you want), can set up record from any TV, can play back
from any TV. If you so desire, you have your voice, DSL and 4 video
channels -simultaneously- on -one- copper pair.

Bottom line: we have been very well pleased with Uverse, technically and
economically. Why do you recommend against it?

Top of the list, overcompression on HD video. Lots of artifacts.
There's only so much you can slam through a copper pair.

Compared to OTA HD, which is the closest to HD you'll get, the
differences are dramatic.

During periods of very heavy usage, where there are peak numbers
of users on a radius, such as during a SuperBowl broadcast in a city
neighborhood, pixelation, stutters, and dropouts are common.

At my late G/F's place in Oak Park, during the American Idol
finals, she went back to an antenna because U-Verse was not able to
provide a reliable picture.

Internet uploads are capped on U-Verse at 384k. Have you ever
tried to upload 8GB of pictures at 384K?

There are better options to U-Verse. Not in all locations, of
course, but in populated areas, for the same money, you can get much
more performance with fewer headaches.

Looka here, I am a Dummy, and a Dumb Dummy at that.

AT&T U-Verse crap.I haven't signed any paper(s) on that.AT&T to install that crap for me on Monday, March 7, 2011.

My paper the guy at that AT&T retail store (about two blocks South of doggy's couch) handed me yesterday afternoon when I was over thar.It says,
AT&T U-Verse TV $84/Month.
AT&T U-Verse Internet $47.00/Month.
AT&T U-Verse Voice Voice Unlimited $39.95 Month.

What the Hell!, I don't need that sheet.I can't really afford it anyway, I am po.
What is AT&T Voice Unlimited? I rarely ever use my AT&T land line phone.

But, (like I was telling doggy just now) I wonder how AT&T TV compares to my DirecTV? I am paying for, abouts $82.00 every month.

I think doggy would tell me, WOOF WOOF! , you better git your arse back over thar to that AT&T store and CANCEL that sheet, before you screw up Big Time!

Metinks doggy is 100 percent Exactly Right.

Greetings:

WWRB shortwave is testing 2.390 mhz every night starting at 7:00 PM Eastern time running till 12:00 AM Eastern time

We are asking for reception reports If you would be kind and provide us help in this matter.

Please via our web site: www.wwrb.org send your report also, we have a photo gallery with many pictures of WWRB and our facilities.

Please check out our aviation video at : www.wa4sze.com

You can hear our Beacon / Radio Range on 10.126 mhz or 28.210 mhz You will hear the Morse code letter A or N or the solid tone depending on where you are.

Please send a reception report for the Beacon. vvia the WWRB web site

Let us know how you liked the aviation video: We are going to add another video soon on Radio Range Instrument approaches,

Thank you!!

WWRB shortwave

A non-issue to us as we don't subscribe to HD service. Many, many
programs are NOT (yet) in HD and with a lot of the "historical"
documentaries using ancient film, never will be...and who needs "Pawn
Stars" or "Myth Busters" in HD anyway?

> There's only so much you can slam through a copper pair.

Absolutely true...and it is true magic how hard they are making that
poor little pair work!

> Compared to OTA HD, which is the closest to HD you'll get, the differences are dramatic.

Probably true, but I'm not sure how fair it is to compare the 5 or 10
OTA stations you may get versus up to 400 channels on Uverse.

> During periods of very heavy usage, where there are peak numbers of
> users on a radius, such as during a SuperBowl broadcast in a city
> neighborhood, pixelation, stutters, and dropouts are common.

Very, very rarely occurs here (or at my cousin's place 35 miles away). I
might question the design of the system in your locality.

> At my late G/F's place in Oak Park, during the American Idol finals,
> she went back to an antenna because U-Verse was not able to provide a

> reliable picture.

Again, I would question your local design and the condition of your local loop. A lot of that old Chicago outside plant is pretty tired, may not have been properly de-loaded, may not have had all of the bridge tap removed. If you have poor service, complain, report it to Repair.

> Internet uploads are capped on U-Verse at 384k. Have you ever tried
> to upload 8GB of pictures at 384K?

That's why the complete name is ADSL (shortened to DSL). The "A" stands for "asymmetrical" upload/download speeds. And no, I've never had to upload 8 GB of pictures -- nor do I suspect most "average" users have either. If you have special needs, Uverse may not be for you...although many DSL services are indeed ADSL too, giving you the same problem.

> There are better options to U-Verse. Not in all locations, of course,
> but in populated areas, for the same money, you can get much more

Possibly true, but for our usage, in our area, great quality of service and for the economic advantage, we are happy campers. Your Mileage May Vary...

The problem is that the artifacts often appear on non HD
programming, as well.

From my location, I've got 46 (on a good day), 38 HD channels
OTA, with their multiple digital subchannels.

Actually, DSL is short for DSL. ADSL is still ADSL. There is
SDSL, as well. And IDSL. But that's no longer being installed.

The "A"
> stands for "asymmetrical" upload/download speeds. And no, I've never
> had to upload 8 GB of pictures -- nor do I suspect most "average"

> same problem.

Not really. Of all the options I've investigated, in areas where
I have visited...except the cabin in Wisconsin...U-Verse is the
slowest by far for the money. For the same money, 1MB up and 3MB
down from Comcast. On a private radius.

For work, I need at least 3 MB up in order to upload a project to
meet deadlines. I've got business class service for that reason,
which replaced my T-1 last year.

U-Verse only offered 384k up on a common node.

some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries

they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.

OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes

and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.

Way too much money. I get Time-Warner Clear QAM broadcast basic for $20 a month. My DSL is $35 a month (fees included) for "Elite" (5 Mbps). Netflix is $12 a month. The phone is around $16 a month (measured service). This is $17 a month less than the U-verse introductory deal. I am only one, maybe 2 people. I got no need for 4 DVRs (or even one). TV is for morons.

You just love to bash backwater hick WLBT 3, do you not? But, you once said there is no such thing as WLBT 3.

Sometimes I will click on some of those shopping channels on tee vee for a little while.Those super duper big screen HDTVs with the latest technology.(buy on flex pay)
I can't look at that super duper s!it too long, it hurts my eyes.

WLBT 3 channel 3 TV station is just as modern as any TV Station you will find anywhere in the World.So is WJTV 12 and WAPT 16.

Is this suppose to be near Salt Lake City ? $640B is not a realistic
figure .The TOTAL denomination of physical USD money in circulation
is around $875B .

Their antenna is almost 2000 feet tall ! That must give really good
coverage, especially with a DTV set . Transmission is on UHF 30, as
per Wiki .

1733. Latest Liberty Net via WB4AIO

Newsgroup: rec.radio.shortwave
Date: 2011-02-25 13:13:56 UTC
From: Kevin Alfred Strom <kevin.strom@revilo-oliver.com>
Message-ID: <201102251313.UTC.ik89uk$cl7$1@tioat.net>
Source record: 220686

Liberty Net: February 19, 2011

http://3950.net/2011/02/liberty-net-february-19-2011/

by Kevin Strom, WB4AIO

GOOD PROPAGATION REUNITED with 75 meters like two long-separated lovers this week (letï¿½s hear it for sunspots!), and signals were loud and clear for the Liberty Net. Only the regrettable DRM interference from the BBC necessitated a frequency change during the netï¿½s entire five-hour-plus run.

Hereï¿½s my summary of a small sample of the ideas put forth this time on amateur radioï¿½s historic Liberty Net:

ï¿½ It may be due to less than idealistic reasons (like partisan squabbling and the budget crunch), but one hopeful sign these days is that funding for Obamaï¿½s unconstitutional ï¿½czarsï¿½ has been cut off. (2 minutes)

ï¿½ Why did the unions and the government both agree to public employee pension plans that were absolutely unsustainable during periods of low interest rates? Were they sold a bill of goods by crooked bankers? (34 minutes)

ï¿½ To what extent are the revolts in the Middle East real, and to what extent are they being stage-managed by George Soros (he of the phony ï¿½color revolutionsï¿½) and the other oligarchs who held the strings of Mubarak and his ilk? (56 minutes)

ï¿½ Be very, very skeptical when a politician says he only wants to tax ï¿½the rich.ï¿½ When the inflation really starts roaring, expect poor people and McDonaldï¿½s workers to be making well over $200,000 nominal dollars and suddenly finding themselves in the upper tax brackets even though each dollar will only be worth a few cents in current terms. (1 hour 1 minute)

ï¿½ One should also be skeptical of the ï¿½budget cuttingï¿½ of the Republicans, who treat the military budget as if it was holy and never consider cutting it, even though it is the most grossly bloated budget on planet Earth, and is used mostly for dishonorable illegal wars and not for the defense of the American people. (1 hour 2 minutes)

ï¿½ With a Washington budget of $3,700 billion, why are both phony political parties getting all excited by a mere $60 billion in spending cuts? Thatï¿½s less than a sixtieth of the total. (1 hour 23

minutes)

ï¿½ In Washington, DC, a Black commissioner is urging that a proposed new Walmart store not be built ï¿½ because, she says, it will result in young Blacks getting criminal records because they would be unable to resist the temptation to steal from the new store. (1 hour 52 minutes)

ï¿½ When young people with a conscience enter the US armed services and are sent to kill and maim and bomb and murder innocent people in the Middle East, it often destroys them psychologically as well as physically. (3 hours 44 minutes)

If youï¿½re an amateur radio operator, please check in to the Liberty Net at 10PM Eastern Time every Saturday. (If youï¿½re not an amateur, itï¿½s easier than ever to get your license.) Thanks to N2SAG and N2IRJ and W1WCR, you can listen live ï¿½ and chat live ï¿½ via the Web whenever the Liberty Net is on the air. You can also download the Liberty Net right here at http://3950.net and listen on your PC or personal mp3 player.

"Earth" on the Discovery Channel did it for me. The problem with not
getting HDTV is that a lot of channels are HD channels squeezed into
analog. If you want the real pictures you have to have HD to see
everything. Get at least a 24" for the bedroom, 40" minimum for the parlor.

Message-ID: <5efccbf5-2116-49da-aad7-b0f2cb9d27ee@z27g2000prz.googlegroups.com>
Source record: 220702

I was watching the NBC Nightly News with Brian Williams last night. NBC has a correspondent who is being driven around in northern Libya. As the correspondent listened to Qaddafi's broadcast rant, a camera shot aimed at the in-dash car radio revealed the digital display showing 972. I suppose that's 97.2 MHz, unless it's a MW station at 972 kHz. That's a Qaddafi-controlled radio station.

Meanwhile, the anti-Qaddafi protesters have established Radio Free Libya. There seems to be a MW operation and, I'm thinking, an FM operation too. Is there anything on HF? I haven't checked Glenn Hauser or the "Media Network blog from Radio Netherlands Worldwide," but I'm sure he is listening for just such a thing.

http://www.radiosurvivor.com/2011/02/21/reports-and-tweets-say-libyan-protestors-are-taking-over-radio-stations/

"The Media Network blog from Radio Netherlands Worldwide today posted a roundup of reports about radio inside Libya. Blogger Andy Sennitt relays reception reports from Denmark of a high-powered mediumwave station (called AM in the US) in El Beida that apparently is taken over by protestors, while other Libyan mediumwave stations continue to air pro-Qaddafi material. The same Danish DXer reports receiving this station, identified as Radio Free Libya, broadasting at 1125 KHz."

Soon, we may have only recordings of Qaddafi to remember him by.

I don't see how asking people to get their licenses and check into a
discussion net that's been on the air for four decades is
"broadcasting." Plenty of other nets (and repeaters, for that
matter), dozens or maybe even hundreds, have ways to listen in on
the Internet, too. Have you ever asked people to listen in to PSK
transmissions? Does that make PSK "broadcasting"?

You ought to check in, Dave. Many people of widely varying
philosophical persuasions do so, and are welcomed. Put up a good 75
meter antenna!

With every good wish,

Kevin, WB4AIO.

This may help change your mind about small radios. It can be plugged
into external speakers for improved sound.

http://tinyurl.com/4maqcrv

It's been seen on sale for under 70 dollars.

I haven't had a TV for years. The radio and the Internet are more than
sufficient. When visiting people, I may bring a DVD and watch a movie.
Movies I like, TV sucks.

A used Eton E1 is about twice that on Ebay. Very nice audio,
particularly with headphones or external speakers. It's a large
portable; but no remote capability. Its front end performance and
features (including phasing-type selectable-sideband sync detector)
put it in a class with far more expensive desktop receivers.

I have one and like it.

With all good wishes,

Kevin, WB4AIO.

I don't speak for Dave, so I can't answer that. But I didn't quote Jefferson. I merely stated that he, at the time, said that piracy must be ended NOW.

That was more than two centuries ago. Suggesting that he wasn't anymore effective at stopping piracy than anyone of our own time making the same demand.

There, there...go spend more money on stuff you don't need and you'll
feel a lot better. Doesn't doggie need a diamond collar? What about you?
A 90 inch TV would feel pretty good about now, wouldn't it? You could
watch Lassie together and then, when you and doggie need a good cry, Old
Yeller would be perfect.

75 meter telephone is part of what kept me away from amateur radio. Too depressing and apocalyptic insane. I can get that from George Noory.

To entice non-amateurs with promises of entertainment and insight steps over a line.

Kaito makes one everybody likes (or they did). I'm still using my RFB45
I got on the junk pile at WalMart 13 years ago.

Kevin, I am getting tempted to grab one and try it side-by-side with
my R75. How well does the S-Am hold lock on weak sgnals?

It holds very well, in my experience, right down into the noise if
tuned within a few hundred Hertz of the center of the passband. If
there are several AM amateurs in a group, though, they need to be
with a kHz or so of each other, or the lock-in will not be
instantaneous and heterodynes will be heard when one station turns
it over to another.

73,

Kevin, WB4AIO.

> Kevin, I am getting tempted to grab one and try it side-by-side with
> my R75. How well does the S-Am hold lock on weak sgnals?

BpnJ,

The Eton E1 {IMHO} is better than the Grundig Satellit
800-M and as good a basic Radio as the Icom IC-R75.

The AM-SYNC Function on the E1 is better in all respects
then both of the other two.

The E1 has more bells and whistles then the GS800-M
but fewer than the R75.

Plus the E1 is less of a Battery Hog than the GS800-M
E1 : ~56 Hours about a Week @ 8 Hours per Day
GS800-M : ~12 Hours about a 3-Days @ 4 Hours per Day

NOTE : The E1 uses Four (4) "D" Cell Batteries {6 Volts}
which is easily doable with a set of 4 NiMH Batteries and
a 4-Station Battery Charger. Fully Charge the Batteries
for 24-Hours and they will last a whole Week.
-while- The GS800-M takes 6 "D" Batteries {9 Volts} so
your best solution there is a 12V SLA Battery and a 9V
Regulator for an 'alternative' Battery Power Source.

You have your countries and leaders mixed up. Libya never had hostages.
That would be Iran, and the Ayatollah Khomeni (sp?) (actually, even HE
didn't have the hostages... that was a bunch of college kids....)

I hereby declare you to not only be the latest recipient of The Golden Come-Along Award, but, also, The World's Asshole.

The World's Asshole Award if given for a lifetime, not just on an annual basis.

So, congratulations go out to David Rickmers, recipient of The World's Asshole Award.

Quite an achievement.

yeah I thought abt doing the external speakers but
would really like to keep clutter down.... but I wont
discount the idea

so do yo own unit in that link? if so how is the
volume with internal speaker and how do you like unit
overall?

Something I find confusing - There seems to be the G6 and the G6 Buzz Aldrin Edition. Just looking on amazon.com, the G6 without Buzz Aldrin says it includes longwave 150-500 Khz and SSB. The $70. Buzz Aldrin does not say that, only lists BC, SW, FM and aviation, but there is a Buzz Aldrin with a battery charger that says it does include LW and SSB. So are there two different G6 radios, or is the only difference the name on the case?

I see direct-conversion single-band ham receiver kits from
ramseyelectronics.com for $40: 20m, 30m, or 40m (HR20C et al)
At that price I thought I'd give it a try. I already have an SWL
portable all-band receiver that I got years ago. I can use its digital
tuning to calibrate the kit. Has anyone tried one of these kits?

So, if you were looking for a single-band receiver, which band would you
choose for the next 5 years? I guess this is really a sunspot question.

Some of them were NOT college kids . While in school,in '79 or '80 I
actually observed them over here (CCNY) , agitating and disturbing
everyone . . . Nope, definetily not kids , but troublemakers ,that's
for sure .

The smaller screen will have a better picture . REAL 1080P HDTV is
still a dream . For giggles, just look at Foxy Network-- 720P is the
maximum they broadcast . Even PBS (!) is much more advanced,
despite all the cuts in funding .

Did you actually hear their broadcasts on the radio ? That land is
getting bombed constantly , all because of oil, what else is new .
Nice music,definitily not arab style and an interesting dialect of
Sudanese AA + something else .

Universal Radio lists the G6 Aviator as discontinued .The G6 Buzz
Aldrin Edition seems to be same radio +logo+gift box+certificate . $90
for new Buzz Aldrin, $60 for reconditioned . Shipping not FREE ,
unlike Amazon.com .

1845. Propagation Forecast Bulletin 8 ARLP008

Newsgroup: rec.radio.shortwave
Date: 2011-02-26 13:23:20 UTC
From: dave <dave@dave.dave>
Message-ID: <4d68fe96$0$5641$bd467cd0@news.dslextreme.com>
Source record: 220798

SB PROP @ ARL $ARLP008
ARLP008 Propagation de K7RA

ZCZC AP08
QST de W1AW
Propagation Forecast Bulletin 8 ARLP008
From Tad Cook, K7RA
Seattle, WA February 25, 2011
To all radio amateurs

SB PROP ARL ARLP008
ARLP008 Propagation de K7RA

The average solar flux was nearly unchanged this week, up just 0.3 point to 103.8, while the average daily sunspot number was down 4.9 points to 65. Sunspot groups 1161 and 1162 -- which brought so much activity last week -- have now rotated across our Sun's western horizon, but new sunspot group 1163 has now emerged over the eastern limb. For Thursday, February 24, we saw a sunspot number of 23. The solar flux was 88.9, planetary A index was 3 and the mid-latitude A index was 0.

The outlook from NOAA/USAF shows 90, 88 and 88 for February 25-27, then 86 on February 28 through March 4, 95 on March 5, 100 on March 6-8, 105 on March 9 and rising to 110 on March 10-15. The predicted planetary A index for February 25-March 2 is 7, 8, 8, 15, 12 and 8, then 5 on March 3-6, and 7, 8, 8, 7 and 5 on March 7-11. Geophysical Institute Prague expects quiet to unsettled conditions for February 25-26 and quiet conditions on February 27 through March 3.

The predicted geomagnetic storm just prior to last weekend's DX contest did not persist, lasting only half a day through February 18. It was triggered by a flare on February 15. Bob Marston, K6TR, sent a link to a high definition video of the flare, as seen through the Solar Dynamics Observatory. It can be viewed on YouTube at, http://www.youtube.com/watch?v=IJViaJ_kgZ0.

Note that you can select resolution of the image by clicking on the 360p on the lower right and can run it as high as 720p. It takes some time to load, varying dependent on your Internet connection speed. Best to just let it load, then run it again to actually watch it.

Dean Straw, N6BV, observed last Friday that the "latest solar wind sequences show that the Bz field was strongly north-directed (rather than south-directed) from 05 to 10 UTC Feb 18, so we probably dodged

the big bullet for this ARRL DX CW weekend." He is referring to an element of the IMF, or interplanetary magnetic field. When Bz points south, our planet is vulnerable to flares and resulting solar wind, but when Bz points north, we tend to be protected.

Carl Luetzelschwab, K9LA, has an interesting and informative column on 10 meter sporadic-E propagation in the current issue of WorldRadio Online. Carl mentions downloading N6BV's presentation on sporadic-E titled, "HF Propagation and Sporadic-E, A Case Study: WRTC 2010."

Bill Collins, KB1MSJ, of Boylston, Massachusetts, is excited about openings on 10 meters. He wrote: "On Friday, February 18, there was a 10 meter band opening here on the East Coast. I was able to talk to Aruba, Brazil and El Salvador, all with only 25 W of power on a homebrew 10 meter antenna. I have been waiting for this to happen for years, as I only have my Tech license (working on General) and have an old 10 meter radio".

Elwood Downey, WB0OEW, of Tucson, Arizona, wrote: "Just wanted to mention you seem to have missed the highest actual 10.7 cm flux reported from Penticton for all of last week. On February 13 at 1800, it was 125.7. The value you report for February 13 -- 106.8 -- was reported two hours later at 2000. Normally I wouldn't bother to mention it, but this was higher than any value you reported for the entire week and is something for the record books."

Yes, I saw that, but only the local noon number is the "official" number for the day. Elwood is talking about the numbers as they are reported directly from Penticton. Note that there are three readings per day, and the local noon number is at 2000. NOAA rounds off the solar flux noon reading to the nearest whole number, and reports it at, http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt. I do like to look at the morning and afternoon numbers though to try to spot trends.

Sometimes NOAA will report a lower value for the day than the noon reading at Penticton. This is if the receiver at Penticton was overloaded, and the value is regarded as anomalous. But I don't have any way of knowing when that receiver is overloaded. My only clue is when NOAA reports a lower value.

In Propagation Forecast Bulletin ARLP006 we mentioned Joan Feynman and erroneously reported that she is physicist Richard Feynman's daughter, when in fact she is his sister. Thanks to Walt Knodle, W7VS, Michael A. Gottlieb and Gregory Andracke, W2BEE, for the correction. Greg is a filmmaker and mentioned that he met Richard Feynman while working on a documentary with Bill Moyers on the 45 year anniversary of the atomic bomb. Michael A. Gottlieb (who is not a ham) runs a website devoted to The Feynman Lectures on Physics. He also published the book Feynman's Tips on Physics: A Problem-Solving Supplement to the Feynman Lectures on Physics. He works in the

Caltech Physics Department and is editor of two editions of the Feynman Lectures on Physics.

Another correction, this time from last week's bulletin, we mistyped Bob Marston's call sign (K6TR) as K6TW. We got a nice note about this from Tim Goodrich of Torrance, California, the proud owner of new vanity call K6TW, which he has held for just one month.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://mysite.ncnetwork.net/k9la/index.html.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 17-23 were 51, 101, 79, 103, 60, 34 and 27, with a mean of 65. The 10.7 cm flux was 110.9, 124.8, 109.4, 104.6, 96.7, 90.9 and 89.3, with a mean of 103.8. The estimated planetary A indices were 2, 17, 5, 7, 7, 1 and 4, with a mean of 6.1. The estimated mid-latitude A indices were 5, 15, 3, 6, 7, 1 and 1, with a mean of 5.4.

I can see the Mexican part, but chasing the Barbary pirates down and occupying their host country was an act of international political theater guaranteed to get us noticed. I believe the British subsequently set fire to New York and to the White House, also political theater.

720P is superior to 1080i for fast action (fewer artifacts). You only
get 1080p very rarely in the real world. Not worth a big premium.

When Larry gets his HDTV he can see the real channel vs the mapped
channel if he digs into his menus.

Technically, according to the FCC database, they are licensed for 9 with
a construction permit for 30. You can commence operation following
informal request for program test authority. This all may have been
done, the FCC database has trouble keeping up sometimes.

The main point being the station hasn't really been on channel 3 for years.

Note the permanent facility is top mounted.

Source record: 220810

and made the biggest loop I could build. It goes from the far corners of the back yard to the left front corner of the house to a support on the right side of the house, a kind of truncated rectangle I guess, 15 feet or so above my desert oasis. I terminated it with an MFJ-913 4:1 BalUn.

The antenna works great for SWL (can't steer it unfortunately for ham radio) and MWDX. It is very quiet re: noise from the neighbors. It also fades less. I can get every powerhouse in the West (except POS KFI) at night, perfectly. No dimmers buzzing. No plasma TVs. No RV Battery chargers.

I don't know how long it is, but I really lucked out. It resonates at 3599 KHz, and is below 4:1 everywhere. There is another resonance at around 15 MHz.

So it appears to be an 80 meter full wave horizontal loop. It involved the roof, so I had to go slow. It took about 2 hours to erect.

Thanks for the description of your new antenna...but you have piqued my curiosity.

I'm glad it works for you, but pardon me, I'm always suspicious of antenna claims that say it is great for radio signals but does not pick up noise.

Hey, we are talking about a piece of #14 wire. RF is RF, noise or the wanted station. I would be curious to see how that plain piece of wire is smart enough to differentiate between wanted RF (stations) and unwanted RF (noise).

My theory is as follows...

You said "I can get every *powerhouse* in the West..."

Is it possible that the antenna is not so great? The noise is weaker than the wanted (strong) signal. In other words, because the antenna is only fair to poor, the weaker noise is not heard, but your "powerhouse" stations are strong enough to be heard.

To give an extreme example, a ham friend less than a mile away and I had a QSO using dummy loads! Needless to say, there was NO noise, but the signal was enough of a "powerhouse" that we could carry on communications.

Any thoughts????

P.S. Not starting a flame war against your antenna. I'm just curious.

Roland Latour wrote:
> So, if you were looking for a single-band receiver, which band would you
> choose for the next 5 years? I guess this is really a sunspot question.

Since the late 1960's, I have had good luck with 6.0mHz, 7.0mHz (now depricated down to 7.2-7.3), and 11.7mhz. 15mHz and 17 mHz work better in the summer and 4.0mHz in the winter. Depending upon how noisy your location is, 4.0mHz will be lost in the noise.

If I had to choose only one band among them all, I would go with 5.9 to 6.2 mHz. Two add 11.5-12.0, Three would add 17 mHz.

Geoff.

I imagine common mode rejection works in the near field (within 50 or 60 feet or so). This would mean all of my house, and most of my either side neighbors' houses.

I'm listening to XX 1090 Sports, from Rosarito Beach, BC, 100 miles away, and they are the loudest cleanest signal on the AM band.

Well, just e-corresponded with Sylvia, the very kind and helpful lady at the other end at PMA The Cross Radio on FSM. She has not yet received an envelope with recording and report I sent on 14 February :-(Thought airmail would be a little quicker than that. It was a good one too - Station ID and details nice and clear. Oh, well - maybe I'll just have to try again.

Well, just e-corresponded with Sylvia, the very kind and helpful lady
at the other end at PMA The Cross Radio on FSM. She has not yet
received an envelope with recording and report I sent on 14 February :-
(Thought airmail would be a little quicker than that. It was a good
one too - Station ID and details nice and clear. Oh, well - maybe
I'll just have to try again.

34th corollary to Murphy's Law (post office section):

The likelihood that any piece of mail will be lost is logarithmically
proportional to its importance.

I sent a cassette tape in a standard plastic case in an envelope with
a report and a couple other things, which I had OKed ahead of time.
She can also accept MP3s, as per the website. Had the PO weigh and
apply the postage, so I know that's not the trouble. I am sure I had
the address right - it's pretty simple to begin with, and I always
double check.

It's a roundabout thing for me to convert a radio signal to an MP3,
but for ease of mailing or e-mailing, I might just do it from now on.

LOL! The unsettling thing is, I just sent out a bunch of these in
similar format - and this one should have been the easiest one to
deliver (Pohnpei, Micronesia still has a US postal zipcode, for crying
out loud).

I know a guy who got turned into a Scotsman by the stuff. He got to the point where he couldn't stand the thought of wasting even a milligram of the stuff. As a result, he'd save the roaches for a few months and then roll new, second generation joints out of them. Those roaches, in turn went into another jar, waiting their turn to become third generation joints.

If memory serves, he got up to about fifth or sixth generation tokes before he got caught. He learned bee keeping while in jail, so it wasn't a complete waste of time. Well, maybe it was. It's hard to raise colonies of bees anywhere near the Downtown core.

Message: 1 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 07:17:37 -0600 (CST) Subject: Discovery Set to Approach and Dock with Station Today

Sat, 26 Feb 2011 06:23:15 -0600

The crew of space shuttle Discovery awoke at 6:53 a.m. EST to the song ï¿½Woodyï¿½s Roundupï¿½ written by Randy Newman and performed by Riders in the Sky, played for Alvin Drew. Today is docking day in space. The terminal initiation burn at 11:33 a.m. will put the shuttle on the final course to link up with the International Space Station at 2:16 p.m. Commander Steve Lindsey and pilot Eric Boe will fly Discovery on its approach for docking to the station. After a series of jet firings to fine-tune the shuttleï¿½s path to the complex, Discovery will arrive at a point about 600 feet directly below the station about an hour before docking. At that time, Lindsey will execute the rendezvous pitch maneuver, a one-degree-per-second rotational ï¿½backflipï¿½ to enable station crew members to snap hundreds of detailed photos of the shuttleï¿½s heat shield and other areas of potential interest, another data point for imagery analysts to pore over in determining the health of the shuttleï¿½s thermal protection system. Once the rotation is completed, Lindsey will fly Discovery in front of the station before slowly docking. About two hours later, at 4:18 p.m., hatches will be opened between the two spacecraft and a combined crew of 12 will begin their work.

Message: 2 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 13:17:32 -0600 (CST) Subject: Discovery Begins Rendezvous Pitch Maneuver

Sat, 26 Feb 2011 12:18:39 -0600

At 1:15 p.m. EST, space shuttle Discovery began the nine-minute Rendezvous Pitch Maneuver, or "backflip." With Commander Steve Lindsey at the helm, Discovery is rotating 360 degrees backward to enable space station astronauts to take high resolution pictures of the shuttle's heat shield. Lindsey then will fly the shuttle through a quarter circle to a position about 310 feet directly in front of the station, allowing the station to catch up with it for docking at 2:16 p.m.On mission STS-114, Discovery was the first shuttle to perform this "backflip" maneuver, one of the safety procedures instituted following the Columbia accident.

Message: 3 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 14:17:34 -0600 (CST) Subject: Shuttle and Station Hard Mate Accomplished

Sat, 26 Feb 2011 14:09:34 -0600

A hard mate between space shuttle Discovery and the International Space Station was delayed until 3:04 p.m. EST while the relative motions between the two spacecraft dampened out. The station mass, now approximately 1.2 million pounds, with spacecraft, laboratories and robotic components from all the international partners attached at the same time, contributed to an alignment issue between the shuttle and station docking rings. The hard mate between Discovery and station could not be accomplished until the motion stopped and Discoveryï¿½s docking ring could be retracted.

Message: 4 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 16:17:37 -0600 (CST) Subject: Hatches Between Station and Discovery Opened

Sat, 26 Feb 2011 15:24:35 -0600

The shuttle and station crews opened the hatches between space shuttle Discovery and the International Space Station at 4:16 p.m. EST. After the ceremony and a safety briefing, the crews will begin transferring cargo from Discovery to the station.

Message: 5 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 16:17:38 -0600 (CST) Subject: Hatches Between Station and Discovery Opened

Sat, 26 Feb 2011 15:28:57 -0600

At 4:16 p.m. EST, hatches were opened between the International Space Station and space shuttle Discovery, beginning the joint phase of the STS-133 mission.NASA Television will air a Mission Status Briefing with STS-133 Shuttle Flight Director Bryan Lunney at 4:30 p.m., or immediately following the standard welcome ceremony between the crews.Later today, Alvin Drew, Eric Boe, Mike Barratt and Nicole Stott will use the shuttle and station robotic arms to remove the Express Logistics Carrier 4 from the shuttle payload bay and attach it to the right hand side of the stationï¿½s truss, or backbone.

Message: 6 From: NASA News Services <nasa_subscriptions@service.govdelivery.com> Date: Sat, 26 Feb 2011 18:17:30 -0600 (CST) Subject: Shuttle and Station Crews Go to Work

Sat, 26 Feb 2011 17:24:41 -0600

Space shuttle Discovery docked to the International Space Station at 2:14 p.m. EST Saturday with its cargo of a new station module, equipment and supplies for the orbiting laboratory.After a delay to

let the relative motion between the two spacecraft, with a combined mass of 1.2 million pounds, dampen out, hatches separating crews were opened at 4:16 p.m. Shuttle astronauts, Commander Steve Lindsey, Pilot Eric Boe and Mission Specialists Alvin Drew, Steve Bowen, Michael Barratt and Nicole Stott moved into the station.Following handshakes, hugs and a welcoming ceremony by the station crew, Expedition 26 Commander Scott Kelly and Flight Engineers Oleg Skripochka, Alexander Kaleri, Dmitry Kondratyev, Paolo Nespoli and Catherine Coleman, Discovery astronauts received the standard station safety briefing.The crews promptly went to work, with Barratt and Stott preparing to use the stationï¿½s robotic arm to pluck Express Logistic Carrier 4 from the shuttle cargo bay and hand it off to the shuttleï¿½s arm, operated by Drew and Boe. After moving the base of Canadarm2, the shuttle arm was to hand ELC4 back for installation on the Earth-facing side of the stationï¿½s starboard truss. There it will be used for stowage of spare parts, including a spare radiator launched aboard Discovery.

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?

100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again.
Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also increases the chance of static discharge to the circuit chips. Ground

is a potential too.

You're talking to someone who has built a couple dozen commercial TV stations and who has been auditioning hi-def for broadcast for over 15 years. ABC and Fox both chose 720p because it is superior for sports to 1080i. 1080p was never considered for broadcast because the MPEG2 data stream is too big to fit in a 6 MHz channel. DiSH Network broadcasts a few 1080P channels, with H264 type coding.

At normal viewing distance, the only way to tell the difference is by knowing tell-tale artifacts ahead of time. To dwell on such matters is a waste of time. There are entire websites devoted to the argument, this amn't one of them.

Those two guys at ShopNBC tee vee channel are talking about Mitsubishi DLP 73'' (there is a 65'' model available too, $2,149) with Stand Diamond Series 1080p HDTV Two 3D Glasses 3D Blu-Ray Player.$2,749 S&H Included.
800 474 6762

They said that Blu-Ray Player will turn non 3D movies into 3D movies.You can surf the internet and do your emailing, all kinds of stuff, you can even use your smart phone and do stuff on that fancy new fangled tee vee set.That's wayyyyyyyyy too fancy and too new fangled for me.I never would figure out how to work it.

Dave is right though.Usually you can't hardly tell the difference between 740 and 1080, most HDTV sets anyway.

- I own one and use it to backup my transceiver.

For an Every Day SWL "Program Listening" Radio
the Grundig Satellit 800-M Receiver is one of the
best Shortwave Radios make in the Modern era
http://www.universal-radio.com/catalog/portable/0800.html
* Picks-Up just about everything a SWL Radio
Program Listeners wants to hear.
http://www.universal-radio.com/catalog/portable/0800frt.html
* Works well with the built-in Whip Antenna
* * Whip Antenna is Mega-Sized and Pre-Amplified
* Handles an External SWL Antenna very well
* Sounds Great for SWL Radio Program Listening
+ FM Radios is very good with Line-outs for Stereo
+ AM/MW Radio with an added small Loop Antenna
on-top of the Radio Works well
http://www.universal-radio.com/catalog/portable/0800rear.html

Someone smelled the pot smoke coming out of the basement window where
the guy lived and turned him in. You have to love law abiding citizens,
who all know that burning leaves will cause the decline of Western
Civilization.

These same people think a 60 year old pervert 'Mormon' screwing 12 year
old children is a man of God.

Prez-A-Duntz Obama is NO Muslim :
Prez-A-Duntz Obama is a Good God Fearing Christian
Man : Professing The Name of Jesus To The World With
Each and Every American Dollar of Foreign Aid Reading
"In God We Trust" - Amen ~ RHF
{It's The Almighty Dollar Cause We Put God's Name On It !}

Proof # 1 : Prez-A-Duntz Obama is making War on the
Muslims in Iraq.

Proof # 2 : Prez-A-Duntz Obama is making War on the
Muslims in Afghanistan.

Proof # 3 : Prez-A-Duntz Obama is Holder'ing All Those
Hundreds of Islam-O-Fascists {Muslim} Terrorists In GitMo
for All Eternity !
{Under Prez-A-Duntz Obama we have added two 'detainees'
for everyone we have released.}

Proof # 4 : Prez-A-Duntz Obama is Threatening Action
Against Iran for their Nuke Program.

Proof # 5 : Prez-A-Duntz Obama is Threatening Action
Against Muammar al-Gaddafi in Libya.

As a Christian US Prez-A-Duntz Obama Likes Attacking
Islam/Muslims.

Proud of My US Prez-A-Duntz Obama for being a Good
Christian and Anti-Islamic/Muslim ~ RHF

- P.S. Not starting a flame war against your antenna. I'm just
curious.

{{-;; Let The Antenna Flame War Begin ! ::-}}
-just-kidding-

Joe from Kokomo,

First it's a Horizontal [Flat] Loop Antenna and is
considered to be a 'Balanced' Antenna.

The each of local nearby RF/EMF Noise Sources
are Single Points of Noise to the Loop from within
and without.

* A Single Point of Noise that is within the Circle/Area
of the Loop is received {pick-up} on all points of the Loop;
and so is usually reduced/canceled-out.

* A Single Point of Noise that is near the outside** the
Circle/Area of the Loop is received {pick-up} on all points
of the Loop; and so is usually reduced/canceled-out.
** Near the Outside within a Distance of one Radius to
one Diameter of the Circumference of the Loop.

Distant RF Signals that are much more Farther Away
from the Loop Antenna {1000 Diameters} are received
as a Single Uniform {In-Phase} Signal; and therefore
NOT usually reduced/canceled-out.

NOTE : Some claim that Local RF/EMF Noise is more
Vertical Polarized than Horizontal -and- Therefore a
Horizontal Loop picks-up less of the Local RF/EMF
Noise as a result of simply being Horizontal - nitt?

PLUS : Most Distance Sky-Wave Signals especially
after a few RF Signal Bounces Off the Atmosphere
are More Horizontal Polarized than they are Vertical
-and- Therefore a Horizontal Loop picks-up More of
these Distance Far-A-Way RF Signals as a result of
simply being Horizontal - nitt?

The Second Thing that a Loop Antenna does for the
Shortwave Radio Listener [SWL] is Maximizes the
Utilization of the Available Space they are Using to
Put More Wire In-the-Air over a Long/Random {Single}
Wire Antenna or even a Dipole {Two Wire} Antenna.
~Translation~ MORE WIRE IN-THE-AIR
-example- For a 50 Foot by 50 Foot Square with a
70 Foot Long Random Wire Antenna across it's
Diagonal -or- a 70 Foot Long Dipole Antenna across
it's Diagonal : A Square Loop Antenna at the Corners
would be 200 Foot around with 3-Times the Wire
In-the-Air to Receive RF Signals.
{~3X High Signal Levels}

The Third Thing that a Loop Antenna does for the
Shortwave Radio Listener [SWL] is Maximizes the
Utilization of the Available Space they are Using to
Expand the Signal-Capture-Area over a Long/Random
{Single} Wire Antenna or even a Dipole {Two Wire}
Antenna.
~Translation~ MORE SIGNAL CAPTURE AREA
-example- For a 50 Foot by 50 Foot Square with
All Antennas at 25 Feet : A 70 Foot Long Random
Wire Antenna across it's Diagonal -or- a 70 Foot
Long Dipole Antenna across it's Diagonal with :
A Square Loop Antenna at the Corners would be
2500 Foot around with 7~9 Times the Signal Capture
Area to Receive More RF Signals.

Conclusion :
* The Horizontal Loop Antenna is a 'relatively' Lower {Local}
Noise Antenna than the Random/Long Wire Antenna
-it's-a-balance-antenna-versus-unbalanced-
* The Horizontal Loop Antenna is a 'relatively' Higher {Distant}
Signal Antenna that the Random/Long Wire Antenna
-it's-got-more-wire-in-the-air-
* The Horizontal Loop Antenna is a 'relatively' More {Distant}
Signal Antenna that the Random/Long Wire Antenna
-it's-got-more-signal-capture-area-
* The Horizontal Loop Antenna is a 'relatively' Designed
for Sky-Wave RF Signals and does a better job that the
Random/Long Wire Antenna
-it's-does-what-it-is-designed-to-do-

The Two Things That The Random/Long Wire Antenna
Has Over The Horizontal Loop Antenna :
1 - Half the Materials {Fewer Things}
2 - Half the Work {Less To Do}
3 - Easier to Locate/Site and Erect {Easy to Do}
=Conclusion= Easier/Simpler To Build

that's my 'relative' opinion - iane ~ RHF
.
.

You have to use ladder line or a BalUn at the feedpoint. It is important
that the antenna be operated fairly "balanced".

att.com/Tutorials Motorola ATRIX 4G

My printer I bought for my WebTV thingy wayyyyyyy back in November or December of 1999, I never even unsealed the box and took the printer out of thar.Even so, WebTV being what it is, the pictures don't show up on my WebTV screen and some of the words on the right hand side of my WebTV screen, some of them don't show up either, it's like somebody cut them off with scissors.It pizzes me off!

I can see all of that stuff on my ATRIX, but I can't use my printer on thar.
When I take doggy to the Animal Medical Center on Wednesday morning at 9:00 AM to get her teeth cleaned, they said I would have to wait until Wednesday afternoon to pick doggy up.In the meaned/meaneded time, I will go over to my brother in law's house and get him to print out those Tutorials for me.I think there are 90 pages of them.
Slick, eh?

I've been looking at this one, myself. Not for a beginning kit
builder, but with a decent antenna, it can be a decent basic rig.

There is a video about this rig, it's construction, and it's
operation on YouTube.

Thanks, Burr, I would not rule that out - but I am not sure my existing software can make or convert to a wavefile (.wav). All I have is MS and Windows sound recording software (creates a .wma file) and some software Brenda found for me that can convert to an MP3.

If you or anyone has some ideas about this, I (not being a PC-savvy person at all) would be most appreciative.

Bruce

- P.S. Not starting a flame war against your antenna. I'm just
curious.

{{-;; Let The Antenna Flame War Begin ! ::-}}
-just-kidding-

Joe from Kokomo,

First it's a Horizontal [Flat] Loop Antenna and is
considered to be a 'Balanced' Antenna.

The each of local nearby RF/EMF Noise Sources
are Single Points of Noise to the Loop from within
and without.

* A Single Point of Noise that is within the Circle/Area
of the Loop is received {pick-up} on all points of the Loop;
and so is usually reduced/canceled-out.

* A Single Point of Noise that is near the outside** the
Circle/Area of the Loop is received {pick-up} on all points
of the Loop; and so is usually reduced/canceled-out.
** Near the Outside within a Distance of one Radius to
one Diameter of the Circumference of the Loop.

Distant RF Signals that are much more Farther Away
from the Loop Antenna {1000 Diameters} are received
as a Single Uniform {In-Phase} Signal; and therefore
NOT usually reduced/canceled-out.

NOTE : Some claim that Local RF/EMF Noise is more
Vertical Polarized than Horizontal -and- Therefore a
Horizontal Loop picks-up less of the Local RF/EMF
Noise as a result of simply being Horizontal - nitt?

PLUS : Most Distance Sky-Wave Signals especially
after a few RF Signal Bounces Off the Atmosphere
are More Horizontal Polarized than they are Vertical
-and- Therefore a Horizontal Loop picks-up More of
these Distance Far-A-Way RF Signals as a result of
simply being Horizontal - nitt?

The Second Thing that a Loop Antenna does for the
Shortwave Radio Listener [SWL] is Maximizes the
Utilization of the Available Space they are Using to
Put More Wire In-the-Air over a Long/Random {Single}
Wire Antenna or even a Dipole {Two Wire} Antenna.
~Translation~ MORE WIRE IN-THE-AIR
-example- For a 50 Foot by 50 Foot Square with a
70 Foot Long Random Wire Antenna across it's
Diagonal -or- a 70 Foot Long Dipole Antenna across
it's Diagonal : A Square Loop Antenna at the Corners
would be 200 Foot around with 3-Times the Wire
In-the-Air to Receive RF Signals.
{~3X High Signal Levels}

The Third Thing that a Loop Antenna does for the
Shortwave Radio Listener [SWL] is Maximizes the
Utilization of the Available Space they are Using to
Expand the Signal-Capture-Area over a Long/Random
{Single} Wire Antenna or even a Dipole {Two Wire}
Antenna.
~Translation~ MORE SIGNAL CAPTURE AREA
-example- For a 50 Foot by 50 Foot Square with
All Antennas at 25 Feet : A 70 Foot Long Random
Wire Antenna across it's Diagonal -or- a 70 Foot
Long Dipole Antenna across it's Diagonal with :
A Square Loop Antenna at the Corners would be
2500 Foot around with 7~9 Times the Signal Capture
Area to Receive More RF Signals.

Conclusion :
* The Horizontal Loop Antenna is a 'relatively' Lower {Local}
Noise Antenna than the Random/Long Wire Antenna
-it's-a-balance-antenna-versus-unbalanced-
* The Horizontal Loop Antenna is a 'relatively' Higher {Distant}
Signal Antenna that the Random/Long Wire Antenna
-it's-got-more-wire-in-the-air-
* The Horizontal Loop Antenna is a 'relatively' More {Distant}
Signal Antenna that the Random/Long Wire Antenna
-it's-got-more-signal-capture-area-
* The Horizontal Loop Antenna is a 'relatively' Designed
for Sky-Wave RF Signals and does a better job that the
Random/Long Wire Antenna
-it's-does-what-it-is-designed-to-do-

The Two Things That The Random/Long Wire Antenna
Has Over The Horizontal Loop Antenna :
1 - Half the Materials {Fewer Things}
2 - Half the Work {Less To Do}
3 - Easier to Locate/Site and Erect {Easy to Do}
=Conclusion= Easier/Simpler To Build

that's my 'relative' opinion - iane ~ RHF
.
.

Unfortunately , the devil is in the detail . Most consumers are not
aware of it and are easily misled . That LAST letter is what counts -
either ' i ' or ' p ' . Many (majority) of consumer video products
are full of gimmicks . And that's the way it has always been !

A loop antenna is more directional (in general) than a longwire .
That's a very big asset in DF applications .

- A loop antenna is more directional (in general) than a longwire .
- That's a very big asset in DF applications .

Arthrny,

Yes : Vertical Loop Antennas can be very Directional
-but- Usually they are less than a 1/10th of a Wave
Length long and often make with Multi-Turns.

What we are talking about here is a Large One Wave
Length {or 1/2 WL} Horizontal [Flat] Loop Antenna
{One 'Single' Turn} that is 'relatively' close to the ground
{Less than a 1/4WL} and uses a Balanced Feed-in-Line.
Generally the more uniform and symmetrical {circular}
the Loop is the more Omni-Directional the Loop Antenna
becomes.

.
.
- It also has an advantage of working well without
- having to be 40 feet in the air.

Dave,

I guess two things are happening here -wrt- the Loop
Antenna -versus- Single Straight Random/Long Wire
Antenna :

* The Loop is a 'Balanced' Antenna unto itself; and is
thus less Ground Dependent.

* The Loop Antenna is simply physically larger with :
* * More Wire In-the-Air
* * Covers More Space/Area
.
- It doesn't seem to mind being around trees, etc.

A Full-Wave Horizontal [Flat] Loop Antenna that is
near/next-to a Tree is still a Very Large 'Balanced'
Antenna.

A 1/4WL & 1/2WL Horizontal [Flat] Straight Wire
Antenna near/next-to a Tree is still a relatively short
Un-Balanced Antenna that potentially is more
un-balanced due to the closeness of the Tree.

```

> > So did the NAZIs
>
- - - ..more like a bunch of pinocchios .
- - - Like their present leadership .

- - Arthrny : "pinocchios" =?= Leadership

- The present Persian leadership .

-but- Why the descriptive word "pinocchios"

-maybe- Jimmy" Durante {The "Schnozzola"}
http://art.allayers.com/images/large/jimmy_durante2.jpg

Simply for a Big Nose as significant Facial Feature.

-but- To me Pinocchios implies Liars and the
present Iranian Leadership is :
* True to Their Word {Political Rhetoric}
* Committed to Their Cause {Religious Beliefs}
* Islamic World Domination {Religious Imperialism}
* Their Leadership in an Islamic World {Power}

Conclusion :
Do It To Them Before They Do It To Us [.]

"I think MII should be careful, we can all
complain about people if we put our minds to it."

Steve

"If M2 dont like his posts do as we all do to trolls ignore
them or killfile them, but to try and stifle or block freedom of expression
no matter how silly is the worse crime."

The Rifleman

"Do you think I'm making this stuff up? If so, please just go ahead and
killfile
me. To be honest, your off topic polittical posts seem to outnumber your SW
posts by a margin of about 30 to 1.

More SW, please, or I won't be seeing any of your posts."

Michael Bryant

My 'GymyBobism' collection...updated daily:
==
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries

they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.

OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes

and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also

increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?
in soc.support.fat-acceptance, alt.support.big-folks

Burn a Live CD of Puppy Linux. Then cold boot your computer with the Live CD. A fully-functional version of Puppy Linux will set itself up in a few minutes. It is preloaded with all kinds of hacker goodness. After a while, you may decide you prefer it. It'll run completely in RAM; it only makes a save file with your permission. You shouldn't need to ever install it on your hard drive, unless you really want to.

Football looks great! BluRay discs look great. Upconverted SD DVDs look
great. I paid less than 4 figures for it.

It is very important that your source material be well made. I have a
Bluray Disc player that connects with Netflix over the internet, and
basic cable ready Time-Warner cable (ClearQAM). They squash everything
pretty badly. I need to move to a higher location where I can "see"
Mount Wilson directly.

A small loop has less than 10% of the wavelength.

A large loop has at least 50% of the wavelength.

Small loops are easily built and when vertically oriented exhibit a very useful figure 8 pattern. Downside, they need to be turned (and tuned). I can't put one inside my lath and plaster house. I don't have an antenna rotator.

My large horizontal loop requires no aiming nor tuning. It is for SWL and amateur receiving only. Set it and forget it. QRM was the main problem. It is 95% solved. I never (never) hear light switches (which cause huge explosions on my ham radio) or the oscillators in my analog TV; and like that there.

I've had varactor tuned exciters do that. They get microphonic. I transmitted the bimetallic thermostat in my crystal oven for a week once, before I figured it out. There'd be a little "ting" about every 45 seconds. You would only notice during the talk shows if nobody was speaking.

Walmart doesn't sell HDTVs anymore? You ought to see the electronics department in the Dangerous Walmart Supercenter store I go to, (Greenway Drive near the intersection of Highway 18, about one and a half mile South of doggy's couch) mostly for food shopping.I never counted them, but I reckon there are at least twenty, maybe more, HDTV tee vee sets on display over there.

There are at least seven Dangerous Walmart Supercenter stores in the Jackson/Jackson metro area.The next nearest Dangerous Walmart Supercenter store (in Clinton,Missy Sippy) is on Highway 80 about four miles West of doggy's couch.I haven't been in that store in about a month or so, but they had HDTV tee vee sets on display in there too.

Pickup on South Street movie is on my Sony Wega Trinitron 27 inchs flat screen tv set right now, Fox Movie Channel.I bought that tv set in 2006 at one of the Cowboy Maloney stores around here.The movie on there looks Great to me, even though it is not in HDTV.

Arthrny -remember- Wal*Mart Love$ You !

Here anything beyond Wal*Mart {Sonora, CA} is
35 Miles down a winding two lane road to Oakdale
and beyond. {Modesto, CA 'the big city' is another
15 Miles or so...

Even Wal*Mart is 12 Miles down the Road.

- Movies are 24 fps. That flicker is unresolvable by
- normal people. 120 is 5 times that. Divides evenly.
- I don't see a technical reason to repeat the same
- frame over and over real fast. 120 makes sense.

Dave : So by inference to your above statement : I can
conclude that 24 into 60 is 2.5 and does not Divide Evenly :
So 60 is not as good as 120. ~ RHF

We had Caregivers who had Celphones, iPhones; and
like-sized {hand-sized} TV Viewers and each one that
I looked at was a stretch on enjoyable viewing to me.

Sort of like the Calculator Watch that was to small to
use -or- Two Big to be comfortable on a Wrist.

MSN {Web} TV still has a niche for what it does.

Full-Size Wireless Keyboard and TV Size Viewing
Screen = Perfect of Senior Citizens :
Easy to Handle
Easy To See

The ADA should cover and enforce Uniform Cellphone
and Computer Designs that are Senior Citizen Friendly
{Assessable & Usable}
http://www.ada.gov/
35~50 Million American US Citizens are going neglected
and under-un-served by the Cellphone and Computer
Industry which is Failing to Meet their Special Needs :
Easy to Handle : Assessable {Large}
Easy To See : Usable {Big}

and that's the way 'i' see it ~ RHF

http://blogs.chron.com/texaspolitics/archives/2011/02/texas_demograph.html

It is interesting that the linchpin of the ruling oligarchy's blueprint to make the USA just another one of their plantations is the destruction of the white race because of their history of independence and freedom.

There would appear to be merit to that line of logic. Did you know that the author of the Patriot Act was a Vietnamese man? And who did Bush turn to the justify his torture policy - a South Korean law professor.

An old timer told me that the USA was 91% white as late as the 1960,'s. What is the percentage today? Considerably lower. There seems to be a lock step relationship between the loss of our freedoms and the changing demographics of the nation.

How sad, this used to be such a wonderful country. Racist or not, it is what it is.

Listening to Radio Canada International a few nights ago I was
surprised to learn that China, India and Pakistan lead the list of
immigrants to Canada for the fifth straight year.

"Canada welcomed the highest number of immigrants in more than 50
years by admitting 280,636 permanent residents in 2010. This new
number is about 60,000 higher than the average annual intake of
permanent residents in recent years, according to a statement by
Immigration and Citizenship Canada. Canada has admitted between
240,000 and 265,000 immigrants annually in recent years."

Mannnnn, I Loves my WebTV.It's foolproof and goofproof.Sometimes, it is slowwwwww, sometimes it gits along purrrrrrrry Good.As long as WebTV is still around, I reckon that is Good enuff furr me.

Yeah, in fact of the business,,,, this afternoon when I took my ATRIX stuff back to the store for a refund, that lady said because I wrote a check, I have to wait ten business days to get my money back, minus $35.00 restocking fee.So, I gits to play with my ATRIX stuff untill next Monday.

Say cuzz, you know anything about J.R.Whipple built desktop computers? Santa Clara,California, I think it is.I saw that website about eleven years ago.I was thinking tomorrow I might email them about prices.

Arra, I paid $199.99 for the phone and $499.99 for the laptop dock.I am playing with the phone right now.Yeah, I am now sort of kind of thinking maybe I will keep the phone and just get a refund on the laptop dock.The phone is real neat, the latest technology and all that good stuff.I will go back to that AT&T store tomorrow (on my way to the Goodwill store, of course) and double check on how much the AT&T monthly service price is, but I am not sure AT&T is charging me money for me to use my phone.I have got to check that out.

Looka here, doggy's couch is less than one quarter of a mile from that big tall cell tower on Lynch Street, over there behind Metrocenter Mall.I wonder if any WiFi devices will get free WiFi signal from there to doggy's couch? If I plug in one of my WiFi radios (Linksys Wireless B Music System or my Aluratek WiFi clock radio, will they catch a good enough signal so I can listen to live Ireland and Live Scotland and live Isle of Manx radio?

Since the census numbers would not include the 31 million illegal
aliens that currently infest the country, 70% (and dropping) would be
a more accurate number.

That 27" Wega is potentially BETTER than some of them Phoney HD-tee-
vee's out there . What kind of inputs does it contain ? Nobody in the
whole world is making CRT's at this stage ! It is considered 'old'
technology ...

********** 'p' is supposedly the real thing. In the '90s,
ProScan had a somewhat similar idea (analog,of course) and they
actually doubled the normal NTSC video to about 1050 line resolution .
Great (ingenious) , but the actual picture looked ... sort of washed
out . As far as I remember , the ' i ' versions of "HD" are a somewhat
similar approach (digitally) . That's the best I can define the
difference of ' i ' and ' p' nomenclature .

WebTV box can't digest heavy graphics . Occassionally , when pushed to
it's limit , it shuts down by itself . And that's the way it was
designed , I guess .

The latest version of this file can be found at:
http://www.rdrop.com/users/billmc

Handy Shortwave Chart
Bill McFadden
billmc@agora.rdrop.com

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2008
FCC rules and Sep 2009 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Please e-mail suggestions and corrections to billmc@agora.rdrop.com.

Phone line as SW antenna
Bill McFadden
billmc@agora.rdrop.com

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area.
Telephone lines present a potential shock hazard. Do not use this antenna
for transmitting. Use at your own risk.

INTRODUCTION

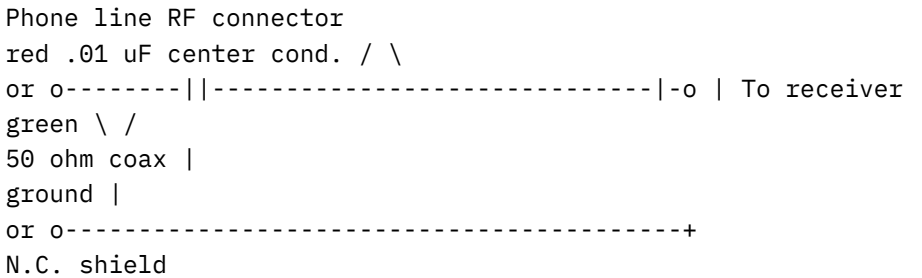
This article describes how to use a phone line as a shortwave receiving
antenna. Performance will vary depending on the kind of phone line you
have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally
pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting
the phone line directly to the receiver, try wrapping the phone cord
several times around the receiver's telescopic whip antenna instead.
Performance may not be as good as a direct connection, but it will
probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought
much about it because thunderstorms are rare in my area. Most phone lines
have lightning arrestors on them where they enter the house, but the
lightning arrestors may pass enough energy during a lightning strike
damage a receiver. My suggestion is to disconnect the antenna when not in
use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and
receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.



N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

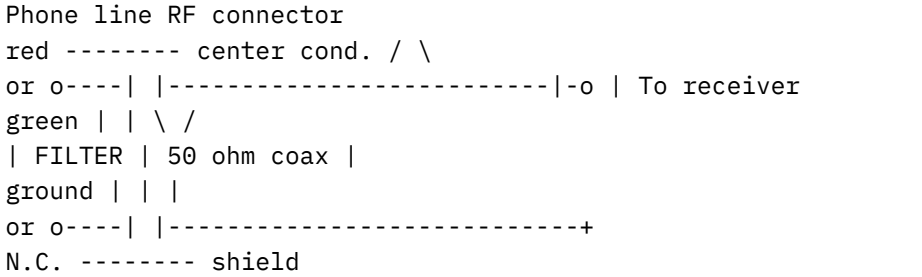
If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:



| RECOMMENDED FILTERS
|
| If you don't want to make your own filters, the following have good
| performance, are well-built and affordable:
|
| Model 400 BCB interference filter (3.5 MHz highpass)
| http://www.iceradioproducts.com/filtersrf.html#bcb
|

| Model 420 HF lowpass filter (30 MHz lowpass)
| http://www.iceradioproducts.com/filtersrf.html#3
| (scroll down a bit to see the model 420)
|
| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):
|
| Model 182A beverage matching unit
| http://www.iceradioproducts.com/reconly.html#Beverage Matching

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

Date: 12 Jan 91 00:44:25 GMT
From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

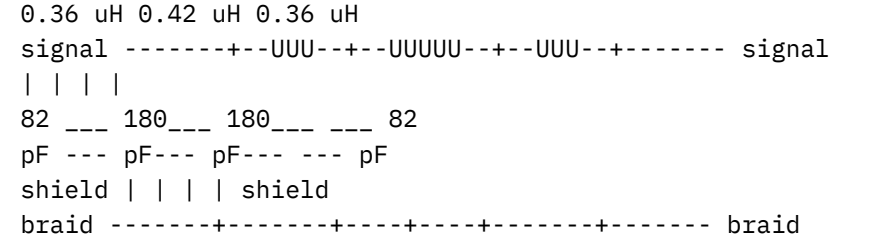
These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

Date: 22 Apr 92 08:59:33 GMT
From: johns@uhunix.uhcc.Hawaii.Edu (John Shalamskas)
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH
instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there
are 4 lugs plus a grounded lug. All "ground" connections go to the lug
that is mounted to the chassis, and the other 4 lugs are used for each
of the connections on the signal line. One terminal strip is used per
filter. Since both filters were necessary to clean up the hash, I am
going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means
you can't possibly hook them up backwards. (In the above schematics,
left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

PARTS SOURCE

Parts for the filters can be obtained from the following source:
http://www.digi-key.com/

Hmmm, so BHO is : 1) Blk 2) Wht 3) Pac. Islander 4) Kenyan 5)
All of the above . p.s. He did spend some years in Indonesia . Does
that count , and as what ?

OOPS! : Haiti -not- Oldest Democracy in Western Hemisphere
http://en.wikipedia.org/wiki/Haiti

After Haiti's Revolution and Independence from France :
Jean-Jacques Dessalines was proclaimed "Emperor for
Life" by his troops : Followed by a King of the North and
a King of the South -sure-don't-sound-like-democracy-

First : It's called named the "Republic of Haiti"
and is NOT a 'Democracy' per se.

Second : I would think that most Haitians would NOT
call the Years of Rule by "Papa Doc" and "Baby Doc"
a real {functioning} 'democracy' -aka- Presidents for Life

Third : Nor would Haitians call the Years of United States
Occupation of Haiti from 1915 to 1934 as a period of
'democracy'.
http://en.wikipedia.org/wiki/United_States_occupation_of_Haiti

FWIW : Generally Costa Rica is considered to be
the Oldest Continuous Democracy in Latin America.

List of Countries Steadily Democratic since at least 1950

Interlaced vs progressive scan, meaning with interlaced half the horizontal lines are scanned every other frame. This is an analog requirement for some odd reason I can't remember. It just makes digital video needlessly complicated.

Irregardless [sic], NBC and CBS both have committed to it.

Length feet = 1005/frequency of interest

Make area inside the loop as large as possible. Get it up in the air (although under the eaves will work if you don't have a lot of metal flashing.) It seems to be deaf to most QRM generated in the "near field", so I have it 3' above my roof, generally in the same shape as the house, parallel to the ground. I cut the loop and put an MFJ-913 4:1 current BalUn, 'cause that's what I had lying around. For receive you can get away with a reversed CATV BalUn.

It wants to be balanced. Use ladder line, twinlead, or a BalUn with coax.

This article is only about half bullshit:

My Sony Wega Trinitron has the usual Audio and Video jacks on the back and there is one S-Video jack and the threaded jack where my DirecTV cable is screwed on there and there is also one ATSC (what is ATSC?) threaded jack on the back of the tv set.There are two Video jacks and one Audio jacks under a little flip up panel on the front.I bought that tv set at a Cowboy Maloney store on December 5,2006.

I have six or seven WebTV set top boxes and about that many wireless keyboards and hand held remotes, they all work too.I have looked yet, but I know there is a fuse inside of those WebTV boxes.

When I bought my first WebTV box on October 15,1999, I also bought a new 27 inch screen RCA CRT tv set, for my WebTV.It had ProScan.About two something years ago, that RCA tv set kicked the bucket, it wouldn't turn on at all, other than make a Bump noise when I tried to turn it on.I think some capacitors or something was leaking, there was some messy sticky stuff underneath the tv set.I set it out front for the garbage truck to pick it up.I went to the Walmart store on Highway 80 in Clinton, (about four or five miles West of doggy's couch) and I bought a Sansui 27 inch screen CRT tv set, for my WebTV.

Man, if you watch the DirecTV Channel 3 modulator on your $1,000 Sony TV
don't start sweating the fine points of HDTV. You do not have golden eyes.

Thanks for this - A great idea, but expenses being what they are, I am
trying to live with what I have.

I do have a small Olympus vox recorder lying around somewhere - I may
see if I can get it working - but for now, I am using an excellent
quality old-fashioned cassette recorder. Just last week, I figured
out how to pump the output of this into my PC to make digitized
recordings; just last night, I managed to burn a couple of CDs for
Voice of Russia and Radio Bulgaria (that don't sound half-bad) which I
assume any self-respecting radio station should be able to play back.

In case I did not make it clear, I am in fact using that R75 rec
output to the aux input on the tape recorder :-).

Like dave said, concerning the Live Puppy Linux. You can access all your windows files and do your mp3 changes. There should be full 'net access.

When you're done, removed the cd and reboot the machine. Nothing will have changed in your existing Windoze setup. that's like taking the *blue* pill.

All the Live Linux distributions on cd run pretty slow. You can't compare that speed to a real hard drive installation. There is a 'dual boot' option in most Linuxes, so you can keep windows where it is and choose between the systems at startup time.

An extra hard drive is a good option. As you wean yourself off the inferior, you spend more and more time away from the Gate's nightmare.

Installing it on an older (cheap or free) computer may be also quite rewarding. There is usually a noticeable speed improvement and a good feeling about having brought something back from the dead.

mike

That's how I feel about hearing a 100 KW station from Tennessee.

Since the Beeb only covers NAm by accident these days, I listen online
because sometimes content is king, rather than the medium.

This is in every version of windows I ever used. An small mono .wav file
can play on any Windows machine and most Macs.

The first tv set I bought from a Cowboy Maloney store was a Toshiba.A few days later that Toshiba developed a blur on the bottom left hand side of the screen.That blur wouldn't go away.I took it back to Cowboy Maloney and bought the Sony.I paid about $38.00 more in price difference for my Sony.Somewhere around not much more than about $350.00 in toto, I think, maybe it wasen't that much.I have my receipt somewhere around here, it would take me forever to find it.No where near $1,000 did I pay, not even near $500.00.So far, my Sony Wega Trinitron tv set is still working just as good as new.It pulls in a Great picture, as far as I am concerned.
cuhulin, the Sony

This is what I use - but so far I have not seen the extension ".wav",
only ".wma." Maybe the same thing? Either way, it burns a decent CD,
and I have sent them by e-mail before.

2041. Mexican IBOC - It's Borderblasters, revisited - LOL!

I don't doubt that DRM has certain advantages over AM/SSB transmission on HF frequencies - but as I listen on my conventional radio to transmissions of this mode from stations such as Radio New Zealand, and the obnoxious sound it makes across a 10 kHz wide piece of the spectrum, I have to wonder if anyone out there in their intended service area is actually using this mode. I guess I can imagine a few folks in East Asia who may have these receivers, but across the islands I cannot imagine they are common at all. Does New Zealand do this to reach better into the Asian interior? To antipodal Europe?

Still, they are not as obnoxious as CRI, who insist on plugging up every other frequency with a transmission 24/7, covering up dozens of other stations who now have no hope of being heard as a result...

ProScan . RCA's top-of-the-line . Nice try , designed to shut down in
case of nearly ANY malfunction and they all needed memory ic
replacements ! Bad memories-- most of them RCA and GE Tee-Vees found
a well deserved place in the dumpster ... S-video was an early
enhancement to raise the resolution to 480(i) lines . Analog days'
"HD" , sort of . My WebTV box has an S-video output in the back .
One time I hooked up a v-e-r-r-r-y e-x-p-e-n-s-i-v-e 6 foot S-video
jumper (by Kimber Kable) . It actually cost twice what I paid for the
WebTV and the WebTV keyboard combined ; the result was quite
interesting to see on a 35" 'high resolution' CRT monitor . The
devil is always in the detail ...

DRM's 10kHz wide signal is preferable to the 30 kHz wide IBLOCK mode
used on the AM band.

Yes it is. Almost anything is.

Actually, though, DRM is a solid 11 kHz wide. With its even power distribution, it is far more annoying on HF when near a desired signal than is even a much wider high-fidelity AM signal, which has only intermittent high-frequency energy.

Presently TDF Issoudun relays RFI via DRM on 3965 kHz (1 kw) and BBC Skelton uses 250 kW of DRM on 3955. Both, especially the BBC, play havoc with US amateur operations on 75 meters.

With all good wishes,

Kevin, WB4AIO.

American Goodies and American junk is farrrrr and away Much Betterr than anything Canada has.You can bet your boots on that! O' Canada.

Yesterday, at that Office Depot store, that pot bellied dude who works there, he Flat Out Lied to me! He told me if something goes wrong with HP computer, (it was a HP 600-1350 Touchsmart desktop computer I was looking at, marked down to $949.99) HP will send you a new computer.

A little while ago when I was in the Sears store electronics department and I was looking at a couple of little cheap laptop computers (one of them is a EEPC, the other one is a Toshiba, about 250 something dollars) the sales clerk guy (he has been with Sears over twenty years, I know him pretty well) told me the Truth.He said, Use them and then throw them away.

DRM as a Broadcast Media seems to Work Best out
to 3500 km ~ 2200 Miles which is a Natural for Radio
New Zealand's Over-the-Ocean-Area Broadcast Scheme.
.
-also-
The Digital Radio Mondiale (DRM) Signal seams to work
best as an 'intra-continental' Domestic Broadcast System
with a Range out to 900~1200 Miles.
.
The AFN Shortwave [HF] Radio Broadcasting System is a
Natural Application for DRM on the Shortwave [HF] Radio
http://groups.google.com/group/rec.radio.shortwave/msg/455492a07ce34fb6
* AFN Fixed Stations to Navel Ships {<1000}
One DRM Transmitter to a Limited Number of DRM
Receivers on the Ships and Redistributed within the Ship
.

From Wikipedia:
* The ABC "D-Cart" system, which was developed by the Australian
broadcaster, uses 48 kHz 16 bit two channel .wav files, which is
identical to that of Digital Audio Tape.
* The Digital Radio Mondiale consortium uses WAV files as an

informal standard for transmitter simulation and receiver testing.

It's time to get a bit more serious about the barnacle that's attached itself to my Usenet identity. The juvenile trying to forge my identity doesn't look like he's going to stop.

Can you get one of your Military network guys to do a bit of homework? I'd like the complete path this guy is using to post his forgeries. The obvious companies all deny the perp is their client.

The juvenile is following me in some electronics newsgroups. His stupidity is eroding whatever good will I may have had. Not everyone checks headers to verify identity. I haven't used Windows in years.

Abuse reports have been sent to:

abuse@highwinds-software.com
abuse@highwinds-media.com
abuse@hwng.net
abuse@teranews.com

Anyone caring about identity forgery should be forwarding the impostor's messages with all headers to the above addresses. It may happen to you, so give it some consideration.

Any help I can get in shutting this bozo down will be appreciated. He's been doing it for years to countless others. It's time to stop it.

Typical forged message headers are below. Note how he uses my Usenet provider's complaint address as a 'reply to'.

How about media for international distribution? I would think the 3"
mini CD would be ideal. Very light and fits in a small envelope.
Anyone using these for reports?

Here are the previous reports I have posted on this guy for a few years,
almost everyday. There was nothing this guy could do to stop me back then
either.

http://groups.google.ca/groups/search?hl=en&as_q=&as_epq=GymyBobism&as_oq=&as_eq=&num=100&scoring=&lr=&as_sitesearch=&as_qdr=&as_drrb=b&as_mind=1&as_minm=1&as_miny=2003&as_maxd=1&as_maxm=1&as_maxy=2008&as_ugroup=&as_usubject=&as_uauthors=m+II&safe=off

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like
your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate

fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished embroidering about 10 items, including a flight bag for golf clubs.

Things have a way of Resolving Themselves Over-Time !

IBOC : The Path To HD-Radio Acceptance and Use . . .

Phase One of IBOC HD-Radio Implementation :
{Years 1~5}
Mixture of Analog and IBOC Digital Broadcasters
with very few HD-Radio Receivers :
The Analog Radio Listeners* Notice "The Hash/Buzz"
* Radio Listening is both Local and Distant Radio
Station Listening.
.
Phase Two of IBOC HD-Radio Implementation :
{Years 6~10}
Still a Mixture of Analog and IBOC Digital Broadcasters
with a mixture of Analog and HD-Radio Receivers :
Still the Analog Radio Listeners* Notice "The Hash/Buzz"
-but- HD-Radio Listeners Using HD-Radios Do Not

Hear "The Hash/Buzz"
* Radio Listening is mostly now Local still with some
Distant Radio Station Listening.
.
Phase Three of IBOC HD-Radio Implementation :
{Years 11~15}
Mostly IBOC Digital Broadcasters with some Analog
and mostly HD-Radio Receivers with some Analog :
Majority is now HD Radio Listeners* Who Are Now
Using HD-Radios and Do Not Hear "The Hash/Buzz"
-and- There still is a few Analog Radio Listeners who still
Notice "The Hash/Buzz" when they do not Listen 'Local'
* Radio Listening is now almost all 'Local' with very little
Distant Radio Station Listening.

NOTE : The AM/FM Radio Station Business Model

I see that Mike Oxlong is playing god again, he seems to enjoy locking up a lot of threads. Now we will get this long thread from him stating blah blah.
After he reads this post. I will also probably be locked out as a member, oh well. This guy has to be put on a short leash and muzzled.

I saw the prelude to the entire IBOC debacle from the inside.

IBOC is a brazen scam.

Its primary purpose -- the purpose for which it was designed -- was to preserve the vast signal superiority of the higher-power FM stations over their lower-power FM, and AM, competitors. It was designed specifically to _prevent_, as much as possible, any increase in relative signal quality or coverage on the part of the lower power and AM licensees that might otherwise have occurred.

In achieving this goal, IBOC has been quite successful.

It has, however, been totally unsuccessful in achieving any of its other highly-touted goals.

In the process, it has ruined reception for many thousands of listeners who wanted to hear some of the weaker, but formerly perfectly listenable, stations.

The failure (and fraudulent nature) of IBOC, and the earlier failure of AM stereo (and the frauds and self-deception that plagued that debacle, too), are symptomatic of the steep decline of what used to be the most technically advanced society on Earth.

With every good wish,

Kevin Alfred Strom.

This absorption event is a very minor one, according to the map and
chart shown.

It is affecting only the lower frequencies (map, left) and the
maximum absorption is only a few dB (chart, right).

With every good wish,

Kevin, WB4AIO.

There's your "bullshit" part right there. You only need it high if you want to use it as a top loaded vertical on lower bands. This is "ham radio" stuff. For SWL just get it as up and in the clear as you can.

I'd check to see if Sprint 4G is available at your location. They'll
give you a free laptop if you sign up for 2 years. 3G is OK for audio,
but will eat up your 5GB cap if you watch TV on it.

"Sprint Nextel Tuesday unveiled dual-mode 3G/4G-embedded netbook and
notebook computers, both made by Dell, at the 4G World conference here.

The devices are considered the first such dual mode devices to be
announced by a national wireless carrier.

The new offerings include the Windows 7 Starter-based Dell Inspiron Mini
10 netbook that is free of charge -- after a $100 rebate and the signing
of a new two year service agreement with Sprint. Sprint also unveiled a
Dell Inspiron 11z notebook computer that runs Windows 7 Home Premium and
sells for $149.99 after a $100 rebate and the signing of a two-year
agreement for Sprint service.

Both devices will go on sale on Nov. 14 at Sprint stores and on
Sprint.com, the company said.

Sprint's 3g/4G service plan is priced at $59.99 a month for unlimited 4G
data and 5 GB of 3G data."

The only advantage of HF is that the radios cost nothing. Going digital
negates that only advantage.

If people want RCI crystal clear they will find a web stream.

Webstream? Who needs a webstream? If I want to hear CRI, all I have to do is
connect a wire to a diode and feed the resultant audio into a cheap
amplifier. If I add a tuned tank, I can separate several of their
frequencies from the "local" megawatt-plus MW stations here... but CRI is
definitely in the mixture even with an untuned detector. I can get a
5-5-5-5-5 signal from them on 41, and 31 meters without an antenna on any HF
receiver I have.

And no, I'm not exaggerating. I wish I could get Oz or the BBC as well. I do
get RCI pretty well, as well as NHK and the VOA broadcast out of China.

operating system is too much money for a home user. They throw it in
free when you buy an overpriced Chinese computer ready made, but I like
to roll my own. There are versions of Linux that are prettier than Macs.

I tried that Puppy Linux today. Some notable drawbacks seem to be that it
doesn't support my sound card (on an HP dv7 laptop) and network connections
are a PITA. Other than that... it does seem to be pretty fast. But if I
can't do anything with it, it doesn't matter how fast it is.

Have you tried "alsamixer"? [open Terminal, type alsamixer [Enter}

The Linux kernel has drivers for any kind of hardware made, built in.

Here's a more disciplined area where such matters are talked over:

http://murga-linux.com/puppy/index.php?f=19

You need to know the name of the wifi chipset if it doesn't find it
automatically. Connect (phone on top of modem icon)> wlan0 it should
give you a list of wifi nodes in your area. Otherwise you need to name
the chipset on a list. But Puppy should have found it. It's as plug and
play as windows these days. This version is married to Ubuntu.

That's not an unreasonable view.

Eventually the allowable digital power is going to be raised to a level where it really does cause unacceptable interference with analog, even locally. So far, if you're listening to local stations, within their protected contour, you're highly unlikely to notice any interference (at least there have been no valid incidences of it that have been reported to the FCC), but for long distance listening there can be issues. Alas, just as getting away with operating components far beyond their maximum ratings for years, then getting a batch that works only slightly beyond their maximum ratings, there was never any guarantee to these stations that they could operate beyond their protected contour forever.

2099. Two SWL "Sky-Wire" Loop Antennas

> > Middle of the Side :
> > Sort of Off-Set... like a Windom

- - Getting the Wire Up 40 Feet in the Air at all 4
- - Corners would be a challenge for most SWLs.

- There's your "bullshit" part right there.

Dave more than just "N1SU" cite using a 160 Meter
Band Full Wave Loop Antenna of 574 Feet Rigged
at a Height of 40 Feet.

1005 / 1.750 = 574 Feet
1/4th Wave Length = 144 Feet High
1/8th Wave Length = 72 Feet High
-and- 1/10th Wave Length = 57 Feet
-so- 40 Feet High would be <1/10th WL for NVIS Operation
.
- You only need it high if you want to use it as a
- top loaded vertical on lower bands.

Dave "NAH" -cause- It is Cut for the 160 Meter Band
{Lowest Band} and Functions there as a Full Wave
Loop Antenna of 574 Feet Rigged at 40 Feet.
-now- If it was cut for the 31 Meter SW Band @
9400 kHz and was 27 Feet per Side at 13.5 to
27 Feet High -then- You might use it as a "top
loaded vertical on lower bands".

- This is "ham radio" stuff.

Dave -nah- Just Radio and Antenna "STUFF"

- For SWL just get it as up and in the clear as you can.

Dave -yes- Most Shortwave Radio Listeners [SWLs]
will take more practical and simpler approaches then
Amateur {Ham} Radio Operator who have to put RF
Power into their Antennas and have to have Antennas
that will Radiate RF Energy very well.

Two SWL "Sky-Wire" Loop Antennas
My Simple and Practical recommendations for a
Shortwave Radio Listener [SWL] would be :
* Small Lot a 31 Meter SW Band Full Wave Loop
Antenna {9400 kHz} with 27 Feet per Side and Rigged
at least 13.5 up to 27 Feet High. {108 Feet of Wire}
* Bigger Lot a 49 Meter SW Band Full Wave Loop
Antenna {5900 kHz} with 43 Feet per Side and Rigged
at least 21.3 up to 43 Feet High. {172 Feet of Wire}

You've gotten that perfectly right. A scam right from the start.
Luckily, IBOC has been a failure, as far as consumers are concerned,
and only 150 FM-HD stations have expressed interest in raising power
(only 3 have gone full -10db). So, the vaunted power increase has been
a complete flop. At least now, Struble/iBiquity and the automakers are
under investigation, and I hope that Struble is eventually prosecuted
for criminal fraud. The law firms will at least get him on civil

fraud. Expect class-actions from consumers and broadcasters. I'm sure many radio listeners have abandoned listening, as IBOC slowly destroys our airwaves. Listeners will just turn elsewhere for entertainment. I hope that the corrupt FCC, NPR, and NAB get dragged into the investigations.

Have you tried "alsamixer"? [open Terminal, type alsamixer [Enter}

The Linux kernel has drivers for any kind of hardware made, built in.

Here's a more disciplined area where such matters are talked over:

http://murga-linux.com/puppy/index.php?f=19

You need to know the name of the wifi chipset if it doesn't find it
automatically. Connect (phone on top of modem icon)> wlan0 it should
give you a list of wifi nodes in your area. Otherwise you need to name
the chipset on a list. But Puppy should have found it. It's as plug and
play as windows these days. This version is married to Ubuntu.

On my way back home this morning from taking doggy to get her teeth cleaned, naturally, I stopped off at the EZ Pawn shop on Highway 80 and then the Goodwill store.EZ Pawn, I saw a nice looking stylish old made in China transistor AM/FM shirt pocket radio, it says Farm Bureau on the front of the radio.It wouldn't say anything, maybe the three AA batteries are run down.On my back to pick up doggy this afternoon, I will take some new Ray O Vac batteries with me and see if that radio will work.If it works, I can buy it for about $20.00.I already own at least three hundred or more old radios.

At the Goodwill store, I saw an ACS33 Altec Lansing Computer Speaker System Powered Subwoofer Listed Audio System 2C52 ALW 0058968 Altec Lansing Technologies Inc Milford, PA

Miss Edna said $3.00 for it.I left it sitting on the shelf.I don't know whether I should stop off there again this afternoon, or not, and buy it.Assuming it is still there.Something inside could be burnt out as far as I don't know.

Anybody copy the FASTRAC 1 and 2 nanosatellites yet? (as on page 83 of the Feb 2011 QST)

They are on 145.825 MHz (and a 440 freq that escapes me at the moment), sending a beacon with embedded telemetry data, using conventional VHF packet protocol (AX.25).

The good news is that you can track it to see when it will be coming over your neighborhood by downloading "Orbitron", a FREE tracking program. The bad news is that Orbitron gets the Keplerian elements from the Celestrak site...and Celestrak surprisingly has not yet posted the keps for these birds. You can get the correct keps from the FASTRACK site or amsat.org and then paste it into Orbitron.

Hey, it's not "short" wave, but it IS radio...and a little change of pace challenge is always fun.

What kind of antenna would be useful for this? Just something the
size of a whip?

The only thing I have that receives this freq is a Patrolman portable
radio :-D

Intel has numerous processors . At any given time they market at least
a dozen of them . Core i5 is one of them . It is not cheap , though .

Got the following response from Doc Kelso at Celestrak regarding the
missing keps:

> The part that is missing is that the US government has decided not to
> release ANY TLE data for any of the objects associated with the
> STP-S26 mission, which includes the satellites you mentioned. As a
> result, there is no data for them on CelesTrak.

I wonder what the big mystery is about the STP-S26 mission. It's already
been published in a national magazine (QST).

P.S. Interesting side note: these sats were put in orbit from Point
Barrow, Alaska, NOT Cape Canaveral. I didn't know they put stuff in
orbit from anywhere but Florida (or maybe Wallops Isl, VA?).

The good news is a whip should be OK. The bad news is, your probably
won't get an accurate frequency read out (or enough sensitivity) from
your receiver ???

I'd guess the sensitivity part will be the biggest problem. With the
dearth of signals around here on 140 mHz, almost anything audible
would stand out like a sore thumb.

Patrolman hand held radio? Last time I was at that other pawn shop (a couple of weeks ago) at the intersection of Ellis Ave and John R. Lynch Road, I saw a Patrolman hand held radio in there.It has been sitting there for about a year.I need to go get doggy in about half an hour.I will stop off at that pawn shop and see if it is still there.I might offer them $10.00 for it.I might offer them $10.00 for that other radio at the EZ Pawn shop on Highway 80.If I don't buy those radios, they will probally still be sitting there weeks/months from now.

Kevin,

There's a lot of stuff that no one cares about that constantly gets
posted to this newsgroup, e.g., Steve's nearly daily diatribes against
my employers or your weekly report regarding the rather meaningless
ramblings of some seriously messed up amateur operators. I find it a
little strange that you suddenly feel nominated to declare what
everyone else cares about. I kind of felt that way about your old web
page that had clear child porno on it.

Many of us don't care about you, either.

This is the result of years of research on my part.

http://groups.google.ca/groups/search?hl=en&as_q=&as_epq=GymyBobism&as_oq=&as_eq=&num=100&scoring=&lr=&as_sitesearch=&as_qdr=&as_drrb=b&as_mind=1&as_minm=1&as_miny=2003&as_maxd=1&as_maxm=1&as_maxy=2008&as_ugroup=&as_usubject=&as_uauthors=m+II&safe=off

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric

system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his

feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not
have on my children

Accupunture worked for my 1 and two year old children for ailments
after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody
else here.

See if you can replace it with a thermal acting unit. They have a
rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a
huge irritant to human digestion and usually results in calcium
deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of
nutrition.

The medical doctors will play the time game and probably just let him
die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat
typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop
but so is insulin for a diabetic. I have stopped taking mine and it
wasn't that bad but after months of regressing I chose to return like
the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky
movements to them.

Make up your mind before you mouth off like the usual Internet piece
of shit. This is a rough group and if you had followed the usual
recommendations you would have known that and have nothing to say
about it.
in misc.kids.health, alt.support.breast-implant,
misc.health.alternative ##

Bad practice to ground yourself when working on electronics. It
increases the chance of injury or death by electrical shock and also
increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?

Polar orbit is what a lot of spy sats use. Also Vandenberg in California
has launch gantries just like KSC.

Isn't there a 2-way, low power TV, ethnic FM radio site straight up from
where you live? Fremont Pk.

Satellite sucks. The only reason to get that is the lack of anything
else. It slows down when it's cloudy and switch over to dialup when it
